The sum required to be set aside as the initial fund of a new branch is fixed at a minimum of \$50,000, and this must be obtained from the shareholders' surplus or from the policyholders' surplus. Only a few of the Canadian companies have any considerable amount of surplus standing to the credit of the shareholders, so that a number of them would certainly experience difficulty in obtaining the necessary sum from the shareholders' fund unless they resort to a call for new subscriptions. On the other hand, most of the companies hold large surpluses to the credit of the policyholders, but the bulk of such surplus is virtually a sinking fund, which must be reserved to pay dividends on the quinquennial and deferred dividend policies when the dividend periods mature, and is, therefore, not available to be transferred. Under the provisions of the amendment not more than 25 per cent. of the entirely free and unallotted surplus may be transferred, and only on condition that a share of the profits earned by the casualty branch is to be paid into the life branch, but no part of any losses incurred is to be charged against the life branch. It is probable that the stock companies will be reluctant in any event to call upon their policyholders to invest part of their surplus fund in the establishment of a new branch.

#### The Initial Fund

The fact, already mentioned, that a number of companies might find some inconvenience in putting up the initial fund of \$50,000, leads to the inquiry whether, in certain cases, a smaller initial fund would be sufficient. I do not wish to review the arguments pro and con on this point, but in passing will simply cite one example. Take the case of the younger Canadian life companies. Those who have built up a permanent agency force, who have a substantial volume of assurances on their books, and who find it necessary to follow the lead of the large companies and issue health and accident contracts in conjunction with their life policies. The initial fund which they must put up is the same as is required of the largest companies, although, of course, the amount of health and accident contracts issued by the larger companies is bound to be in some cases ten and in other cases as much as twenty times greater.

Looking at the same case from another angle, the comparatively small but well-organized life company puts up the same amount for its new accident branch as is required in the case of a brand new accident company setting up to write sickness, accident and employers' liability insurance, and faced with heavy organization expenses and all the difficulties which beset the path of a new company.

## CONSIDER BORROWING POWERS OF LOAN COMPANIES

Subject Under Discussion in Dominion and Provincial Fields  
—Income Tax Forms Now Prepared

(Special to *The Monetary Times*.)

Ottawa, January 27, 1921.

**T**HERE has been no decision as yet as to whether there will be any amendments to the Loan Companies Act during the coming session of the Federal parliament. Just as an effort is being made by certain loan companies to have amendments made in the Ontario Legislature to the Loan and Trust Corporations Act by which such companies would have extended powers of borrowing by taking deposits, similar representations have been made to the Dominion Government to have the Loan Companies Act amended in like manner.

Since the war, with the resultant adverse rates of exchange, Great Britain has been shut off from Canadian loan companies as a source of borrowed money available for mortgages on excellent security. Some of the companies—not all—report that they are unable to get sufficient funds to meet the demands of those able to offer the best of security on mortgages. These companies have, therefore, been representing, both in the Federal and provincial arena, that the present limits on borrowing by taking deposits can be extended without impairing the security of debenture holders or depositors, "provided there is careful inspection by the government of the assets of loan companies and the maintenance of a reasonable proportion of liquid assets." By legislation last session it was provided that loan and trust companies with Dominion incorporation should be inspected by the Superintendent of Insurance with the same care as insurance companies have been hitherto, and arrangements for inspecting their 1920 business are now well under way. Canadian banks cannot loan money on real estate mortgages as United States banks do, and so it is urged that the loan companies should be given wider powers in that respect.

### Effect on Bank Deposits

Although your correspondent has been informed that "no decision has been arrived at with respect to these proposals," the question of the powers of the loan and trust companies has received considerable attention ever since the supply of money from the British Isles was cut off. No formal request for legislation has been made by the companies, but representations have been made, and a more formal presentation of their case would not be unexpected. Banks have not been allowed to lend money on mortgages in Canada in order that their funds would be more quickly realizable, and more readily available for carrying on the current business of the country with its fluctuating needs. In order to keep the deposits in the banks as high a figure as possible in keeping with this policy, any extending of the powers of taking deposits of loan and trust companies will be made with extreme care if at all. The opposition to any extension of powers, as suggested, by some of the large companies will also weigh against throwing the gates too wide open.

Income tax forms are now going out from Ottawa. Forms on which salaries and wages of employees and dividends to shareholders are shown as well as those for companies and individuals are being sent to inspectors of taxation in the various districts for distribution. By February 8, they should be available in all parts of Canada. The forms giving information with respect to wages and salaries of employees and dividends to shareholders must be returned to the inspectors of taxation in each local district by March 31, and the income tax forms from companies and individuals must be returned by April 30 to the same inspectors, along with a cheque for at least one-quarter of the amount of the tax, the rest to be payable in bi-monthly instalments, with interest at 6 per cent. The whole amount of the tax can be put in the cheque, and interest thus saved. If anyone liable to this tax does not receive a form the onus is on him to get it.

## LETTER TO THE EDITOR

### FIRE INSURANCE COSTS AND COMMISSIONS

Sir,—In your issue of the 14th instant you say, "The responsibility for conducting the fire insurance business on a sound and economical basis rests first of all upon the companies, not upon the government, and it strikes the outsider unfavorably when he sees that more is paid out in acquiring business than in meeting claims, as is quite commonly found in the case of individual companies." I suppose that is true if you pick a company here and there, and now and again, but even so it is misleading. In the address by Mr. G. D. Finlayson, Superintendent of Insurance for Canada, before the Montreal Fire Insurance Brokers, 16 December last, he says: "The record of fire insurance in Canada is fairly complete for a period of fifty-one years, from 1869 to 1919. The following figures give in summary form the experience of the companies during this period:—

Losses (incurred) .....	\$327,676,803
Expense (incurred) .....	\$176,863,919

The premiums earned during this period he says were \$535,111,024, so that the loss ratio in round numbers was 61.5, and the expense ratio or acquisition cost 33.5. Do you think there is anything in these figures, Mr. Editor, to justify you in thinking that the business is not conducted on "a sound and economical basis?"

Insurance Agent.

### BIG DISTRIBUTION OF SAFETY LITERATURE

During 1920 the Ontario Safety League issued and distributed thousands of bulletins, cards, notices, etc., which have been sent all over the province. The distribution includes 275,000 safety bulletins to industries, electric railways, etc., 115,000 school safety bulletins, 225,000 gummed stickers, 150,000 letters to parents, 240,000 pay envelope slips, 120,000 window cards and many thousands of smaller pieces of safety literature and cards.

There were two outstanding features in connection with the work of the League in 1920: First, the three-day Safety Convention in Toronto last April, when representatives from Ontario, Manitoba, Quebec and Nova Scotia were present to hear papers on important phases of accident prevention in the industries; and second, the drive against accidents in general in the spectacular "Safety Week" campaign in October. "Safety Week" was observed in fifteen cities throughout Ontario and was productive of wonderful results.

The Executive Committee of the Ontario Safety League has plans for an extension of the work of the League in the industries, in the schools and among the pupils generally. The seventh annual meeting of the League will be held early in 1921.

## Index for Volume 65 Ready

*The Monetary Times* index for the half-year ending December 31st, 1920, is now ready for distribution. Subscribers desiring this index will be furnished a copy upon request.

## MUNICIPAL TAXES IN MANITOBA, \$16,078,985

Averages \$29 Per Head of Population—Western Financial Institutions Thriving—Alberta Flour Mills Financing

(Staff Correspondence)

Winnipeg, January 27, 1921.

**M**ANY of the western financial and insurance companies are holding their annual meetings this week and next, and in all cases excellent reports are being presented. The life companies have made considerable progress, and the volume of insurance in force is growing to very large proportions. The Great West Life now have business in force totalling \$256,850,251, while the Monarch Life report insurance in force of \$25,000,000.

Business in Winnipeg continues to make steady progress, and collections are reported to be improving. Local bond houses report an active demand for securities with very little offering.

## Alberta Flour Mills Issue

The Alberta Flour Mills of Calgary are actively pushing the sale of their stock in Winnipeg and throughout Manitoba. This milling company has a splendid board of directors behind it, and the success of the enterprise seems assured. There is no promotion stock, and every dollar that is raised is being put into the erection of this large mill which will have a capacity of eight thousand barrels per day. Col. J. S. Dennis, Chief Commissioner of Colonization and Development for the Canadian Pacific Railway, is one of the directors of the enterprise, and is quite confident of its success. While in Winnipeg a few days ago he had this to say about it:—

"We determined to secure the money for this mill in the west, and we decided that we would proceed with the erection as we secured the funds. It was our wish and still is, that all the common stock should be owned in the west, and that the control of the property should be in the west. We have adhered to this policy and will continue to do so. We could have made more rapid progress if we had had all the money we needed at the beginning, but we are satisfied with what has been done. There is good prospect that the mill will be finished and equipped this year. We are now out to get the balance of the needed money, and there is no doubt that Western Canada will provide it for this great enterprise."

Col. Dennis said that having been in the company from the start, he intended to remain in it and give every assistance to the enterprise. With reference to power to operate the mill, he said that this would be bought from the city of Calgary, and the cost of power would be smaller than it was in Medicine Hat, where natural gas was used. With reference to the placing of the bonds, Col. Dennis stated that he had taken this matter up with the National City Co. in New York, and had received assurance that when the details in the west had been completed there would be no difficulty about the bonds. The proposal is to place common stock to the amount of \$2,500,000, and to sell bonds to a similar amount. There are two mills operating at the present time in Calgary, a Robin Hood and a Western Canada plant, and both of these have had very satisfactory earnings. These are considerably smaller plants than the new mill will be.

## Manitoba Telephones Deficit

The Manitoba Government Telephones show a deficit for the past year of \$390,000. This is due to some extent to the change from the manual to the automatic system, but more particularly to the increase in wages and cost of materials. The former have increased 110 per cent. since 1914, and the latter 160 per cent. It is stated that this deficit in operating expenses will be met by surpluses of other years and by the depreciation fund.

W. H. Cross has been elected vice-president of the Home Investment Co., taking the place of P. C. McIntyre,

who recently died. Another new member of the board of this company is Geo. W. Allan, K.C.

Taxes imposed in Manitoba for running municipal governments was \$16,078,985, according to statistical information compiled by the Department of the Municipal Commissioner, E. M. Wood. The total population of Manitoba today is 541,466. This means that every man, woman and child in the province is assessed a tax of \$29 annually for municipal purposes.

## STANDARD TRUSTS BUSINESS INCREASED

Notwithstanding a substantial increase in business, the profits of the Standard Trusts Co., Winnipeg, were lower for 1920, being \$101,822, as compared with \$111,004 in 1919. The increased cost of administration and general expenses were, no doubt, the reason for this, as the same tendency has been apparent in other trust companies' reports. A substantial balance was brought forward from the previous year, however, so that the balance for distribution was \$128,468, as compared with \$116,645. The usual dividend of 9 per cent. was paid to shareholders and a balance of \$38,468 was carried forward.

The Standard Trusts Co. is one of the most important trust companies operating in the west. According to the latest statement estates under administration amount to \$12,244,615, while clients funds held in trust total \$1,159,964. The company is also trustee for bond issues amounting to \$10,000,000. Total assets are now \$16,438,282, as compared with \$16,196,331 at the end of 1919.

## NORTH AMERICAN LIFE CONTINUES SUCCESSFUL CAREER

The North American Life Assurance Co., which established a firm foundation long since, continued its career of success in the Canadian life underwriting field in 1920. Business issued and revived in 1920, amounting to \$24,363,971, was over \$2,150,000 in excess of the previous year, and brings the total business in force to \$99,600,473, the highest mark yet reached in the history of the company. Some conception of the scope of the company's business is to be found in the fact that during the past year there was paid to policyholders and beneficiaries over \$2,163,000. This amount included \$424,948 paid as dividends, while in contrast to this it is noted that only \$6,000 was paid to guarantors. The death losses incurred during the year amounted to \$650,995, being somewhat less in amount than for the previous year. The president, L. Goldman, in his address to the policyholders at the recent annual meeting made the announcement that the same scale of dividends will be continued to policyholders in 1921. Of the total liabilities, policy reserves now amount to \$16,793,929, and in addition there is a net surplus of \$2,609,827.

The success which has attended the efforts of the company is readily apparent from the following figures:—

	1920.	1911.
Net premium income . . . . .	\$ 3,378,602	\$ 1,653,832
New business . . . . .	24,363,971	6,129,426
Total assets . . . . .	20,041,882	12,313,107
Insurance in force . . . . .	99,600,473	45,849,545

J. B. McKechnie, general manager of the Manufacturers Life Insurance Co., in an address before the Young Men's Club of the Toronto Board of Trade on January 24, compared life insurance with fire insurance, and pointed out that fire insurance maintains a uniform risk, whereas a hazard in life insurance increases with the age of the policyholder. He stated that there had never been a failure of a life insurance company in Canada as regards policyholders. Life insurance companies had to pay out twenty million dollars in claims resulting from the war and thirteen million dollars owing to influenza.

## THE SCOPE OF INSURANCE COMPANIES

PROVISION for the writing of fire and casualty business by life insurance companies, and *vice versa*, is the object of an amendment to the insurance laws of Canada, proposed by G. D. Finlayson, superintendent of insurance. The draft amendment was fully described and discussed on January 26 by H. R. Stephenson, general manager of the Crown Life Insurance Company, before the Insurance Institute of Toronto. The proposal has been only slightly discussed, and some managers are scarcely aware of it. Yet such a measure would be far-reaching in its potentialities, though it is not supposed that it would immediately lead to many new departures.

The situation is complicated by reason of the already intricate system of control of the insurance business in Canada. The maintenance of separate funds for the different lines of business, and the allocations of the surplus over liabilities to policyholders, are two of the questions which must be considered. Then again there is its relative effect on Canadian, British and foreign companies respectively, and on the other hand its possible effect on the ability of Canadian companies to secure licenses in other countries. The fullest consideration and discussion should therefore be given to such a measure before it reaches parliament, so that the insurance companies may appreciate its importance to them.

It is understood that the superintendent and not the companies has initiated the proposal, having in mind a possible reduction in the cost of writing business. With such a motive therefore the superintendent represents the public, and the companies will gladly concur in any measure which holds forth a reasonable prospect of attaining this end. Whether a reduction in costs would be achieved by the amendment, or whether the same purpose could be attained indirectly by making possible greater strength and reduction of overhead expenses, is still to be determined. Tinkering with the Insurance Act, especially the erection of still more

complications, is not desirable, as it adds to the difficulties of management and also to the feeling of dissatisfaction which is such a prominent feature of public opinion at the present day.

## BANKING RESULTS IN SCOTLAND

IN view of the similarity between the Canadian and Scottish banking systems, reports of Scotland's banking practice are always received with interest here. The Commercial Bank of Scotland, one of the important banking institutions in the British Isles, has just issued its annual report for the year ended October 31, 1920, showing a position which may be taken as fairly representative of the banking situation overseas. During the past two years, the Commercial Bank of Scotland has made good progress, total assets increasing from £37,805,283 at the end of October, 1918, to £51,241,596 at the end of October this year. Paid-up capital has increased from £1,000,000 to £1,750,000, while reserves have advanced £250,000 to £1,000,000 in the period mentioned.

Deposits show a large growth, now being £41,096,567, as compared with £30,698,529 in 1918. Notes in circulation have increased from £3,307,838 to £1,350,944. Under loans, the following comparisons are shown: Money in London at call and short notice, £3,430,347 in 1918, and £5,332,423 for 1920; loans on securities, £703,958 in 1918 and £1,340,586 for 1920; bills discounted, including British government treasury bills, £11,268,826 in 1918 and £6,465,766 for 1920; advances on accounts, £4,089,476 and £13,775,353 for 1920.

The Commercial Bank of Scotland has now 195 branches throughout Scotland, as compared with 174 two years ago. It also has a branch at London, Eng., and has numerous correspondents throughout the British Isles, colonies and foreign countries. The Canadian correspondent of the institution is the Imperial Bank of Canada.

The National Bank of Scotland, another of the more important Scottish banking institutions, has issued its an-

nual statement covering the twelve months ended October 31, 1920, showing a healthy progress. Over a period of two years, total assets have grown from £37,131,051 to £41,042,667. Paid-up capital has increased from £1,000,000 to £1,100,000, while the reserve fund has been advanced by the sum of £100,000 to £1,000,000. Deposits now stand at approximately £37,000,000, as against £30,594,495 at the end of October, 1918, while note circulation has increased from £3,167,677 to £3,798,877.

Cash assets have advanced to the sum of £6,028,528 from £4,095,276. A comparison of the loans accounts shows the following results: Loans on call in London, £6,208,468 for 1920, and £5,355,690 for 1918; British government securities, £11,212,427 for 1920, and £8,064,927 for 1918; bills discounted, £3,661,296 for 1920, and £9,044,845 for 1918; advances on accounts, £13,922,381 for 1920, and £6,671,152 for 1918. With regard to the bills discounted, the 1918 figure includes £7,823,500 British treasury bills.

#### THE REWARDS AND COSTS OF BUILDING

SOME building will, it is anticipated, be carried on in 1921. It is more than likely however, that public housing commissions which in 1919 and 1920 failed to make any showing in the face of adverse conditions, will retire from the field. Much public money has been risked for this purpose, and some of it may be lost. Until such time as building costs come down, however, there is little chance of a drop in the value of property. Labor costs show no decline as yet, and while materials are lower, the decrease is a very small fraction of the total cost. The present level of rents and values can scarcely be cut until the reduction in costs is sufficient to place upon the market new structures at a lower price.

That the increase in rentals during the past few years was low compared to the increase in costs and in prices generally, is shown by the results of an investigation made in Winnipeg, and shown on page 29 of this issue. Rents in Winnipeg in October, 1920, averaged 35 per cent. higher than at the beginning of 1914, while foodstuffs were 110 per cent., and building materials 180 per cent., higher. The general impression is that the increase in rentals has been more than this, but this is due to the fact that in 1914 they decreased about 40 per cent., so that they practically doubled between the end of 1914 and the end of 1920. Foodstuffs and building materials, on the other hand, commenced to go up in price throughout 1914. It is apparent therefore that a large part of the excessive increase in building materials must be wiped out before new houses can profitably be placed upon the market.

The relation between rentals and realty values is direct. A return of 10 per cent. is commonly recognized as suitable, after paying taxes, this being interest plus depreciation. The high rates of interest prevailing during the past two or three years has possibly raised this a little. The comparison of net income with investment is a mental operation which is performed consciously or unconsciously by every careful buyer.

#### SPECULATION AND FAILURES

LET a business man take a hundred dollar flier in the market just for fun of the thing, and the world begins at once to check up on him. If he has notes at the bank the president calls him into the back room and tells him all about it. The mercantile agencies begin to report him as 'suspicious' and representatives of his creditors drop in to look the ground over. No matter how shrewd he may be, once it is known he is speculating he is looked upon as unsafe. And yet a recent table of business failures put out by Bradstreet shows that speculation accounts for only .7 per cent. of the total failures of business men in the United

States. On the other hand 'incompetence' is responsible for 38 per cent. of the failures."

In some comments on this comparison of speculation with other causes of failure, *Our Paper*, published by the Grain Dealers' Fire Insurance Co., says: "This is not an argument for speculation. We merely desire to call attention to a condition in our business life that receives too little attention. We often say that a business lacks system, doesn't know how to advertise, has poor equipment, or runs with second grade help, but we seldom say when we meet these things that the proprietor is incompetent, and yet this is the classification he should draw. When 38 per cent. of business men go under because they don't know how to run their establishments, it is time that we ceased worrying so much about the speculator and gave more heed to competence in business. We are interested in this subject because we know that incompetence has a direct bearing on burning ratio of the risks we insure. A well equipped systematized office nine times out of ten is connected with a well kept, carefully handled elevator. On the other hand a disorderly office generally means a disorderly elevator. A well kept elevator may sometimes burn while the disorderly house across the way will have to be torn down, but given a hundred elevators of each class and the disorderly houses will show much heavier loss ratio. This is the reason why we are so much in favor of better business practices, better equipped offices, more system. They mean a lower loss ratio and consequently a lower insurance cost."

What solution has Manitoba, which so strongly opposed the increase in railway rates, to offer for its \$390,000 public telephone deficit?

\* \* \* \* \*

The cold weather makes it unnecessary for the Ice Board to commence operations. This board, according to reports, was being organized to stabilize the temperature, and thereby save the ice industry from melting away.

\* \* \* \* \*

The immediate oversubscription of Ontario's \$10,000,000 loan, at a margin of one and a half per cent. profit to the underwriters, illustrates the strength of the Canadian bond market at present. In view of this condition might not the province have secured a better price than a 6.28 per cent. basis?

\* \* \* \* \*

Now that Victory bonds are near par again, it would be interesting to know who was the lucky party that bought some at 89 on November 29th.

\* \* \* \* \*

The old-established custom of "hazing" the new bank junior is still observed. The head office of the Canadian Bank of Commerce recently received the following document, presumably sent in by a faithful aspirant:—

"To Whom it May Concern:

"I hereby certify, vow and declare that to the best of my ability I have faithfully carried out the reminders and instructions demanded of me by the lawful officers of the Canadian Bank of Commerce, and Mr. .... in particular.

"And I do hereby swear that said above instructions, i.e., the winding of the combinations on the outer door of the vault—twenty turns to the left, and forty-nine similar turns to the right, all done in a conscientious and commendable manner,—were not unheeded by me, but that I did so truly and faithfully carry out above said instructions, as given me by Mr. ...., a duly appointed officer of the Canadian Bank of Commerce.

"To this I swear, so help me God.

"....."

"Second Junior and Runner,  
"Dated at ....., July 20, A.D. 1920."

## PERSONAL NOTES

A. N. McTAVISH, who has been with the Insurance Department, Ottawa, for some years past, succeeds M. P. Langstaff as actuary of the Dominion Life Assurance Company.

JOHN WEIR BROWN, superintendent of the Royal Exchange Assurance Company at the head office for Canada,

Montreal, has been appointed to the position of assistant manager for Canada. This is a new position and has been created consequent on the growth of the company's business in the Dominion, under the management of Arthur Barry. Mr. Brown has been connected with the business of fire insurance for past twenty-five years. He commenced his insurance career with the old Phoenix of London, serving that company for eighteen years, during which period he

was its branch manager at Winnipeg, he afterwards joined the Royal Exchange, in which institution he has now attained an important position.

JOSEPH F. STEWART, of Stewart, McNair, Reid and Company, investment brokers, Toronto, has been elected a member of the Toronto Stock Exchange and will represent his company on the floor. The above firm is the result of the broadening policy of the original company of J. F. Stewart and Company. G. K. McNair has been associated with Mr. Stewart since the inception of the company. Duncan C. Reid was just admitted to partnership recently. Mr. Reid has had wide experience in financial affairs both in Toronto and Montreal having been with the Union Bank of Canada for some four-

teen years. He is a fellow of the Canadian Bankers' Association.

GEORGE BURDITT, who for the past five years has been in the service of the Continental Life Insurance Company as manager for Manitoba, with office at Winnipeg, has been appointed to a more important position in Toronto, in connection with the business in Ontario. J. H. Woodhead has been appointed to succeed Mr. Burditt.

SENATOR GEORGE LYNCH-STAUNTON, K.C., Hamilton, and A. W. MARQUIS, of Marquis and Pepler, St. Catharines, Ont., have been appointed to the directorate of the Imperial Trusts Company of Canada, Toronto.

LIEUT.-COL. EARNEST WIGLE, K.C., of Windsor, Ont., has been elected to the directorate of the Trusts and Guarantee Company, Limited, Toronto, to succeed the late Mathew Wilson, K.C., of Chatham, Ont.

ROY M. WOLVIN, president of the Dominion Steel Corporation has returned to Canada after an absence of more than a month in England. Mr. Wolvin had very little to say regarding the British Empire Steel Corporation. On the general situation he said: "I was very much pleased to find that there is a large amount of money in England available for investment, and I believe that as quickly as exchange approaches normal we will find a ready supply of British capital for Canada, and I am satisfied that Canada holds first place in the eyes of the British investor."

## OBITUARY

RT. HON. A. L. SIFTON, K.C., secretary of state for Canada, and conspicuous in the world's affairs for his attendance at the Peace Conference in Paris, died in Ottawa last week. He was educated in Wesley College, Winnipeg, and Victoria University, Cobourg, Ont., and practised law in the west for many years. He was a member of the old Northwest Assembly, and later of the Alberta Legislature. His entry into federal politics took place in 1917.

## BANK BRANCH NOTES

The following is a list of branches of Canadian banks which have been opened recently:—

Walkerville, Ont. (Main Walkerville)	Bank of Montreal
Toronto, Ont. (East Denforth)	Dominion Bank
East London, Ont.	Home Bank of Canada

H. A. Thomson, manager of the Molsons Bank at Port Arthur, has been transferred to Lachine, Que., and will be succeeded by E. F. Carre, of Lachine.

C. A. Bonnalie, manager at Fernie for the Canadian Bank of Commerce, has been transferred to Vancouver.

George Mair, who was manager of the Traders Bank of Canada since its opening for business at Windsor, Ont., in 1893, to its amalgamation with the Royal Bank of Canada in 1912, and since then manager of the latter bank, has retired. Chas. W. Morris, who was manager of the Royal Bank of Canada in Sudbury up to April last, and since then assistant manager at Windsor, has received the appointment as manager for Windsor.

J. C. Munro, for five years manager of the branch of the Canadian Bank of Commerce at Cayuga, but recently promoted to the position of an assistant inspector of the bank for Ontario, was tendered a banquet by his friends in Cayuga.

C. E. Brien, who for several years has been manager of the Royal Bank of Canada at Niagara Falls, Ont., has been transferred to Owen Sound and will be succeeded by C. A. R. Warren, of Hamilton.

The Sterling Bank announces the following: J. B. Thompson, who was manager at Newtonbrook, Ont., has been transferred to Minesing, Ont., as manager. H. E. Laverty, who was at head office for a short time has been appointed acting-manager at Newtonbrook. H. P. Hayes has taken over the management of Mille Roches, Ont., branch. C. F. Perkin, who was acting-manager there has returned to Cornwall to his position as accountant. L. B. Lett has been appointed acting-manager at Queensville, Ont.

The branch of the Royal Bank of Canada at 21 King St. West, Hamilton, was damaged by fire.

## THE STERLING BANK OF CANADA

Besides being equipped to handle foreign exchange speedily and intelligently, our Foreign Department gives a *personal* attention to each client.

## WHAT THE FORESTS MEAN TO CANADA

Latest Developments Show Increased Command of Foreign Markets, But Suggest Need for Conservation

**F**OREST products are an item of increasing importance in the external trade in Canada. Government returns covering the twelve months ending August, 1920, place the value of all domestic products exported at \$1,219,523,896. As was pointed out in the Canadian Bank of Commerce Commercial Letter recently, \$267,480,144, or nearly 22 per cent., represents the exports of wood, pulp and paper, chiefly to the United States. The volume exported has increased steadily for several years. During the twelve months in point, exports of wood pulp have increased by nearly 8,000,000 cwt., or 80 per cent., and of printing paper by 2,000,000 cwt., or 15 per cent. This market, so far from contracting, shows every promise of assuming greater and greater proportions and would seem to be limited only by the extent to which Canadian forest resources can be tapped without endangering the future supply.

## Limits to Exploitation

Dominion and provincial authorities throughout Canada, while drawing attention to the vast wealth latent in our forests, have at the same time issued warning notes as to the economic limits of forest exploitation, in view of the large percentage of natural as well as avoidable wastage and the impossibility of estimating with any degree of accuracy the annual increment in growth. The total wastage of timber every year from fire, decay, windfalls and floods is estimated at nearly 2,500,000,000 cubic feet, which is approximately 5 per cent. of the standing merchantable saw-timber in Canada. The annual pre-war cut of saw-timber was 900,000,000 cubic feet, and of pulpwood over 200,000,000 cubic feet. The processes of felling, transporting and milling reduce the output to about 40 per cent. of the cut in the case of saw-timber and 80 per cent. in the case of pulpwood. The average volume exported annually during the immediate pre-war period was the amount derived from a cut of 350,000,000 cubic feet of saw-timber and 100,000,000 cubic feet of pulpwood, or 39 per cent. and 50 per cent. of the respective total cuts. This does not include the large quantity of pulpwood manufactured in Canada into pulp or paper and exported in these two forms. The proportion between the output of saw-timber and that of pulpwood has considerably altered during the last decade. The Dominion Forestry Branch describes the situation as follows:—

"The consumption of timber for lumber manufacture has decreased since 1912 and is still decreasing. The estimate of the total supply is based on inaccurate and incomplete data; the maintenance of the supply depends on the unknown increment rate and the very uncertain factor of loss through forest fires. It is probable that the consumption will continue to decrease in the future as the source of supply moves back farther from the lines of transportation each year. The cost of lumber in Canada will probably increase until it becomes profitable to plant potential forest land with commercial species, and to pay for efficient protection and management of the remaining forests. In the case of pulpwood the utilization is increasing rapidly as supplies are being exhausted in the United States. The United States is Canada's chief customer for unmanufactured pulpwood, wood-pulp and paper, and with the increasing consumption of newsprint and other papers brought about by increased advertising, it would appear that Canada's supply would be exhausted long before the four hundred years obtained by an arithmetical calculation.

## Higher Prices Mean Greater Care

"As long as forest products are comparatively cheap, as they are in Canada at the present time, no extraordinary care will be taken to protect and develop them. As the price of these products increases, it will become more and more profitable to do so. The immediate steps necessary are connected with protection from fire, insects, and fungus diseases, and careless or destructive utilization. The regulation of cutting, with a view to natural regeneration, is a more valuable means of re-establishing forest areas in a new country like Canada than any expensive system of replanting."

## LANDED BANKING AND LOAN COMPANY

An all-round increase in business, together with an advance in earnings, are shown in the annual statement of the Landed Banking and Loan Co., Hamilton, Ont. Loans on mortgages at the end of 1920 stood at \$2,967,025, compared with \$2,811,518 at the end of the previous year. Loans on stocks and bonds are given as \$139,677, as against \$103,896. Holdings of securities, including Dominion government bonds are nearly \$20,000 higher, at \$477,780. The cash account is the only one to show a reduction.

Sterling and currency debentures outstanding have been reduced by \$18,550 to \$693,875. Savings deposits have increased from \$949,882 to \$1,015,277. Out of the earnings for the year of \$245,139, the regular 8 per cent dividend was paid, and \$40,000 was added to reserve, which account is now within \$35,000 of the paid-up capital of \$1,000,000.

## CENTRAL CANADA LOAN AND SAVINGS COMPANY

The report of the Central Canada Loan and Savings Co., presented at the annual meeting on January 18, shows net profits for the year, after deducting charges of management, interest on debentures and deposits, etc., of \$212,348, as compared with \$210,822 previously. Added to this was the balance brought forward from 1919 of \$124,202, making a total for distribution of \$336,551. The usual 10 per cent. dividend was paid, and a special bonus of 3 per cent. from profits earned prior to January, 1917, leaving a balance to be carried forward of \$103,470 after donations to charitable and other funds. The reserve fund, which now stands at the same amount as the paid-up capital, viz., \$1,750,000, was not increased.

The president, E. R. Wood, confined his remarks to subjects directly affecting the shareholders. He pointed out that the assets of the company stand in its books at prices well within their present market value. Deposits show a large increase for the year, the total as at December 31 amounting to \$2,194,835.93, as against \$1,824,318.55 on December 31, 1919, an increase of 20.31 per cent.

## DOMINION BANK'S JUBILEE YEAR

Fifty years of business have now been completed by the Dominion Bank. Its growth during this period is shown by the following figures:—

	1920.	1911.	1900.	1872.
Capital paid-up.	\$6,000,000	\$4,702,799	\$1,500,000	\$834,544
Rest . . . . .	7,000,000	5,702,799	1,500,000	50,000
Total deposits.	104,941,256	53,547,865	15,790,401	1,057,150
Loans and dis-				
counts . . . . .	79,526,480	40,492,726	12,710,912	2,104,033
Net profits . . . . .	1,347,011	70,045	214,342	107,488
Total assets . . . . .	139,263,093	70,179,552	20,824,147	2,541,583

Nineteen-twenty was the bank's jubilee year, and was an eventful one. An increase in profits from \$1,256,053 in 1919 to \$1,347,011 is indicative of the business prosperity of the earlier part of last year, but the balance sheet has marks of the readjustment which took place in the latter part. Deposits have decreased from \$111,414,057 at the end of 1919 to \$104,014,256, as a result of the reduction in deposits not bearing interest, which represent largely the balances of the commercial and other institutions. Savings deposits, however, show an increase of more than \$10,000,000. Loans show no significant changes, as compared with 1919.

Despite reductions in some accounts, the bank's position has been substantially strengthened. Liquid assets show a ratio to liabilities to the public of more than 27%, as compared with less than 25% in 1919. Immediately available assets are almost 51½% of the liabilities to the public.

## THE TRADE OUTLOOK

Some improvement in business is reported by mercantile houses, but little hope of an appreciable recovery until spring is found. The excessive number of failures taking place indicates how apathy on the part of the buying public is affecting the retail trade. During the week ended January 21 there were 71 failures in Canada, compared to 20 during the corresponding week last year. The decline in wholesale prices has only slightly affected retail prices, whereas substantial reductions will be necessary to attract purchasers.

Bradstreet's report that dry goods are moving more freely, clothing is still slow, although the situation is now more favorable than it was two months ago. "Manufacturing operations are also showing greater life, especially at many of the larger factories. Financial difficulties are holding back others, however. Boots and shoes are selling on a better scale than before the holidays. Rather significant at this time is the statement of the manager of a large retail store in Toronto who says that, not only is business good, but the people are showing a strong desire for quality goods. In fact, it is claimed that if they cannot get what they want in the way of good materials, they will not buy, rather than take anything inferior. In the iron and steel markets conditions are regarded as favorable, and all comments are optimistic. The leather business is brighter, and dealers say that there is a better demand coming for standard lines of sole leather. Groceries are moving steadily, and the sugar market is now on a stable basis, with wholesale prices to the retailers at \$10.71 per 100-pound bag. Hardware is in moderate demand, with many price revisions downward."

Reporting from Montreal, Dun and Co. say: "General business conditions have not undergone any very material change since last writing. Some manufacturing interests are slow in showing improvements, but wholesalers as a rule note a gradually improving demand. The volume of dry goods orders being received from travellers is encouraging. A number of large buyers from points as far west as Vancouver and as far east as Halifax have been in the market this week, and, while more careful than ordinary in making their selections, the aggregate of their purchases is nevertheless fair. The spell of Arctic weather has been helpful to retail sales of seasonable heavy wear."

The Trade Bulletin, Montreal, reports that payments have been a little slow since the first of the year, a larger portion of mercantile paper falling due since the beginning of the year not being met at maturity, but most of it was renewed, a portion by part payment. The outlook, however, on the whole, is encouraging, as there are signs of improving trade in the near future. In most departments of the wholesale trade there is an increase in the volume of business, although not nearly up to that usually experienced at this period of the year. In wholesale dry goods, orders are coming in from travellers, consisting of sorting as well as spring goods, but the latter are below those of a year ago, as it is asserted that many intending purchasers are postponing orders, anticipating a further decline in values. In any event orders are not coming in as well as expected.

## CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended January 21, 1921, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	S. S.	A. B.	P. E. I.	Total.	1920.
Jan. 21	15	35	6	3	5	1	4	2	0	71	20
Jan. 14	13	23	4	1	3	0	0	0	0	44	14
Jan. 7	15	14	3	2	3	1	2	1	0	40	11
Dec. 31	16	7	2	1	3	3	4	0	0	36	18

## EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—			
	Buyers.	Sellers.	Counter.
N.Y. funds	11½ pm	11¾ pm	.....
Mont. funds	Par	Par	.....
Sterling—			.....
Demand	\$4.2750	\$4.2850	.....
Cable transfers	4.2850	4.2950	.....
Bank of England rate,	7 per cent.		

## RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first three weeks in January:—

Canadian Pacific Railway.			
	1921.	1920.	Inc. or dec.
January 7	\$3,303,000	\$3,171,000	+ \$ 132,000
January 14	3,276,000	3,331,000	+ 55,000
January 21	3,196,000	2,837,000	+ 359,000
Canadian National Railway.			
January 7	\$1,814,057	\$1,642,208	+ \$ 171,849
January 14	2,168,969	1,864,220	+ 304,749
January 21	1,996,701	1,599,643	+ 397,058
Grand Trunk Railway.			
January 7	\$1,958,441	\$1,568,805	+ \$ 389,636
January 14	2,088,691	1,682,809	+ 405,882
January 21	1,907,473	1,567,103	+ 340,370

## WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended January 27, 1921, compared with the corresponding week last year:—

	Week ended		Changes.
	Jan. 27, '21.	Jan. 29, '20.	
Montreal	\$101,621,678	\$129,845,123	— \$28,223,445

## THE TORONTO GENERAL TRUSTS CORPORATION

NOTICE IS HEREBY GIVEN that the Annual General Meeting of the Shareholders of The Toronto General Trusts Corporation will be held at the Head Office of the Corporation, at the corner of Bay and Melinda Streets, in the City of Toronto, on Wednesday, the 2nd day of February, 1921, at 12 o'clock noon, to receive and consider the Annual Report and Financial Statements of the Corporation for the year ended 31st December, 1920, to pass and confirm by-laws, to consider amendments to existing by-laws, and to elect Directors for the ensuing year, as well as for the transaction of such other business as may be brought before the Shareholders.

By Order of the Board of Directors.

A. D. LANGMUIR,

General Manager

# Prices Changing With Phenomenal Rapidity

Speed of Fall Exceeds Rate of Increase in War Years—Farm Products, Leather and Textiles are Leading—May, 1920, was High Record, with Steady Decline Since—Average now Back at Level of June, 1919—Comparison of Movement by Groups of Commodities

SINCE May, 1919, wholesale prices in Canada have been steadily falling, and it is now certain that the movement is a permanent one. As measured by the index number of the Department of Labor, Ottawa, which is based on an average of 100 for the ten-year period 1890-1899, wholesale prices in recent years have been as follows:—

1913, December	137.1
1914, "	137.6
1915, "	162.2
1916, "	207.5
1917, "	257.1
1918, "	288.8
1919, "	322.7
1920, May (maximum)	356.6
1920, December	290.5

The changes by groups of commodities, between December, 1913, and December, 1919, and again between the latter date and December, 1920, are shown in the following table:—

	1913.	1919.	1920.
Grains and fodders	141.0	344.4	261.1
Animals and meats	188.4	326.4	320.8
Dairy products	166.9	355.2	340.0
Fish	157.2	242.4	236.5
Fruits and vegetables	130.8	286.6	226.1
Misc. groceries and provisions	111.9	267.3	256.3
Textiles	136.6	399.7	328.6
Hides, leather, boots and shoes	166.2	377.8	231.8
Metals and implements	113.3	224.7	230.4
Fuel and lighting	114.4	247.6	317.6
Building materials	141.6	338.7	356.5
House furnishings	128.1	352.8	390.2
Drugs and chemicals	111.5	214.4	228.1
Miscellaneous	148.7	576.7	277.5

All commodities 137.1 322.7 290.5

The movement in detail by months since the beginning of 1919 is illustrated by the accompanying charts.

Another index number, compiled by Professor H. Michell, of McMaster University, Toronto, gives the following results:—

Index Number of 10 Commodities

	1914.	1918.	1919.	1920.
January	120.9	225.7	231.3	280.8
February	120.4	236.7	222.7	281.2
March	119.9	237.6	223.2	287.6
April	119.3	239.6	227.3	295.2
May	119.3	244.4	232.6	298.3
June	118.8	250.4	238.3	296.9
July	120.	248.3	250.8	292.9
August	122.9	251.5	262.7	274.4
September	126.1	252.	250.7	254.5
October	122.8	245.5	250.	242.1
November	122.7	246.8	251.1	233.1
December	123.7	245.6	259.2	221.6

Average price, 1900-1909, 100.

Professor Michell's index number is based on the prices ruling at the end of the month in the Toronto markets of forty commodities, twenty foodstuffs and twenty manufacturers' goods. The twenty foodstuffs are made up of flour, beef, mutton, pork, bacon, lard, whitefish, butter, cheese, sugar, rice, tea, coffee, potatoes, beans, canned tomatoes, canned peas, oatmeal, eggs and tapioca. In the list of manufacturers' goods are included rubber, wool, cotton, hides, leather, iron, galvanized sheets, steel, silver, lead, copper, tin, zinc, cement, paints, coal oil, pine, oak,

maple and newsprint paper. This list is constructed with a view of including those commodities which are in most general use in the community. The price of each food ruling at the end of every month is calculated as a percentage of the average price of the same commodity during the decade 1900 to 1909, and the total of all these percentages is then divided by forty to give the average of all the indices.

### Decline Has Been Sharp

Writing recently in the *Toronto Globe* on prices, Professor Michell said:—"The year 1920 will be memorable for having seen the long-expected drop in prices after the great rise during and after the European war. An index number based on forty commodities, twenty foodstuffs and twenty manufacturer's goods, the average price during the period

1900 to 1909 of these goods being reckoned as 100, reached its peak in May, standing at 298.3. The subsequent recession has been sharp, and for a similar drop we must go back to the year 1865, when prices dropped 26 per cent. in six months in the United States after the Civil War, while prices in Canada have dropped 25.7 per cent. since May.

"That this drastic revision of prices was inevitable was, of course, quite apparent to all, indeed immediately after the break on the New York Stock Exchange on November 12, 1919, it was simply a matter of a few months before a recession in wholesale prices was due, and those who predicted this for the coming spring were less daring than appeared at the time. With inventories of goods constantly rising in value, it became inevitable that the banks could not possibly continue to carry the burden much longer, and would be forced out of consideration not only for their own position but for the good of trade in general to cut down drastically on their accommodation to customers. This, coupled with a very definite revolt on the part of the buying public against high prices of necessities, completes the story of the fall

which began in June, and the end of which we have not yet seen.

#### Wide Fluctuations

"In reviewing the list of commodities included in the index number, some rather amazing fluctuations are seen. For instance, raw rubber, the average price of which for the decade 1900 to 1909 was \$1.04 per lb., has fallen to 19 cents in 1920. Raw hides, whose average price during the same period was 9½ cents per lb., have fallen to 7 cents, having reached their maximum price of 35 cents in October, 1919. Raw cotton, which reached its peak of 41½ cents in March, 1920, receded to 15 cents per lb. in December. Oak, which reached \$270 per 1,000 feet in April, 1920, had fallen to \$135. In the foodstuffs also notable declines took place. Granulated sugar, to take a well-known example, stood at \$24.21 per 100 lbs. in July, 1920, and had fallen below \$10.71 by the end of the year. Potatoes, which stood at \$7.75 per bag in April, had fallen to \$1.85 in December. Rice, reflecting in large measure the extraordinary fall in silver, fell from 15 cents per lb. to 7 in November. Beef, dressed hind-quarters, which was selling at \$34 per cwt. in June, had reached \$23 in November.

"The list might be continued through practically every commodity of every-day use. The revision of prices has been most drastic, and there is every reason to expect that it will continue with unabated vigor at least until next summer, when the deflation of credit, and to a less degree of currency, will have worked itself out, and the banks will be once more in a position to stabilize the markets. That this shaking out will be of the greatest benefit to the country in general cannot be doubted.

#### The Financial Structure

"That the world is meeting this period in good shape is now apparent, and it is probable that we may be fairly confident that no very serious breaks in the markets will take place. It is undoubted that this stability is due in large measure to the Federal Reserve system in the United States, and without its wise and restraining influence we should have experienced all the disasters of a financial panic of most serious proportions. By its drastic curtailment of money for Wall Street trading it laid the way for a less severe but none the less necessary deflation of commercial credits. Without the co-ordinating influence of the Federal Reserve Board this would have been practically impossible, and the utter confusion of the panic of 1907 would have been seen once more in even more serious proportions. But by its action in reducing credits it has made imperative the revision of price inventories, and at last the deadly "vicious circle" has been stopped in its mad career and has been forced, if we may use the expression, to uncoil itself.

"The pinnacle of the spiral up which this vicious circle of inflated credits, inflated currency, inflated prices and inflated wages had been seemingly ceaselessly pursuing its course, was definitely reached in May of 1920, and has now changed into a circle of deflated credits, deflated currency, deflated prices and deflated wages. This circle, which may appear so beneficial at first, may of course become as vicious as the other, unless great care is taken to arrest its course before it has gone so far as to inflict severe injury on trade in general. That we have a steady hand on the brake in the shape of the Federal Reserve Board in the United States and our own chartered banks we may be thankful for. If an acute financial crisis were due for this period it is altogether probable that it would have developed in November, and it looks as if we were now, if not altogether through the woods, at least nearly through, and that the danger of a disastrous panic is practically over.

"We may attempt to sum up our conclusions. First, the danger of a really serious break in the markets is now passed. Second, although panic conditions have been averted, the recessions in prices will certainly continue, at least until the spring. Third, although it is hard to speak with any certainty, we may reasonably expect a steadying of prices perhaps next May or June, unless, of course, some unfore-

seen disaster overtakes us, and we must always remember that a whole lot of most surprising things may take place in the world during the next six months, especially in that place of surprises, Wall Street."

#### PUBLICATIONS RECEIVED

**Canadian Almanac for 1921.**—Copp, Clark Co., Toronto. \$3.50. The new edition of this useful publication is up to the usual standard. Among its most useful features are the lists of banks in Canada, post-offices and railroad stations, government departments and officials, courts of law and judicial officers, newspapers and magazines, lawyers and chartered accountants. Information is also given about the income tax, the customs tariff and excise duties.

**The Slave in Canada.**—By Hon. W. R. Riddell, Justice of the Supreme Court of Ontario. The Association for the Study of Negro Life and History, Washington, D.C. This 120-page book, with index, is an expansion of a paper, "The Slave in Upper Canada," read before the Royal Society of Canada in May, 1919, and subsequently published in the *Journal of Negro History* for October, 1919. The author quotes extensively from original documents and deals with his subject in a thorough and interesting way.

**Canadian Modern Accounting.**—Part I., by A. F. Sprott, and Part II., by Frank G. Short, C.A. Commercial Text Book Company, Toronto. Part I., 220 pages, with index. Part II. will be ready shortly. \$2 per volume.

This text book, which is for students of accounting, instead of commencing with an explanation of ledger accounts, starts in with invoicing and other operations, the object of which is apparent to the beginner, and then works up to posting and the preparation of financial statements. In other words, it follows, as far as possible, the actual practice in office routine. Part I. deals with single ownership and partnerships, while Part II. follows on with limited companies. The work is well illustrated by forms and documents.

**Report on Swiss Commerce and Industry in 1919.**—The report on Swiss commerce and industry, which is published every year by the directors of the "Swiss Association of Commerce and Industry," has just appeared for the year 1919. The systematic arrangement of the contents of this volume of 500 pages makes it a handy book of reference. The detailed reports on the various forms of economic activity in Switzerland, together with the full statistics given, provide a rich field of information for all those interested in the commercial and industrial situation of the country in 1919. The foreign student especially will be able to perceive how closely Switzerland is bound up with the world-wide economic conditions, and to what an extent certain international economic factors, which predominated during the first year after the war, have affected Swiss commerce and industry. The report can be obtained at the price of 9 fr., postage extra, from the secretariat of the "Union Suisse du Commerce et de l'Industrie," Zurich, Switzerland.

**Heaton's Annual.**—The seventeenth edition of Heaton's Annual, issued by Heaton's Agency, Toronto, maintains the standard of former editions. As an office handbook for commercial and financial firms, it needs no introduction, and no public or private library in Canada is complete without it.

In addition to Dominion and provincial directories, banking and insurance directories, postal, cable, financial and commercial information, which we would expect to find in such a book, the Annual is known as the standard authority on the Canadian Customs Tariff and Regulations. There is a very complete summary of the Income Tax and Sales Tax, and it has two features that are quite unique: a complete encyclopedia of the natural resources of each province, including agriculture, fisheries, forest products, fur trade, minerals, water-powers, etc., all revised to date, and the official Boards of Trade Register, which gives up-to-date descriptions of towns in each province, including railways, banks, schools, hotels in order of merit, industries, assessment, population and local opportunities, with clear maps of each province. Smaller places are covered in a Shippers' Guide, giving banks, railways and population.

# The Standard Trusts Company

The Eighteenth Annual General Meeting of the Shareholders of the Standard Trusts Company was held at the Head Offices of the Company in Winnipeg on Thursday, the 27th day of January, 1921. There was a good attendance of Shareholders, and the following report and financial statement were submitted and adopted:—

## REPORT BY THE DIRECTORS

TO THE SHAREHOLDERS OF

## THE STANDARD TRUSTS COMPANY

*For the Year which ended 31st December, 1920*

To the Shareholders:—

Your Directors have pleasure in submitting herewith the Company's Financial Statement showing its operations during the past year.

Balance at credit of Profit and Loss Account brought forward from last year .....	\$ 26,645.34
Net profits for the year, after providing for all costs of management and investment, income, and other taxes, interest on Guaranteed Investment Certificates, etc.....	101,822.84
	<u>\$128,468.18</u>

Appropriated as follows:—

Dividends Numbers 32 and 33 at the rate of 9% per annum .....	90,000.00
Leaving to be carried forward .....	<u>\$ 38,468.18</u>

Your Directors have to record, most regretfully, the passing of one of their colleagues in the person of Mr. P. C. McIntyre, a most respected citizen, and a very valuable member of the Investment Committee. It is not in contemplation that the vacancy on the Board be filled meantime.

All your Directors, in accordance with the Company's By-laws, retire, but are eligible for re-election. Your Auditors, John Scott & Company, also retire and offer themselves for re-appointment.

Respectfully submitted,

M. BULL,  
President.

Winnipeg, January 20th, 1921.

Balance carried forward	.....	38,468.18	\$128,468.18

**AUDITORS' CERTIFICATE.**

We beg to report to the shareholders that we have audited the Books and Accounts of The Standard Trusts Company at its Head Office and Branches for the year ending 31st December, 1920, and hereby certify that the above Balance Sheet is, in our opinion properly drawn up so as to exhibit a true and correct view of the Company's affairs, according to the best of our information and the explanations given us, and as shown by the Books of the Company. All loan balances have been checked with the Mortgage Ledgers, and the Securities covering such loans have, as in previous year, been duly inspected and the cash and bank balances verified. All our requirements as Auditors have been complied with.

JOHN SCOTT & CO.,

Chartered Accountants,  
Scotland and Manitoba.

Winnipeg, 18th January, 1921.

Messrs. John Scott & Company were reappointed Auditors, and the following Directors were re-elected to serve on the Board during 1921:—

Messrs. William Harvey, E. S. Popham, M.D., John A. Girvin, Kenneth MacKenzie, John Persse, John Stovel, Manlius Bull, W. A. Matheson, W. R. Bawlf, Hon. W. B. Willoughby, K.S., John McFarland and J. C. Gage.

At a subsequent meeting of the Directors, Mr. Manlius Bull was re-elected President, Mr. William Harvey and Dr. E. S. Popham, Vice-Presidents, while the working or Executive Committee were elected as follows:—Messrs. M. Bull, William Harvey, E. S. Popham, M.D., John A. Girvin, and W. A. Matheson, with Mr. Bull as Chairman. 380

**EIGHTY-NINE YEARS OF SUCCESSFUL BANKING**

Eighty-nine years of successful banking in Canada, ending with 1920, have brought the Bank of Nova Scotia's assets up to \$239,704,383. The reserve fund totals \$18,000,000, or nearly double the capital stock of \$9,700,000.

Deposits not bearing interest are shown at \$39,264,930, as compared with \$53,745,723 at the end of 1919, but deposits bearing interest have increased from \$126,546,884 to \$145,480,914, bringing total deposits more than \$4,000,000 in excess of 1919. All the loans accounts show increases, with the exception of call in Canada. Demand loans secured by grain and other staple commodities are \$15,183,998, or about \$1,000,000 in excess of the 1919 figure. Other commercial loans are shown at \$73,103,489, as against \$66,171,447 previously, while current loans abroad have increased by somewhat over \$2,000,000.

The growth of the institution is illustrated by the following figures. In the 1919 annual statement the general manager, H. A. Richardson, showed the result of amalgamations, and their value to the bank. There were no absorptions in 1920, so that the natural growth of the institution since 1909 can be readily deduced:—

	Dec. 31, 1909.	Dec. 31, 1919.	Dec. 31, 1920.
Capital	\$ 3,000,000	\$ 9,700,000	\$ 9,700,000
Reserve fund and profit	5,544,865	18,704,172	18,982,595
Loans	30,776,870	117,473,263	127,215,916
Deposits	35,008,332	180,292,608	184,745,845
Circulation	2,842,476	23,266,963	21,004,637
Total assets	48,359,366	238,278,722	239,704,383
Percentage of cash to public liabilities	12.6%	15.49%	16.20%
Percentage of cash and bank balances to public liabilities	24.6%	25.92%	26.20%
Dividend paid	12. %	16. %	16. %

Net profits of the bank last year increased from \$1,925,478 to \$2,327,422. The usual dividends were paid, and \$300,000 written off bank premises account, an increase of \$100,000 over the previous year. Nothing was added to reserve, and a balance of \$982,595 was carried forward, as compared with \$704,172.

**CONFEDERATION LIFE ENJOYED GOOD YEAR**

Notwithstanding the uncertainty of cont. during the latter part of the year, which affected life insurance companies in general with other business, the Confederation Life Association is able to report a satisfactory volume of insurance for 1920. Applications were received for new insurances amounting to \$35,904,642, and of this amount the sum of \$34,203,226 was approved and policies issued therefor. The balance, amounting to \$1,701,416 was declined or deferred for further consideration. The total new issues during the year, inclusive of bonus additions and revivals amounted to \$35,144,811, being an increase over the year 1919 of \$3,876,284.

The net revenue from premiums and annuities was \$5,272,550, being \$915,480 more than for the previous year. The net revenue from interest and rents amounted to \$1,391,485, which was \$107,517 in excess of that for 1919.

Payments on the whole were lower than in 1919. Claims by death which arose during the year, after deducting re-insurances, amounted to \$974,356, an increase of \$103,430 over the previous year. Matured endowments, however, showed a decrease of \$197,196 compared with the previous at \$471,831, while total payments to policyholders amounted to \$2,384,398, which is \$433,842 less than in 1919.

The balance sheet shows net invested assets of \$25,830,361, of which amount bonds and debentures are 51.10 per cent., first mortgages, 20.95 per cent., and loans on company's policies, 12.84 per cent. The reserve liability on all outstanding insurances is now \$24,645,296.

**NATIONAL TRUST BUSINESS INCREASED IN 1920**

The financial statement of the National Trust Co., Ltd., Toronto, for the year ended December 31, 1920, shows an increase in the volume of business transacted by the company of approximately \$5,000,000. The estates, trusts and agency account was \$5,060,880 in excess of the 1919 figure, which was \$79,665,410. The guaranteed trust account was somewhat lower at \$5,387,200.

Notwithstanding the increased service to the public the company reaped smaller returns, net profits amounting to \$252,825, as compared with \$281,140 in 1919. The income for the year was augmented by \$375,000, being the premium on a new stock issue of \$500,000 made during the year. The dividend rate was raised from 10 to 12 per cent., and the reserve fund was advanced to \$2,000,000 by an addition of \$400,000. The capital stock also stands at \$2,000,000. Profit and loss balance carried forward is \$84,417, compared with \$59,623 at the end of 1919.

W. A. Tolmie, C.A., has retired from the firm of Alfred Shaw, Tolmie and Co., Vancouver, B.C., and has opened offices at 722 Standard Bank Building. Mr. Shaw, C.A., will continue business at Rooms 708-9-10 Credit Foneier Building, Vancouver.

# THE DOMINION BANK

The Fiftieth Annual General Meeting of the Dominion Bank was held at the Banking House of the Institution, Toronto, on Wednesday, the 26th January, 1921.

Among those present were noticed: Sir Augustus M. Nanton (Winnipeg), Sir Edmund B. Osler, Leighton McCarthy, K.C., H. W. Hutchinson (Winnipeg), P. Leadley, T. P. Phelan, E. G. Gooderham, W. T. Kernahan, W. L. Matthews, Sigmund Samuel, S. C. Halligan, J. O. Gadsby, R. S. McLaughlin (Oshawa), H. H. Williams, R. J. Christie, Sir William Mulock, John J. Cook, A. W. Austin, Chas. P. Stuart, N. M. Paterson (Fort William), W. H. Knowlton, Allan McPherson (Longford Mills), W. C. Crowther, Rev. J. dePencier Wright (Kingston), W. Gibson Cassels, S. Jeffrey (Port Perry), A. Monro Grier, K.C., Jas. Ince, H. B. Phillips, J. H. Paterson, Wm. Logan, J. J. Cawthra, W. M. Stewart, Hon. Thos. Crawford, Jesse Ashbridge, H. W. Fleury (Aurora), W. J. Fleury, R. Mills (Hamilton), Rev. T. W. Paterson, Henry Brock, A. Nordheimer, W. H. Edwards, H. R. Playtner (Preston), A. T. Reid, W. W. Near, Wm. Chocker, V. H. Cawthra, Dr. F. LeM. Grasset, J. P. Bell (Hamilton), D'Arcy Martin, K.C., E. W. Hamber (Vancouver).

It was moved by Mr. R. J. Christie, seconded by Mr. H. W. Hutchinson, that Sir Edmund B. Osler do take the chair and that Mr. W. K. Pearce do act as Secretary.

Messrs. Graham Campbell and W. Gibson Cassels were appointed Scrutinisers.

The Secretary read the Report of the Directors to the Shareholders, and submitted the Annual Statement of the affairs of the Bank.

To the Shareholders:—

The Directors beg to present the following Statement of the result of the business of the Bank for the year ended 31st December, 1920:—

Balance of Profit and Loss Account, 31st December, 1919	\$ 495,707.05
Profits for the year, after deducting charges of management and making full provision for bad and doubtful debts	\$1,347,011.11
Less:—	
Dominion Government Taxation	\$120,000.00
Provincial Governments Taxation	38,500.00
	158,500.00
Making net profits of	1,188,511.11
	<u>\$1,684,218.16</u>

Which amount has been disposed of as follows:—

Dividends (quarterly) at twelve per cent. per annum	\$ 720,000.00
Bonus, one per cent.	60,000.00
Total distribution to Shareholders of thirteen per cent. for the year	780,000.00
Contribution to Officers' Pension Fund	35,000.00
	\$ 815,000.00
Written off Bank Premises	200,000.00
	\$1,015,000.00
Balance of Profit and Loss Account carried forward	669,218.16
	<u>\$1,684,218.16</u>

E. B. OSLER, President. C. A. BOGERT, General Manager.

The financial year which closed 31st December, 1920, was marked by a steady demand for credit, and our funds were in consequence continuously employed. We feel that the results, as reflected in the Annual Balance Sheet and Profit and Loss Statement, will be received by the Shareholders with satisfaction.

The Head Office and Branches have been regularly inspected by our inspection staff during the past twelve months. The Bank's Auditors, Messrs. G. T. Clarkson and R. J. Dilworth, have made the usual examination of the Bank's affairs, and their certificate is appended to the Statement submitted herewith.

During 1920 seventeen Branches and three Sub-branches were opened at points which promised, after careful investigation, that we were warranted in entering the territory. In ONTARIO—Ameliasburg (Sub to Belleville); Hamilton, Gage Avenue Branch, Homeside Branch; Kemilworth (Sub to Mount Forest); New Toronto; Roblin (Sub to Napanee); St. Thomas, East End Branch; Sarnia, Sprucedale, Timmins, Trenton. In MANITOBA—Dauphin, The Pas; Winnipeg, Portage Avenue and Kennedy Street Branch. In ALBERTA—Calgary, Alberta Stock Yards Branch; Edmonton, Edmonton Stock Yards Branch; Tofield. In SASKATCHEWAN—Canora, Yorkton. In BRITISH COLUMBIA—West Summerland. Two branches were closed—Craven, Sub to Regina, and Petersfield, Sub to Selkirk, Man.

In order to provide for the increased business of some of our long-established Branches, several new buildings were completed and occupied during the past twelve months. New quarters have been provided for our Branches at the corner of Queen and Bay streets, the corner of Dupont and Christie streets, and the corner of Yonge and Hayden streets, Toronto, and at Orillia, Ont. In addition, suitable offices have been erected for Fairbank, New Toronto and Cherry and Commissioner streets (Toronto) Branches. Your Directors, as is customary, have made a substantial appropriation for reduction in Bank Premises Account.

Owing to the continued expansion in the Bank's business, your Directors consider it expedient to request your authorization of an increase in the number of members on the Board from thirteen to sixteen members; the relative By-laws will be submitted for your approval.

E. B. OSLER,

President.

Toronto, 26th January, 1921.

The Report was adopted.

Messrs. Geoffrey T. Clarkson and Robert J. Dilworth, the retiring Auditors, were reappointed for the current year.

The thanks of the Shareholders were tendered to the President, Vice-Presidents and Directors for their services during the year, and to the General Manager and the other Officers of the Bank for the efficient performance of their respective duties.

The following gentlemen were duly elected Directors for the ensuing year: Messrs. A. W. Austin, James Carruthers, R. J. Christie, Sir John C. Eaton, E. W. Hamber, H. W. Hutchinson, W. L. Matthews, R. S. McLaughlin, Sir Augustus M. Nanton, W. W. Near, A. T. Reid, Sir Edmund B. Osler and H. H. Williams.

At a subsequent meeting of the Directors, Sir Edmund B. Osler was elected President and Mr. A. W. Austin and Sir Augustus M. Nanton Vice-Presidents for the ensuing term.

**AUDITORS' REPORT TO SHAREHOLDERS**

We have compared the above Balance Sheet with the books and accounts at the Chief Office of The Dominion Bank, and the certified returns received from its Branches, and after checking the cash and verifying the securities at the Chief Office and certain of the principal Branches on December 31st, 1920, we certify that, in our opinion, such Balance Sheet exhibits a true and correct view of the state of the Bank's affairs, according to the best of our information the explanations given to us and as shown by the books of the Bank.

In addition to the examinations mentioned, the cash and securities at the Chief Office and certain of the principal Branches were checked and verified by us at another time during the year and found to be in accord with the books of the Bank.

All information and explanations required have been given to us and all transactions of the Bank which have come under our notice have, in our opinion, been within the powers of the Bank.

## HEALTH AND ACCIDENT FEATURES IN LIFE POLICIES

(Continued from page 6.)

It may be mentioned here, as supplementary to the provisions stated in the amendment, that transfers of funds from the shareholders' surplus may be made by the shareholders at any time and to any amount, but the amount which may at the commencement be transferred from the policyholders' surplus subject to the policyholder's consent and within the maximum of \$100,000 cannot be augmented by a similar transfer at a later date until same has been formally approved by the Treasury Board.

### Fire Companies in Life Business

In addition to the new subsections of section 77 before read, there are three more new subsections which make provision for a fire or casualty company entering upon the business of life insurance; because the privilege of securing an enlargement of license is to be opened to companies of every variety on equal terms on the principle that "what is sauce for the goose is sauce for the gander." It is also made plain that either one of the separate branches may be wound up, in the same manner as a separate company, without in any way involving the other branch. These provisions are as follows:—

"(5) If the said by-law in the case of a company other than a life insurance company authorizes the transaction of the business of life insurance, the treasury board shall require as a condition of its section of the said by-law that the company shall keep separate and distinct accounts and shall create and maintain in respect of the business of life insurance a separate and distinct fund to an amount of not less than one hundred thousand dollars and such fund shall be liable only for claims or losses arising from the said business of life insurance, and the other funds shall not be liable for the said claims or losses.

"(6) For the purpose of creating the separate and distinct fund mentioned in subsection five hereof, the company may by by-law transfer as such fund the whole or any portion of the surplus of the company which under the provisions of this Act is available for the payment of dividends to its shareholders.

"(7) Any separate and distinct fund authorized by this section may in the case of any company be liquidated and wound up under the provisions of this Act or of the Winding-up Act independently of the other business of the company and the provisions of this Act and the Winding-up Act shall apply to such funds as fully as if the company transacted only the class or classes of business in respect of which such funds are maintained; provided, that in the winding-up of the company or of any fund therefore, the capital stock, if any, subscribed before the date of the separation of funds herein authorized shall be liable, both as to the amount paid and the amount unpaid thereon only for claims or losses arising from the class or classes of business transacted prior to the said date."

That is the last of the changes proposed by the amendment which concern our subject.

### Life and Casualty Combination

It will be interesting at this point to consider, in the case of a life company which sets up a casualty branch, just what is the legal recourse open to a policyholder of either branch in making a claim on the company. The proposal is that the company will issue its life policy quite as at present, except that a clause will be inserted exempting the casualty fund from liability for any claim arising out of the life policy; and the casualty policy will be issued in the name of the life company, with a clause inserted which will in effect exempt the life fund and also the shareholders' capital and surplus from liability for any claim arising out of the casualty policy.

There is evident here another important variation from the British Act. Under the British Act, the companies capital stock stands as a common guarantee behind all the branch funds. Under the law of New York State, and it may be added under the law of Ontario, there is no statutory provision for separation of the funds of the various classes of business. The legal position of the various classes has been summed up in an opinion by the general counsel of a big American company as follows:—

"In the United States, and I assume that the same practice would be followed in the courts of the Dominion, the assets of the company, in the event of liquidation, would be so marshalled by the courts, that no part of the reserves maintained for the life liabilities could be used to liquidate the liabilities of the accident department, until all the life liabilities had been fully discharged, and no part of the reserves of the accident department could be used to liquidate life liabilities until after all the accident liabilities had been discharged."

This implies that not only the capital stock, but also the company's general surplus, regardless of its origin, and in case of insolvency the reserves of all the branches combined would stand as a common guarantee behind all the policies. This is about the same condition as will exist in the casualty branch of a Canadian life company, among the various classes of insurance transacted; always remembering that the entire casualty branch will exist as a subsidiary of the original life company.

### American Companies' Difficulties

Under the Canadian amendment as it stands, requiring separate capital, separate securities and separate funds, as well as separate accounts, it is doubtful whether many of the American companies will be able or willing to obtain an enlargement of their licenses in Canada. Obviously, the Canadian department has no power to enlarge the corporate powers granted to an American company by its native jurisdiction. Another matter to be inquired into by Canadian companies, which desire to operate in the United States, is whether their application for license there would in any way be prejudiced by the separation of the funds according to this amendment.

The main question to consider is to what extent or how soon are the Canadian companies likely to avail themselves of the opportunities which the amendment presents to them of entering upon new classes of insurance. I have discussed this with a number of men connected with various companies. Few of them are prepared to say just what new classes, if any, their companies are likely to undertake. All the companies have recently been expanding rapidly in their particular fields and find themselves unusually busy, without launching out upon new ventures. It must be remembered that the companies themselves have not framed the new regulations, nor have they sought them, although in the absence of compulsory features no serious objection has been raised. Furthermore, new developments in the insurance world have been coming so thick and fast latterly, that there is not time to properly assimilate one before it is necessary to come to a decision about the next.

### Likelihood of Action

The consensus of opinion is that the life companies are not likely to undertake, for the present at least, such classes of business as fire or surety insurance for example, which are not at all nearly related to life insurance. Neither does it seem likely that the fire and casualty companies will quickly enter upon the business of life insurance.

The one important development, which is likely to take place without delay, is the undertaking by the life insurance companies to a limited extent of health and accident insurance. There has been a big movement along these lines in the United States, and, broadly speaking, two distinct methods of operation have been tried out.

# DIVIDENDS AND NOTICES

## BANK OF MONTREAL

Notice is hereby given that a Dividend of Three Per Cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after Tuesday, the First Day of March next to Shareholders of record of 31st January, 1921.

By Order of the Board.  
FREDERICK WILLIAMS-TAYLOR,  
General Manager.

Montreal, 21st January, 1921. 373

## THE ROYAL BANK OF CANADA

### DIVIDEND No. 134

Notice is hereby given that a Dividend of Three Per Cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Tuesday, the first day of March next to shareholders of record at the close of business on the 15th day of February.

By Order of the Board.  
C. E. NEILL, General Manager.

Montreal, Que., January 14, 1921. 371

## THE CANADIAN BANK OF COMMERCE

### DIVIDEND No. 136

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 28th February next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 1st March, 1921, to shareholders of record at the close of business on the 13th day of February, 1921.

By Order of the Board.  
JOHN AIRD, General Manager.

Toronto, 21st January, 1921. 279

## THE MERCHANTS BANK OF CANADA

### QUARTERLY DIVIDEND

A Dividend of Three Per Cent. for the Current Quarter, being at the rate of Twelve Per Cent. per annum, upon the Paid Up Capital Stock of the Bank, was declared payable on 1st February next to Shareholders of record on the evening of 15th January, stock not fully paid up on 1st November to participate from that date on the amounts then paid up and on subsequent payments from the dates thereof.

By Order of the Board.  
D. C. MACAROW,  
General Manager.

Montreal, 28th December, 1920. 346

## THE QUEEN CITY FIRE INSURANCE COMPANY

The Annual General Meeting of the Shareholders of this Company will be held, pursuant to the Act of Incorporation, on Monday, the 14th day of February, 1921, at 10 o'clock a.m., at the Company's office, 32 Church Street, Toronto, to receive the report of the Directors for the past year, to elect Directors for the ensuing year, and for the transaction of such other business as may be transacted at a General Meeting of Shareholders.

By Order.  
HUGH F. CRIGHTON,  
Secretary.

Toronto, January 24th, 1921. 278

## THE HAND IN HAND INSURANCE COMPANY (Mutual and Stock)

The Annual General Meeting of the Members and Shareholders of this Company will be held on Monday, the 14th day of February, 1921, at 10.30 a.m., at the Company's offices, No. 32 Church Street, Toronto, for the election of the Directors for the ensuing year and the transaction of other business relating to the management of the Company.

By Order.  
F. E. DINGLE,  
Secretary.

Toronto, January 24th, 1921. 278

## THE FIRE INSURANCE EXCHANGE CORPORATION (Stock and Mutual)

The Annual General Meeting of the Members and Shareholders of this Corporation will be held on Monday, the 14th day of February, 1921, at 11.00 a.m., at the Company's offices, No. 32 Church Street, Toronto, Ont., for the election of Directors for the ensuing year, and the transaction of other business relating to the management of the Corporation.

By Order.  
ARTHUR DWYER,  
Secretary.

Toronto, January 24th, 1921. 278

## MILLERS AND MANUFACTURERS INSURANCE CO. (Stock and Mutual)

The Annual General Meeting of the Members and Shareholders of this Company will be held on Monday, the 14th day of February, 1921, at 11.30 a.m., at the Company's offices, No. 32 Church Street, Toronto, Ont., for the election of Directors for the ensuing year, and the transaction of other business relating to the management of the Company.

By Order.  
C. H. C. FORTNER,  
Secretary.

Toronto, January 24th, 1921. 278

## COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended January 21, 1921:—  
Beaver Con. M., 60,000; La Rose, 87,990; Dominion Red'n., 60,000; total, 207,990. The total since January 1st is 496,301 pounds, or 248.1 tons.

The first is the method employed by the Travelers' Life of establishing a separate department to carry on each separate class of insurance and to issue policies quite independently of each other. The other method is that recently adopted by a great many of the American life companies, whereby an accident and health contract is issued only in conjunction with a life policy.

#### Suggested Course

If I may be permitted to outline the course, which appears to me after such incomplete investigation as I have made to be desirable for the Canadian life company to pursue, I will make the following tentative suggestions:—

(1) Issue accident and health contracts only in conjunction with life policies.

(2) Adopt a form of policy which will most strongly recommend itself to the policyholder as a single indissoluble contract of complete insurance of his person and which will not suggest to his mind the discarding of the health and accident feature, but rather will tend strongly to induce him to continue the combined contract in force. This result can be accomplished more readily if the companies are not forced to issue separate contracts.

(3) Adopt the so-called "non-cancellable" form of health and accident feature. This will, of course, require a higher premium than a "cancellable" feature, but will probably prove more satisfactory to all parties in the end.

(4) Allow commission to agents on the combined contract at the same rates as in the case of life policies issued without the health and accident feature.

(5) Fix a ratio between the size of the life policy and the size of the health and accident feature issued with it, this ratio not to be exceeded in any individual case.

(6) Fix a second ratio between the total volume of life policies issued in a year and the total volume of health and accident features issued in conjunction with them.

(7) Commence with a scale of premiums for the health and accident feature, which the best experience available indicates to be adequate.

(8) Make preparation so as to be in a position to handle health and accident claims as they occur expeditiously and with reasonable liberality.

(9) Instruct the agents so that they will take every legitimate advantage of their increased opportunities for rendering service to the public.

#### Anticipated Results

Some of the results which the life company will anticipate from such a course may be stated as follows:—

(1) Owing to their careful inspection of the health and accident risks in the first instance and to the greater persistence of the contracts which will follow from linking them up with the life policies, they will gain the benefits of selection and escape the injury of anti-selection exercised by the policyholders; as a result they will almost certainly experience a more favorable loss ratio than the casualty companies at the present time; and they will be in a strong position to adopt non-cancellable contracts.

(2) Owing partly to the greater persistence of the health and accident contracts when incorporated in the life policies, and partly to the conditions under which the business will be operated, the cost of acquisition and overhead expenses should be lessened, at least in some degree, and probably in a marked degree.

(3) The health and accident section of the business, if efficiently administered along the lines suggested, will not react adversely on the life section; neither should it impair the efficiency of the agents as life insurance producers. On the contrary, the company will probably gain much in popularity and prestige.

I understand that one main reason which has led Mr. Finlayson to advocate the handling of personal accident and sickness insurance by companies which also handle life insurance, is his hope that by this means the cost to the policy-

holder can be lowered. Whether that expectation will be realized or not remains to be seen. I think, however, that all present here are alive to the necessity of searching for ways and means whereby the cost of every kind of insurance can be reduced.

As regards the actual nature of the benefits which the life companies will incorporate, it is difficult to speak at all definitely at this stage. The tendency will undoubtedly be toward more or less standard benefits and an avoidance of frills of doubtful value. The double indemnity principle will no doubt be included because of its universal popularity, and in spite of the fact that it is open to objection on purely logical grounds.

It need not be feared that the life companies will be wild cats in the casualty field, their traditions are all against it, and they are ballasted by the counsel of their actuaries and medical directors—men who have long been trained in the scientific conduct of life insurance.

In conclusion, there is just one other matter to which I will refer, namely, the suggestion of the executive committee of the Canadian Life Officers' Association. The opinion is advanced by this committee that if a life company issues its health and accident benefits only as a part of a life policy, and fixes limiting ratios on the amount of such business transacted in comparison with its life business, then the Canadian Act might safely permit it to maintain all its policies in a common fund, with common investments and a common capital, keeping, however, separate accounts of the life and casualty sections, as is now done in the case of participating and non-participating sections of its business.

Let us consider for a moment what the item of agent's commission on the health and accident feature will amount to when this feature is attached to a life policy, assuming a policy duration averaging eight years and commission rates the same as the life companies are now paying. The total commissions paid on life policies averaging a duration of eight years, and comprising all plans of insurance, would be less than 120 per cent., that is, less than 15 per cent. per year. That would seem fairly reasonable under present-day conditions, with the other expenses in proportion. This plan would not interfere with the other terms of the amendment, but would be an alternative to them. Undoubtedly, it is a plan which nearly all the life companies would choose in preference to the other, especially at the commencement, and in many cases permanently. It would give the life companies as much scope in the health and accident field as they are likely to make use of in any case, because few, if any, of the life companies desire to enter upon a general casualty business. It would be a simple and convenient plan, which would avoid all the objections which I have mentioned in reference to the amendment in its present form, and it would satisfy almost everybody. A Dominion incorporation would then confer equal privileges with a provincial incorporation, which is not the fact at present.

The only objection which might be urged would be that excessive losses might be incurred from the health and accident features which would affect the security of the life policies, or the amount of dividends payable on them. The more that objection is weighed, the more chimerical it appears. For the reasons already stated the experience of the health and accident section, conducted by the method outlined, will probably be very favorable. This same objection of "too risky" is always the stock argument of the reactionaries. For example, the gravest misgivings were voiced at first as regards incorporating total and permanent disability benefits in life policies, but now even the pessimists have calmed their forebodings. American life companies have for years been inserting health and accident guarantees in their policies with excellent results, without forming subsidiary companies. Surely the Canadian life companies can be trusted to follow that precedent with safety.

## RIGHT OF GRAIN BROKER TO RECOVER LOSSES

**Manitoba Court Holds That Where Client Did Not Furnish Margin, Broker is Entitled to Recover Losses**

"ONE who instructs his broker to sell for him wheat which he agrees to deliver, and which it is the intention of the parties shall be delivered, the broker causing sales to be made to various persons in consequence of these instructions, and who is unable to make delivery and authorizes such broker to purchase sufficient other wheat to close out these transactions is liable to the broker for any loss which such broker sustains in carrying out such transactions."

The above is in substance the judgment in the case of Canadian Grain Co., Ltd., vs. Nichol. The facts of the case were: In July, 1916, Nichol instructed the company to sell on his account wheat for delivery in October, amounting to 9,000 bushels. The company through its Winnipeg agents did so. After this wheat was sold, the price of wheat rapidly rose. By the rules of the Winnipeg Grain Exchange it was necessary to put up margins to protect the contracts of sale against the rising price. Nichol did not have the money and he asked the company to supply it, which they agreed to do provided Nichol would undertake to deliver all the grain sold on his account, and indemnify them against any loss arising from his failure to so deliver. To this Nichol agreed in writing, and the company put up the necessary sums to protect his contracts. On October 24 he notified the company that he could not make delivery of any wheat, and on the same day instructed them to buy 9,000 bushels to fulfil the contracts of sale which they had made on his behalf.

#### Brokers Sued for Amount Lost

The action was for the difference between what the company was obliged to pay for the wheat in October and the amount coming to Nichol from the purchasers to whom the company had sold 9,000 bushels on his behalf. The defences relied on were: (1) That the contracts were illegal, being contrary to sec. 23 of the Criminal Code, and (2) that the company did not make privity of contract between two principals.

The following parts of their Lordship's judgment give their decision:—

"So far as the first objection goes, I agree with the trial judge that that is disposed of by his finding of fact as to the intention of the parties, that there was to be delivery of wheat by Nichol. The trial judge, however, held that the company did not make privity of contract between two principals.

"So far as this is concerned, when the broker representing the defendant on the Grain Exchange sold the wheat of the defendant to other brokers representing purchasers, then it seems to me, that there was a binding contract entered into for the sale and purchase of the defendant's wheat."

"The plaintiff (the company), should have judgment against the defendant for \$5,400.25 and costs."

#### CANADIAN NATIONAL TELEGRAPH SYSTEM

A reorganization of the Great Northwestern and the Canadian National Telegraph Companies has been effected in conjunction with the nationalization of the Grand Trunk and the Canadian National Railways, and effective on January 1, the two telegraph services were united under one name, Canadian National Telegraphs.

Following is the personnel of the new company: Executive officers—George D. Perry, general manager; A. C. McConnell, secretary and auditor; D. E. Henry, treasurer. Commercial department—W. G. Barber, Toronto; L. S. Humes, Montreal; J. G. Davies, Toronto, and J. F. McTaggart, Winnipeg. Traffic department—Charles E. Davies, Toronto. Plant department—W. J. Duckworth, Toronto. Supply department—George Watt, Toronto. Commercial news department—R. H. Hathaway, Toronto.

## EFFECT OF SECTION 167 OF BILLS OF EXCHANGE ACT

**Notice of Death of Drawer of Cheque Held by Saskatchewan Court to Terminate Duty of Bank to Meet It**

ON appeal from the trial judgment in the case of Curley vs. Briggs, the Saskatchewan Court held according to the Bills of Exchange Act that from the date that the bank receives notice of the death of the drawer of a cheque, presentment for payment is dispensed with because nothing can be gained by such presentment, the bank's authority to pay the cheque being terminated by notice of the death and an action brought against the administrator for the amount due should be framed as for money advanced to the deceased, the right of the payee being subject to the conditions under which the payee received the cheque.

The action was brought against Charles Briggs, administrator of the estate of Thos. A. Drury, deceased, for five cheques given by Drury in his lifetime to Curley. The defences raised were: (1) That the cheques were given in payment of a gambling debt, and (2) that there was no evidence of presentment for payment or dishonor.

Elwood, J. A., in his written judgment, says in part, "So far as the first defence is concerned, that in my opinion is disposed of by the finding of the trial judge that the cheques were not given for a gambling debt.

#### Notice of Death Conclusive

"So far as the second defence is concerned, sec. 107 of the Bills of Exchange Act is in part as follows: 'Notice of dishonor is dispensed with as regards the drawer where . . .

(d) the drawee or acceptor is, as between himself and the drawer, under no obligation to accept or pay the bill; (e) the drawer has countermanded payment.'

"Section 167 of the Bills of Exchange Act in part is as follows: 'The duty and authority of a bank to pay a cheque drawn on it by its customer are determined by . . . (b) notice of the customer's death.'

"I am of the opinion that the effect of sec. 167 is, that from the date of the death of the drawer of the cheque, or at any rate from the date that the bank would receive notice of the death, presentment for payment would be dispensed with, because nothing could be gained by such presentment. Notice of the death, in effect, countermands the right of the bank to pay the cheque. Notice of dishonor is also dispensed with under sec. 107, because from the notice of the death the bank is, as between itself and the drawer, under no obligation to pay the cheque; in fact, it is not only under no obligation, but its authority to pay the cheque is determined.

"If I am correct in the conclusions I have reached above, then it was not necessary in this case for the plaintiff to allege either presentment or notice of dishonor."

#### SASKATCHEWAN FIRE INSURANCE AGENTS

The campaign of the Saskatchewan Fire Insurance Agents Association for members, launched on August 15 last, has resulted in 105 new members being enrolled. The total membership now numbers 138. The association is working for uniform rates of commission throughout the western provinces and for improved regulations governing the issue of agents' licenses in Saskatchewan.

J. C. Millar, C.A., chief auditor, Canadian Wheat Board, and W. J. Macdonald, C.A., assistant auditor, Canadian Wheat Board, have entered into a partnership under the firm name of Millar, Macdonald and Co., chartered accountants, with offices at 428 Main Street, Winnipeg. The firm will specialize in cost accounting, grain, income and business profits, war taxation, etc.

# News of Industrial Development in Canada

Recent Feeling of Depression in the Pulp and Paper Trade was Without Grounds, According to Officials—Supply and Demand of Newsprint Closely Balanced—Canadian Cottons Makes Reductions in Wages—Cuts are not so Large as Those by American Companies—Heavy Rail Orders in Store for Canadian Steel Plants

A FEELING of depression which recently came over the pulp and paper industry, and which was reflected in the stock market quotations, has been disposed of by officials in the trade. An investigation of the business being done by the Riordon Company, the largest producers of bleached sulphite pulp in Canada, would prove that the depression is not particularly serious, and also that the bottom has been reached, and that new business is rapidly coming in. Regardless of a dull market, the Riordon Company has not closed any of its plants, and at the present time is working at 90 per cent. of full capacity. Deliveries were for a time slightly curtailed, but in an enterprise the size of the Riordon, a temporary let-up in deliveries is not particularly serious. The prices obtained by the company are good, and the business of the coming year bids fair to equal that of last, which was the record year in the company's history, that is, to judge from the present outlook.

With regard to the newsprint outlook, George Cahoon, jr., of the Laurentide Company, Ltd., remarks: "The demand for this commodity has been more uniform than for any other commodity, and reflects very prosperous conditions in the newspaper industry. Prices for paper made by the large producers are at the maximum. No price adjustment has been heard of, and none is possible until after the first quarter of the year. There is nothing in the general outlook that would alter the belief that the newsprint industry is in a very healthy condition, due to the fact that the supply and demand are very closely balanced. Whatever may happen in the future, no readjustment in newsprint prices will be out of proportion to the readjustment in prices of all commodities that go into the making of newsprint."

On the book and high-grade paper outlook, C. Howard Smith, of the Howard Smith Paper Mills, is quoted as saying: "There has been a lull in the high-grade and book paper market, and some of the mills have closed down, considering it an opportune time to do overhauling. As far as our plants are concerned, they are working at 75 per cent. capacity, with business picking up sufficiently to warrant the belief that within a month it will be again normal. As far as we can see, with readjustment at both ends, the mills making our grades of paper should average out in 1921 on a par with 1920."

J. H. A. Acer, head of J. H. A. Acer and Company, has expressed his views on the kraft paper situation as follows: "Those who use packing and wrapping paper, etc., have still supplies on hand, and these must be worked off before there can be any return to normal business with the kraft paper mills. The mills have no stocks, and are working to fill incoming orders. When the present supplies in the hands of the consumer are worked off will depend on the increase in business in all lines of commodities, and that part is hard to predict. However, lately we have noticed a slightly better demand, although world-wide, it is still dull."

The Kaminstiquia Pulp and Paper Company's new pulp mill in Port Arthur, Ont., went into complete operation this week. The slasher mill has been running for a couple of months and has prepared 1,500 cords of pulp for the grinder mill and the wet-room, which later commenced recently to make it into the commercial pulp. The company has its output sold for six months ahead. Plans are under way for increasing the present capacity of 30 tons per day to 100.

## At the Coast

The pulp and paper situation in British Columbia can be described as being satisfactory. The organization of the Whalen Pulp and Paper Company is undergoing several changes, which, when completed, will enable the company to proceed actively in its operations.

The plant of the Western Canada Pulp and Paper Company will be put into operation early next month, according to Mr. W. O'Connor, secretary of the company. The plant is located at Port Mellon, about thirty miles north of Vancouver, and will have a capacity of about 40 tons of pulp a day. While the output of the plant will be governed to a great extent by the demand, in view of the fact that a very large proportion will be for export, it is believed by the company's officials that within a short time the plant will be turning out pulp to the limit of its capacity.

## Canadian Cottons Cut Wages

Employees at the Canadian Cottons, Ltd., mill at Marysville, N.B., have been notified of a reduction of 12½ per cent. in all wages. Individual notices have been sent to each of the 750 employees at the mill, and it is stated that the reduction is being made general at all of the company's eight mills, from St. John to Hamilton, Ont., which employ approximately 3,500 people.

The notices were contained in a circular letter, which set forth the situation from the standpoint of the company. Business conditions were explained, and the employees were told that the company had cut prices in an effort to stimulate trade, and the workers would have to take some portion of the lowering of prices in the way of reduced wages. The mill at Marysville and all others of the Canadian Cottons system, except that at Milltown, N.B., have been operating only four days a week for some time past, closing from Thursday night until Monday, and it is said that the short hours will not be discontinued as a result of the wage reduction until business picks up, and orders are renewed by the wholesale trade.

It is not expected, however, that any serious action will result. Textile prices are being lowered and wages must be reduced accordingly. In the United States the textile mills recently cut wages 22½ per cent. in a good many instances.

## Another Announcement on Rails

A report in these columns recently to the effect that orders of the Canadian railways for steel railways would keep our steel plants busy during the coming year, has not yet been officially confirmed, but further information has been brought to light which in itself is practically confirmation. Mr. Ball, who is engaged in the capacity of steel inspector for Robert W. Hunt and Co., with territory at Sydney, New Glasgow, and Sault Ste. Marie, forecasts big business in Canada in steel manufacturing as soon as the market for steel rails becomes steadier.

The steel plant at the Soo is completely shut down, and from present indications will remain so for some weeks yet. The company at Sault Ste. Marie is looking forward to a big season's work in rolling rails for the Canadian railways. Both the C.N.R. and the C.P.R. systems require immense rail tonnage for renewals and extensions, but at the moment the market is steadily falling and to place orders would more than likely mean paying at least \$4 to \$5 per ton more for rails than the price which will be obtained later on. The C.N.R. is anxious to arrange for its requirements at once, but to do so would place the management in the position of purchasing on a declining market and paying more for its rails than the C.P.R. would be able to obtain their supplies later on. And for the great quantity required this would run up into a very considerable sum in excess of the outlay to be paid by the competing system.

The Canadian railway orders for the Dominion Iron and Steel Co., which will be booked in due course, will keep it

going at full capacity for the balance of the year. The two big railway corporations when they eventually award their contracts will provide sufficient business to keep the Sault Ste. Marie and the Sydney plants working full time for practically the balance of the season, the price is expected will be a very close one and the margin of profit rather meagre, but steady employment at the Canadian mills will brighten the steel business generally.

The Kraft-MacLaren Cheese Co., Ltd., which was recently incorporated in Montreal with a capital of \$1,000,000, has under construction in Montreal a factory, refrigerating plant and warehouse to cost \$200,000.

#### INSURANCE NOTES

The Stuyvesant Insurance Company, of New York City, which has been operating in Saskatchewan for the last year or so, will not renew its Saskatchewan license for 1921. A notice to this effect has been filed with Arthur E. Fisher, superintendent of insurance for the province. A number of companies which have underwritten insurance in the province in the past are not renewing their licenses this year, according to Mr. Fisher. On the other hand, a number of new companies are applying for licenses, and the present outlook is for a larger number of companies doing insurance business in Saskatchewan this year than was the case last year.

Application will be made by the Dominion Life Assurance Company at the next session of parliament of the Dominion for amendments to its charter by repealing section thirteen, which requires the company to maintain three separate accounts of the business transacted by it in the "general," the "abstainers" and the "women's" sections, and by re-enacting as section thirteen the following provisions of the original section: The company may establish a section on the principle of non-participation in profits. In the distribution of profits the directors shall allot to the policyholders in the participating section of the company at least nine-tenths of the profits declared from time to time, which shall be payable as the directors by by-laws or regulations from time to time determine.

J. T. McCay, general agent at Oxbow, Sask., has been appointed district manager for northern Alberta by the Mutual Life of Canada to fill the vacancy following the appointment of Mr. Reany as superintendent of agencies. W. C. Walsh becomes general agent for southeastern Saskatchewan in succession to Mr. McCay.

Arrangements for the writing of general fire insurance in Canada are proceeding apace by the Motor Union Insurance Company, and it is expected that business will be accepted some time in February.

The employees of the Robin Hood Mills, Moose Jaw, Sask., have nearly completed the organization of an insurance company for the sole benefit of the employees at the mill, it having been found necessary to incorporate the company. The insurance scheme will be worked by the employees paying 1 per cent. of their wages each week to the insurance fund, while the Robin Hood Milling Company will pay an equal amount, and out of the fund so established each worker will be paid two-thirds of his wages in case of illness or accident, which would not be covered by the Workmen's Compensation Act, so that the workers at the mill will have protection in case of illness or in case of accidents which may happen outside the scope of their employment.

## Insuring the Motive Power

The object of Business Insurance is to insure the "brains" of an organization. Knowledge, combined with administrative ability, is invaluable. Every business, large or small, depends primarily upon one or more experienced leaders. The death of any one of them would result in a heavy financial loss. There would be heavy going until the deceased official was replaced by someone of equal ability. The possession of a policy of insurance payable to the firm in the event of the death of such a leader is essential. Joint policies payable on the death of the first partner, or (preferably) separate policies on the lives of the individual partners in favor of the survivors are issued by The Mutual Life of Canada. It will be the object of the Company to adapt each Business Policy to the particular requirements of the insuring firm. Consult our representative. He will be glad to advise you regarding business insurance.

# News of Municipal Finance

**Saskatchewan Minister of Municipal Affairs Takes Objection to Adverse Criticism of Western Municipalities—Quebec Government Will not Force Annexations—Dwelling House Exemption By-Law in Toronto Will not be Operative Until 1922—Tax Collections in Moose Jaw and Saskatoon Exceed 1919 Returns**

**O**BJECTION is taken by the Hon. Geo. Langley, minister of municipal affairs for Saskatchewan, to articles which appeared recently in a contemporary, which adversely criticized the bonds of municipalities in western Canada and especially in Saskatchewan. Mr. Langley, who has gone to some length to explain his case says:—

"I am not prepared to say that all municipal authorities in Saskatchewan have at all times acted wisely in their borrowings. Unfortunately, we passed through, during the years 1909-12 inclusive, a boom period; and during this period the value of real estate particularly was boosted very much beyond its actual value—boosted in many cases to double its actual value. A great deal of property changed hands during the boom period and very large profits were made by the 'boosting' speculators. The spirit of outlay and expenditure founded on these excessive values was not confined to private parties but found expression in quite a number of our municipal councils. A willingness to spend thoughtlessly and to saddle the future with responsibility for these expenditures found its way into practice in the case of a number of the municipal organizations in the province; and there appeared to be at that time an equal willingness on the part of those representing the investing public to loan their money to the municipal bodies to which I have referred.

"Cases might be mentioned where terms were accepted by the municipalities, and taken advantage of by investors, which should have counselled caution to those lending the money; but the spirit of 'boost' and faith in an apparently rosy future deprived both borrowers and lenders of that care and caution which should be exercised in connection with such matters. It was inevitable that chickens hatched under these peculiar circumstances should at a later date come home to roost. The thing that has been somewhat surprising to me is that so few of our municipalities should have encountered difficulty in meeting their obligations. The number might be counted on the fingers of one hand, and practically everyone of these municipalities has been able to make arrangements that give promise of fully meeting the liabilities of the borrowers and the just demands of the lenders.

## Hold No Responsibility

"The disappointment that has been manifested among the agents of the bondholders and given expression to, has arisen not so much from difficulties between the borrower and the lender, as from the strange assumption on the part of those who make the bondholder's complaint that the provincial government should in all cases where financial difficulties have arisen in a municipality, turn the municipal bonds into provincial bonds. When these loans were contracted, it was perfectly well understood that the securities were municipal securities. There was never any suggestion of any kind made at any time that in case of difficulty the municipality's trouble would be accepted by the provincial government and provided for out of the funds of the province. The interest charged by the lenders was always arranged on a purely municipal basis, and was higher or lower, according to the standing and prospects of the municipality. This being the case, there is no ground for the complaint that is being made against the provincial government. The 'kick' that is being made is not made because of widespread defalcations—because, as a matter of fact, there has not been anything of the sort; it is being made in the elusive hope that by making the complaint loud enough and repeatedly reiterating it, the provincial government may be driven into the position of guaranteeing these securities.

"It cannot be too emphatically stated that these gentlemen might better save their breath; as the whole question

has been canvassed with the utmost seriousness and care by the provincial government, and the government has come to the conclusion, which is deliberate and final, that it will not accept responsibility in these matters. It will lend itself, as between the bondholders and the few municipalities involved, to regulate the terms of repayment in any manner giving promise of the full payment of its liabilities by the municipality and the avoidance of loss on the part of the bondholders; but beyond this it certainly will not go."

**Moose Jaw, Sask.**—Tax collections for 1920 totalled \$925,420, made up of current taxes \$770,308, and arrears \$155,112. The total levy was \$1,041,986.

**Lethbridge, Alta.**—During the eleven months ended November, 1920, the street railway accumulated a deficit of \$37,579, as compared with a loss of \$35,737 for the whole of 1919. The electric department had a surplus for the eleven months of \$5,978.

**Saskatoon, Sask.**—Net assessment for 1921 is \$28,727,567, made up as follows: Land, \$23,912,110; improvements, \$7,013,170; exemptions, \$3,071,635; net land and improvements, \$27,853,645; business, \$386,549; income, \$487,373; total net, \$28,727,567. The total quoted under the item of improvements, represents only the taxable portion, that is to say, 35 per cent. of the total assessment of improvements.

Tax collections in 1920 totalled \$1,183,813, as compared with \$1,103,159 in 1919.

**Winnipeg, Man.**—Tax collections in the city from May 1 until December 31, 1920, amounted to \$6,644,797, according to figures revealed in a report of H. R. Pattinson, city tax collector. The largest single amount collected was from the municipal and school tax, shown at \$4,596,792 and the current levy and arrears of the Water district, \$650,234 with \$343,665 realized from pavement taxes. Arrears amounting to large sums were collected in connection with each item.

W. H. Evanson, city comptroller, has issued a report showing that the city has effected a saving of \$60,000 since 1917 by the self-carrying employees' insurance scheme under workmen's compensation arrangements.

**Toronto, Ont.**—The dwelling house exemption by-law which was passed by the ratepayers at the last municipal elections, and which provides for partial exemption on houses which are not assessed for more than \$4,000 will not be applied in the city this year. The reason for this is that the work on the tax collectors' rolls has reached a stage at which a revision, as a result of the operation of the by-law would mean a delay in tax collections this year, which would embarrass the city treasurer. It is estimated that interest to the amount of \$150,000 would have to be paid on temporary loans, which would have to be made if the first instalment of taxes was delayed. In addition there would be the cost of additional labor in revising the rolls. Furthermore, the city has already received loans and been assured of assistance from the banks to the extent of \$7,000,000, on the distinct understanding that these loans would be repaid not later than early in June. This arrangement was made in good faith and in the belief that the first instalment of taxes would be received at the usual time.

**Calgary, Alta.**—A proposal that the city put the money, which it now has on deposit with Calgary banks drawing 3 per cent. interest, on deposit instead with the provincial government treasury, "payable on demand," to draw 5 per cent. interest, is made by Ald. J. S. Arnold. At the present time the city has on deposit in Calgary banks approximately \$300,000 of funds belonging to Spitzer, Rorick and Co., on which it is paying that company 6 per cent. interest and

drawing only 3 per cent. interest from the banks, so that the city is losing 3 per cent. interest on the deposits. This money is being held on account of the adverse condition of Canadian exchange, as a great loss would be entailed in sending it to the United States at the present time in repayment of the Spitzer-Rorick loan. Mr. Arnold says his proposal would convert this 3 per cent. interest loss, amounting to \$9,000 a year, into a loss of only 1 per cent., or \$3,000 a year. Also, the city has on deposit with the bank approximately \$500,000 of sinking fund money, on which it draws only 3 per cent. interest. By putting the money on deposit with the provincial treasury at 5 per cent., there would be a gain of 2 per cent. interest on this sum. Mr. Arnold, however, proposes that only about \$200,000 or \$250,000 of the sinking funds be

put in the provincial treasury at the 5 per cent. rate to begin with.

**Montreal, Que.**—Certainly it will not be the government of the province of Quebec which will attempt to force the municipalities of the island of Montreal into annexation with the big city. Hon. L. A. Taschereau, prime minister, in receiving a delegation of mayors, aldermen and prominent citizens of the outlying municipalities last week, made this fact clear. The premier said that there was no demand before the legislature for annexations, and he predicted that if there was such a demand, those who were behind the movement would have a stiff battle. Mr. Taschereau took the stand that it would not be fair to throw the municipalities into the arms of Montreal against their will, nor to impose on them a form of government which they were opposed to.

**Ontario Sells Ten Millions of Securities for Hydro Purposes—  
Province Paid 6.28 Per Cent. for Its Money—Victories Move Up,  
with the Exception of Taxable Issues—Several Municipal Issues**

**T**HERE was no sign of weakening in the bond market this week. Victory bonds moved up, with the exception of the taxable issues, while municipalities received fairly good prices for their securities. A set-back is regarded as improbable, and it is felt that the market is established definitely at its present levels, and that there will be a gradual upward movement. There will no doubt be some fluctuations of an adverse nature, but these, it is thought, will be temporary and not of a serious nature. The price movement of Victories in the past two weeks is illustrated by the following figures:—

	Control price.	Last week.		This week.	
		High.	Low.	High.	Low.
1922 .....	98	98%	97½	99¼	98
1927 .....	97	98½	97½	98%	97½
1937 .....	98	99%	99	100¼	99
1923 .....	98	97%	96½	99%	97
1933 .....	96½	98	95%	98%	97½
1924 .....	97	97	96	96¾	95¼
1934 .....	93	95¾	95	95¾	95

### Ontario Sells Ten Millions

The principal event of the week was the sale of \$10,000,000 6 per cent. 20-year province of Ontario bonds, the proceeds of which will be used for Hydro, to a syndicate of twenty-four Toronto bond houses headed by A. Jarvis and Co. The province got a price of 96.787 and accrued interest, which is on about a 6.28 per cent. basis. This compares with 6.80 per cent., which was paid for the issue of \$16,000,000 made in December last. The present issue, as in December, was heavily oversubscribed.

### Will Pay in Sterling

Members of the finance committee of the city council have decided to confirm the action of City Treasurer J. H. Mercer in declining to pay in Calgary in Canadian currency, interest coupons of city of Calgary bonds made payable in London and Calgary in British pounds sterling. There are approximately \$700,000 of such 4½ per cent. bonds issued, and since the removal of the embargo an export of securities, holders of them in the old country have been endeavoring to have them paid in Calgary in Canadian money to take advantage of the exchange rate, although the bonds bear the printed statement that they are repayable, interest and principal, in pounds sterling. Alderman F. R. Freeze moved, and the committee adopted, a resolution that the treasurer be confirmed "in paying the bonds in sterling at the current rate of exchange."

Calgary has issued only a comparatively small amount of bonds of this description, payable in London and Calgary, and the amount of saving either way is not large, but it is the principle at stake. When the city redeemed some of these bonds just prior to the war, when sterling was at a premium, the city had to pay the premium, although the bondholders did not get the advantage. The aldermen see no reason why the city should have to stand a loss on the exchange. There is about \$17,500 of this interest due in January, and at the current rate of exchange, the loss, if the city paid in Canadian currency, would be about \$1,750 for the semi-annual period.

### Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Gladstone, Man. ....	\$ 11,000	6	20-years	Feb. 1
Regina P.S.D., Sask.	250,000	6½	30-years	Feb. 1
Brockville, Ont. ....	143,964	6	10-instal.	Feb. 4
Portage la Prairie, Man. ....	54,000	6	20-years	Feb. 11

**Kitchener, Ont.**—Tenders will be received until February 3, 1921, for the purchase of \$20,000 6 per cent. 20-instalment debentures.

**Portage la Prairie, Man.**—Tenders will be received until February 11, 1921, for the purchase of \$20,000 6 per cent. 20-year waterworks debentures, and \$34,000 6 per cent. 20-year electric light debentures. (See advertisement elsewhere in this issue.)

**Winnipeg, Man.**—When the city engaged in a campaign to sell \$1,500,000 6 per cent. 30-year hydro-electric bonds to local citizens last fall, the efforts were described by some as being futile, and they were to some extent, as only \$175,000 were disposed of in the manner intended, the balance being taken up by A. E. Ames and Co. The city realized 96.63 on the sale, which is on a 6.25 per cent. basis.

### Debenture Notes

**Fort Garry, Man.**—The municipality will raise \$50,000 for school purposes.

**St. Vital, Man.**—A by-law authorizing the raising of \$75,000 for school construction, has been defeated.

**Edmonds, B.C.**—The municipality proposes selling \$134,000 debentures over the counter.

**Decker S.D., Man.**—All tenders were rejected on the \$30,000 7 per cent. issue of debentures. The securities are

## Make the Most of Your Investments

When planning an investment, it is advisable to obtain the one which affords the maximum of security, the most convenient facilities for collecting interest, and the highest yield consistent with the two.

Such an investment is to be found in Canadian Government and Municipal Bonds, which, at existing prices, provide interest returns ranging from 6.10% to 7%.

Write for a list of these bonds.

still on the market, and it is hoped to make a better sale in the next three months. The bids received were:—

Harris, Read and Co. ....	92.50
Bond and Debenture Corporation .....	92.00
Clifton Cross Co., Regina .....	91.50

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board from January 8, to January 15, 1921:—

Schools.—Beaverside, \$500 8 per cent. 5-years annuity; Swan Bluff, \$1,500 8 per cent. 10-years annuity; Mountain Lake, \$600 8 per cent. 4-years instalment.

Rural Telephones.—Redpath, \$1,000 8 per cent. 15-years annuity.

**Alberta.**—New school debenture issues totalling \$57,600 have been authorized by the board of public utility commissioners. They represent eighteen separate issues in all parts of the province, and the proceeds are to be used for local educational purposes, in most cases the erection or improvement of school buildings. The largest of the new issues will be that of the Wrentham consolidated school district south of Lethbridge, which will borrow \$12,000 for a building, equipment and vans. Another loan of \$5,500 by the Zawale school district is among those newly authorized by the utility board.

**East Kildonan, Man.**—Application has been made to the provincial government by the municipal council for \$105,000 for housing purposes, Hon. Edward Brown, provincial treasurer, has announced. He also reaffirmed the government's decision not to extend the housing act this year, and intimated that the treasury has \$500,000 worth of 1934 maturity Victory bonds, which the government is willing to exchange with municipalities for municipal debentures. Municipalities with housing problems can receive assistance by such exchange, he said.

**Montreal, Que.**—At a recent meeting of the Civic Improvement League the housing question was discussed. It was stated that the Dominion housing loan was a proven failure, as far as the province of Quebec was concerned, urban congestion still increasing at an alarming rate. It was proposed that the provincial government enact a law at the present session of the legislature to float a loan not to exceed \$20,000,000, and to re-loan the same through the municipal councils or through a special commission, for the purpose of assisting the building of houses for the people on a more equitable basis. These loans, it was suggested, should be made for a period not exceeding 31 years, at not more than 5 per cent., repayable monthly, with a sinking fund to retire the total loan. Provision was also made that the maximum loan on any building should not exceed 75 per cent., with a maximum for any house or tenement of \$6,000.

#### Bond Sales

**Saskatchewan.**—The following is a list of sales reported by the Local Government Board from January 8 to 15, 1921:—

Eight per cent. Schools.—Grainview, \$6,000 15-years, Weed Creek, \$4,000 15-years, Roadside, \$4,000 10-years, H. J. Birkett and Co., Toronto; Husiatyn, \$4,500 15-years, Waterman-Waterbury; Buffalo Head, \$775 5-years, A. Hislop, Arcola; Eigenheim, \$8,000 15-years, R. S. Fleury, Rosthern.

Eight per cent 15-years Rural Telephones.—Tipperary, \$1,600, Regina Public School Sinking Fund; Bulyea, \$550, Eddy, \$200, A. Neale, Bulyea; Gregherd, \$7,600, W. L. McKinnon and Co.

**Wattford, Ont.**—C. H. Burgess and Co. have purchased \$52,000 6½ per cent. 30-instalment debentures at a price of 97.27. Tenders received were:—

C. H. Burgess and Co. ....	97.27
W. A. Mackenzie and Co. ....	97.14

**Sault Ste. Marie, Ont.**—Wood, Gundy and Co. have purchased the following debentures at a price of 91.50: \$6,500 6 per cent. 10-year; \$20,000 5½ per cent. 30-years; \$25,000 6 per cent. 30-years; \$134,500 6 per cent. 30-years; \$10,000 6

per cent. 10-years. The money will be used for schools, parks and other improvements. Tenders on the issue were as follows:—

Wood, Gundy and Co. ....	91.50
Dominion Securities Corporation .....	91.25
C. H. Burgess and Co. ....	90.846
A. E. Ames and Co. ....	89.122
Royal Securities Corporation .....	87.80

The rate of the highest tender was on about a 6.60 per cent. basis.

**Merriton, Ont.**—The town has awarded \$30,000 6 per cent. 30-year debentures to Dymont, Anderson and Co. at a price of 95.137, at which rate the town pays about 6.38 per cent. for its money. Tenders received were as follows:—

Dymont, Anderson and Co. ....	95.137
Harris, Forbes and Co. ....	94.37
R. C. Matthews and Co. ....	94.11
W. L. McKinnon and Co. ....	93.93
C. H. Burgess and Co. ....	93.91
A. E. Ames and Co. ....	93.89
Wood, Gundy and Co. ....	93.79
Bank of Nova Scotia .....	93.75
Canada Bond Corporation .....	92.25
Brent, Noxon and Co. ....	90.023
Housser, Wood and Co. ....	89.85

In addition, the National City Co., Ltd., bid 94.70 for a 20-year issue, while the United Financial Corp., Ltd., also bid 94.36 for twenty-year bonds.

**Brampton, Ont.**—The following bids were received on January 24 for the issue of \$61,138.93 bonds, due as follows:—\$3,668.88 6 per cent., due in 20 instalments; \$1,556.33 6 per cent., due in 30 instalments; \$24,879.16 6½ per cent., due in 20 instalments; \$31,034.56 6½ per cent., due in 10 instalments.—For entire issue—Canadian debentures Corporation, 100.18; A. E. Ames and Co., 98.79; C. H. Burgess and Co., 98.52; Harris, Forbes and Co., 98.377; R. C. Matthews and Co., 98.18; McKay and McKay, 98; United Financial Corp., Ltd., 97.75; Brent, Noxon and Co., 97.53. For 6½ per cent. bonds only—Dymont, Anderson and Co., 99.77; Dominion Securities Corp., 99.647; Wood, Gundy and Co., 98.79. The bonds were awarded to the Canadian Debentures Corporation.

**Simcoe, Ont.**—The town is calling for tenders up till February 3, 1921, on \$28,976 5½ per cent. 30-instalment debentures. The proceeds of the issue will be used for sanitary sewers.

**Saskatchewan.**—There was keen competition for the \$2,000,000 6 per cent. 15-year bonds of the province, the issue going to a syndicate of dealers comprising Dominion Securities Corporation, the National City Co., Ltd., and Harris, Forbes and Co., Inc., by a margin of only \$140 over the next highest bid. At the price secured, the province pays about 6.23 per cent. for its money. Tenders were as follows for bonds payable in Canada:—

Dominion Securities Corp., National City Co., Ltd., and Harris, Forbes and Co., Inc. ....	97.637
Wood, Gundy and Co., and A. E. Ames and Co. ....	97.63
MacNeill, Graham and Co. ....	96.59
W. A. Mackenzie and Co., R. A. Daly and Co., and Hanson Bros. ....	96.53
A. Jarvis and Co. ....	95.817

Three new directors have been elected to the board of the Bank of Hamilton, namely, Robert S. Ambrose, president of the Tuckett Tobacco Company, Allan V. Young, president of the Hamilton Cotton Company, and W. P. Riley, of Winnipeg, president and general manager of Western Grocers, Ltd., a director of the Monarch Life Insurance Company and of the Equitable Trust Company, and vice-president of the Dominion Loan Securities Company.

# Corporation Securities Market

Another Week of Quietness and Easiness Experienced by Canadian Stock Markets—Papers Afford the Most Interest—Investment Securities Still in Demand—Standard Bank Stock Listed—Bank of Hamilton Declares Bonus

ANOTHER week of quietness and easiness was experienced by the Canadian stock markets, and at the close on January 26, prices appeared to have no definite trend. A survey of the lists reveals a number of gains, but at the same time net losses were numerous. It is not the lack of funds that is now holding operations in check, but an absence of desire on the part of traders to participate.

It is hard to define which section of the markets gave the best account of itself, as they were all more or less irregular. The strictly investment securities are still the favorites, although some bank stocks were easier. Canada Steamships and the steel issues were fractionally lower, while Barcelona and Brazilian dropped to slightly lower levels.

Papers afforded the most interest. It had been thought that the statement of the minister of finance to the Pulp and Paper Association last week, that further taxation might be expected by them, would have a depressing effect on the stocks, but no such movement has yet made itself prominent. The sharp advance in Riordon shares was an event which caused the Street to stop and consider, in that it was opposite to expectations. The position of the Riordon Co., however, is favorable, and as manufacturers of the best sulphite pulp on the continent, the outlook of the company is of the best. On the whole, the pulp and paper industry is far from depressed, and the optimistic note sounded by the authorities in the various sections of the trade has brought about a much better feeling.

Trading figures show that the turnover of listed stocks in Montreal was 47,448, as compared with 48,572 in the previous week, while the turnover of listed shares in Toronto was 14,930, as against 14,575 previously. Bonds changed hands on the Montreal exchange to the extent of \$1,607,200, compared with \$1,449,290 last week, while the Toronto figures were \$1,830,700 and \$1,801,500, respectively.

An issue of £1,000,000 Grand Trunk Railway 3-year 6 per cent. notes, matured in London, England, this week. The announcement is made that these notes have been retired. An issue of £2,000,000 of Grand Trunk Pacific 7-year 5 per cent. notes will fall due in London on March 2. This issue is guaranteed by the Grand Trunk Railway. There is a good deal of speculation in banking circles as to whether this issue will be refunded or paid off upon maturity.

The Standard Bank of Canada has listed \$500,000 additional of its stock on the Toronto exchange, this being the new issue, which was made in December at \$175 per share. The authorized capital of the Standard Bank is \$5,000,000, and the amount subscribed and paid up at the present is \$3,500,000.

In addition to the regular quarterly dividend of 3 per cent., the Bank of Hamilton has declared a bonus of one-half of 1 per cent. for three months ending February 28, 1921, when the bank's fiscal year ends. This makes a total distribution of 13 per cent. for the financial year. The divi-

dend and the bonus on new stock will be computed at the same rates, but in accordance with the terms of issue, and both will be payable to shareholders of record at close of business on February 15.

## Capitalization Changes

The following companies, registered under provincial charters in Ontario, have been authorized to increase their capitalization. The shares to be issued in each case will have a par value of \$100:—

Company.	Former capital.	In-creased to
Hobbs Mfg. Co., Ltd., London	\$ 50,000	\$1,000,000
Wagstaffe, Ltd., Hamilton	40,000	1,000,000
Hinde and Daunch Paper Co., Ltd., of Canada, Toronto	250,000	625,000
Pembroke Shook Mills, Ltd., Pembroke	100,000	500,000
Grand and Toy, Ltd., Toronto	50,000	500,000

Application has been made to the Public Utilities Commission of New Brunswick by the Madawaska Light and Power Co., Ltd., for permission to issue \$250,000 bonds and \$500,000 stock. The company owns practically the only site in Madawaska County, N.B., available for development, and about \$750,000 is to finance the undertaking. The commission has not yet stated its decision.

## CANADIAN PACIFIC'S CONSTRUCTION POLICY

Bridge replacement, relaying of rails and improvements to shops and tracks will constitute the early spring work of the Canadian Pacific Railway, according to a statement issued on January 20 in Winnipeg by D. C. Coleman on his return from Montreal, but appropriations arranged by the headquarters staff at Montreal do not contemplate any large investment. Mr. Coleman's statement is as follows:—

"With commercial and financial conditions as they are at present, the Canadian Pacific must proceed with caution in the matter of incurring expenditures. The appropriations for the year had to take into consideration necessity for retrenchment to meet a comparatively light traffic movement. The usual provision has been made for keeping the condition of the property up to present standards, and a considerable amount of bridge replacement, rail replacement and work of that character will be undertaken. In addition, there will be certain improvements to terminal, shop and passing track facilities to enable the grain crop of 1921 to be handled with efficiency. Any large expenditures on capital account will, however, be deferred until the business outlook clears up, and no announcement as to what may be undertaken then can be made at present."

## *The Upward Trend*

Notwithstanding the seemingly alarming over-inflation apparent in the present finances of the world, the tendency seems to be all toward a stabilization of conditions generally.

Business readjustments are making substantial progress. Manufacturers are again turning attention to production. Labor difficulties seem nearer solution owing to decrease of unemployment. Cheaper money is admitted to be in sight and once the channels of commercial activities are properly opened, the gradual return towards pre-war normals will become more apparent.

These conditions undoubtedly have a direct bearing on the Bond Market, and will show in rising prices for high grade securities. Unquestionably now is a favorable time to buy good bonds and over a period present purchases should show substantial increases in values.

## Condensed Advertisements

"Positions Wanted," 3c per word; all other condensed advertisements 5c per word. Minimum charge for any condensed advertisement, 65c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

A FAST-GROWING GENERAL AGENCY, with excellent organization, requires additional representation in their office for the Provinces of Alberta and Saskatchewan. Experienced underwriters of proven ability. We have three inspectors in this field. An exceptional opportunity for the company just entering this territory. Box 373, *Monetary Times*, Toronto.

EXECUTIVE.—Age 35. Twenty years' experience. Eight years in Railway Operating and Construction Department, twelve years in Accounting Department, past five years as General Auditor. Expert Accountant, thorough knowledge of railway and construction materials, well informed in financial matters, seeks engagement. Box 381, *Monetary Times*, Toronto.

WANTED.—By young man with clean record, apprenticeship for secretary of a financial institution. Apply Box 383, *Monetary Times*, Toronto.

# Ogilvie Milling

The ninth in our series of analytic studies of Canadian Industrial Companies is devoted this month to the Ogilvie Flour Mills Company Limited.

This study discloses facts of rather unusual significance.

**Montreal Power Company Made Satisfactory Showing Despite Higher Operating Expenses—  
Brompton Company Outlines Position of Subsidiaries at Annual Meeting—Bell Telephone Hearing  
Concluded and Judgment Reserved—Lower Gas Price Advocated by Toronto Civic Authorities**

**Cape Breton Electric Company, Ltd.**—Gross earnings of the company for the twelve months ended November 30, 1920, were \$637,586, an increase over the previous period of \$57,717. Operating expenses, however, increased \$90,471, so that net earnings were \$95,326, or \$32,754 lower than the figure for 1919.

**Southern Canada Power Company, Ltd.**—Notwithstanding the slowing down of industrial activity, the gross earnings for December show an increase of 18 per cent., and a net of 30 per cent. over the same month of 1919; and for the quarter the gross increase is 18 per cent. and the net increase 25 per cent. over the same period of 1919, thus showing a steady growth in the demand for light and power. The figures are as follows:—

	Dec. 1920.	1919.	Increase.
Gross .....	\$ 67,063	\$ 57,184	\$ 9,878
Operating expenses and purchasing power .....	32,764	30,925	1,838
Net earnings .....	\$ 34,299	\$ 26,259	\$ 8,030
Three months ending December 31, 1920:—			
Gross .....	\$193,758	\$164,969	\$28,788
Operating expenses and purchasing power .....	100,413	89,765	10,648
Net earnings .....	\$ 93,345	\$ 75,204	\$18,140

**Consumers' Gas Company.**—Finance Commissioner Ross and City Auditor Scott, of Toronto, have presented to the council the final report of the independent audit of the Consumers' Gas Company's books by Henry Barber. "We estimate the average revenue per thousand feet of gas for the company's financial year ending September 31, 1921, to be \$1.22.66 cents, and the average cost \$1.20.46, leaving a surplus of \$2.14 per thousand," reads the report. "The total estimated increases of expenses for the year is placed at \$957,377.48, or about 19 cents per thousand feet of gas. The major increases, it is pointed out, are for coal and gas oil, in which commodities it is reasonable to expect a decided decline in price within the next few months, in which event the manufacturing cost of gas will be lower than our estimate, and the price should be reduced to the consumer accordingly."

**Bell Telephone Company.**—Argument in the rates case before the Board of Railway Commissioners terminated on January 25 at Ottawa. The hearing of the application for an increase in rates, with which was to be coupled the inauguration of the measured service system, opened at Ottawa in September last, and hearings were subsequently held at Toronto, Hamilton and Montreal. The application was opposed by practically all the municipalities and boards of trade and by the provincial governments. Telephone and public service experts from both sides of the international border were called as witnesses for and against the application, and the hearings throughout have been participated in by nearly a score of lawyers.

Hon. F. B. Carvell, chairman of the Board of Railway Commissioners, did not take any part in the recent hearings, the chair being taken by the assistant chief commissioner, Dr. S. J. McLean, who had with him on the bench Commissioners Nantel and Boyce. The commissioners reserved judgment at the close of the argument of Glyn Osler, K.C., of counsel for the Bell Company.

**Brompton Pulp and Paper Company, Ltd.**—The annual meeting of the company was held in Montreal last week, when the annual report, which has already been published in these columns, was submitted to shareholders. The prin-

cipal event of the meeting was the outlining of the company's United States subsidiaries' position at the request of one of the shareholders. F. N. McCrea, president, answered the question regarding dividends from American mills by explaining their position. Since the Clermont Company was purchased on January 1, 1919, it has practically paid for itself. The original cost was \$1,184,000, on which Brompton made the first payment of \$300,000. The balance of the debt has been paid by the mill itself, and only \$175,000 remains unpaid. As the company will earn more than that this year, there is every reasonable assurance that Brompton will soon be in receipt of dividends from that source. He stated that the reason these American mills were first secured was because pulp enters the United States duty free, while kraft and other paper bears 25 per cent. duty. With the American plants Brompton has been shipping the pulp there duty free and selling the paper all over the United States, these mills being paid in, of course, American funds. In this connection he stated that the first sulphate pulp, and on the continent, was made at the Brompton plant at East Angus in 1907.

Mr. McCrea then dealt with the Groveton plant, which was purchased on January 1, 1919, at a cost of \$2,500,000. The quick assets and quick liabilities were also taken over, the former then being \$1,395,003 and the latter \$758,673, leaving surplus quick assets of \$636,329. Quick assets are now \$2,217,608 and quick liabilities and reserve for taxes \$1,043,275, leaving surplus quick assets of \$1,174,333. Since purchasing, new additions and improvements (all extensions) have been \$632,790, making the total value \$3,670,794. They now have total liabilities of: Bonds outstanding, \$1,250,000, and balance payable on land, \$400,000, a total of \$1,650,000. Against this may be set surplus current assets as already mentioned of \$1,174,333, or a net balance of debt of under \$500,000. This includes the bond issue, which has some eighteen years to run before maturity. Inventories have been taken at some \$300,000 less than cost in getting at the figures.

**Montreal Light, Heat and Power Company.**—Twenty months has elapsed since the last report of the company was published as a consequence of the change in the fiscal year of the company enacted by the shareholders at their last general meeting. For the purpose of simplicity and to permit of future comparisons the directors have divided the lapsed period into two parts, namely, eight and twelve months. Surplus revenue resulting from the operations of the eight-month period, after full provision for expenses and depreciation, as well as fixed charges and dividends for the period, has been transferred to the surplus account, leaving only the twelve-month period to deal with in detail.

The result of operations for the year ended December 31, 1920, shows gross revenue of \$12,748,409 and net income of \$3,804,506, as compared with \$10,939,272, and \$3,605,181 for the year ended April 30, 1919. Dividend payments show an increase of \$658,448 at \$3,220,739, while the amount transferred to general surplus, subject to income tax, is shown as \$563,767, as compared with \$1,022,890 in the 1918-19 period.

The balance sheet shows a much stronger position. Current assets, including investments of \$4,642,632, and cash, \$2,222,324, amount to \$9,874,631, as against current liabilities of \$3,050,153. The following are some of the other principal changes:—

	1920.	1918-19.
Stocks, bonds and interests in other corporations .....	\$63,495,650	\$65,428,365
Advances to subsidiary companies	4,712,485	1,765,237
Capital stock .....	64,475,500	64,126,100
Reserves, depreciation, etc. ....	6,778,674	6,268,801
Surplus .....	3,243,652	2,608,204

AUDITORS' CERTIFICATE

We have examined the books and accounts of The Bank of Nova Scotia at its Chief Office and have been furnished with certified returns from the Branches, and we find that the above statement of Liabilities and Assets as at December 31st, 1920, is in accordance therewith. The Bank's investments and the securities and cash on hand at the Chief Office and at several of the principal Branches of the Bank were verified by us as at the close of business December 31st, 1920, and in addition we visited the Chief Office and certain Branches during the year, when we checked the cash at the Chief Office and verified the securities and found them to be in agreement with the books. We have obtained all information and explanations required, and all transactions of the Bank which have come under our notice have, in our opinion, been within the powers of the Bank. And we certify that the above statement of Liabilities and Assets as at December 31st, 1920, is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the books of the Bank.

A. B. BRODIE, C.A.  
D. M. K. McCLELLAND, C.A. (Auditors)  
of the firm of Price, Wetherhead & Co.

Toronto, Canada, 15th January 1921.

## RECENT FIRES

Empress Theatre at Prince Albert Destroyed with Loss of \$90,000—Masonic Temple at Moose Jaw Suffered Loss of \$50,000—Large Fires in Weston, Ont., and Winchester, Ont.

Fernie, B.C.—January 14—Store building belonging to Mr. Lasalle and a small stable belonging to U. Gales were destroyed by fire.

Grappler Creek, Barclay Sound, B.C.—January 10—A fire destroyed the salmon cannery owned by Banfield Fisheries, Ltd., together with 160 tons of salted herring.

Insurance as follows: On clothing factory—Atlas, \$7,500; British Colonial, \$10,000; British Empire, \$2,500; Century, \$7,500; Girard, \$5,000; Guardian, \$15,000; North America, \$7,500; National of Hartford, \$7,500; North British and Mercantile, \$8,000; Northern, \$15,000; Norwich Union, \$3,000; Royal Scottish, \$7,500; United States, \$10,000; Yorkshire, \$4,000; Tokio, \$5,000; others, \$3,000. Total, \$118,000. Loss about 75 per cent. The insurance on retail store on the ground floor is stated to be \$70,000. Complete list not available. Loss about 50 per cent.

Marmora, Ont.—January 25—Marmora's newest business block was destroyed by fire.

Montreal, Que.—January 14—A fire destroyed the W. R. Cuthbert and Co.'s brass finishing plant, 41 Duke Street. Insurance as follows: Lloyds' (England), \$14,500; Stuyvesant, \$4,000; Northern, \$5,000; Alliance of Philadelphia, \$5,000; Sun, \$3,000; National of Hartford, \$2,500; Norwich Union, \$2,500; Royal Scottish, \$2,500; Union of Canton, \$2,500; Midwest, \$2,000; Firemen's Underwriters, \$2,500; Century, \$2,000; London Guarantee, \$2,000; North Empire, \$1,500; Queen, \$1,500; British Empire, \$1,500; Employers, \$1,500; North America, \$1,000; Firemen's Fund, \$500; Providence-Washington, \$500. Total, \$60,000. Loss, total.

Montreal, Que.—January 23—A fire broke out in the kitchen of Oscar Lemire's home, 424 Cuvillier Street, doing considerable damage.

Moose Jaw, Sask.—January 23—The Masonic Temple building on Main Street was completely gutted by fire. The total loss is estimated at \$50,000.

New Liskeard, Ont.—January 26—Fire originating near the furnace in the basement did \$10,000 damage to the building and contents owned by the Binkley Co., general storekeepers.

Plattsville, Ont.—January 22—The Plattsville mill was destroyed by fire. The loss is partly covered by insurance.

Port Stanley, Ont.—January 26—The metal barn owned by Frances Stanton was destroyed by fire.

Prince Albert, Sask.—January 20—The Empress Theatre was destroyed by fire with a loss estimated at \$90,000, with insurance of \$45,000.

Quebec, Que.—In our issue of January 14th a fire was mentioned as located in the city of Quebec, the college that was destroyed by fire on December 15th last, with losses at \$500,000. This college is situated 75 miles from Quebec City, at Ste. Anne de la Pocatiere village, on the south shore of the St. Lawrence River.

Sydney, N.S.—January 21—A store building owned by Dan Gallivan, on Lingan Road, was damaged by fire. The fire started from an overheated stove. The loss is partly covered by insurance.

Sylvan Lake, Alta.—January 22—Lake view boarding-house was destroyed by fire when a gasoline lamp exploded. The loss is estimated at \$8,000, with insurance of \$3,000.

Three Rivers, Que.—January 20—The two tenement houses recently built by Henri Marchand at Cap de la Madeleine were destroyed by fire. The loss is partly covered by insurance.

Toronto, Ont.—January 20—Fire broke out in the shoe shine establishment in the basement of the Royal Bank

Building, doing damage to the extent of \$1,000 to the building and \$1,500 to contents.

January 24—Residence of Mr. Swan, 260 Lee Avenue, was damaged by fire. The loss is \$800 to building and \$600 to the contents.

January 26—Sparks from a picking machine started a fire in the Standard Mattress Company premises at 27-29 Davies Avenue. The loss is estimated at \$6,000 to contents and \$800 to building. About \$100 damage was done to the home of Mrs. Willard, 44 Ann Street, by fire. The cause of the blaze is unknown.

Tyron, P.E.I.—January 12—A fire destroyed the workshop and garage of Thos. McNeill, together with contents, including five automobiles. Loss, \$12,000.

Vancouver, B.C.—January 18—Residence of R. A. McIntosh, of 2330 Alder Street, was damaged by fire. There was no insurance.

Weston, Ont.—Factory of the Reliable Bedding Co. was destroyed by fire. The loss is estimated at \$30,000, of which about a third was insured.

Winchester, Ont.—January 20—A fire broke out in the office of the Winchester "Press," and spreading rapidly to the adjoining building which was occupied as the local office of the Bell Telephone Co. The loss on the two destroyed buildings was estimated at \$12,000, half of which is covered by insurance.

## ADDITIONAL INFORMATION CONCERNING FIRES

Aylmer, Ont.—January 4—Icehouse of the Carnation Milk Products Co., Ltd., was damaged by fire. The loss is \$3,741, with insurance of \$359,350.

Edmonton, Alta.—December 25—The building at 10236-40 Jasper Avenue, owned by the Banque d'Hochelega, was insured for \$21,000 and the loss as adjusted is \$10,925. The other building was insured for \$20,000, but no damage resulted to the building itself. The contents of the stores were insured for \$48,700, and the losses as adjusted amounted to \$28,452. The adjustments were made by the Lilly Adjustment Agency, Edmonton.

Manitoba.—During the month of November there were 150 fires reported, with an estimated loss of \$342,187. The following is a list of the class of structure destroyed or damaged: Dwellings 44, farm buildings 40, stores 8, warehouses 5, apartment buildings 4, garages 3. Stoves and furnaces caused 24 fires, hot ashes caused 22 and matches caused 10.

Moncton, N.B.—December 15—The "Times" Publishing Building was damaged by fire. Insurance on damage to building, \$4,200, and \$9,500 on stock.

Regina, Sask.—December 23—The shops of Alex. Young Co., Ltd., marble and stone works, were damaged by fire. Loss on building, \$4,000; insurance, \$2,500. Loss on machinery, \$15,000; insurance, \$4,500. Loss on stone and marble, \$6,000, no insurance. The fire was caused by an overheated stove. The riding school of the Royal Canadian Mounted Police was destroyed by fire. The total loss was \$30,000, with no insurance. The cause of the fire is unknown.

St. Catharines, Ont.—December 19—Three boathouses were destroyed by fire. The house owned by T. Crowley suffered a loss of \$700, with insurance of \$400. House owned by T. O'Gorman was valued at \$1,954, with insurance of \$700. Boathouse owned by Allan Grass valued at \$1,200; insurance of \$500, with a loss of \$146.

St. Hyacinthe, Que.—January 4—Fire of unknown origin caused a loss of \$25,000, covered by insurance.

Toronto.—The fire losses for the year 1920 are estimated at over one million dollars, an increase of losses of \$529,944 over 1919. The total damage for the year 1920, according to the fire department's statistics, was \$1,260,906. During the twelve months 2,496 alarms were responded to by the fire sections. Chief Russell reports that the work of the double-platoon system had proven successful, and that, starting on New Year's Day, the firemen would be given one day off each week. The motorization of the department has been continued, and during the year seven new combination trucks were purchased. Five persons met their death as a result of fire in the city of Toronto during the past year.

## Loans Accounts Show Heavy Contractions

**December Bank Statement Shows Declines in Commercial and Municipal Borrowings—Foreign Credits and Canadian Call Loans Increase—Overdue Debts are Small in Volume—Savings Deposits Higher by One Million—Cash Accounts are Lower but Liquid Position Shows Improvement**

	December, 1919.	November, 1920.	December, 1920.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand .....	\$ 703,329,292	\$ 686,754,091	\$ 657,496,742	- 6.5	- 4.2
Deposits after notice .....	1,138,086,691	1,292,009,008	1,293,007,488	+ 13.6	+ 0.08
Current loans in Canada .....	1,207,109,046	1,357,973,118	1,301,804,342	+ 7.8	- 4.1
Current loans elsewhere .....	168,955,696	169,677,657	184,540,423	+ 9.5	+ 8.9
Loans to municipalities .....	42,635,290	65,487,171	55,973,926	+ 30.9	- 15.4
Call loans in Canada .....	125,888,760	108,471,340	114,703,246	- 8.8	+ 5.5
Call loans elsewhere .....	172,232,161	218,183,191	211,442,652	+ 22.7	- 3.2
Circulation .....	217,611,079	253,576,531	246,859,667	- 0.4	- 2.8

TWO of the most important conditions reflected in the December bank statement, are declining business and easy money. To those who have studied the situation closely, these facts are pretty well known, but the above comparisons corroborate any assertions which may have been of an abstract nature.

The decline in current loans in Canada and demand deposits were within expectations, while the decrease in note circulation was a seasonal event. December is known by bankers as one of the redemption months for note circulation, because of the reaction from the demands for the crop movement.

Current loans have declined about 8.2 per cent. since the peak was reached last September, but this account is still 7.8 per cent. above the 1919 figure, indicating that further contraction is still in order. A factor which may be considered in relation to current loans is the comparative smallness of the overdue debts. Little significance has been attached to this account, because it is said that there is no excuse for ordinary business paper to be overdue. Where there are a great number of loans, however, and when business is depressed, it is reasonable that at least a small portion should be overdue.

The course of the current and call loans in Canada during the past thirteen months is given in the following figures:—

	Current in Canada.	Call in Canada.
1919—December .....	\$1,207,109,046	\$125,888,760

December .....	1,301,804,342	114,703,246

The increase of about 5½ per cent. in call loans in Canada signifies the release of funds for speculation and purposes other than those pertaining to general business. This is one of the signs of easiness in money. Call loans abroad declined during the month, but this is attributed not to the inability of the banks to supply funds, but rather to the falling off in demand. Operations on the New York stock exchange were not very active in December, and this was the chief reason for the falling off in loans. The monthly movement of call loans abroad since January, 1917, is illustrated by the following figures:—

	1917.	1918.	1919.	1920.
	\$	\$	\$	\$
January ..	155,747,476	132,387,066	140,819,656	170,206,805
February ..	162,344,556	160,239,494	155,983,681	184,469,882
March .....	161,616,735	167,296,701	160,116,443	205,202,133
April .....	159,156,054	179,818,531	155,533,666	206,229,451
May .....	168,692,675	172,259,879	157,176,325	213,964,182
June .....	159,309,133	170,034,476	167,236,045	219,214,431
July .....	151,875,676	167,112,836	178,098,434	203,045,209
August .....	176,610,625	160,544,990	174,176,578	193,888,245

parison with previous figures, but that there should be an advance at all, in times such as these, is satisfactory, to say the least. The trend of notice and demand deposits in Canada during the past thirteen months is shown in the following table:—

	Deposits payable on demand	Deposits payable after notice
1919—December	\$703,329,292	\$1,138,086,691
1920—January	621,408,024	1,163,297,037
February	620,069,555	1,187,027,307
March	657,412,028	1,197,719,570
April	652,918,760	1,209,573,990
May	645,957,229	1,229,073,515
June	659,622,583	1,243,700,977
July	639,415,025	1,253,170,443
August	640,361,707	1,261,647,732
September	677,286,905	1,270,194,097
October	687,651,781	1,271,275,751
November	686,754,094	1,292,009,008
December	657,496,742	1,293,007,488

The course of deposits account during the past six years is shown in the following table:—

Dec.	On demand.	After notice.	Total.
1915	\$423,690,384	\$ 720,990,267	\$1,144,680,651
1916	458,208,417	845,006,717	1,303,215,134
1917	569,441,871	995,978,013	1,565,419,884
1918	711,034,060	958,473,557	1,669,507,617
1919	703,329,292	1,138,086,691	1,841,415,983
1920	657,496,742	1,293,007,488	1,950,504,230

Deposits abroad increased by about \$5,000,000 during the month, but the Dominion government reduced its credit balance by more than \$17,000,000. The amount due provincial governments was slightly increased.

### Liquid Position Improved

Notwithstanding a substantial reduction in the cash assets of the banks, their liquid position, as a whole, was improved. The ratio of quick assets to liabilities to the public was 24.87 per cent., as compared with 24.34 per cent. in November. The ratio of liquid assets, including call loans

Of the deposit in Central Gold Reserves \$11,502,533 is in gold coin, the balance is in Dominion Notes  
 J. C. SAUNDERS, Deputy Minister of Finance.

and securities, to liabilities to the public was 49.40 per cent, compared with 48.80 per cent. in the previous month. These facts further emphasize the easiness of money, as it is considered good banking if quick assets are but 35 per cent. of the total liabilities to the public.

The reduction in cash assets during the month is shown in the following figures:—

	Capital and Reserves	Capital	Capital
Gold and sub-coin in Canada	\$ 1,401,447	.....	.....
Gold and sub-coin elsewhere	2,632,019	.....	.....
<b>Total change</b>	<b>\$ 4,033,466</b>	.....	.....
Dominion notes in Canada	13,149,975	.....	.....
Dominion notes elsewhere	1,625	.....	.....
<b>Total change</b>	<b>\$13,151,600</b>	.....	.....
The only other principal changes were in current loans abroad and municipal advances. The former account was increased by about \$15,000,000, thus disposing of some of the idle funds which the banks could not place in Canada. On the other hand, municipalities reduced their obligations by nearly \$10,000,000, but still outstanding loans are nearly 31 per cent. in excess of the figure as at December, 1919.			
<b>Capital and Reserves</b>			
Slight additions were made to the subscribed and paid-up capital and reserve last month as follows:—			
Bank	subscribed	paid up	Reserve.
Standard	\$52,493	\$ 52,493	\$ 39,370
Merchants	.....	.....	43,490
Provinciale	.....	.....	2,730
Royal	.....	.....	29,950
Hamilton	.....	.....	23,940
Home	.....	.....	105
<b>Total additions</b>	<b>\$52,493</b>	<b>\$153,153</b>	<b>\$266,315</b>

## BANKRUPTCY ACT STILL IN PROCESS

Question May be Again Gone Into Fully—The Insurance Amendment—Estimating Canada's Bill Against Germany

(Special to *The Monetary Times*.)

Ottawa, February 3, 1921.

**A**N effort is being made by Mr. Thomas Mulvey, Under-Secretary of State, to get provincial officials together in a conference so as to get a symposium of their views with regard to bankruptcy legislation. Since the present federal bankruptcy act came into force on July 1 last, there have been complaints from some of the provincial governments that it overrides a good deal of provincial legislation.

There is a mistaken idea abroad that under the present law, bankruptcy proceedings must be taken under the federal law, but initial proceedings may be taken under provincial law, and unless one of the creditors invokes the bankruptcy act passed in the federal parliament in 1919, any bankrupt business might be wound up without recourse to the federal machinery at all. However, once a creditor, any creditor, invokes the Dominion law, there is no doubt that the Dominion statute rides across provincial enactments here and there.

### Present Act Was Fully Discussed

On the Dominion side it is argued that the act was printed and circulated for a year before it was put into force, and that no complaints came from the provinces. It is desired to have a conference at which the matter can be fully threshed out, and amendments devised to meet the situation, as in a matter of such importance to the whole credit structure of the country, it is thought inadvisable to have important amendments coming before parliament at every session. The business world would not be just sure where it stood if the law were constantly changing. It is realized that the matter is a very complex one, however, and that for a long term of years there will have to be yearly attention to details of procedure whenever matters are found to be working less smoothly than they might. If possible, the conference of federal and provincial officials will be held early in the present session of parliament, so that amendments may be introduced at the present session, if found desirable. If it cannot be arranged the important modifications of the bankruptcy act desired by some of the provinces could not be made before the 1922 session.

In *The Monetary Times* of Friday last a full description is given of the proposed new bill to be introduced at the coming session of parliament for the purpose of giving insurance companies powers possessed in Great Britain and in the United States to go into different forms of insurance under certain regulations. That bill is not yet in its final shape, although the outline draft, submitted by the superintendent of insurance to the Life Officers' Association for consideration, contains all the essential features. The final draft will not be available until after the session begins.

### Canada's Reparation Bill

Cables are passing daily between officials of the Reparation Commission in London and Dominion government officials, whose duty it is to make out Canada's bill for reparation to be included in the British empire's quota of the 226,000,000,000 gold marks demanded from Germany by the Allies. Full details of Canada's expenses other than that of keeping a hostile force in France have gone forward, and accountants overseas are busy at work trying to see what Canada's expenses would have been if pensions and separation allowances had been on the French scale which is accepted in the Peace Treaty as the basis for reparation. The pension payments of Canada when reduced to the French scale will be capitalized. The total bill as Canada sends it forward, based on what is allowed in the Peace Treaty, amounts to between six and eight hundred million dollars. All the items are being closely checked and questioned overseas, including the amount for the Halifax disaster, and the ultimate amount

of the bill may be much smaller. When this process is finished for the empire, percentages will be struck. The entire proportion of the British indemnity has been fixed, it is stated by officials in close touch with what is going on overseas, at 22 per cent. of the total reparation sum. That would be 49,720,000,000 gold marks. Canadians have stuck out for 5 per cent. of the whole British empire quota, which would be \$497,200,000, allowing five gold marks to the dollar. Therefore, a shrinkage to this point is certain, and if the view of some officials overseas hold, the total received by Canada would be less than one hundred million dollars. The British empire total reparation bill is larger than can be collected under the indemnity arrangement submitted to Germany.

## REACTIONS IN BUSINESS COMMENTED UPON

Financial Concerns Look Towards Future, However—Winnipeg Offering More Bonds

(Staff Correspondence.)

Winnipeg, February 3, 1921.

**E**XCELLENT winter weather prevails in Winnipeg, and business in many lines is reported to be improving. This is the season of the year for conventions, and a great many farmers and out-of-town people are in the city. At the various annual meetings of financial and insurance concerns, a very good feeling is expressed in the comments of various officers, and while things are still quiet throughout the west, the outlook for the spring is quite encouraging.

### Hemp-Growing Concern Started

E. F. Hutchings, president of the Great West Saddlery Co., has been appointed president of the Canada Fibre Products Co., which will go extensively into the hemp industry during the present year. This company has been organized principally through the efforts of Col. William Grassie, who is vice-president. The land in Manitoba is quite suitable for the growing of hemp, and the company will seed 1,000 acres of land in the northern part of the province during the present season. It is stated that the growing of hemp will solve several important problems connected with agriculture in Manitoba, and that, in addition to the beneficial results which have been indicated, there will be by-products of almost equal commercial value. Among the agricultural advantages claimed for hemp growing is the prevention of soil drifting, the enrichment of the land, and the destruction of noxious weeds.

W. D. Campbell, former bank manager, and in recent years connected with the credit department of Marshall Wells and Co., has been appointed manager of the estates department of the Traders' Trust Co., whose head office is in Winnipeg.

### Local Financing

The city of Winnipeg are offering this week \$750,000 6 per cent. 20-year debentures, and are giving the buyer the option of an additional \$500,000 at the same price. These bonds are payable in Canada only. Local predictions are that the price would be around 97.25.

The opening of the provincial legislature of Manitoba is set for February 10. This session is likely to be a very important one, as a great change has taken place since the last legislature. A large number of labor and farmer representatives have been elected and the combined strength of these outnumber the government supporters.

The local wheat market took a decided advance to-day, the closing prices being as follows: May wheat, 1.69; July, 1.60%; May oats, 48%; July, 48%. Elevator companies report very little farmers' wheat has been sold on the recent decline in prices.

The Victoria, B.C., Board of Trade has abandoned the old name, and will now be known as the Chamber of Commerce. J. H. Beatty is president.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

### DEPOSITARIES FOR PUBLIC SAVINGS

USUALLY unconcerned as to the solvency of financial institutions, the public is at times eager to act when signs of weakness are shown. It is for this reason that sound finance requires depositaries of public savings to be at all times prepared to meet demands upon it. In Canada the maintenance of an adequate reserve of quick assets has been largely left to the financial institutions, following the practice in the United Kingdom, while the United States, always more ready to express its principles in statutory form, has passed legislative enactments to a similar purpose. In Canada our public depositaries are the banks which are exclusively under the control of the federal government, and loan and trust companies, which may be incorporated either under provincial or Dominion authority. The proportion of quick assets to deposits is a matter which is left entirely to the banks. In the case of the loan and trust companies, however, there are strict limitations as to the amount of deposits which may be received, and there is now a movement on foot to enlarge their deposit receiving powers so that a larger amount of funds may be available for investment.

The banks, however, limit the use of most of their funds to the purchase of commercial paper, etc., maturing in a few months. Their entire capital is therefore turned over very quickly, so that while some cash must be kept on hand to meet day to day demands from depositors and note-holders, and even extraordinary demands in time of stress, the continual flow of maturing paper ensures ability to meet a prolonged demand for liquidation of these obligations. The position of a loan and trust company which invests chiefly in bonds and mortgages is different, for here the turnover of capital is relatively much slower. The practice pursued thus far of financing mortgage loans, which mature in a few years, by the issue of debentures of a similar term is sound, and should be adhered to in the main. The conditions which have recently restricted the operations of loan and trust

companies are temporary and should not be reflected in legislation of a permanent character. While the exact ratio of cash to demand obligations must be determined by each company separately, legislation which presumed to fix a margin of safety which might prove too narrow would be a blot in the financial record of the Dominion or of the province concerned.

### CANADA AND THE REPARATION TERMS

THERE is a possibility of Canada receiving a small portion of the indemnity which the allies are now trying to force upon Germany. As our interest in the war was not financial, however, the delay is not causing any concern. Great Britain is supposed to get 22 per cent. of the total reparation. Out of that percentage, Canada will have a share estimated from 5 to 7 per cent. When she will get it, and how much it will amount to in real cash cannot be said. In any event the Dominion government, eventually, does not regard the German indemnity in the light of a very liquid asset.

The allied decision to demand that Germany pay 226 billion marks in gold in 42 years has apparently satisfied all parties, including France, although the German side has yet to be heard. The decision is based, presumably, on what the experts consider Germany will be able to pay. The announcement may have the effect of causing Germany to undergo a rigid course of deflation and economy, provided the government is strong enough to impose such a regime. On the other hand the terms may cause a strengthening of the reactionary elements within the country. The situation in Germany just now is obviously critical. She is in a position where the imposition of a great new load or of a definite load may prove the last straw that will break her back. A vital essential to her welfare and recovery is internal peace. Will the demand of the Allies cause internal disturbances and an outcry against the orderly processes of government, or will they have the effect of sobering the German people and fore-

ing on them a realization of their position and the means that must be taken if their country is not to suffer collapse and the trials and humiliation that go with such a national calamity?

A NATIONAL DISAPPOINTMENT

CANADA has failed to realize the hopes of the fathers of confederation, maintains a Victoria correspondent of *The Monetary Times*. "There must be something wrong with the present system of confederation when we look at present circumstances," he says. "Confederation is sixty years old. We have the best and richest part of the North American continent; we have a paltry eight millions of men, women, children and imbeciles; we have heavy, cumbersome systems of government, federal, provincial and municipal; we are head over ears in debt; our few manufacturers are coddled and wet nursed to suffocation, so much so that most of the energy is sapped out of them, and when the chilliness of a little breeze of competition blows, they button up their fur coats and run off to Ottawa to get more protection from Mother against the bad boy who threatens to win their marbles in a straight game. The general run of the public take the cue, until the farmer wants government assistance to build a path to his chicken coop, and the fellow who starts a peanut stand in the city poses as a promoter of industry and asks for some concession from the municipality. And so on along the line. We have spent untold millions in immigration, and haven't retained one-tenth of it among us. Our youth has to go elsewhere for a living instead of growing up with the country. The labor element, the most soulless of the war profiteers, are also pap-fed to the point of gluttony by protective legislation. The average person asks what is the reason? The answer is: (1) The manufacturers and bankers can finance the politicians; (2) labor is an organized vote and is purchasable.

"We nearly bust our vocal chords singing 'God Save the King,' and at the same time send a customs officer to search his valise if he should visit us—in other words we bellow ourselves hoarse about our Grand Old Mother Country, and slap her in the face with a high tariff wall at the same time, so as to protect our infant industries, industries which have been in their infancy from 1867, and are still in the sucking stage."

Our correspondent believes that Vancouver Island could do better if free from the Dominion, setting up a free-trade colony which might become a manufacturing centre for Canada. It appears to be difficult, however, for England, with its free trade heritage of nearly a century, to maintain the principle. One of the first moves of every self-governing British colony seems to be to surround itself with a protective tariff, and it is difficult to see how Vancouver Island, if it could ever adopt such a policy, could stick to it. In any case sentiment in Canada does not at the present time lend a ready ear to sectional movements, and Vancouver Island's influence can be more usefully applied towards a moderation of the present national tariff than towards separation from it.

THE IRREDUCIBLE HOURS OF LABOR

A NEW YORK clerk asked for a raise. Gradgrind replied: "Why do you want a raise? There are 365 days in a year; you work 8 hours a day, and that is 122 days. There are 52 Sundays in a year; you get them off. That leaves you 70 days. There are 14 holidays and two Jewish holidays, which you get, which leaves you 54 days. You take one hour off for lunch, which leaves you 40 days. You get Saturday afternoons off, which makes 26 days, which leaves you 14 days, and I give you two weeks' vacation each year. When do you work, anyway!"

A Canadian business man has encountered the same problem for he finds that the preparation of government statements has so eaten into the time previously devoted to private telephone conversation and book agents that there is absolutely no opportunity to gossip in the office. The situation has been found unbearable to the clerks who have consequently demanded an increase in pay. He is quite perplexed over the situation and would like to know what to do. He finds that the office hours are divided approximately as follows:—

(1) Coming late, going early, lunch and days off ..	25%
(2) Attending to beggars .....	5%
(3) Answering wrong telephone calls .....	5%
(4) Washing and brushing up .....	10%
(5) Interviewing book agents and vendors .....	7%
(6) Preparing various government statements, Dominion, provincial and city .....	35%
(7) Private telephone conversations .....	10%
(8) The work of the firm .....	1%
(9) Correcting mistakes in item No. 8 .....	2%
	100%

Public school children of Fort William, Ont., have \$14,922 on deposit in the local school bank, which was established in 1916.

"Good Business" propaganda on the part of manufacturing and wholesale firms must be coupled with the price reductions which are necessary to make business good.

In spite of an immense reduction in exports to Great Britain, total exports in 1920 were greater than in 1919 or 1918. Our imports, however, show a much greater increase.

The large corporation is daily becoming more prominent in Canada. A few years ago the formation of a million dollar corporation was a rare event, now there are several every week.

Saskatchewan's failure in local financing proves the futility of this method in the case of rapidly growing communities, and the advantages of a free movement of capital from where it accumulates to where it is needed.

The annexation by Montreal of twenty-two adjoining municipalities would clear up a situation which is confusing to the bondholder. On the other hand, would the city's credit be enhanced by the addition of more financial difficulties?

The need for a recognition of deflation by all parties in industry, coupled with a fair measure of optimism as to the ability of this country to maintain business on sound lines, is seen from the summary of board of trade results published in this issue.

No dividends are probable for shareholders of the defunct Farmers' Bank, according to G. T. Clarkson, liquidator. The most that the assets will do is to redeem the note issue and provide for liquidating expenses. All the assets have been disposed of, with the exception of a few judgments of doubtful value and a one-quarter interest in the Cochrane mining claim at Cobalt, which may have some value.

QUITE SO

They met by chance in the waiting room of a railway station. "My friend," began the man with the bag full of tracts, persuasively, "have you ever reflected on the shortness of life and the fact that death is inevitable?"

"Have I?" replied the man in the big overcoat, cheerfully. "Well, I should say so. I'm an insurance agent."

## PERSONAL NOTES

J. L. ROUTLY, branch manager for the Imperial Life at Port Arthur has recently been elected president of the Port Arthur Board of Trade.

SIR ADAM BECK, chairman of the Ontario Hydro-Electric Power Commission, has returned to Canada after a holiday for a few weeks in Europe.

STANLEY JOHNSTON, of Johnston and Ward, the Montreal investment brokerage house, successors to F. B.

McCurdy and Company, with branches in Quebec and the Maritimes, has been elected a member of the Toronto Stock Exchange. Mr. Johnston has had considerable experience in financial circles in Canada. He was with the Union Bank of Halifax from 1903 to 1909, when he joined the Nova Scotia Fire Insurance Company, remaining with that organization until 1911. That same year he became associated with F. B. McCurdy and Company, and when the war broke out he went overseas with

the Canadian Machine Gun Corps. He returned to Canada in 1919, and in October, 1920, with his partners, Alfred Bowser, K. R. Schofield and R. H. Metzler, took over the business of F. B. McCurdy and Company.

RUSSEL G. DINGMAN, who has been manager of the bond department of the Toronto investment house of F. H. Deacon and Company, for the past two years, has been admitted to partnership.

WILLIAM J. BALFE, fire insurance adjuster, Toronto, has accepted a position with the Underwriters Adjusting Company, of Chicago, as assistant manager of the Michigan department with headquarters at Detroit.

MAJOR C. B. TOPP, D.S.O., M.C., has recently been appointed director of the Government Insurance for Returned Soldiers. It is intended to open offices in various centres throughout the Dominion, one having already been opened in Montreal.

FRANK S. JOHNSON, assistant manager for Canada of the Preferred Accident Insurance Company, of New York, is severing his connection with that company, and on March 1, will join the insurance agency of Carl J. Jennings, Hamilton, Ont., as office manager and to handle claims.

J. H. ASHDOWN, of the Ashdown Hardware Company, Winnipeg, who was elected president of the Western Canada Colonization Association, has declined to accept the position, because of his already numerous business associations which demand constant attention. To *The Monetary Times* he states that he can do nothing more with the Colonization company than act as an ordinary director.

## OBITUARY

DR. J. H. WEBB, medical director of the Mutual Life Assurance Company of Canada, died last week.

## MANUFACTURERS' LIFE STATEMENT

The thirty-fourth annual report of the Manufacturers' Life was presented to policyholders and shareholders at the annual meeting held on February 3rd. All previous records for new business were broken, the new insurances being \$52,268,849, while the amount in force on December 31st, 1920, reached the large total of \$178,757,911. The gain in insurance in force, of \$39,371,180, also established a high record.

The income from interest and dividends amounted to \$1,699,978. The assets of the company increased during the year by \$3,865,280, and now amount to \$33,220,910. Of the total invested assets over 95% consists of government and municipal bonds, first mortgages on real estate, policy loans, cash on hand and in banks. During 1920 the sum of \$480,598 was paid to policyholders in dividends. A further sum of \$881,805 has been set aside for dividends payable in 1921 and future years. After providing for these items and maintaining a contingent reserve of \$300,000, the surplus amounts to \$2,536,341. The mortality experienced was extremely favorable, being only 51 per cent. of the expected.

## ST. PAUL FIRE AND MARINE INSURANCE CO.

Another satisfactory year was completed by the St. Paul Fire and Marine Insurance Co., of St. Paul, Minnesota, in 1920. Net premiums written amounted to \$13,978,046, being an increase of \$1,357,587 over the previous year. Unearned premiums are shown as \$9,334,899, compared with \$7,565,432.

The St. Paul Fire and Marine was organized in 1865 with a paid-up capital of \$75,000. By 1870 the company had total assets of \$285,546. The total assets now are \$19,244,432, and the paid-up capital is \$2,000,000.

In Canada the company is well known because of its rather extensive connections, particularly in the west. The results of the Canadian operations for 1920 have not yet been ascertained, but presumably, in view of the conditions outlined in the complete statement, they have been satisfactory. In 1919, net cash received for all classes of business, but principally fire, was \$522,682, while the total Canadian income was \$544,220. At the end of 1919 the total assets held solely for the protection of Canadian policyholders was \$543,485. Under the direction of C. F. Codere, Winnipeg, Man., who is chief agent for the Dominion, the company has made good progress here since it commenced to write business in 1907.

## MONARCH LIFE MAKES NEW RECORD

Fourteen years of work in the Canadian life underwriting field has brought the Monarch Life Assurance Company to a place of prominence among the other life insurance companies of this country. As pointed out by J. W. W. Stewart, managing director, at the annual meeting in Winnipeg last week, the preliminary work has been well done, and rapid development can be expected in the future, as has been the case with the best life companies with a similar early experience. According to Mr. Stewart, the company is already ahead of its own program for expansion by about two years, and it is anticipated that within the next four years the progress will be as great as during the whole period since 1906.

Some features of the 1920 report are that net premiums received amounted to \$777,510, an increase of \$174,497 over 1919. Assets increased \$473,047 to \$1,819,453, while the policy reserve increased \$434,846 to \$1,691,225. New business during the year totalled \$8,171,239, an increase of \$761,027 for the year, while the total amount of assurances in force increased \$5,435,631 over 1919. Mortality claims amounted to \$58,852, or 30 per cent., of the expected, as against 58 per cent. previously.

# Deposit Limitations of Loan and Trust Companies

**Amendments to Dominion and Ontario Acts are Urged by Some Companies—  
Would Enlarge Deposit Receiving Powers and Require Part of Assets to be  
in Cash—Opponents Point Out that Present Powers Not Fully Utilized**

**P**OWER to accept more deposits is the object of representations now being made by loan companies to the Dominion and Ontario governments. There are about 14 loan companies operating under Dominion charter, and a considerably larger number have charters from the Ontario government. In the other provinces there is no general loan companies act, the companies incorporated there operating under special acts of incorporation.

Under the Dominion Loan Companies Act, 1914, deposits are limited by section 65 as follows: "The company may receive money on deposit upon such terms as to interest, security, time of repayment and otherwise as may be agreed upon, but the amount held on deposit shall not at any time exceed the aggregate amount of its then actually paid-up and unimpaired capital stock, and of its cash actually in hand or deposited in any chartered bank in Canada."

Section 68, limiting total liabilities, also affects deposits, and reads as follows: "The aggregate of the sums of money borrowed by the company shall not exceed four times the combined amounts of its then actually paid-up and unimpaired capital stock and reserve; Provided that the amount of cash on hand or deposited in chartered banks in Canada belonging to the company, shall be deducted from such aggregate for the purpose of this section. Debenture stock issued by the company shall be included in such aggregate."

Under the laws of Ontario loan companies may accept deposits up to the total of their capital and reserve, plus cash on hand and in banks.

## Mortgage Loans Restricted

On January 21 a deputation representing loan companies doing business in Ontario discussed the question with the provincial government. Both the Dominion Mortgage and Investment Association and the Land Mortgage Companies' Association of Ontario favor an extension, but there are several individual companies who oppose it.

In a statement on January 20, Hume Cronyn, general manager of the Huron and Erie Mortgage Corporation, which has been active in urging a change, said:—

"There has been a real shortage in mortgage funds throughout Canada for six months, produced by several factors. For a generation prior to the war, mortgage companies (among others) secured a large part of their lending capital in Great Britain. For the time being, and perhaps for some period in the future, this source has not only been cut off, but large repayments of moneys borrowed abroad have been made. Moreover, foreign loan corporations have withdrawn from the field, and in some instances have disposed of many millions of assets to Canadians. If the loaning corporations are to continue to take their part in the further development of Canada, it is necessary that every effort should be made to replace from Canadian sources the moneys which have been sent out of the country. Owing to the high rates obtainable on government and municipal bonds, it is increasingly difficult to persuade investors to purchase loan company debentures, unless the rate of interest thereon is raised to a figure which wipes out the narrow margin of profit hitherto obtainable.

"At the present moment the supply of money most readily available is to be found by way of deposits. As far as the removing of the present restrictions impairing the confidence of the British investors, this is very improbable, and any company fearing this could very easily pass a rule stating that they would not take advantage of the new privilege and notify their agents in Great Britain to this effect.

"The limit fixed by law governing deposits in loan companies is wholly artificial and bears little relation to the

object desired, to wit—safety. It has been wisely suggested that, instead of an arbitrary limit, these companies accepting deposits should be obliged to keep on hand a definite proportion of same in the most liquid of securities. This plan has been adopted in the case of the savings banks of the United States."

## Some Opposing Views

Against these arguments, George H. Smith, assistant general manager of the Canada Permanent Mortgage Corporation, said recently:—

"There is no difference of opinion as to the inadequate supply of funds for mortgage loans. When it is stated, however, that this shortage will be alleviated by the Ontario legislature giving the companies power to take a larger amount of deposits than is now authorized, we believe that those who are approving this proposed measure on that ground are deluding themselves and misleading the government.

"By far the larger portion of the money which has been loaned by Canadian mortgage corporations is that which has been supplied by Britain. It is true that additional money from Britain may not be expected immediately, though there are not wanting evidences that conditions in this respect will improve at no distant date. Meantime, however, large amounts of debentures held in Britain are maturing half-yearly. The widening of the powers to receive deposits, which the British investor looks upon as a preferred claim, will unquestionably affect the willingness of the debenture holders to renew. The Scottish agents of several of the leading companies, including the two firms which have been instrumental in sending to Canada a very large proportion of the money invested in Canadian loan company debentures, have unqualifiedly expressed themselves as opposed to the change, on the ground that it would jeopardize the debenture money and adversely affect the facilities for borrowing on debentures in Britain when the market is again open.

"Under the existing restrictions, the Ontario loan companies have unused powers to take deposits to the amount of more than twenty million dollars or, in other words, after all these many years of effort they have not obtained deposits of much more than half the amount already authorized. If some of the larger companies which are operating under the Dominion act, an act which limits the companies much more than the Ontario act does, possessed the powers authorized by the Ontario act, the amount of additional deposits which might yet be received by the companies would be increased to over thirty-one million dollars.

"The various companies have unused borrowing powers, by way of deposits and debentures, to the extent of more than ninety million dollars, a pretty ample field for the increase of Canadian debenture money as well as deposits.

"We see it is claimed that it is difficult to obtain money on debentures in Canada at present. I think I remember seeing it stated in a recent issue of "The Globe," that in 1920 the Huron and Erie increased the amount of its Canadian debentures more than in any previous year. In the same period the Canada Permanent increased its Canadian debenture money \$431,000. This would seem to be evidence that the debentures of our strong and old-established loan companies are looked upon with favor by a considerable section of the Canadian investing public.

"If a practical suggestion were desired, as to how the amount of money immediately available for mortgage loans might be considerably increased, it might be found by a reference to the very large amount of investments some of the companies have in bonds and similar securities, which

 Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

might be converted into mortgage loans. It is prudent for companies to invest a limited proportion of their funds in negotiable securities, but when these amount, as in some cases, to more than their investments in mortgages, it does not furnish evidence of the bona fides of their earnest desire to supply additional funds for mortgage loans. According to the latest available government reports, loan companies had not less than \$43,215,000 not loaned on mortgages to the hungry property owners referred to, but invested in bonds and stocks."

### SLIGHT RECOVERY IN TRADE

There is a gradual but certain improvement in business throughout Canada, says the January 28th trade report of the Canadian Credit Men's Trust Association. Reports from the maritime provinces, Ontario and Quebec, all indicate more activity in manufacturing, wholesale and retail lines, orders from country towns showing a decided improvement on the early part of the month. Winnipeg and the west is finding a distinct improvement in most wholesale lines. Retailers are abandoning scare-head advertising for saner methods, and the confidence of the public is shown in increased sales in almost every line. Collections show an improvement.

R. G. Dun and Co. report on Montreal District conditions as follows:—"Country winter roads are now in good shape generally, favoring trade and traffic in the interior, and district collections are reported rather better than fair. Western payments are not up to the level of last year. Wholesalers of dry goods are fairly well satisfied with the development of business in their line. Buyers who have been long holding back are in daily evidence among the warehouses, and that retailers' shelves throughout the country are becoming bare is shown by the fact that quite a few orders are being received for prompt shipment by express, some of them ranging into quite respectable figures. The millinery houses, who experienced three very quiet months in October, November and December, report a noticeable improvement in the demand, and are looking forward to a fair spring business. The wholesale millinery openings are fixed for the 28th of February. Boot and shoe orders still rule on the light side, and manufacturers' purchases of leather and findings are mainly confined to small immediate needs. A fairly steady distribution is noted in staple groceries, and there is little change in values. Refiners' deliveries of sugars are about normal, and prices remain on the basis of 10½c. for standard granulated."

Toronto District conditions were described as follows:—"When the final total of payments for January the fourth was made up it was surprising what a creditable return merchants made, and this did much to banish any fears, formerly entertained, that a serious set back to trade might develop later. On top of this, houses are to be found reporting business to date ahead of the same period one year ago. Travelers are out getting orders with few exceptions. Confidence is being restored, unemployment improved a shade, and the general outlook has a brighter aspect."

### CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended January 28, 1921, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P. E. I.	Total.	1920.
Jan. 28	12	20	4	1	1	4	3	1	0	46	..
Jan. 21	15	35	6	3	5	1	4	2	0	71	20
Jan. 14	13	23	4	1	3	0	0	0	0	44	14
Jan. 7	15	14	3	2	3	1	2	1	0	40	11

### BANK BRANCH NOTES

The following is a list of branches of Canadian banks which have been opened recently:—

Toronto, Avenue Road and St. Clair Ave.	Bank of Nova Scotia.
London, Ont., Hamilton Rd.	Royal Bank of Canada.
Hamilton, Ont., King St. and Sandford Ave.	Bank of Hamilton.

The Royal Bank of Canada is now installed in its new building at Marpole, B.C.

The Union Bank has purchased the Garry building, Portage Ave. and Garry St., Winnipeg, from George Montagu-Black. The price was in the neighborhood of \$500,000.

### EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	11 13-16 pm	11 15-16 pm	.....
Mont. funds	Par	Par	½ to ¼
Sterling—			
Demand	4.3050	4.3125	.....
Cable transfers	4.3150	4.3225	.....
Bank of England rate,	7 per cent.		

New York quotations of exchange on European countries, as supplied by the National City Co., Ltd., Toronto, as at February 3, 1921, follow: London, cable, 385; cheque, 384¼; Paris, cable, 7.11; cheque, 7.10; Italy, cable, 3.65; cheque, 3.64; Belgium, cheque, 7.45; Swiss, cheque, 16.00; Spain, cheque, 14.00; Holland, cheque, 33.90; Denmark, cheque, 19.00; Norway, cheque, 18.35; Sweden, cheque, 21.85; Berlin, cheque, 1.58; Finland, cheque, 3.50; Roumania, cheque, 1.40; Poland, cheque, 13.00; Greece, cheque, 7.00.

### WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended February 3, 1921, compared with the corresponding week last year:—

	Week ended Feb. 3, '21.	Week ended Feb. 5, '20.	Changes.
Montreal	\$123,865,980	\$143,627,188	—\$19,761,208
Toronto	103,116,490	102,156,934	+ 959,556

# Boards of Trade Review Year's Work

Organizations of Representative Centres of the Dominion Present Their Opinions on the Situation—The Fall in Crop Prices Chief Grievance of the West—Nova Scotia is Confident—Toronto and Montreal Look to Better Times

**B**OARDS of trade now holding their annual meetings in all parts of Canada, while by no means overlooking the present dullness in business, are hopeful for the year 1921. Substantial progress was made in 1920 in the securing of new industries.

## Twenty-Nine New Toronto Industries

W. H. Alderson, manager of the Ontario division of the Gutta Percha and Rubber Co., is president of the Toronto Board of Trade for 1921, having been elected by acclamation. D. A. Cameron, manager of the Toronto office of the Canadian Bank of Commerce is first vice-president. The bulk of the annual address given by the retiring president, who in this case was C. Marriott, was given over to an account of the activities of the board during the past year. Among other things it was pointed out that through the activities of the Harbor Commission Industrial Department, 29 new industries were located in Toronto during 1920. Up to the end of the year there were 35 parcels of Harbor Commission reclaimed lands under lease, and eight under option of lease, representing a total of 270 acres.

In reviewing general business, Mr. Marriott said: "The decline in value in most lines has been very marked, and it may be said that the movement has gone too far in some directions for confidence to be restored, or for new buying to be stimulated, until it has gone farther in other directions. The buying power of the people has been impaired and is more out of balance than it has been at any previous time. Our farming population, our manufacturers, merchants, operatives, and the army of unemployed have suffered a loss of buying power and it would be folly to think that we can go on making and selling goods as though this were not the case. The situation is one which we must face with courage and determination and by a policy of judicious economy, curtailment of imports, development of our resources and by increased production for export. In this way we must seek to place the commerce of the country upon a more stable basis."

## Montreal Board Membership Increased

The annual report of the Montreal Board of Trade submitted at the annual meeting on January 25, shows that during 1920, the membership increased by seventy, bringing the roll well over 2,200. The statement of finances showed total revenues of \$133,388, with expenditures totalling \$125,596, leaving a balance as a net surplus for the year of \$7,792. The total figures showed gross assets of \$805,345, with liabilities of \$642,452, leaving a total to surplus account of \$162,892, to meet interest charges, bonds as they fall due, and other liabilities. The assets included investments in various Dominion war issues to the extent of \$28,957, the board's own bonds, to a large extent redeemed and held for cancellation, \$186,526, and a valuation of their site, building and furniture at \$600,000.

In their general report the council sets forth that the past year will go into history as the first year of adjustment from war prices to normal conditions, following the period of inflated prices which came immediately after the war, until in the fall of 1920 the general break in prices began. The second half of the year had brought a series of sharp declines which had affected almost every commodity. This began with boots and shoes, while hides fell to below pre-war prices, with no demand. Furs had dropped 50 per cent. Raw cotton had dropped about in the same proportion, and the manufactured article was marked down. The rubber business had suffered sharp drops, but was beginning the new year on a sound basis, and better results were looked

for. Foodstuffs had declined, but not in the same proportion as other products.

These declines, the report set forth, were largely due to the refusal of the public to buy at the higher prices. The result was that 1921 began with a general slowing down of industry, increasing unemployment, and, as a consequence, general readjustments of wages in a downward direction. Indications were that within a few months many such readjustments would have been completed. Manufacturers, wholesalers and retailers had all made concessions in the matter of profits, and in many instances had incurred losses. "It is now the turn of the other important faction in the making of prices, wages, and it begins to look as though the wage-earner recognizes the situation, and will be prepared to make concessions also. Should this prove to be the case the first serious step in readjustment will have been taken, and industry may once more be started forward upon a steadier and more satisfactory course."

Senator Lorne C. Webster is president of the board for 1921, having been elected by acclamation.

## Border Chamber of Commerce

The annual meeting of the Border Chamber of Commerce was held at Windsor, Ont., on January 20. Lieut.-Col. W. L. McGregor was elected president for 1921. The retiring president, M. G. Campbell submitted an exhaustive report covering the year's activities. Since early last spring, the report stated, the chamber had interested itself in the question of amalgamation of the Border Cities. It was admitted that there was little tangible progress to record in that direction but the interest of the public in the proposition had been stimulated and the president felt that, in itself, was something worth while.

During the year 1920, the report continues, as a result of the efforts of the chamber every available building in the Border Cities has been filled with some kind of an industrial plant. Many of them, it was admitted, are not accommodated to the best advantage, but the chamber did its best under the circumstances and hoped for an improvement when times returned to normal.

## Lethbridge and Irrigation

A report which is particularly interesting, more especially to the western public, is that of the Lethbridge Board of Trade. G. R. Marnoch, who has been president of the board for seven years, and who has again been elected chief, has given a comprehensive review of the general situation. Mr. Marnoch states:

"General business in Lethbridge and the district has kept up well in volume. Our merchants both wholesale and retail, are steadily endeavoring to adjust their merchandising to the changing conditions in which we all find ourselves. The bank clearings this year are greater than they have ever been before.

"As to agricultural prospects for 1921, it is difficult just at present to make a surmise. Unfortunately we have again such a condition as that which prevailed at this same time last year, that is, there is practically no reserve moisture stored in the soil; there is this difference, however, that there is no hard shell of frost covering the top-soil, so that if we have snows that lie on the ground to be gently melted by the chinook winds, the resulting moisture will be available in the spring. A great deal will therefore depend on the spring rains."

Referring to the irrigation question, Mr. Marnoch continued: "The future stability of our agricultural and com-

# The Great-West Life Assurance Company

Condensed statements for 1920 as announced at the Annual Meeting, held February 1st, 1921:

<b>New Business Issued</b> . . . . .	<b>\$ 60,703,525</b>	<b>Income (Premiums and Interest)</b> \$	<b>9,967,436</b>

mercial progress hinges upon irrigation developments; and we look upon it as being the bounden duty, as well as the privilege, of both the Dominion and Alberta governments to further that progress with the utmost expedition. There is a good deal of talk about increasing our agricultural population; but, as any well-conducted business always recognizes, you must be able to say that you are taking good care of the people you are already dealing with, before you start out to enlarge your business."

#### Wheat Movement Through Vancouver

In his annual address at the annual meeting of the Calgary, Alta., board of trade last week, J. A. Hornbrook, retiring president, referred to the trying times of the reconstruction period, the reaction that had set in after the war, the sales tax and the luxury tax, the increase in bank clearings, the re-adjustment of prices with the consequent losses to business men, and the world-wide conditions of industry, and stated that "while the present business outlook is not as bright as we would like to see it and will require careful handling, still there is no reason for gloom. If we keep our heads and exercise due care and proper economy, I see no reason why we cannot come safely through this readjustment period and in the near future enjoy more prosperous conditions."

With regard to agriculture the president referred to the large crop produced in Alberta, but regretted that the low prices realized did not come up to the expectations of the farmers owing to the expense of putting in the crops, which he referred to as "the most expensive crop ever produced in Alberta." The increase in freight rates also added to the burden of the farmers, but Mr. Hornbrook stated that there are indications that in future years more Alberta wheat will be moved through Vancouver, which will mean a great deal to Alberta.

Mr. Hornbrook among other things alluded to the good work of the secretary, J. H. Hanna. The election of officers resulted in the appointment of Bruce L. Robinson as president.

#### Galt Establishing Industrial Connections

In a review of the past year's work at the annual meeting of the Galt, Ont., board of trade last week, the retiring president, H. J. Bassett, stated:—

"The industrial committee has been very busy during the past year, but since it was a period of after-war reconstruction and high building costs, the erection of new plants was prevented. The committee established connections with some American firms that planned locating branches in Canada, but found it necessary to drop their plans on account of high building costs. However, the committee has not lost these connections and when the opportune time comes can reopen negotiations. We had requests from firms for empty buildings but unfortunately from one standpoint and fortunately from another, we had no empty factory buildings to offer."

S. L. Clark, who was vice-president of the board last year, was elected president for 1921. H. J. Foster is secretary.

#### Nova Scotia Can Weather Readjustment

"The year under review has seen a more serious decline in values and stoppage of export trade than anticipated," stated A. H. Whitman, retiring president of the Halifax Board of Trade, at the annual meeting last week. "I think I am safe in saying that Nova Scotia is likely to weather the period of readjustment as well, if not better than, any part of the empire. Our wealth consists mostly in our natural resources. The two necessities ahead of us are work and thrift."

Mr. Whitman reviewed briefly the activities of the board during the year, referring to the efficient work of the secretary, E. A. Saunders. Following the submission of the other usual reports a discussion on taxation took place. J. Cuthbertson Doyle presented a report of the Retail Merchants' Association on the civic taxation problem of Halifax. It

stated that the association had disapproved of the present system since its inception, and felt that any change would only be a partial change of existing abuses, since, to ensure an effective system, a uniform tax was required for entire province of Nova Scotia. Notice was given that a bill would be introduced at the next session of the legislature asking for a commission to be appointed to go thoroughly into the provincial tax system.

#### Charlottetown Reviews Trade

Reviewing the agricultural and industrial developments in the district and province last year, Isaac Carter, retiring president of the Charlottetown Board of Trade, stated at the annual meeting last week: "We all know that the wheat and oat crop have not turned out so well as was estimated some time ago, although the estimate is much below that of last year, which showed for the oats over six million bushels with six thousand less acreage, and for wheat two hundred thousand bushels more than this year. The hay on an average is at least one half a ton per acre less than for last year. Potatoes have given a slightly better yield, but rot has been much more prevalent. Roots in some localities were excellent while in other sections they were almost a failure." Mr. Carter also referred to the success of the dairy and fisheries of the province.

Another new industry was started in the city a few months ago by the Charlottetown Milling Co., Ltd., who erected a new flour mill with a capacity of one hundred barrels of flour per day. The company is buying wheat from the farmers and importing grades of Ontario and western wheat which are producing high-grade flour.

A. A. Pomeroy, vice-president of the board last year, was elected to the presidency this year, while W. L. Higgins was re-elected secretary.

#### Fredericton Board of Trade

Mayor John A. Reid, of Fredericton, N.B., was re-elected president of the local board of trade at its annual meeting last week. Mr. Reid reviewed the work of the past year, which was chiefly of local interest. "The retail and wholesale merchants of this city during the past year have been probably more fortunate than those of many cities in Canada," he said. "The slowing up of industry in general has not affected Fredericton to any great extent, and I believe before the end of the year is reached conditions will again be stabilized and that we may look forward with confidence, believing we are about due for a wave of renewed prosperity."

Several matters in connection with the president's report were discussed, among these being the question of delimiting the areas of the city and on motion a resolution to take steps to secure legislation at the next session of the legislature for delimiting the boundaries of the city was passed. The question of a new C.P.R. station was also taken up and the transportation committee was authorized to press the C.P.R. authorities in the matter.

#### Civic Consciousness of Community

At the annual meeting of the Sydney, N.S., board of trade on January 17, A. N. McLennan, retiring president was re-elected chief. The principal speaker was J. Grove Smith, Dominion fire commissioner. Mr. Smith gave an instructive address on the work of boards of trade with reference to fire loss and protection. He stated that the board represented the civic consciousness of the community. As a result of present depression, over-insurance was a common occurrence. Since the period of depression had begun in Canada, its fire losses have increased very largely. This was not due to fires set with criminal intent, but rather it is due largely to criminal negligence and carelessness on the part of business men. In support of this statement Mr. Smith said that of 27,000 fires in Canada in 1919 with a loss of \$27,800,000 59 fires totalled \$12,000,000. These fires were obviously not in dwelling houses.

## LOCAL FINANCING PROVED DISAPPOINTMENT

Province Raised Only \$350,000, and Municipal Issues Were Too Small to Test Market—Developments of the Past Year

**I**N a survey of 1920, F. J. James, of Nay and James, Regina, bond dealers, said to *The Monetary Times*:—

"There is no doubt that the condition of sterling exchange at the opening of the year had a most marked effect upon Canadian security prices in general and western municipal bonds were by no means affected the least. While the offerings of rural municipalities, schools and telephone bonds were, in the early months of the year, quite limited, nevertheless they were not easily marketed. With straight-term sterling obligations of western provinces yielding around 6½ per cent. and the debentures of western cities available on a 7 per cent. basis, it was not difficult (apart from anything else) to understand the reluctance of investors to buy instalment bonds of western municipalities except at most attractive prices.

"As the year progressed the interest rate tended to increase, and by mid-year the demand for our smaller western issues was quite limited, even on an 8 per cent. basis. A fair amount of schools and rural telephones were disposed of in the months of October, November and December, but, generally speaking, at 8 per cent. to the investor. Tightness of money and the very attractive yields procurable on Victory bonds and such high-grade securities as Ontario province, Saskatchewan province and city of Toronto, were undoubtedly contributing factors towards bringing about this condition. Western town bonds were most difficult to dispose of; indeed, so far as we are aware, very few issues of this character found purchasers in 1920. In the years from, say, 1905 to 1912, these securities were favored by a wide list of investors and even small towns often obtained their money at less than a 6 per cent. rate. Unfortunately, the defaults of certain of our urban municipalities since the latter date has created a decidedly unfavorable feeling towards this class of security, and what is greatly to be deplored is the fact that this feeling has had a tendency to prejudice many investors against those classes of security which have never (with very few exceptions indeed) failed to meet their payments of principal and interest promptly.

### Municipal Defaults

"We believe that our Local Government Board fully appreciates the importance of maintaining our municipal securities at highest possible standing and the board is carefully scanning all applications for loans, thus ensuring to the investor that security for his money which is so much desired. At the same time our government by doing all in its power to assist investors to collect what is already due to them from these defaulting municipalities (limited in number though they be) will assuredly be working in the interest of all the districts and municipalities in the province. Such assistance, of course, cannot be extended to the payment of principal sums in arrears or even guaranteeing the same, but it might go so far as to taking care of past due interest. It may be argued that by so doing, municipalities would be encouraged to become slack in meeting their obligations, but we feel that the government could protect itself in such a manner as to make it decidedly unpleasant as well as unprofitable for municipalities to throw this responsibility upon the provincial government.

"It must be admitted that investors have long memories and once bitten it is generally a case of more than twice shy.

"The opportunities for investment of moneys at remunerative rates of interest are likely to be many for the next few years at least, and we cannot afford to overlook this fact and if there is anything that we need in our province next to man power on the land, it is money for development. A depreciation in value equal to a quarter of one per cent. in yield on all the Saskatchewan rural municipalities, rural telephones, school districts and town debentures sold in one

year, would, we believe, not nearly offset the bad effect brought about by the above-mentioned conditions. It must be remembered that a large amount of securities of our smaller municipalities as well as the larger urban centres are held in the United States; a portion of this latter market stands closed to us at the present time.

### Provincial Issues

"On the whole, Saskatchewan provincial issues marketed during the year brought good prices, though, at anything like the present rate of exchange the two short-term issues which provided for payment of principal and interest in United States funds will mean dear borrowing. The three million dollars twenty-year six per cent. issue disposed of in the early fall brought a very good price, and we think the provincial treasurer acted wisely when he accepted the bid providing for repayment of principal and interest in Canadian funds only. In October the provincial treasurer announced that a campaign for the sale of three million five hundred thousand dollars' worth of Saskatchewan farm loan debentures would start on the 26th of October and continue for six weeks. The executive of the Saskatchewan Press Association took charge of the publicity side of the campaign, and municipal officials throughout the province were requested to handle the organization work. While we believe the provincial treasurer was fairly well satisfied with the results of the campaign considering the conditions under which it had been carried on, the campaign nevertheless at the close only resulted in the sale of some three hundred and thirty thousand dollars.

"These bonds were issued bearing interest at the rate of 5 per cent. per annum, payable half-yearly, and are redeemable at par at any time by giving the provincial treasurer three months' notice in writing. In our opinion, conditions for the sale of these bonds in our province were most unfavorable; our farmers who had just succeeded in garnering a fair crop under the most expensive conditions ever confronted by them in the raising of the products of the farm, had to face a rapidly falling grain market, and it was impossible for them to invest much money in farm loan debentures under these circumstances. During the year at least two of our cities put on an "over the counter" sale of bonds. The amounts offered were small and the conditions generally were not such as to demonstrate the practicability of this method of distribution. It may not be difficult from time to time to market small blocks of securities within our own province, as there is undoubtedly a growing market in the west for municipal bonds, still we doubt whether it will be feasible for some years to come at least to successfully dispose of large blocks of such securities.

"Regina sold something over \$100,000 in this manner, but they went slowly. This, however, we think was partly due to the fact that they were offered at par for 6 per cent., while at the same time earlier issues of the city were being offered to investors in the open market at a materially better yield.

### Outlook is Fairly Good

"Summing up the situation, Saskatchewan can look forward to the year now about to open with a sense of satisfaction; the most rural of all the provinces in the Dominion has yet a vast area of land awaiting the right type of settler and settlers will be offering themselves in large numbers before very long. Let us look them over carefully that we may make no mistake. We want those who will assimilate rapidly and become good Canadian citizens. It is true that wheat and other grains have fallen in price very materially, but there is every reason to confidently expect the downward trend in price of general commodities which has been in evidence for some time to continue, though the decline may be more gradual. Let us hope that with these lower prices will follow lower rates of interest, so that our communities may be developed along sane lines at a less burdensome cost. Nevertheless, it would be unwise to look for any great reduction in interest rate."

## DIVIDEND NOTICES

### BANK OF MONTREAL

Notice is hereby given that a Dividend of Three Per Cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after Tuesday, the First Day of March next to Shareholders of record of 31st January, 1921.

By Order of the Board.  
FREDERICK WILLIAMS-TAYLOR,  
General Manager.

Montreal, 21st January, 1921.

373

### THE ROYAL BANK OF CANADA

#### DIVIDEND No. 131

Notice is hereby given that a Dividend of Three Per Cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Tuesday, the first day of March next to shareholders of record at the close of business on the 15th day of February.

By Order of the Board.  
C. E. NEILL, General Manager.

Montreal, Que., January 14, 1921.

371

### THE CANADIAN BANK OF COMMERCE

#### DIVIDEND No. 136

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 28th February next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 1st March, 1921, to shareholders of record at the close of business on the 13th day of February, 1921.

By Order of the Board.  
JOHN AIRD, General Manager.

Toronto, 21st January, 1921.

## DEBENTURES FOR SALE

### CITY OF PORTAGE LA PRAIRIE

#### DEBENTURES

\$20,000.00, 20-year, 6% Waterworks Debentures.

\$34,000.00, 20-year, 6% Electric Light Debentures.

In Denominations of \$500.00, Coupon-bearing Bonds, dated January 2nd, 1920, maturing January 2nd, 1940. Retired by Sinking Funds at the end of the term. Interest Coupons payable July 2nd and January 2nd at par, Montreal, Toronto and Portage la Prairie.

Sealed Bids will be received by the City Treasurer up to Five o'clock of Friday, February 11th, 1921.

W. R. GRIEVE,  
Secretary-Treasurer.

363

ONTARIO

### THE PUBLIC SERVICE SUPERANNUATION BOARD

#### TENDERS FOR GROUP LIFE INSURANCE

Pursuant to Section 6 of The Ontario Public Service Superannuation Act, tenders for a policy contract covering group life insurance upon employees in the Ontario Public Service will be received by The Public Service Superannuation Board to February 15, 1921. Companies tendering will submit premium rates and drafts of policies of group insurance. The Board reserves the right to refuse any or all tenders.

Such information as may be required may be obtained on application in writing to the Secretary of the Board, Parliament Buildings, Toronto. 385

## Condensed Advertisements

"Positions Wanted," 3c per word · all other condensed advertisements 5c. per word. Minimum charge for any condensed advertisement, 65c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent. extra if charged.

**EXECUTIVE.**—Age 35. Twenty years' experience. Eight years in Railway Operating and Construction Department, twelve years in Accounting Department, past five years as General Auditor. Expert Accountant, thorough knowledge of railway and construction materials, well informed in financial matters, seeks engagement. Box 381. *Monetary Times*, Toronto.

**A STRONG** American fire insurance company intending to enter the Provinces of Ontario and Quebec, is desirous of receiving applications for the position of Superintendent of Agencies. Communications will be treated confidentially. Box 387, *Monetary Times*, Toronto.

The executive of the Canadian Manufacturers' Association, presided over by J. S. McKinnon, of Toronto, met in Hamilton on January 27 for the purpose of receiving reports on transportation and legal matters.

## CANADA'S EXPORT TRADE MAINTAINED

## MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

Notwithstanding Falling Off in Britain's Purchases Here of \$187,000,000—Small Adverse Balance for Current Year of 1920

FOR the current year ended December, 1920, an increase in Canada's trade of nearly \$404,000,000, as compared with 1919, and \$485,857,323, as compared with 1918, is shown. A small adverse balance of some \$34,000,000 is shown, but exports are substantially ahead of 1919, while there is an increase of \$59,000,000 over 1918.

It is worthy of notice that our export trade has been maintained despite the fact that the United Kingdom has been buying about \$187,000,000 less than in 1919. At the present time very little business is being done by Canadians with British buyers, except in foodstuffs and raw materials and deliveries under old orders. The Canadian Export Association, representing about thirty Canadian manufacturers, and managed in London, England, by Harry and Winfield Sifton, recently closed its offices.

Our exports to the United States continue to show a healthy growth, while imports from that country are inclined to slacken. Purchases from our southern neighbors for the twelve months ended November, 1920, were shown at about \$927,000,000, while for the period now under review, the figure is some \$6,000,000 less.

There are excellent possibilities for increasing Canada's trade with India, Ceylon, Malaya and the Dutch East Indies, in the opinion of Henry R. Pousette, who has just returned from India to take up his duties as commissioner of commerce of the Dominion. It was Mr. Pousette's mission to investigate the openings for trade with India particularly.

Changes shown in the December statement of the Montreal City and District Savings Bank and the La Caisse d'Economie de Quebec are not unusual, and are what one would expect to find at this time. Loans are lower, while cash and securities are higher. The continued increase in savings deposits indicates a certain amount of prosperity in the respective communities. It is a significant fact that the increase in savings deposits closely approaches that shown in the chartered banks' statement on another page of this issue.

Over a period of one year both of these French-Canadian banking institutions have made good progress, as the figures below will illustrate. The large reduction in Dominion government demand deposits is the result of the gradual withdrawal of the funds deposited following the Victory loan in the fall of 1919, but this decrease has been more than offset by the substantial increase in savings.

## INTRICACIES OF EXCHANGE RATES

Investigation by detectives and banks has revealed that a Rochester broker has been making substantial profits out of the fact that a discount is charged on Canadian currency but not on Canadian silver. The detectives learned that several times a week for the last several months with \$500 in United States currency, he purchased \$560 of Canadian, which in Canada he changed into 10 cent pieces and deposited in Rochester, N.Y., at full value.

In an effort to break up the operations of a gang of money exchangers, Cleveland bankers, acting through the Cleveland Clearing House, on January 21, voted to accept Canadian money only at a discount of 20 per cent. This action was taken after a committee of bankers earlier in the day had agreed to discount silver and paper money alike. Organized gangs have been flooding northern cities of the country with Canadian coin and have been making profits of thousands of dollars which United States banks have lost, according to J. C. Henderson, manager of the Commercial Division, of the Foreign Department of the Guardian Savings and Trust Co., one of the largest banks in the city.

The administrator of lunatic estates in Saskatchewan has 350 estates under administration involving assets totalling \$697,294. The government advances funds required to pay pressing debts against these estates at 5½ per cent, whenever security is available.

## BRITISH COLUMBIA FIRE AGENTS' CONFERENCE

Licensing of Agents, Fire Prevention and Organization of Associations are Main Subjects Discussed—Difficulties in Regulating Appointments

(Special to *The Monetary Times*.)

Vancouver, January 22, 1921.

THE first annual conference of the fire insurance agents of British Columbia took place in Vancouver on January 20th and 21st. Some 200 delegates were present including the more prominent insurance men from every part of the province.

Geo. L. Schetky occupied the chair. Mr. Schetky stated in his opening remarks that their object in getting together was to, if possible, agree upon a uniform constitution and by-laws for all local insurance agents' associations in British Columbia. He stated there were 900 men in British Columbia who were fire insurance agents, and such a large body of men, could, if they were so disposed do a great deal to improve the conditions under which they carried on their business.

A series of papers followed. Frank R. Rounsefell gave an interesting talk on the early history of fire insurance in British Columbia from the old "Cut rate" days when there was no Fire Board, when it was not so much a matter of equitable rates as making the rate a little lower than your competitor had quoted. Mr. Rounsefell divides the honors with Walter E. Graveley of being the agent longest engaged in the insurance business and still engaged in it, of any of the agents in Vancouver. It is possible, however, their records may be beaten in Victoria or New Westminster, cities which were in existence before Vancouver.

## Licensing of Agents

Mr. Rounsefell was followed by H. G. Garrett, Superintendent of Insurance for the province, who read a paper intitled "Agents Service." This paper was so important owing to the subject treated and the authoritative source of the information contained therein, that a committee was appointed to report on its chief features. On the question of licensing agents (not done in this province) the committee

## Are You a Trustee?

IF so, you may be interested to learn that this Corporation also acts as agent for personal Trustees, taking charge of the administration of estates for them and performs such duties as keeping estate funds fully employed in high-class investments, collection of revenue, cutting coupons, management of real estate, rendering statements and remitting balances to beneficiaries at regular intervals, keeping securities in Safety Deposit Vaults, etc. Many Trustees find this the most satisfactory way for them to administer an estate—by turning it over to us as their agent and at the same time retaining the responsibility imposed on them under the Will.

Write or call for our rates on this class of business.

THE  
TORONTO GENERAL TRUSTS  
CORPORATION

Head Office - - TORONTO  
Branches: Ottawa Winnipeg Saskatoon Vancouver

advised that, if the agents of British Columbia desired to be licensed, measures be taken in the proper quarters to approach the government. In regard to the question of "Fire Prevention" the committee recommended that the government be informed of the good work done, and being done by their

BRITISH COLUMBIA FIRE INSURANCE AGENTS IN CONVENTION AT VANCOUVER, B.C.

fire prevention officer, Mr. Thomas, and they further recommended that the British Columbia Fire Underwriters' Association confer with Mr. Thomas for the purpose of formulating such plans as may result in further extending this principle, and to obtain such further legislation as may be deemed necessary to assist Mr. Thomas in extending the activities of his office.

#### Agents' Associations

The constitution and by-laws of the Vancouver Fire Agents' Association was then considered clause by clause, and as amended, passed in their entirety as the constitution and by-laws which shall govern all fire agents' associations in British Columbia. In the discussion of these by-laws and the various clauses of the constitutions many alleged imperfections in the present system as regards inter-relationships between agents, were considered, and the constitution was amended in the direction of putting the insurance business on a better and more equalable basis for all concerned, throughout the province.

Following the passage of the constitution and by-laws H. H. Stevens delivered a very able and eloquent address on "Thoughts on the present and future economic conditions of Canada," in which he spoke of the appalling thought that little if anything was being done in the direction of reforestation in British Columbia. While vast wealth was being produced in the lumber, pulp and paper industry, little or nothing was done to build up again the depleted forests which he understood would only take 22 years if it was commenced now. He spoke at length of Canada's vast resources all of which should be conserved and the burden of taxation placed on profits, not on development.

#### Fire Prevention and Co-operation

J. J. Banfield's paper on, "Fire Prevention, Future Legislations and Commissions," resulted in a long discussion, and a resolution framed by a committee appointed for the purpose was unanimously passed, which will tend to foster a better feeling among agents in British Columbia, and probably result in future legislation to the advantage of the agents and companies.

Following Mr. Banfield, R. W. Douglas read a paper on "Co-operation," which was followed by one on the "Services of the British Columbia Fire Underwriters' Association," by J. L. Noble, secretary, British Columbia Fire Underwriters' Association. The final paper was one on "Industrial Insurance," by A. W. McLeod, of New Westminster. Between the papers several addresses were delivered on interesting insurance topics.

The banquet in the evening at Hotel Vancouver was attended by some 150 delegates, the speaker of the evening being Major Coart, president of the Fire Insurance Agents' Conference of the State of Washington, Major Coart, who is also past vice-president of the Insurance Federation of Washington State, spoke largely of the good work which could be accomplished by the co-operation of these two bodies. He stated that it was largely the case that companies desired to assist their agents in every possible way and in most cases they saw eye to eye with the agent, so that while the insurance federations were largely supported financially by the companies, and the agents were obliged to conduct their association affairs without monetary help from the companies, still the two associations had much in common and the federations organized in the main, to strive to prevent unfair insurance legislation, were ever ready to help in any legislation work desired by the agents and not opposed to the interests of the companies. It was up to the agents who were always on the firing line to win the victories for good legislation, fair treatment in their relations to one another and between themselves and the companies.

At the conclusion of the conference Mr. Schetky was elected to name a committee to carry on the work of the conference between sessions, Mr. A. E. Goodman being named as secretary of the British Columbia conference committee.

#### FIRE INSURANCE IN CANADA IN 1920\*

Losses Continue Heavy, While Business Depression Introduces New Complications—Ontario's Proposal to Limit Agents' Commissions Was Outstanding Event

BY CECIL S. WAINWRIGHT

Secretary, Western Assurance Co., Toronto

IN Canada in the early months of the year, while there was some uncertainty as to what the immediate future might bring forth, matters on the whole ran smoothly in the fire insurance world. Companies and agents were still pointing out to the assured the advisability of a proper amount of insurance being carried in view of the then prevailing high values so that in the event of a loss they would be protected in a fair and equitable manner, and some companies were making special drives for "Use and Occupancy" insurance. As the months went by, however, clouds appeared upon the business horizon and there ensued a falling off in the demand for certain commodities, a consequent reduction in prices, a state of over-production by manufacturers and of over-stocking by retailers and wholesalers and a general contraction of credit by the banks. This was accompanied by that increase in moral hazard which appears almost automatically to accompany such conditions; the temptation to "sell" to fire companies for the insurance money seeming almost invariably to develop in times of falling values and financial depression. The admonitions to the public to see that they were carrying proper and adequate insurance were discontinued and the pushing of the "Use and Occupancy" branch of the business was dropped.

#### Adjustments

Then there arose to worry underwriters the difficulty of the adjustments of "Use and Occupancy" claims (and this entirely outside any question of moral hazard) as such claims would be sure to present many complications owing to the rapidly changing financial conditions above referred to. Indeed, this worry extended to adjustments generally, as in all likelihood there would be many instances of over-insurance of property in cases where the insurances were based upon the previous excessively high prices of commodities.

A further difficulty which arose out of the unfavorable business conditions was in connection with the collection of agents' balances. This was due to the fact that a good many agents were carrying the premiums owing to them by their customers who were unable to liquidate their indebtedness to the agents.

In addition to these troubles, heavy cancellations took place all over the country to such an extent as to affect seriously some premium incomes.

Summing up the business of the year as a whole, however, it is probable that in view of the favorable experience of the companies during the early months of the year, the loss ratio for companies generally for the twelve months will be a moderate one, but this will likely be offset to some extent by heavy expense ratios due to the continued increase in taxes, travelling expenses, salaries, etc.

#### Commissions in Ontario

By far the most important event of the year in the fire insurance business was the action taken in the closing month by the superintendent of insurance of the province of Ontario in notifying companies and agents of his intention to recommend to the provincial legislature that no commission in excess of 15 per cent. shall be paid to any insurance agent in Ontario. It is no exaggeration to say that this is the most important incident that has taken place for many years past in connection with the business of fire insurance in

# Canada Permanent Mortgage Corporation

## ANNUAL MEETING

The Annual Meeting of Shareholders of the Canada Permanent Mortgage Corporation was held at the Head Office of the Corporation, Toronto Street, Toronto, on Friday, January 28th, at twelve o'clock noon.

The chair having been taken by the President, Mr. W. G. Gooderham, the Assistant General Manager, Mr. George H. Smith, was appointed Secretary of the meeting, and read the Report of the Directors for the year 1920, and the Statement of Assets and Liabilities, which are as follows:—

### REPORT OF THE DIRECTORS

The Directors have much satisfaction in submitting to the Shareholders the Annual Statement of the business of the Corporation for the year 1920. It has been duly certified by the Auditors.

The net profits for the year, after deducting interest on borrowed capital, expenses of management, all charges and losses, together with War Revenue, Dominion Income and other Taxes, amounted to ..... \$ 854,277.30

The balance at the credit of Profit and Loss at the beginning of the year was ..... 150,493.28

Making available for distribution ..... \$1,004,770.58

This sum has been appropriated as follows:—

Four quarterly dividends of Two and One-half per cent. each on the Capital Stock ..... 600,000.00

Transferred to Reserve Fund ..... 250,000.00

Balance carried forward at credit of Profit and Loss ..... 154,770.58

\$1,004,770.58

The Reserve Fund now amounts to Six Million Dollars and is equal to the Paid-up Capital.

All which is respectfully submitted.

W. G. GOODERHAM,

Toronto, January 12th, 1921. *President.*

R. S. HUDSON,

*Vice-President and Joint General Manager.*

JOHN MASSEY,

*Joint General Manager.*

We beg to report that we have audited the books of the Canada Permanent Mortgage Corporation for the year ending 31st December, 1920, and have verified the cash, bank balances and securities of the Corporation. That we have examined the foregoing statement and that it agrees with the books of the Corporation.

That after due consideration we have formed an independent opinion as to the position of the Corporation.

That after our independent opinion was formed, and according to the best of our information and the explanations given us, we certify that in our opinion the statement sets forth fairly and truly the state of the affairs of the Corporation.

That all transactions of the Corporation that have come within our notice have been within the powers of the Corporation.

A. E. OSLER,

HENRY BARBER,

Chartered Accountants, } *Auditors.*

Toronto, January 11th, 1921.

The President, Mr. W. G. Gooderham, then addressed the meeting as follows:—

The Report of the year's operations and the Statement of Assets and Liabilities, as at the close of the year, which have been in your hands for the past fortnight, and which have just been read, are of such an eminently satisfactory character that I believe you will agree with me that the Shareholders are to be congratulated thereon.

You will have noticed that the Assets, and the Liabilities to the public, are itemized in a different order from that which has previously been followed. While we are of the opinion that the sequence in which the various items had appeared in our previous statements is, on the whole, a more satisfactory presentation of the Corporation's condition, we have followed the form prescribed by the Ontario Registrar of Loan Corporations.

A comparison of the Statement with that of 31st December, 1919, will show that the amount of our mortgages on real estate has increased by nearly two million dollars, and now exceeds twenty-eight million dollars. These mortgages number 14,819, an average of less than \$1,900 each.

It has always been the policy of the Directors to invest the funds with which they have been entrusted as largely as possible on the security of mortgages on improved and productive real estate. The preference is given to loans on mod-

erate sums on farm properties and on dwellings of not too expensive a class in our leading Canadian cities—two classes of property which are the most readily saleable under all circumstances. We have never lost sight of the fact that it was to supply the requirements of owners of real estate, and more particularly the farm and home owners, that this and other Land Mortgage Companies were founded. During the past year the demand for this, as well as other classes of loans, has been greatly in excess of the ability of lending institutions to meet. The large increase of nearly two million dollars in the amount of our mortgages affords evidence that we have done all in our power to meet the situation and that, as far as it is humanly possible, we have performed the service to the community for which our Company was created.

Like other Loan Companies, we have powers of investment in Bonds, Debentures and similar securities. At the close of 1919, chiefly owing to our having considered it necessary in the national and patriotic interest to subscribe as largely as possible to various War Loans, we became the owners of a larger amount of these securities than we had previously considered it advisable to hold. In addition to disposing of a considerable portion of the Bonds we held, we endeavoured, by again increasing the rate offered to Sterling Debenture holders, to retain as much as possible of the British money which became payable during the year. In this we were fairly successful and, in view of the very large aggregate of Sterling Debentures which matured in 1920, the total amount outstanding at the end of the year does not show as great a diminution as might have been expected.

Had we followed the policy of paying off the Debentures which became due, or a greater portion of them, the favorable rates of exchange which prevailed would have enabled us to have very materially added to the profits for the year. To retain the money in Canada, we had also to compete with the unprecedented yields which the British investor has been able to obtain on the choicest securities at home. Bonds of the leading British cities, as well as the obligations of the British Government, were being pressed upon him to yield better than six per cent. European Countries, which in 1919 borrowed in the United States at five and one-half per cent., had, in 1920, to pay eight per cent. The fact that in the face of this competition we renewed and replaced such a large proportion of our Debentures affords the best evidence of the reputation of the Corporation in Scotland, and of the very high place our Debentures hold in the estimation of investors and their financial advisers.

In renewing instead of paying off these Debentures, your Directors and the Executive have been actuated by a desire to provide as fully as possible for the requirements of our farmers and other owners of real estate. They are also satisfied that ultimately it will prove to be in the best interests of the Corporation to maintain the valuable associations which have been built up in the past forty-five years, and which we so greatly appreciate. The abnormal conditions which have existed for some time must sooner or later give place to those which prevailed for so many years, and leading economists do not hesitate to express the opinion that this process will be much more rapid than the vast majority anticipate. By keeping the channels open in the meantime, we may confidently expect a renewal of the flow of British money to Canada and which will be made available through investment in this Corporation's Debentures for loaning on Canadian real estate.

While on this subject, I am very sorry to inform you of the sudden death last November of one of our valued representatives in Scotland, Mr. David Cowan, of the firm of Bell, Cowan & Co., Edinburgh. As our Chief Agents say in their letter about him, he was a much respected friend and colleague and he will be very much missed. It has been said of him that he was personally the first to send money from Scotland on Canadian Loan Company Debentures.

It is a source of much gratification that, notwithstanding the number and amount of other securities which were offered to the Canadian public at very attractive rates, our Debentures hold such a high place in the esteem of our people that the amount payable in Canada increased during 1920 by more than \$431,000.

While the cost of our borrowed money has necessarily increased, the rates of interest obtainable on mortgage loans have been attractive and afford a fair margin of profit. I shall not venture to predict how long the present rates may prevail. There is every indication that the demand is likely to at least equal the available supply of money for loaning

purposes for some time to come. If there should be a lessened demand and a consequent reduction of rates of interest, it will be due to such altered conditions as will enable us to obtain supplies of capital on more favorable terms. In the meantime, the interest paid by mortgagors is not more than commensurate with the increased cost of the money loaned and does not afford as great a ratio of profit as when it was possible to make loans at much lesser rates.

The real estate held for sale includes not only the properties acquired by foreclosure, but also all which have fallen into the possession of the Corporation under Power of Sale or in any other way. A Corporation which transacts a loaning business in every Province of the Dominion except Quebec, and of the volume shown in our Statement, will always have a percentage of its customers who, for some unavoidable reason, fail to meet their obligations. The amount represented by this item in our Assets is about 1.36 per cent. of the total. There is no doubt that these properties will realize at least the amount at which they are held and in the meantime they are producing a yearly rental equal to eleven per cent.

The Corporation's investment in The Canada Permanent Trust Company is proving satisfactory. That Company's business and the profits therefrom are increasing. The Corporation's Shareholders can further increase the business of the Trust Company and the profitable nature of the Corporation's investment in it, by employing it whenever it can be of service in any of the various capacities in which it is authorized to act and by recommending it to their friends and any who may consult them on such subjects.

For the eighth consecutive year we have paid the Shareholders dividends at the rate of ten per cent. per annum and for the fifteenth year in succession we have added a quarter of a million dollars to the Reserve Fund. In addition, the balance at the credit of Profit and Loss shows a small increase. The Reserve Fund is now equal to the Paid-up Capital of Six Million Dollars. I stated last year that upon reaching this objective, which we have had in view for many years, the Directors may feel justified in thereafter making smaller additions to the Rest. We believe we are now warranted in informing the Shareholders that, if nothing unforeseen occurs between now and the date at which the next quarterly dividend be declared, it is the intention of the Board that it shall be three per cent. for the quarter, or at the rate of twelve per cent. per annum. This will be a return of six per cent. on the Shareholders' combined Capital and Reserve Fund, amounting together to Twelve Million Dollars.

I think it is unnecessary to detain you with any further remarks. I have followed my usual practice and confined my observations to the business of the Corporation. There is no institution with which I am associated in which I take a more vital personal interest nor of which I am prouder. I know that the pride I feel in its success and in the premier position it occupies is more than fully justified. I, therefore, have much pleasure in moving, seconded by the Vice-President, that the Report of the Directors be received and adopted and, together with the Financial Statement, be printed and a copy sent to each Shareholder.

The motion was seconded by the Vice-President, Mr. R. S. Hudson, who said:—

As the President has given you a clear idea of the Company's business for last year, it is hardly necessary for me to make many remarks. I will say this, that another year has passed, and we have added Two Hundred and Fifty-four thousand odd dollars to our Profits, over and above the dividend. The average addition to Reserve and Profit and Loss during fifteen years has been \$260,652. The record has been of a character to make every shareholder thoroughly satisfied with his investment, and when we take into account that, as stated by me last year, these Assets are realizable and are only incorporated in the Statement after the most careful revision, there is an added assurance.

Since our last Annual Statement, farm lands have somewhat increased in value and I have no doubt the facilities we have afforded the farming community have assisted in this result.

Had it been that we had no other idea during the year than that of temporarily making a good showing, we might have paid off more of our Sterling Debentures, but by not doing so we were enabled to increase our loans to farmers and householders by nearly \$2,000,000.

There are two important facts to which I might refer. The first is that over 84 per cent. of our total investments are in first mortgages, chiefly on farm properties and dwell-

ings of moderate size and value. The second, and it is a significant one, is that we collected on mortgages alone, during 1920, \$5,991,924 in cash, only \$137,558 less than our total deposits, all of which has been reloaned, and we also collected interest alone on other securities \$233,288, leaving the total amount collected during the year in actual cash \$95,730 more than our total deposits, and this is not an unusual showing for your Company.

It is with a great deal of satisfaction I bear testimony to the loyal support and co-operation the members of the different staffs have given Head Office, without which such results as have been obtained might not have been secured.

With the foregoing remarks, I beg to second the President's motion that the Report, as read, be adopted.

The President's motion for the adoption of the Directors' Report was unanimously carried.

The retiring Directors were all unanimously re-elected for the ensuing year, namely, Messrs. W. G. Gooderham, R. S. Hudson, Col. Albert E. Gooderham, J. H. G. Hagarty, John Campbell, S.S.C. (Edinburgh), John Massey, F. Gordon Osler, E. R. C. Clarkson, William Mulock and George W. Allan, K.C., M.P., of Winnipeg.

Messrs. Henry Barber and A. E. Osler, Chartered Accountants, were re-appointed Auditors for the current year.

The Directors met after the adjournment of the Annual Meeting, and re-elected Mr. W. G. Gooderham, President, and Mr. R. S. Hudson, Vice-President. 390

## FIRE INSURANCE IN CANADA IN 1920

*(Continued from page 26)*

Canada and it would be hard to say how far-reaching the effects of such a move might be. It came "as a bolt from the blue" upon companies and agents alike. In his letters to the companies and to the Ontario Agents' Association, the superintendent drew attention to the fact that the companies had done nothing in the direction of acting upon the suggestion in the report of the Hon. Mr. Justice Masten (who had been appointed by the Ontario government to look into the question of rates, etc., and which report was published in January, 1919) that the companies agree upon some limitation of agents' commissions, otherwise that the legislative assembly might take the matter in hand. As it is only recently that copies of the superintendent's letters have been published broadcast in the press, it is unnecessary to say anything further now as to their contents except that the superintendent said the objects he has in view in taking the action outlined are:—

- (a) A reduction of insurance rates to the assured.
- (b) A reduction of the cost of acquisition of business to the companies.
- (c) Equal and fair remuneration for equal service to agents in Ontario.
- (d) Improved agency service to the public by competent and trustworthy agents.

A largely attended conference took place before the close of the year between the superintendent and the Canadian managers of fire insurance companies (both tariff and non-tariff) doing business in Ontario, at which the attorney-general of the province was present on behalf of the government, and made an address in which he said that the government had given very serious consideration to the suggestions in Mr. Justice Masten's report and had reached the conclusion that its recommendations were reasonable and that something ought to be done to carry them out. He said he was not aware that there were conflicting interests involved, and that the carrying out of these suggestions might be distasteful to and against the interests of some of those attending the conference. But he added that the public interest and the public point of view must prevail. He said it was the intention of the government to bring down a bill in such form as might be considered wise after the representations of the conference had been heard. This conference between the superintendent and the managers was followed by one between him and the agents. These meetings have shown that the superintendent would welcome a settlement by which the companies would themselves arrange for the

fixing of uniform commissions. It is easy to understand, however, how difficult it would be for tariff and non-tariff companies to come to an agreement on this question since the non-tariff companies have no association of any kind, and many of the provincial non-tariff companies are wedded to a profit commission and have grave objections to discontinuing their methods of remunerating agents. The superintendent is now trying to arrange for an agreement as to same plan of remuneration in excess of the flat 15 per cent. commission suggested by him in the hope that this may remove the hostile attitude of the agents and make the path of the contemplated bill smoother. It looks, however, as if the proposed legislation will be strongly opposed by the agents and that the companies will take the stand that they prefer to continue their existing commission arrangements rather than have legislation enacted which would restrict their individual efforts and methods of conducting business.

The outcome of this important and engrossing matter will, it is needless to say, be awaited with the keenest of interest both by the agents and by the companies.

### No Fire Brigade Strikes

During 1920 the country was fortunately free from police, fire brigade and similar strikes which had been all too frequent in 1919, although there was a strike of 250 employees of the Montreal waterworks system in the first month of the year that caused grave anxiety. This, fortunately, only lasted a day or two.

Two important meetings affecting fire insurance were held during the year—one being the meeting of fire chiefs, which was held in Toronto in June and which was attended by fire chiefs from all over the United States and Canada. At this gathering many suggestions were made with a view to reducing the fire loss in Canada. The other was the meeting of the insurance superintendents of the various provinces, which was held in Winnipeg in October, and at which very important matters affecting the business were discussed, among them being that of having uniform policy conditions in every province, and which question is now in gradual process of deliberation and adjustment.

### Heavy Property Waste

Notwithstanding the activities of the various fire prevention and other organizations which, during recent years, have been taking an ever-increasing interest in the question of fire prevention and loss reduction, the fire waste still increases by leaps and bounds. It is estimated that the total value of property destroyed in the Dominion of Canada during 1920, will be no less than \$27,000,000, as compared with \$23,000,000 for the 12 months of 1919; thus again leaving Canada in the lead in so far as per capita property waste is concerned.

In New Brunswick the legislature passed the Corporations Tax Act, by which the annual tax upon fire companies' premiums was doubled (from 1 to 2 per cent.).

### British Columbia Boards

In British Columbia an important change took place whereby the two associations (the "Mainland" at Vancouver and the "Island" association at Victoria) were amalgamated in the name of the "British Columbia Fire Underwriters' Association," so that instead of there being two associations with separate secretaries and officials, there is now only one, thus saving a waste of time in meetings and a duplication of work and officials. The new arrangement is reported to be working satisfactorily.

The number of fire companies licensed to do business by the Dominion Insurance Superintendent still increases. At the close of the year there was a total of 149 fire companies licensed by the Dominion Insurance Superintendent, as compared with 138 at the end of 1919. Competition, already too keen, must therefore become sharper, especially if there is a reduction in the premium income of the companies as a whole, as would seem to be inevitable if the prophecies of poorer business conditions in 1921 turn out to be true.

# Price of Silver Fell Rapidly in 1920

Drop of Thirty-One Cents Per Ounce Recorded in New York and of Twenty-Three Pence in London—Estimated Increase in Production Last Year but Canadian Output Has Fallen Off—Demand for Currency and Industrial Purposes

SILVER and the price of silver are of great importance to Canada, as silver coins are the chief subsidiary currency used. This is illustrated by the fact that the great increase in the value of the metal last year made it necessary for the government to reduce the silver content in the coins. On the production side the price of silver also affects this country, as our annual output is around \$20,000,000. The vagaries in the price fluctuations of silver during the past five years have, in fact, caused great disturbance, both in the mining industry and in currency. The Royal Bank of Canada, in its November letter, points out that during this period silver quotations have fluctuated more than 100 per cent. in London and 70 per cent. in New York. The high and low prices in these principal markets, by weeks during the year 1920, are shown in the accompanying table, compiled by *The Monetary Times*—

\*Domestic.

The following table shows the production of silver by principal countries for recent years:—

Year.	Mexico.	United States.		Other countries.	Total.
		(Amounts in millions of fine ounces).	(Amounts in millions of fine ounces).		
1913 (pre-war year)	71	71	32	58	232
1914	28	70	28	50	176
1915	40	72	27	47	186
1916	23	79	25	48	175
1917	31	71	22	51	175
1918	63	68	21	46	198
1919	63	55	15	44	177
1920 (probable output)	55	55	..	..	195

The main feature of the table is the remarkable decrease in production during the war years, a decrease due for some time to the failure of Mexican supplies. This was caused by internal political conditions and not by non-productivity of the mines. More important still from the Canadian point of view is the fall in Canadian production, the number of ounces mined in 1919 being less than half the 1913 figure. Production in British Columbia has continued steady at from three to three and a half million ounces. The Cobalt field, however, is being exhausted, and, unless fresh discoveries are made, its days as a great silver mining centre are numbered, more especially since the fall in the price of silver has rendered the mining of low grade ore unprofitable. In the United States, reduced production of copper, from which a large proportion of their silver is obtained, has brought down the 1919 output to fifty-five million ounces as shown above.

### Increased Currency Demand

Silver is in demand for subsidiary coinage purposes, for use in China and India, both for monetary and non-monetary or hoarding purposes, and for the industrial arts. The use of silver as the material of both standard and subsidiary coins has for many years been the principal factor in the demand. That demand was greatly increased during the war owing to the large amounts of coin that were used by the soldiers of all the warring nations and to the wide extension of war industries.

British India has long been considered a bottomless pit for the precious metals. Silver is hoarded in enormous quantities, both in the form of coin and as ornaments. It has been estimated that, during the five war-years, India absorbed approximately \$400,000,000 of silver. Among the countries still using a currency of silver, China is by far the most important. During the last two years China has purchased probably 120,000,000 ounces. A considerable factor in this country's insistent demand for silver has been the distrust among her people of the bank notes in circulation there.

### Use in Industrial Arts

The use of silver in the industrial arts has been steadily increasing. The era of cheap silver resulted in the development of many new uses which persist. Although it has been impossible to estimate with any degree of accuracy what is the normal annual consumption of silver in industry, 60,000,000 to 75,000,000 fine ounces may be stated to be the average consumption. The moving picture industry is by far the largest single consumer; the amount of silver nitrate it requires has been steadily increasing during the past decade.

The diminished supply and markedly increased demand have resulted in strong fluctuations in the price of silver.

In midsummer of 1915 the average monthly price of silver fell to 48½ cents per fine ounce, which is the lowest point it has touched since definite records were established. Thereafter the price rose gradually to about \$1 per fine ounce in May, 1918, and maintained that level during a year of United States governmental regulation. In May, 1919, a rapid advance began which carried the price to the record high point of \$1.37½ in November, 1919. The average monthly price in January of the present year was the highest ever recorded, but in March a sharp turn downward occurred, and silver fell to 80 cents on June 15th. Thereafter the price rose in July and August until a figure over \$1 was reached on August 20th. Silver since then has been weak, and the last quotation available in October was 52½d. in London and 80½s cents for foreign silver in New York.

# The Toronto General Trusts Corporation

The thirty-ninth Annual General Meeting of the Shareholders of The Toronto General Trusts Corporation was held at the Head Office of the Corporation in Toronto on Wednesday, the 2nd day of February, 1921, at twelve o'clock noon. The President of the Corporation, Hon. Featherston Osler, K.C., D.C.L., presided, and Mr. W. G. Watson, Assistant General Manager, acted as secretary of the meeting. Mr. A. D. Langmuir, General Manager of the Corporation, submitted the Annual Report for the year ended December 31st, 1920, accompanied by the usual statements showing the results of the operations for the year.

## THIRTY-NINTH ANNUAL REPORT OF THE BOARD OF DIRECTORS

(being for the year ended 31st December, 1920)

To the Shareholders:—

Your Directors have pleasure in submitting the Thirty-Ninth Annual Report of the Corporation, together with the usual statements showing its operations for the year ended the 31st December, 1920.

The gross profits for the year, after providing for all ascertained or anticipated losses, amount to \$820,269.88. The administration expenses, including salaries, Directors' and Auditors' fees, advertising, rent, taxes, etc., amount to \$466,555.90, this, as you will observe, makes our net profits for the year \$353,713.98. To this amount must be added \$265,529.02 brought forward on the 1st of January, 1920, together with the premium of \$171,395.89 received on account in connection with the issue of \$500,000 new stock of the Corporation, making a total of \$790,638.89, which has been dealt with by your Directors as follows:—

To payment of four quarterly dividends as follows:—	
Nos. 95 and 96 at the rate of 10% per annum .....	\$75,000.00
Nos. 97 and 98 at the rate of 12% per annum .....	90,000.00
To payment to the shareholders of:—	
One per cent. bonus on the 2nd July, 1920 .....	15,000.00
Interest on new stock .....	1,407.39
	<hr/>
	\$181,407.39
To amount provided for 1920 Federal Income Tax (payable in 1921) .....	25,000.00
To amount written off Corporation's Safe Deposit Vaults at Toronto and Ottawa, and Office Furniture Account at Vancouver .....	13,221.85
To amount written off Vancouver Branch Building	27,845.76
To amount transferred to Reserve Fund, including \$171,395.89 premium received on account in respect of new issue of stock .....	250,000.00
To balance carried forward to credit of Profit and Loss .....	293,163.89
	<hr/>
	<u>\$790,638.89</u>

The Assets and Liabilities Statement shows an increase of assets over the preceding year of \$12,639,292.67, making the total volume of assets now in the hands of the Corporation \$113,762,324.18.

It is with regret your Directors have to record the death during the year of Mr. Thomas Long, an efficient and valued member of the Board since 1898. The vacancy on the Board has been filled by the appointment of Mr. Thomas Bradshaw, of Toronto, General Manager of the Massey-Harris Company, Ltd.

All of which is respectfully submitted.

A. D. LANGMUIR,                      FEATHERSTON OSLER,  
General Manager.                      President.  
Toronto, January 18th, 1921.

## AUDITORS' REPORT

We, the undersigned, beg to report that we have made a full examination of the books, accounts and vouchers of The Toronto General Trusts Corporation to 31st December, 1920, and find same to be correct and properly set forth in the above statements of Profit and Loss and Assets and Liabilities. We have examined, and find in order, all the mortgages, debentures, bonds and scrip of the Corporation, as well as those negotiated for the Supreme Court of Ontario, and Trusts, Estates and Agencies in the Corporation's hands, and we have checked same with the mortgage and debenture ledgers and registers. The Trust investments and funds are kept separate from the Corporation's own securities and funds, and all securities are so earmarked in the books of the Corporation as to show the particular Estate, Trust or Guaranteed Account to which they belong. The Banker's Balances, after deducting outstanding cheques, agree with the books of the Corporation. All our requirements as Auditors have been complied with. We have also examined the reports of the Auditors of the Winnipeg, Ottawa, Saskatoon and Vancouver Branches, and find that they agree with the Head Office books.

After due consideration we have formed an independent opinion as to the position of the Corporation. In our opinion so formed, according to the best of our information, and the explanations given to us, we certify the above statements set forth fairly and truly the state of the affairs of the Corporation, and are in accordance with its books. All transactions for the Corporation that have come within our notice have been within the powers of the Corporation.

R. F. SPENCE, F.C.A., "Can." }  
JAMES HARDY, F.C.A.,         } Auditors.

Toronto, January 18th, 1921.

The meeting was then addressed by the President and General Manager.

The report of the Directors and the accompanying statements were duly adopted and the following Shareholders were appointed Directors for the ensuing year: Hon. Featherston Osler, K.C., D.C.L., Hamilton Cassels, K.C., LL.D., Brig.-Gen. Sir John M. Gibson, K.C., K.C.M.G., LL.D., Hon. W. C. Edwards, Wellington Francis, K.C., A. C. Hardy, John Hoskin, K.C., LL.D., D.C.L., Lieut.-Col. R. W. Leonard, Thomas Bradshaw, J. Bruce Macdonald, Hon. Sir Daniel H. McMillan, K.C. M.G., Lieut.-Col. John F. Michie, Sir Edmund D. Osler, J. G.

Scott, K.C., Sir Edmund Walker, C.V.O., LL.D., D.C.L., E. C. Whitney, E. T. Malone, K.C., H. H. Williams, His Hon. Lionel H. Clarke, Robert Robson.

At a subsequent meeting of the Directors, the following officers were elected President and Vice-Presidents: Hon. Featherston Osler, K.C., D.C.L., Brig.-Gen. Sir John M. Gibson, K.C., K.C.M.G., LL.D., Hamilton Cassels, K.C., LL.D.

## PRICE OF SILVER FELL RAPIDLY IN 1920

*(Continued from page 32)*

## Prices and Eastern Exchanges

The decline in the price of silver has naturally had an effect on the eastern exchanges. China in particular has suffered in this movement. On February 16, 1920, when the price of silver in the London market was 83½ pence, the value of the Shanghai tael was 9 shillings and 3 pence in London; on March 24th, when the price of silver had fallen to 71½d., the value of the tael also had fallen and it was worth only 7 shillings and 5 pence. The decline in the value of the tael kept pace with the decline in the price of silver, until, on June 9th, when silver had fallen to 45½d., the tael had fallen to 4 shillings and 10 pence. This precipitous decline in the purchasing power of the tael has curtailed Chinese buying in foreign markets, particularly in the English piece-goods market which has been heavily affected.

## The Silver Markets

The principal market for silver is London. In September, 1917, the United States controlled silver, and did not permit its export except under license. The Pittman Act of April 23, 1918, a most important piece of currency legislation, authorized the sale of silver not exceeding 350 million silver dollars from the dollar reserve. Out of this, the equivalent of 270,000,000 fine ounces, the share of India was 200 million fine ounces, which was bought by the British government and imported into India in the following year. The act further stipulates that silver sold under its provisions shall be replaced by purchases made at the fixed price of \$1 per fine ounce, and that the metal so purchased must be "the product of mines situated in the United States and of reduction works so located." The result of these provisions is to establish two separate and distinct markets and quotations. In the United States, domestic commercial silver is virtually pegged at 99½ cents. Foreign silver is also quoted on the New York market, but moves with the London price.

From the above outline of the silver situation it can be understood that the conditions ruling demand are so varied and difficult of estimation that any prediction in regard to future prices is impossible. The predominating factor must continue to be Indian and Chinese purchases, and these are governed by general conditions of trade and commerce in the East.

## MUTUAL LIFE OF NEW YORK MAKES SOME RECORDS

The Mutual Life Insurance Company, of New York, one of the oldest and greatest of American life insurance companies, in publishing the results of its operations in 1920, discloses that the insurance paid for was by far the largest in the company's history, having reached the total of \$423,677,719, as compared with \$354,422,133 in 1919. The total outstanding insurance, December 1, had reached the stupendous aggregate of \$2,357,973,121.

Among the payments to policyholders were \$30,397,483 in death claims, \$8,789,260 in endowments, \$2,644,772 in annuities and \$21,976,566 in dividends to policyholders—the company has no stockholders, being purely mutual. The total payments to policyholders were \$87,523,160, and the total received from policyholders was \$85,652,598. The company's mortality experience in 1920 was distinctly favorable, and a material sum was thereby added to the savings, which are available for dividend payments. The assets on December 21, 1920, footed \$671,000,181, the liabilities were \$647,941,638, and the contingency reserve or surplus was \$23,058,543.

The Mutual Life does a big business in Canada. Returns for 1920 are not yet ready, but, assuming the company's experiences to be as favorable as those of other life companies operating in the Dominion and in line with its experiences of the previous year, there can be no doubt as to the results. The amount of new business issued by the Mutual in Canada in 1919 was \$9,752,423, and the total assurances in force at January 1, 1920, was \$45,364,903.

## GREAT-WEST LIFE'S TWENTY-EIGHTH YEAR

The Great-West Life Assurance Company's new business issued during 1920 amounted to \$60,703,525, compared with \$51,577,899 in the previous year. Premium income during 1920 totalled \$8,021,406, as against \$6,698,792 in 1919. Interest and rents and profits on securities brought in \$1,873,188, making a total income of \$9,967,435, compared with \$8,598,393. Payments to policyholders were about \$200,000 lower at \$2,695,057. Death claims incurred were \$1,180,788, as compared with \$1,020,086. The increase was not as great as the larger business in force would have justified, and the actual losses were only 49 per cent. of those provided for in the standard mortality tables. The largest surplus earnings in the company's history, being \$1,388,897, are reported for the year.

At the present time the company is confining its new investments to farm mortgages for which there is a large demand, enabling the company to make a careful selection. With regard to mortgages acquired in past years, there are now on hand properties amounting to only \$88,003, and that loans with interest overdue for one year or more amount to only about 2½ per cent. of the mortgages. During 1920, the company increased its mortgage loans by \$3,397,562, and added \$1,855,598 to its holdings of bonds and debentures.

The rapidity of the development of the insurance business in the Dominion in the past few years is further emphasized by the following figures of the Great-West Life:—

	1920.	1919.	1918.
New business issued. \$	60,703,525	51,577,899	30,659,557
Business in force . . . .	256,850,276	212,560,276	170,863,673
Total assets . . . . .	37,382,646	31,260,347	27,432,823
Premium income . . . .	8,021,406	6,698,792	5,488,460

## SLIGHT IMPROVEMENT IN EMPLOYMENT CONDITIONS

Dominion headquarters of the Employment Service of Canada, Department of Labor, reports that there was a further, though slight decline in employment during the week ended January 8, when it was reported by 4,892 firms that they had released 2,769 persons, a contraction of less than one-half of 1 per cent. Firms in eight industrial groups registered additions to their payrolls aggregating 7,521 workers, but in 24 groups there were decreases totaling 10,290 employees. It may be noted that the figures used in this report do not include loss of time due to industrial disputes. Some recovery from the pronounced decreases of the preceding week was recorded in all provinces except Quebec, Saskatchewan and Alberta, the increase of 2,995 persons in Manitoba being the largest. For the following week, moreover, further expansions in operations were expected in all except the four western provinces. In Nova Scotia, Prince Edward Island and Alberta only was employment at a higher level than that reported by the same firms for January 17, 1920 (the base week), while substantial losses in this comparison took place in other sections of the country.

The most decided increases in employment since the preceding week occurred in railway shops, where work was resumed following a temporary shut-down. There was, however, activity in the manufacture of other vehicles, including steel ships, tools, in sugar refineries, chocolates, confectionery, thread, yarn, cloth, garment, hosiery and knit goods factories, and also in logging camps. These additions very largely represented recovery from inventory and holiday shut-downs, and further, more pronounced, increases were anticipated for the succeeding week. The largest contractions in payroll were reported in retail trade as a result of after-Christmas inactivity. There were losses, however, in abattoirs, cement, boot, shoe, harness, saddlery, brass, bronze and copper products, pulp, paper, printing, publishing, paper box and tobacco factories and in the mining of coal, asbestos and chrome, also in local, railway and water transportation, wholesale trade, building and railway construction.

## TRAVELLERS' MUTUAL BENEFIT SOCIETY

The annual general meeting of the Commercial Travellers' Mutual Benefit Society, of Toronto, was held on January 29. The following officers and trustees were elected for the year 1921: president, Chas. S. Parsons; vice-president, S. M. Sterling; treasurer, S. R. Wickett; secretary, Richard Ivens; trustees for Toronto, Robt. Forbes, W. J. Sykes, R. Maxwell, J. Burns, J. Curtis, L. R. Arnett, A. J. Tipping, E. Fielding and H. L. Willmott.

The report for the year 1920 was presented by the president and adopted. The following are noteworthy facts: The total assets are now \$194,712, as against \$174,369 a year ago; \$342,000 new insurance was written during the year, compared with \$267,000 written in 1919, an increase of over \$200,000, after deducting \$33,500 paid in death claims during the year.

## CANADA PERMANENT MORTGAGE CORPORATION

Notwithstanding the many problems which have confronted the companies operating in the mortgage and loan field in the past few years, the Canada Permanent Mortgage Corporation is able to present a financial statement for the year ended December 31, 1920, which should be regarded with satisfaction by the shareholders. Profits for the year were \$854,277, as compared with \$827,983 for 1919. With the balance of \$150,493 brought forward from the previous year, the total available for distribution was \$1,004,770. Out of this the regular dividend of 10 per cent. on the outstanding capital of \$6,000,000 was paid, \$250,000 was transferred to the reserve fund, and a balance of \$154,770 was carried forward.

The balance sheet contains evidence of increased mortgage business. The amount of this class of loans is shown at \$28,064,269, as against \$26,211,306 in the previous year. Advances on stocks and bonds were lower in volume, the figure being \$296,623, as compared with \$404,699 in 1919. Holdings of securities, including stock of \$978,000 in the Canada Permanent Trust Co., are shown at \$2,267,343, as against \$4,232,768 previously. Cash in banks and on hand increased from \$1,245,070 to \$1,253,848.

The liabilities side shows a decline in deposits from \$6,206,962 to \$6,129,483. Sterling debentures have decreased from \$10,244,641 to \$9,642,550, while currency debentures increased to \$4,553,765 from \$4,122,278. The reserve fund is now \$6,000,000, being equal to the amount of paid-up capital.

## BANNER YEAR FOR EXCELSIOR LIFE

The Excelsior Life Assurance Company reports that in 1920 applications for new assurances were received for \$11,479,234, an increase over the amount written in the previous year of \$1,119,325. There was issued and revived a total of \$11,138,242, bringing the total assurances in force at the close of the year to \$40,574,890. Net premium receipts amounted to \$1,283,029, an increase of \$183,010 over 1919, while total receipts for premiums, interest, rents, etc., were \$1,605,597, as compared with \$1,398,962 for the previous year.

Policyholders participated more largely in the company's profits as a result of the increased business and reduced death claims, payments, including profits, surrender values, etc., amounting to \$102,397, compared with \$79,929 for 1919. Death claims were \$233,391, as against \$249,522 in the previous year.

The total assets available as security to policyholders now amount to \$6,468,457, an increase for the year of \$669,820. The holding of government and municipal bonds now total \$1,554,252. The average rate of interest earned upon invested assets was increased to 6.87 per cent., and, as the reserve on the major portion of the company's business is based on a 3 per cent. rate, the large surplus interest earnings will contribute materially to policyholders' profits. The reserve fund for policyholders was increased \$646,624 during the year to \$5,197,877.

# Nearly a Million Surplus for Quebec Province

Hon. Walter Mitchell Announces Results for Last Fiscal Year—Estimates for Year Ending June 30, 1922—Complications of Bond Issues Explained—Net Funded Debt is \$38,531,751

A SURPLUS of \$951,910 for the year ending June 30, 1920, was reported by Hon. Walter Mitchell, provincial treasurer of Quebec, in his budget speech on January 27. Higher expenditures for the coming year, especially on education, are to be provided for. The treasurer stated that the province was always able to command the best market prices when loans were made.

Estimated expenditure for the year ending June 30, 1922, totals \$12,814,421, made up as follows: Public debt, \$2,587,151; legislation, \$495,880; civil government, \$845,850; administration of justice, \$1,317,773; public instruction, \$1,645,822; lunatic asylums, \$936,625; reformatory and industrial schools, \$245,000; health, \$165,888; public works, ordinary, \$670,776; labor, \$61,600; agriculture, \$882,000; roads, \$831,500; lands and forests, \$441,000; colonization, mines and fisheries, \$683,500; charities, \$78,770; charges on revenue, \$616,200, and miscellaneous services, \$301,450, and \$7,633 for railway subsidies.

Receipts are estimated at \$13,010,743. The federal subsidy is given as \$2,028,280, but there will be the federal census this year, and this will mean almost another million dollars of revenue. Mr. Mitchell also estimates revenue from licenses at \$1,200,000.

## Results Last Year

The treasurer showed that the estimates for the fiscal year ending 30th June, 1920, had anticipated an ordinary revenue of \$10,449,393, and an ordinary expenditure of \$10,399,345, which would have left an estimated surplus of \$50,047; where as the actual result of the year's operations showed an ordinary revenue of \$14,472,650, and an ordinary expenditure of \$13,520,740, giving a surplus of \$951,910. The actual ordinary revenue was more than the estimate by \$4,023,257, and the estimates of the ordinary expenditure were exceeded by \$3,121,394. The receipts and expenditure were the largest in the history of the province.

With respect to cash operations in 1919-1920, Hon. Mr. Mitchell explained that on the 1st July, 1919, there was in the banks the sum of \$879,233, and outstanding warrants at the same date amounted to \$927,106. On the other hand the total receipts from all sources from the 1st July, 1919, to 30th June, 1920, were \$26,629,861, and the total payments \$25,302,924, showing an excess of receipts of \$1,226,937, leaving a balance of \$1,179,063; there was on deposit in banks, \$1,783,842, from which had to be paid outstanding warrants amounting to \$604,778.

The treasurer then gave a statement of the direct liabilities and available assets of the province at the 30th June, 1920. He showed that the liabilities formed the total of \$48,756,763, while the assets aggregated \$12,972,756, making the excess of liabilities over assets \$35,784,006.

## Funded Debt

On this head he showed that there had been an increase in the net funded debt of \$815,464, but this was not a large increase when it was considered that on roads alone \$3,413,108 was expended last year. The total amount of the net funded debt was \$38,531,751. This could not be called excessive considering that from 1912 to the 30th of June, last, \$25,153,108 had been spent on roads and for this expenditure we have to-day some 3,400 miles of improved macadam, concrete and gravel roads throughout the province, which have the beneficial effect of cheapening the cost of delivery of farm produce to the consumer in the city, of facilitating travel throughout the country, not to speak of the inducement to tourists to come here and spend their money.

At the 30th June, 1920, the unfunded debt, consisting of temporary loans, trust deposits, outstanding warrants, etc., amounted to \$8,048,649, but the government had against this at the same date in the form of cash, claims against individuals and corporations for advances, Quebec's share (\$1,173,006) of the common school fund, etc., a total of \$10,796,394, leaving a surplus of assets over the unfunded debt of \$2,747,744.

## Current Financial Year

Dealing with the question of the current year, Mr. Mitchell stated that the receipts from ordinary revenue for the six months ended on the 31st December, 1920, had been very satisfactory and the estimated receipts would probably be exceeded at the end of the fiscal year. There would also be an increase over the estimates in the ordinary expenditure for the current fiscal year by the amount of special warrants issued, since 1st July, \$93,271, as shown in the statement laid on the table of the House and also by the supplementary estimates to be submitted to the House for the amounts required for the different services to complete the necessary expenditure for the current year. It was expected that this increase in expenditure would be more than covered by the increase in revenue, judging by the receipts up to the 31st December.

## Temporary Loans

Under the authority of Article 807 of the Revised Statutes of Quebec, 1909, and of order-in-council of the lieutenant-governor of the 17th June, 1920, a temporary loan was obtained from the Bank of Montreal of five million dollars, to bear interest at the rate of six per cent. per annum. This loan was made to recoup temporarily the Consolidated Revenue Fund of the province, in part for the large advances made on account of the construction of the St. Maurice River waters storage; of the St. Francis River waters storage; of the St. Anne and Savanne rivers' waters storage; of the extension of the Sanitorium at Ste. Agathe des Monts; of the construction of an annex to the Montreal court house; of the construction of the bridge over the Batiscan River, and for expenditure for good roads under the Good Roads Act, 1912, which expenditures are, by the acts authorizing them, to be provided from permanent loans. This loan was paid 18th October, 1920, from the proceeds of short-term loans authorized by Act 10 George V., chapter 3.

Under authority of the Act 10 George V., chapter 3, tenders were called through the Bank of Montreal from the leading bond houses in Canada and in the United States for \$3,500,000 province of Quebec five-year gold bonds to be dated 1st March, 1920, bearing interest at the rate of six per cent. per annum, payable half-yearly on March 1st and September 1st, principal and interest payable in gold at the Bank of Montreal, at Quebec or Montreal, or at the agency of the Bank of Montreal, New York, at the option of the holders. Bonds to be in the denomination of \$1,000 each, with interest coupons attached. In response to the call tenders were received from two syndicates. The most favorable tender, that of the syndicate composed of Messrs. Wood, Gundy and Co. and the Dominion Securities Corporation, was accepted and the amount \$3,255,973 was paid by them to the credit of the province in the agency of the Bank of Montreal, New York. The price obtained for these bonds in Canadian funds was 104.59, the province, however, being obliged to pay prevailing rate of exchange realizing as above set forth.

Tenders were called for a second issue of \$3,500,000 under the same terms, through the Bank of Montreal. In response to the call, three syndicates tendered and the most favorable, the syndicate composed of Messrs. Harris, Forbes

## Canadian National Newspapers and Periodicals Association

—a highly constructive service—absolutely dependable and devoid of prejudice and personal bias. It means much to you.

The policies and principles back of this important service enable you to secure practical and impartial information of great value in business and in the home: and they assure a ready fund of literature of exceptionally high standard at all times.

To read the Association's Standards of Practice listed herewith is to understand what this Association means to you.

### Standards of Practice

#### Canadian National Newspapers and Periodicals Association

THE Members of this Association shall dedicate their best efforts to the cause of business and public service, and to this end shall pledge themselves:

1. To consider first the interests of the Subscriber.
2. To work for truth and honesty in all departments.
3. To eliminate, in so far as possible, their personal opinions from their news columns, but be leaders in thought in their editorial columns, and make their criticisms constructive.
4. To refuse to publish puffs, free reading notices, or paid write-ups, to keep their reading columns independent of advertising considerations, and to measure all news by the standard "Is it real news?"

5. To decline any advertisement which has a tendency to mislead, or which does not conform to business integrity.
6. To solicit subscriptions and advertising solely upon the merits of the publication.
7. To supply advertisers with full information regarding character and extent of circulation, including detailed circulation statements, subject to proper authentic verification.
8. To co-operate with all organizations and individuals engaged in creative advertising work.
9. To avoid unfair competition.
10. To determine what is the highest and largest function in the field which they serve and then to strive, in every legitimate way, to promote that function.

This is Number One of a series of advertisements regarding an Association that typifies thorough-going Canadian stability. Read the forthcoming advertisements in the Magazines, and Agricultural, Business, Religious and Educational newspapers and Technical newspapers.

**Canadian National Newspapers and Periodicals Association**  
Office - 70 Lombard Street - Toronto, Ontario

and Co., Incorporated, and the National City Co., was accepted and the amount \$3,302,366 was paid by them to the credit of the province in the agency of the Bank of Montreal, New York. The price obtained for this issue in Canadian funds was 105.13, the province, however, being obliged to pay prevailing rate of exchange, realizing as above set forth. From the proceeds of these two loans the \$6,000,000 temporary loan authorized by section 1 of the Act 5 George V., chapter 2, maturing 1st April, 1920, was paid, the balance of the price of the bonds being applied in reduction of the advances made out of the Consolidated Revenue Fund. The accrued interest, \$33,640, was credited to interest account.

#### Loan of June, 1920

Under authority of the Act 10, George V., chapter 3, debentures for \$5,000,000 were issued, dated 1st June, 1920, bearing interest at the rate of six per cent. per annum, payable half-yearly on June 1st and December 1st, \$2,500,000 maturing 1st June, 1925, and \$2,500,000 maturing 1st June, 1930. Principal and interest payable in gold at the Bank of Montreal, Quebec or Montreal, or Toronto, at the option of the holder. Bonds in denominations of \$100, \$500 and \$1,000 were issued, of which \$1,000,000 was sold to the Montreal City and District Savings Bank, Montreal, at 98.53 and accrued interest, and \$4,000,000 were issued and offered to the public through the Bank of Montreal and numerous bond houses, on which a commission of one per cent. was paid, netting 99 to the province, and all of which have been sold at that rate. The province on the whole issue of \$5,000,000 realized \$4,993,692. The proceeds of these loans were applied towards the payment of the temporary loan of the 15th June, 1920. The accrued interest, \$48,392 was credited to interest account.

Some criticism was made by certain financial houses of the fact that the government did not accept the tenders which were called for this loan by the fiscal agents of the province of Quebec, in a call for tenders dated the 14th April, 1920, and which call for tenders contained the following conditions:—

"Delivery and payment will be made at the Bank of Montreal, Quebec, on the 15th May next."

"No tender for any part of the issue or for securities not precisely as described or varying the terms of payment and delivery will be considered."

Three tenders were received in answer to the call for tenders as made. One by the Dominion Securities Corporation, Ltd., and Syndicate, and one by Hanson Brothers and Syndicate, and the third by the Bank of Hochelaga. The two first mentioned tenders complied with all of the conditions of the call for tenders, but the tender of the Bank of Hochelaga contained modifications as to payment and delivery, contrary to the specific conditions contained in the call for tenders, in the following manner:—

"In case any one of offers 1, 2 or 3 is accepted, we will take delivery of and pay for \$1,000,000, on May 15th, 1920, \$1,500,000 on or before June 15th, 1920, and \$1,250,000 on or before September 1st, 1920, \$1,250,000 on or before October 1st, 1920."

"In case any one of offers 4 and 5 is accepted, we will take delivery of and pay for \$1,000,000, on May 15th, 1920, and \$1,500,000 on or before June 15th, 1920."

In view of the fact of the Bank of Hochelaga's tender being the highest, but not conforming to the call for tenders, it was deemed advisable not to accept any of the tenders made, the fiscal agents of the province having reserved its right not to accept the highest or any bid, in the following terms: "The highest or any bid will not necessarily be accepted."

The position taken by the province was that they could not accept the highest tender because it did not conform to the call for tenders, as this would have been manifestly unfair to the other tenderers, and the province could have been severely criticized by all good business and financial pro-

cedent, and it would have resulted in untold injury to the credit of the province on any and all future calls for tenders made by it, and might have resulted in financial houses declining to tender on future issues and thereby resulting in great and material loss and irreparable injury to the credit of this province, not to speak of the just and equitable criticism that might be made to the method of so dealing with tenders.

The government then negotiated the sale of \$1,000,000 above referred to with the Montreal City and District Savings Bank, Montreal, at 98.53, on the conditions that they were to be held for investment purposes during the whole term for which the debentures were issued, and that they would not be placed on the market and compete with the balance of the issue of \$4,000,000, which it was intended to dispose of through the fiscal agents of the province and various bond houses, as before mentioned, at par and accrued interest, and to net the province 99.

The Hon. M. Mitchell closed his remarks on this item by saying that the House and the province of Quebec had no apologies to make to anybody, and could hold its head high with pride for the price that its bonds have got in the markets of the world.

### NEW BRUNSWICK HAS CURRENT DEFICIT

#### Surplus More Than Wiped Out by Interest on St. John and Quebec Railway Obligations

RECEIPTS of \$3,100,548 and expenditures of \$3,004,200 are shown in a financial statement of New Brunswick for the year ended October 31, published on January 29. The expenditure, however, does not include interest on bonds and other indebtedness of the St. John and Quebec Railway, amounting to \$311,903, from which is taken province's share of the net earnings for the year, \$59,552, which would make the net charge from St. John Valley Railway \$252,351, and makes an actual deficit on current account of \$156,002, which amount is carried into the balance sheet as "deficit on current revenue account for the year ending October 31, 1920, as per statement attached."

The certificate of Price, Waterhouse and Co. is addressed to the Premier of New Brunswick and reads as follows:—

"In accordance with your instructions we have examined the books and accounts recording the financial transactions of the Government of the Province of New Brunswick for the fiscal year ending October 31, 1920, and certify that, in our opinion, the attached balance sheet exhibits a correct view of the financial position of the province as at October 31, 1920, according to the best of our information and explanations given to us and as shown by the books of the province.

"The additions made during the year to the capital accounts of roads and bridges represent expenditures classified as 'permanent' by the provincial engineers.

"The revenue and expenditure account for the year has been charged with interest on bonds and other indebtedness of the St. John and Quebec Railway Co. amounting to \$311,903.69, but no credit has been given in respect of interest accrued during the year on the balance of cash retained by the trustees for the bondholders of the St. John and Quebec Railway, which balance, we understand, may be subject to adjustment when a final settlement with the trustees is effected."

The revenue includes:—Dominion subsidy, \$637,976; territorial revenue, \$1,589,539; fees, provincial secretary, \$31,204; taxes, incorporated companies, \$164,386; motor vehicle fees, \$198,111; provincial hospital, \$58,391; provincial prohibition, \$79,562; succession duties, \$90,340.

Expenditure includes:—Agriculture, \$83,243; education, \$318,697; forest service, \$175,347; legislative assembly, \$52,637; motor vehicle fund, \$142,959; provincial prohibition, \$59,346; provincial hospital, \$172,433; public health, \$48,079; public works, \$811,810.

## CONCURRENT USE OF TRADE MARKS

### Canadian Courts Have Not Yet Gone on Record on This Point—Some Decisions of Courts of England and United States

**I**N a recent case before the Exchequer Court of Canada, that of United Cigar Stores, Limited, vs. Miller, the petitioner sought to have the words "United Cigar Stores" registered as a trade mark, and to have the same words registered in the name of the objecting party expunged. These words constituted the trading name of the petitioner, and most of the trade marks claimed by it were for particular brands of cigars. It was held that on the facts as stated the petitioner was not entitled to have the words "United Cigar Stores" registered as a trade mark.

Mr. R. S. Smart, of the Ottawa Bar, has made an annotation dealing with the question brought up in the above case, viz., if a company has a corporate name similar to that of the petitioner would that be a bar to any action which might be brought against it for passing off its goods as the goods of the petitioner? Mr. Smart says that these rights as between two parties who use a trade mark concurrently have never been defined in Canada.

#### Decisions in United States

In the United States the following decisions have been pronounced:—

"There is no such thing as property in a trade mark except as a right appurtenant to an established business or trade in connection with which the mark is employed. The law of trade marks is but a part of the broader law of unfair competition; the right to a particular mark grows out of its use, not its mere adoption; its function is simply to designate the goods as the product of a particular trader and to protect his goodwill against the sale of another's product as his; and it is not the subject of property except in connection with an existing business.

"*The exclusive right to the use of a trade mark is founded on priority of appropriation*, 36 Sup. Ct. Rep., at 361, 'But these expressions are to be understood in their application to the facts of the cases decided. In the ordinary case of parties competing under the same mark in the same market, it is correct to say that prior appropriation settles the question. But where two parties independently are employing the same mark upon goods of the same class, but in separate markets wholly remote the one from the other, the question of prior appropriation is legally insignificant; unless at least it appear that the second adopter has selected the mark with some design inimical to the interests of the first user, such as to take the benefit of the reputation of his goods, to forestall the extension of his trade, or the like.'"

#### The Law in England

The same question has also arisen in England in the case of Edge and Sons, Ltd., vs. Gallon and Sons, the facts and decision being as follows:—

"In 1888 E. commenced to call his blue 'Dolly,' and it was ordered, invoiced and advertised thereafter as 'Dolly.' In 1894 a company was formed which took over the business of E. In 1898 the company commenced an action against G. and Son for supplying blue not being the plaintiff's, to persons ordering 'Dolly Blue.' The blue so supplied was blue manufactured by R. and bore R's trade mark, which consisted of a washing tub called in some parts a 'Dolly' tub and in other parts a 'Peggy' tub with a handle of a dolly or peggy stick projecting from it. R. had used this trade mark since 1871, and registered it under the Trade Marks Act in 1876. It was admitted that R's blue was called 'Oval Blue' and was invoiced as 'Oval'; but the defendants' case was that retail customers often asked for it as 'Dolly Blue,' both before 1888 and since, and that there had, in fact, been a concurrent use of the word 'Dolly' to describe E's blue and R's blue. *Held*, in the trial, that the plaintiffs were entitled to an injunction. An appeal was allowed with costs

above and below, and the plaintiffs' costs of the trial, which had been paid by the defendants, were ordered to be repaid to them, but without interest. The plaintiffs then appealed to the House of Lords. *Held*, by the House of Lords, that the concurrent user was proved, and the judgments of the Court of Appeal were right.

#### Trade Mark and Design Act

In Canada under the Canadian Trade Mark and Design Act the applicant is required to be entitled to the exclusive use of the trade mark. In Partlo v. Todd, Chief Justice Ritchie said, "It is not the registration that makes the party proprietor of a trade mark; he must be proprietor before he can register. I think the term 'proprietor of a trade mark' means a person who has appropriated and acquired a right to the exclusive use of the mark." In the same case on appeal it was said by Hagarty, C. J. O.: "I think the object of the act was not to create new rights but to facilitate the vindication of existing rights . . . (cites early statutes). All this legislation is based upon the further protection of existing rights. Next year 24 Vict., ch. 21, was passed, for the first time establishing a register. It declares it expedient to make provision for the better ascertaining and determining the right of manufacturers and others to enjoy the exclusive use of trade marks claimed by them." A distinction must be drawn between a trade mark which is a mark on goods and a trade name used on a hotel, store or establishment. A trade mark as such must be applied to a vendible article."

Sebastian, 5th Edition, at page 17 says, "All such cases whether of trade mark or trade name or other unfair use of another's reputation are concerned with an injurious attack upon the goodwill of a rival business; customers are diverted from one trader to another, and orders intended for one find their way to another. Trade marks are really a branch of the goodwill of the business with which they are connected, representing it in the market, while the trade name over the shop represents it to the passerby. It is by the devaluation of the goodwill that that of the trade marks is regulated; they are in fact included in and valued as part of the goodwill; severed from it they cannot exist."

#### Boston Rubber Case

The use of the name of a corporation as a trade mark was dealt with in the Boston Rubber Shoe Co. v. Boston Rubber Co. of Montreal, the facts and decision being:—

The plaintiff incorporated in Massachusetts in 1852; registered the trade mark in 1897. The defendant in 1899 sold rubber boots and shoes with the mark of "The Boston Rubber Co., of Montreal, Ltd.," and pleaded that the mark was in effect a corporate name and the use of was not fraudulent. The trial by Audette held that defendants were free to use their corporate name in the absence of fraud. The judgment was reversed by the Supreme Court which held that the word "Boston" had become an invented or fancied name. Sir Louis Davies said:—

"It seems to me, with great respect, very difficult on the evidence in this case to find that fraud and bad faith were absent; . . . The object . . . may not have been the decisive purchasers . . . but that such would have been the result, I entertain no reasonable doubt."

"Nor am I able to see how he can, by obtaining for himself and his associates letters corporate under the statute, do under cover of the corporate name what he otherwise would be prevented from doing. The defendant company has the right to use its corporate name for all lawful and legitimate purposes. It has not the right to use it, however, by stamping it upon goods it has manufactured and offered for sale, if by so doing it causes the purchasing public to believe that the goods are those of the plaintiff company." Restrained use of words "Boston" or "Bostons" in connection with rubber boots and shoes by stamping circular advertising without clearly distinguishing from the shoes of the plaintiffs.

# News of Industrial Development in Canada

**Toronto Harbour Board Since its Inception Has Brought in Industries at the Rate of One in Ten Days—Little Hope of Securing Steel Orders From Britain—Brighter Outlook for Smaller Steel Products—Howard Smith Company Running at Seventy-Five Per Cent. of Capacity**

SINCE the inception of the Toronto Industrial Department, operated under the joint auspices of the city and the Harbour Commission in February, 1919, the record of tangible accomplishment is equal to one new industry established in Toronto every ten days, according to the annual report of the department. These industries occupy more than 1,200,000 square feet of floor space for manufacturing and storage purposes. Thirty-five of the industries were established in 1919 and twenty-nine last year. Of the latter, twenty-one were American, two British and six Canadian. In addition, approximately seventy-five British, Canadian and American firms are at the present time actively investigating the industrial possibilities of Toronto as presented by the department.

Greater progress has not been made owing to the limited new building construction, due to the high cost of materials. In many cases the department has been advised by incoming industries that it was their intention to establish branch plants as soon as the cost of construction became normal. The activities of the department have in the main been directed to endeavoring to establish basic industries in Toronto. To this end a careful survey has been made of the greatest importations into Canada, ascertaining the largest manufacturer of such articles in other countries, and setting forth the facts relating thereto as applied to Canada's trade possibilities.

The officials feel that the work accomplished to date is satisfactory, and, with the completion of the Chippawa power development scheme, which will furnish the city with unlimited power facilities, greater progress will be made, and Toronto will soon become the largest manufacturing and industrial centre in the Dominion. Manager E. L. Cousins advocates the establishment of a permanent industrial force in London, England, to furnish British manufacturers with accurate data regarding industrial openings in Toronto. He expresses the opinion that in the very near future over \$6,000,000 of British capital will be invested in industries in Toronto. What is needed most in Great Britain is unlimited publicity, coupled with accurate data regarding industrial opportunities here to induce the manufacturers of the Motherland to establish branches in Toronto.

## The Steel Industry

Reports from New York indicate that, after four weeks of restricted operations, amounting in some cases to almost complete shut-downs, various independent steel companies are starting up on orders that will keep their plants going on a fifty per cent. scale for two weeks or more. Railroads, shipyards, fabricating shops and implement works, the ordinary outlet for plates, shapes and bars, give promise of moderate consumption in the first half of the year.

In Canada, however, there is no indication of a revival of any significance at the present. The steel companies in Nova Scotia are operating very much below normal, and the possibility is that the Dominion Steel Corporation will close down entirely unless orders are received. It was hoped that Roy M. Wolvin, president of the company, on his return from England, would issue the "carry on" order in the hope that the future would bring business, but no such announcement has been made. The hope of securing business from Britain at the present time is very remote, as even the British steel manufacturers are having difficulty in placing their products.

George Williamson, of Barrow-on-Furness, England, is visiting Canada as a representative of large English ship-building interests, and brings a story of depression in the steel, engineering and allied industries. The various yards throughout the British Isles are fairly busy on their slipways

and in their engineering shops, due, of course, to the fact that most of the orders now being executed were placed six to nine months ago, when the outlook was not obscured by a too uncertain future, and when the warning of economists still went unheeded.

## Small Steel Products

There is stated to be a better outlook for the smaller steel goods. The Ontario Steel Products, Ltd., is running its plants at considerably more than half capacity at Chatham and Gananoque, Ont., and orders are stated to be coming in, with business much brighter.

The Ontario Steel Products Company manufactures a line of garden tools, such as spades, rakes, etc., and with the approach of spring there should be a better demand for this class of goods.

## Howard Smith Paper Mills

A recent report in the press regarding the retarded operations and wage reduction of the Howard Smith Paper Mills is stated to be misleading by the company, and to some extent incorrect. Last year, when labor was scarce, the workers at the Beauharnois and Cornwall mills endeavored to form a union, and threatened to stop work unless higher wages were granted. Unable to do otherwise, the company granted the increase, with the understanding that when labor became more plentiful the increase would be cut off. In these two mills this has been done. At the Crabtree Mills of the company there has been no reduction in the wage schedule. These mills are running five days a week.

A few days ago, Howard Smith, president of the enterprise, stated that the company was working around 75 per cent. capacity, and that, with business picking up, it looked as if normal running would be in vogue in about a month. This 25 per cent. of less than normal working means a reduction in certain of the Toronto Paper Company's mills from 54 hours normal a week down to 36 hours for the day hands and from 32 to 40 hours for the other shifts, whose normal week is 48 hours. The reductions are not uniform, and constitute about 25 per cent. average reduction from normal. Contracts for high-grade paper have been made at last year's average price.

## Cut Glass Company Enlarging

The Community Cut Glass Company, of Winnipeg, Man., is enlarging its plant and increasing its staff by more than forty men. The company commenced manufacturing last August, and at the time only American glass was available, but this month the first shipment of Belgian glass arrived, and the company will use this entirely in the future.

A new company, under the name of the Dundas Plate Glass Company, has been formed, and has been located at Dundas, Ont.

Transformation of the sash and door plant of the Rat Portage Lumber Company at Norwood, Man., into a modern automobile factory is progressing. The new company plans to build a thousand cars during the first year of operations.

The McClary plant, formerly the Buck Stove Works, Brantford, Ont., which had been closed since Christmas, has reopened, though not at full strength. The staff will be increased as the market opens up.

Last week the Peace River Milling Company commenced operations at Peace River, Alta.. The flour factory has a capacity of 150 barrels per day, while there is a grain elevator with a capacity of 40,000 bushels. The company is a local organization, the stock having been subscribed by men of the district.

## CEASE TO TRANSACT BUSINESS IN MANITOBA

It was announced in these columns last week that a number of insurance companies who were transacting business in the province of Saskatchewan, and whose licenses expired at the close of 1920, have made no renewals. The same situation is in evidence in Manitoba, a number of companies having ceased to transact new business in the province. Some of these companies are: The Maryland Assurance Corporation of Baltimore; the Equitable Life Assurance Society of the United States; Lloyd's Plate Glass Insurance Company.

The Manitoba government will not initiate immediately group insurance for civil servants, it has been announced. The whole question probably will be referred to the legislature at the coming session. It has been found that, owing to the comparatively advanced average age of employees and the fact that many of them, by length of service, would be entitled to immediate maximum benefits under the plan, the premium cost would be very high. The government does not feel justified in putting the plan into operation without getting the sanction of the legislature.

That some system of insurance for civic employees is urgently needed, and that if satisfactory arrangements can be made with an insurance company, insurance against accident, sickness and death will be consummated for them by the city on some mutual basis to be decided upon later, was the belief and decision of the Calgary, Alta., city commissioners at a conference between that body and a deputation from the federation of civic employees last week. It was suggested that the scheme should be based on the contract that the city should pay half of the premium and the employees the other half. However, this was only a tentative suggestion.

A. Z. DeLong has severed his connection with the Terminal Agency, Ltd., the Vancouver, B.C., insurance agency, and has become resident manager of the local insurance firm of Wilcock, Peck and Hughes. For several years Mr. DeLong had been the manager of Little and Loomis, Inc., and last year the provincial business of this company was incorporated under the name of Terminal Agency, Ltd.

The Scottish Canadian Assurance Co. which was recently granted a Dominion license, has been registered to transact fire and hail insurance in Ontario.

## Fifty-one Years of Steady Progress

One of the most brief yet impressive histories of Canadian financial institutions is contained in the annual record of The Mutual Life of Canada. The current issue will be ready in a few days. A copy will be sent to you on application. It contains fifty-one successive summaries, showing in the parallel columns the increase from year to year of the company's various receipts, expenditures, etc. No other document could better convey the idea of solid, uniform achievement and the momentum of the advance is now greater than ever. The prospects are bright for a still more rapid expansion within the next few years. The assets of the company exceed \$40,000,000, and the assurances in force have reached \$206,000,000. There is a gross surplus of more than five million dollars over and above the amount necessary to guarantee all policies, so that the position of the company, in spite of the strain of recent years, is one of uncommon strength.

# News of Municipal Finance

**Annexations of Municipalities to Montreal Will be a Problem for Quebec Legislature—Metropolis Objects to Taking Over the Weak Without the Strong—Force May be Used—Penticton Improves its Standing—Calgary Tax Arrears Nearly Five Millions—Collections are Improving**

**Charlottetown, P.E.I.**—A deficit of \$2,767 on last year's transactions is shown by the city, due to the taxes which have not yet been paid for 1920.

**Lethbridge, Alta.**—\$33,000 worth of bonds, due in 1922, have been redeemed, thus affecting a saving in the interest of 4½ per cent. for the unexpired period of a year and four months, and netting the city the sum of \$1,850 saved in the process.

**Ottawa, Ont.**—Taxes and water rates collected by the city last year amounted to \$3,977,600, an increase of nearly half a million dollars over the amount for the previous year. Tax arrears at the end of 1920 amounted to \$568,734, of which amount it is estimated \$430,110 is collectible.

P. H. Veale, civic assessment commissioner, reports that the income assessment has increased nearly 200 per cent. in the past five years. The income assessment for 1920 was \$10,379,777, as against \$3,530,982 in 1916. In 1920, 9,631 income forms were sent out from the assessment office and were followed up with 2,463 letters. Mr. Veale's report also shows a substantial increase in the business assessment. In 1916 the business assessment was \$9,710,950; in 1919, \$10,381,276, and in 1920, \$11,390,099, an increase of 17.29 per cent. in five years.

**Vancouver, B.C.**—H. J. Painter, assessment commissioner, places the value of the buildings throughout the city for this year at \$77,353,371. The revised figures for last year, as passed by the Court of Revision, were \$73,652,920, or an increase of \$3,700,541 in the value of improvements alone. In land values Mr. Painter estimates the assessed value of taxable realty in the city for this year as \$133,240,598, compared with \$133,954,010 as the revised land values for last year. The decrease for the current year is explained by Comptroller Pilkington as representing approximately the value of the various parcels of land which fell to the city at the 1919 tax sale and thereby became exempt from taxation. The value of these tax sale lots amounts to \$910,325, which indicates that the assessment commissioner has not made any material increase in assessed values for this year as far as land alone is concerned. The total assessed value of both land and improvements within the city's boundaries is placed by Mr. Painter at \$210,593,969, while the total for last year after being revised was \$207,606,930, or an increase of \$2,987,039.

**Calgary, Alta.**—For three years, while the total amount of taxes owing has been increasing, the percentage of collection of taxes also has been improving, according to figures of J. H. Mercer, city treasurer. The treasurer's statistics show that while unpaid arrears of taxes and current taxes now amount to \$4,630,254, the percentage of collections for the last three years has been, on all taxes, as follows:—1918, 40.75; 1919, 43.50; and 1920, 44.54 per cent.

The improvement in percentage of collections, however, is really better than this, for the reason that it is in the collection of current taxes that the increasing improvement is most evident. It is the long-standing arrears that are hardest to deal with, and a start has now been made in cleaning these up through the drastic method of the tax sale. In current taxes, the treasurer's figures show that in 1918 66 per cent. of the current taxes were collected. In 1919 the current taxes were collected to the extent of 69.50 per cent., while in the year just past current taxes were collected up to the total of 71.21.

**Penticton, B.C.**—Over the period of two years the municipality has greatly improved its financial standing. The total tax levy last year was \$93,413, and taxes paid totalled \$73,529, leaving arrears for the year of \$19,883.

These figures compare with \$68,840 the levy for 1918, and tax collections of \$40,011. The total arrears of taxes, with interest at the end of 1918 was \$41,397. This amount had been reduced to \$25,850 at the end of 1920.

The balance sheet shows a stronger position, assets exceeding liabilities by \$128,809, as compared with \$103,014 at the end of 1918. The debenture debt is now \$819,000, against which the sinking fund amounts to \$89,812, being \$4,091 short of the necessary amount. At the end of 1918, the sinking fund was \$66,206, against a debenture debt of \$530,500, but was \$31,500 in arrears. The better standing in regard to sinking funds has been brought about by the improved tax collections.

Utilities are also in a much better position. The profits on the irrigation system for the year amounted to \$3,470, compared with a loss of \$2,311 for 1918. Electric light department had a loss of \$489, but this compares with a loss of \$2,253 for 1918. The water department had a profit of \$2,821, compared with a profit of \$625 for 1918. The combined profit of the utilities was \$5,802, as against a deficit of \$3,939 for 1918.

**Montreal, Que.**—The city council has passed a resolution calling upon the legislature to annex the municipalities on the Island of Montreal, which are twenty-two in number, to the city, and has placed itself on record as favoring action to force such cities as Westmount, Outremont, Verdun and Lachine into union with the metropolis. The municipalities mentioned, together with others, are opposed to such action, and have placed their views before the legislature, and Premier Taschereau has almost as good as stated that no municipalities will be annexed to Montreal against their will.

In introducing the motion, Ald. Brodeur, leader of the council, said as Westmount was surrounded by Montreal territory, and Outremont is nearly enclosed, except at the northern section, they really formed part of Montreal. Verdun was likewise a part of the city. He considered it was in the city's interests to annex them. Referring to the Metropolitan Commission, he said the debts of all the municipalities were to be consolidated with the debt of Montreal. Montreal would, therefore, become responsible for all these debts, and, as these municipalities wanted to take part in the affairs of Montreal, he thought they should go all the way and annex themselves to the city.

The municipalities which resent annexation are in good financial standing, and are opposed to the idea of becoming associated with the less fortunate municipalities. On the other hand, those places whose standing is not quite as good as it might be, wish to become annexed to the city of Montreal. As Premier Taschereau has stated, such action would not be fair to the metropolis. It is a case of either all or none being annexed, as already the city's debt has been advanced to a high mark through taking over weak municipalities.

A realty tax of 1.35 has been passed by the city council. This is the same rate as for 1920. The council has also approved of temporary loans not to exceed \$10,000,000 in anticipation of 1920 revenue.

The report just submitted to the Administrative Commission by P. Collins, assistant city treasurer, shows that the total valuation of property in the city for 1920 amounts to \$893,179,797, less \$3,494,180 of reductions, giving a net figure of \$889,685,617. Exempted property for 1920 amounted to \$226,249,403, or \$1,735,532 more than the previous year. The taxable value for 1920 was \$663,436,214, an increase of \$36,321,644. The revenue from taxes on real estate, including school and snow removal taxes, amounted to \$15,420,435, as against \$14,107,054 for the previous year.

# Government and Municipal Bond Market

**Ontario and Saskatchewan Bonds Readily Absorbed—Latter Issue was Increased to \$3,000,000, But Hon. Peter Smith Would Not Meet Extra Demands—Victory Bond Market Firm—St. Thomas Selling Over the Counter**

THERE can be no doubt as to the trend of the government and municipal bond market. The ready absorption of the \$10,000,000 Ontario issue and the \$3,000,000 Saskatchewan, together with other municipal issues, and the continued demand for Victory bonds, are all favorable signs. One of the chief influences in bringing about the change in the bond market in the past two months is the lessening of demand for funds for general business, but the rising tendency has been to some extent the result of psychological influence. A few weeks ago investors were apprehensive and inclined to be depressed, but this feeling is disappearing and confidence is becoming predominant.

The great danger at the present time, however, is over-confidence and extravagance, which factors, if becoming over-ruling, will work to weaken the market. When the province of Ontario bonds found such a ready market last week, dealers approached the provincial treasurer for an extra issue of \$5,000,000, but the Hon. Peter Smith was disposed to move cautiously, in spite of the fact that the province is in need of funds and that the market is in a receptive mood. Any other action on the part of the treasurer would hardly have met with the approval of conservative bond men, as any movement towards oversupply at the present time will not help the bond business, but will be extremely adverse.

The movement of Victory bond prices during the past week, as illustrated below, has been favorable. Fractional reactions took place in two issues, but the market as a whole was firm and steady with a good demand throughout:—

	Control price.	Last week.		This week.	
		High.	Low.	High.	Low.
1922 .....	98	99¼	98	99¼	98¾
1927 .....	97	98¾	97½	99	98¼
1937 .....	98	100¼	99	99¾	98
1923 .....	98	99¾	97	99	96½
1933 .....	96½	98%	97½	99	98
1924 .....	97	96¾	95¼	96¾	96
1934 .....	93	95¾	95	95½	95

### Local Selling

In view of the better position of the Canadian bond market and of the further improvement which will no doubt follow as the year proceeds, it is not expected that many municipalities will undertake to arrange their own financing this year. There were a number of municipalities whose efforts in the local market were attended by success in 1920, and these will perhaps use this same method in disposing of their securities until they find it more profitable to use the whole Canadian market by selling through the usual channels. Most of the municipalities which used the local market last year received par for their debentures, which, in the majority of cases was on a 6 per cent. basis. The general market has not yet reached that level for municipalities or provinces, but is gradually proceeding towards that rate.

St. Thomas, Ont., one of the pioneers in the "sell at home" method has just placed \$233,000 waterworks debentures on the local market and \$50,000 debentures for improvements to the gas works. Already about \$100,000 has been taken up.

Marmora, Ont., is also offering \$15,000 6½ per cent. electric light debentures, and application for about \$5,000 have been received.

Newmarket, Ont., has completely disposed of \$20,000 sewer debentures "over the counter."

Lennoxville, Que., is selling \$75,000 6 per cent. 40-year debentures locally, and already a considerable amount has been disposed of..

### Coming Offerings

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Mossbank, Sask. ....	\$ 2,000	8	10-instal.	.....
Sarnia, Ont. ....	164,747	var.	various	Feb. 7
Rockwood R.M., Man.	52,878	6	30-instal.	Feb. 10
Portage la Prairie, Man.	54,000	6	20-years	Feb. 11

Mossbank, Sask.—Tenders are being asked for \$2,000 8 per cent. 10-instalment debentures. W. R. Chrystal, secretary-treasurer.

Trail, B.C.—A by-law has been passed by the rate-payers authorizing the expenditure of \$37,000 for extension and repairs to the waterworks system, and debentures for this amount bearing 7 per cent. interest, and payable in Trail, Toronto or New York, will be issued shortly.

Sarnia, Ont.—Tenders will be received up till February 7, 1921, for the purchase of the following debentures:—\$86,147.68 6½ per cent., maturing from 1921-30; \$50,000 6 per cent., maturing from 1921-35; \$18,400 6½ per cent., maturing from 1921-35; \$10,200 6½ per cent., maturing from 1921-30. The total issue is \$164,747.68, and the proceeds will be used for various local improvements.

Rockwood R.M., Man.—Tenders will be received up till February 10, 1921, for purchase of \$52,878.59 6 per cent. good roads debentures, dated November 1, 1920, and maturing from one to thirty years. Bidders to state offer, including accrued interest, in Canadian currency. V. W. McFarlane, secretary-treasurer, Stonewall, Man.

Fredericton, N.B.—Tenders will be received up till February 15, 1921, for \$120,000 5 per cent. serial bonds maturing from 1924 to 1934.

### Bond Sales

Edmonton, Alta.—W. Ross Alger and Co. have purchased the following school district issues: Georgetown, \$3,500 8 per cent. 15-years; Westlock Consolidated, \$4,300 8 per cent. 15-years; Granstone Dale, \$3,500 8 per cent.. 10-years.

Three Rivers, Que.—Keating and McCrea, a local company, has purchased \$200,000 6 per cent. bonds maturing in 1925 at a price of 98.39, which is on about a 6.37 per cent. basis. Versailles, Vidricaire and Boulas offered 98.01, while G. L. Beaubien and Co. bid 97.50.

Windsor, Ont.—The Dominion Securities Corporation has purchased the following debentures, aggregating \$477,585, at a price of 94.42, which is on about a 6.40 per cent. basis:—\$110,000 5½ per cent., 30-instalments; \$234,585 5½ per cent., 10-instalments; \$125,000 6 per cent., 20-instalments; \$8,000 6 per cent., 40-instalments. The following tenders were received:—

Dominion Securities Corp. ....	94.42
W. A. Mackenzie and Co., and R. A. Daly and Co. ....	94.33
Wood, Gundy and Co. ....	94.312
R. C. Matthews and Co., and A. E. Ames and Co. ....	94.219
Brent, Noxon and Co. ....	94.137
National City Co., Ltd. ....	94.048
United Finance Corp. ....	93.53

There was a great deal of trouble regarding the award of the issue, then difficulty arising from the fact that tenders were called on the four blocks separately. In the

## Convenient Collection of Interest

is one of the three outstanding advantages to be derived from purchasing Canadian Government and Municipal Bonds. The other two are security and marketability.

These three features permit the investor to feel that his principal is safe, that his interest is prompt and sure, and that he can, if necessary, find a ready market for his bonds.

At present prices these bonds yield from 6% to 7%.

final analysis, however, it was found that the Dominion Securities Corporation was the highest bidder by a small margin over W. A. MacKenzie and Co. The first four bids were very close..

Regina P.S.D., Sask.—The school board has awarded its \$250,000 6½ per cent. 30-year debentures to the Canada Trust Co., and McLeod, Young, Weir and Co., at a price of 100.697. Tenders were asked for securities due in thirty instalments, or at the end of thirty years, and payable either in Canada or in New York, and the following offers were received:—

	Can. straight term.	Can. instal.
Canada Trust Co., and McLeod, Young, Weir and Co. ....	100.697	.....
Wood, Gundy and Co. ....	99.646	98.86
Nay and James, and A. E. Ames and Co. ....	99.199	98.796
Canadian Debentures Corp. ....	99.02	.....
Dominion Securities Corp. ....	98.417	98.147
Harris, Read and Co., Housser, Wood and Co., and Bell, Gouinlock and Co. ....	98.37	.....
R. C. Matthews Co., and United Financial Corp. ....	98.11	.....
A. Jarvis and Co. ....	98.067	97.87
Brent, Noxon and Co. ....	97.54	.....
MacNeill, Graham and Co. ....	97.09	.....
W. A. MacKenzie and Co. ....	96.00	.....

No American bids were considered.

Saskatchewan.—There was good competition for the \$2,000,000 6 per cent. 15-year bonds of the province, and owing to the good price received the provincial treasurer decided to increase the issue to \$3,000,000. Some of the Canadian bids were published in these columns last week, but the following is the complete list. It will be noticed that there is only a small margin between bids for American and Canadian payment:—

	Payable in Canada.	Payable in Canada or U.S.A.
Dominion Securities Corporation, Ltd., on behalf of Dominion Securities Corp., Ltd., National City Co., and Harris, Forbes and Co. ....	97.637	.....
Dominion Securities Corp., Ltd., and Dillon, Read and Co. ....	.....	97.73
Wood, Gundy and Co., and A. E. Ames and Co. ....	97.63	.....

Received after opening of the above tenders:—		
Miller and Co., and Brandon, Gordon and Waddell ....	.....	99.10

Winnipeg, Man.—Wood, Gundy and Co. have been awarded \$750,000 6 per cent. 20-year bonds at a price of 97.89, which is on about a 6.19 per cent. basis. Tenders received were:—

Wood, Gundy and Co. ....	97.89
United Financial Corp., Ltd. ....	97.84
Osler, Hammond and Nanton and A. Jarvis and Co. ....	97.82
A. E. Ames and Co. and Dominion Securities Corporation ....	96.78
Bond and Debenture Corporation ....	96.33
Allan, Killam and McKay ....	95.53

Wood, Gundy and Co. also took an option on another \$500,000 at the same price.

### NEW TORONTO BOND HOUSE

Announcement is made of the establishment of a new bond house in Toronto, Ont., to be known as McLeod, Young, Weir and Co. The four members of the firm, D. I. McLeod, W. E. Young, Lt.-Col. J. G. Weir, and J. H. Ratcliffe, have been associated for a considerable term of years with the bond department of A. E. Ames and Co. All are well known in local financial circles. The new company will specialize in government and municipal bonds, and has opened offices in the McKinnon Building.

### WESTERN EMPIRE LIFE ASSURANCE CO.

The Western Empire Life Assurance Co. has laid the foundation for the upbuilding of what looks to be a healthy and progressive business. Incorporated before the war, the company was forced to go through its initial stages during the world struggle and the readjustment period following, but the experiences encountered, it seems, have added to rather than adversely affected the strength of the organization, and last year the first dividend of 6 per cent. was paid on the called capital. The following figures are sufficient evidence of the above remarks:—

	1920.	1916.	Increase.
Assets .....	\$ 653,116	\$ 285,940	\$ 367,175
Premiums .....	130,759	60,277	70,482
Total income .....	249,514	87,449	162,064
Insurance in force .....	5,481,464	2,703,768	2,777,695

### MUTUAL LIFE ASSURANCE CO. OF CANADA

The Mutual Life Assurance Co. of Canada celebrated its fifty-first year by breaking all its records for new business. In 1920 new assurances issued amounted to \$47,008,024, being \$6,382,368 in excess of the record figure of 1919. Income last year, including net premiums of \$7,685,792, amounted to \$10,124,171, compared with \$8,583,404 in 1919. Surplus earned amounted to \$1,657,104, bringing the total surplus up to \$5,018,680, as compared with \$4,540,536 in the previous year.

Death and disability claims were considerably less, being \$1,215,136, compared with \$1,517,411 in 1919, while total payments were about \$145,000 lower at \$3,667,521. Expenses and taxes were somewhat higher.

The record of the Mutual Life is among the best of those submitted by Canadian life companies, and as the company is conducted on a strictly co-operative basis, all policyholders share equitably in its prosperity. The following figures tell their own story:—

	1920.	1919.	1913.
New business .....	\$ 47,008,024	\$ 40,625,656	\$14,412,962
Income .....	10,124,171	8,583,404	4,169,660
Total assets .....	42,847,277	38,020,949	22,252,724
Business in force .....	206,627,728	170,706,305	87,392,026

Canadian Stocks Show Reactionary Tendency—Paper Issues Depressed—Fort William Pulp Bonds Offered—Several Other Companies Plan New Financing—Mount Royal Hotel Company on the Market

ONE of those reactions which frequently overtake a confident market in the face of conditions which do not warrant a rapid rise, made itself felt on the Canadian stock exchanges this week. The nervousness was brought about chiefly by a similar movement in Wall Street and depression in the paper issues. Liquidation was not great, however, and this helped to hold prices from falling too sharply. The declines should be considered constructive rather than otherwise, in that they will bring prices more into line with fundamental conditions, and thus give the market a firmer foundation to work upon.

The falling off in papers was the most interesting feature during the week, and the movement was ground for a good deal of discussion. It is realized that paper prices must undergo adjustment, just as other commodities have been changed, and as some paper prices are already doing. No one industry can escape the readjustment. The big decline in Riordon, following the sharp advance of a week ago, was the result of technical operations. The covering of shorts drove the stock up to a level which it was hardly possible to hold in the light of present conditions. The position of Riordon, however, is very satisfactory, and the outlook is not marred.

The position of New York stocks was to a slight extent an influential factor here, but there are many events occurring across the line which have no particular bearing on the situation in Canada. This week, contrary to the movement which has been in progress for a few weeks, money became scarce and the call rate went up to 7 and 8 per cent. The reason for this is that the banks are carrying some weak companies over the strain; and furthermore, American banking resources are still engaged largely in the financing of foreign trade. In addition, the government has been drawing heavily on its balances.

Trading figures show that the turnover of listed stocks in Montreal was 49,272, as compared with 47,448 in the previous week, while the turnover of listed shares in Toronto was 13,102, as against 14,930 previously. The increasing demand for investment securities is reflected in the bond trading, which amounted to \$1,900,360 in Montreal, as against \$1,607,200 previously, and \$2,417,850 in Toronto, as compared with \$1,830,700.

## New Financing

A great deal of new industrial financing is expected to be completed within the next two or three months, and already several announcements have been made. The Spanish River Pulp and Paper Company, it is understood, will issue bonds for the construction of a new power plant. It is also stated that the Montreal Tramways Company is completing

plans for financing large extensions and betterment to the system.

An offering of \$1,000,000 first mortgage 8 per cent. serial gold bonds, issued by the Fort William Paper Co., Ltd., has been announced in Montreal by Peabody, Houghtling and Co., Chicago. They are offered at par and accrued interest to net 8 per cent. on the investment. This is part of a total authorized issue of \$5,000,000, its purpose being to complete a 120-ton groundwood pulp mill and to furnish working capital. The bonds mature in ten instalments of 1½ years to 10½ years, commencing with \$40,000 and terminating with \$160,000.

The total assets of the company are placed at \$3,140,000, and the estimated earnings from the pulp mill are 36,000 tons of groundwood pulp at \$120 per ton, amounting to \$432,000. The interest charge on this would be \$80,000, and the annual reserve necessary to pay both principal and interest of the issue, \$146,896. The company has issued capitalization of \$1,100,000 preferred and \$4,000,000 common, the incorporation having only been in August last.

## Mount Royal Hotel

Next week, N. A. MacDonald and Company, Ltd., of Montreal, Toronto and Ottawa, will offer publicly the unsold balance of the \$4,000,000 8 per cent. convertible debentures of the Mount Royal Hotel Company. The debentures will be issued in denominations of \$100, \$500, \$1,000 and \$5,000. Coupons will be payable quarterly on 1st of January, April, July and October at the Royal Bank of Canada, Montreal, or New York. The debentures are to be converted into 8 per cent. preferred stock, fully paid and non-assessable, on January 1st, 1923.

## Capitalization Changes

James Coristine and Company, fur merchants, etc., Montreal, Que., incorporated under the laws of the Dominion of Canada, have been authorized to increase their capital stock from \$300,000 to \$500,000 by the issue of 2,000 new shares of \$100 each.

The Monarch Lumber Company, Savona, B.C., operating under a Dominion charter, has been authorized to increase its capital from \$1,000,000 to \$2,000,000 by the issue of 10,000 new shares of \$100 each.

Supplementary letters patent have been issued to the Sunbeam Chemical Company of Canada, Ltd., Toronto, by the Dominion government, authorizing the company to increase its capital from \$50,000 to \$100,000 by the issue of 500 new shares of \$100 each.

The 12,786 new shares of Consumers' Gas Company stock recently issued, with a par value of \$639,300, has been listed on the Toronto Stock Exchange.

# Corporation Finance

**Canadian Pacific Railway Net Earnings for 1920 Exceed Previous Year by a Small Margin—  
Break in Silk Prices Affects Belding, Paul, Corticelli Profits—F. N. Burt Reports Good Year**

**Loew's Theatres of Canada.**—The proceedings for the completion of the merger of the various Loew's companies in Canada have been delayed for the present, according to an announcement, pending the securing of certificates from the auditors, showing exactly the existing assets and liabilities of the various companies.

**Twin City Rapid Transit Company.**—The total operating revenue of the company in 1920 was \$12,986,406, as against \$11,442,444 in 1919, an increase of \$1,543,961, or 13.49 per cent. At the same time the operating expenses were increased from \$8,445,058 in 1919 to \$9,794,834 in 1920, an increase of 15.58 per cent. The gross income in the past year advanced from \$1,922,081 to \$2,144,397, and the net income transferred to profit and loss from \$788,352 to \$999,099.

The earnings of the company for the year 1920, after paying all expenses and making proper allowances for depreciation, were sufficient to warrant the directors in declaring a dividend of 3 per cent. for the year upon the common stock, payable January 3, 1921. The regular quarterly dividends on the preferred stock at the rate of 7 per cent. per annum were declared and paid.

**Pressed Metals Company of Canada.**—At the meeting of the company in Toronto this week shareholders received new assurances of progress made in connection with the process of making bushings, which is the company's chief product. J. W. Leighton, inventor of the bushing, explained to the gathering that he had invented a new process which, he claimed, was much more satisfactory, in that it reduced the details of the process materially, and made for an almost perfect product, according to tests so far made, as compared with heavy rejections through defects under the old method. This improvement had been reached since the opening of the factory at Marysville, Mich., last autumn, and, from the favor with which the bushings were received by the Ford Company of Canada, there was reason to believe that it would be in good demand from other motor manufacturers when the industry revived. The financial statement, covering the past year and ten months, showed that no profit had been made.

**F. N. Burt Company, Ltd.**—The annual report of the company for the year ended December 31 last, shows profits of \$842,712, compared with \$795,714 in the previous year, the profits having been arrived at, as President S. J. Moore points out, after writing down inventories to present replacement values, the shrinkage having been charged off in the year's operations.

Taking advantage of the conversion privilege, a large block of preference stock has been converted into common, the common stock now amounting to \$1,278,700, compared with \$858,500 a year ago, while the preferred has been reduced to \$1,476,500 from \$1,866,700. The inducement was, of course, the increase in the dividend on common from 8 to 10 per cent. on October 1 last. Dividend payments on both classes of stock amounted to \$214,132, or about one-third of the year's profits. All dividends were paid in New York funds.

Even after writing down, the company's inventory is still higher, merchandise amounting to \$1,186,587, compared with \$991,609 a year ago. The profit and loss balance carried forward is \$984,857, as against \$713,044, an increase of \$271,000. Quick assets have increased from \$1,671,710 to \$1,938,003, while current liabilities were reduced from \$676,021 to \$559,948.

**Belding, Paul, Corticelli, Ltd.**—Adverse conditions in the silk trade are reflected in the annual statement of the company. Profits in 1920, after all manufacturing, selling and administration expenses, were \$262,153, down from \$429,260 in the 1919 year. After deduction of depreciation, debenture interest, discount on debentures and making an extraordinary charge of \$50,000, a balance of \$121,285, against \$331,467, remained available for dividends. Preferred dividends took

up \$90,856, against two years' payments made in 1919, amounting to \$121,142. These deductions leave net profits available on the outstanding common stock of \$749,500, of only \$30,429 against \$210,325 a year ago. The 1920 net is equal to 4.05 per cent. earned on the common stock, against 29.3 per cent. the previous year.

The company has survived the big break in prices, and the balance sheet shows a satisfactory position. Net working capital is somewhat lower, but is substantial. Principal figures are as follows, with comparisons:—

	1920.	1919.
Property . . . . .	\$1,227,167	\$ 999,980
Investments . . . . .	10,376	66,550
Current assets . . . . .	2,336,010	1,500,216
Current liabilities . . . . .	1,599,432	639,876
Bonded debt . . . . .	559,375	587,796
Surplus . . . . .	363,565	338,136
Inventories . . . . .	1,504,216	639,585

**Canadian Pacific Railway.**—Barely exceeding the showing of 1919, the Canadian Pacific Railway closed 1920 with net earnings of \$33,153,044 for the year. A résumé of the company's operations for the twelve months shows a steady increase in gross earnings from nearly \$14,000,000 in the first two months to nearly \$25,000,000 in October, which proved to be the biggest month of the year. In November the gross fell to \$23,799,146 and in December to \$20,604,167.

The operation expenses of the road, however, did not show the same uniformity and net earnings in consequence did not always show up as the gross. During the first two months net showed a substantial decrease from the corresponding months in 1919. In March, April and May net showed up better, but fell away again in June to September. In October the best comparison with the preceding year was shown. Not only was there a record for the year, but net was a record and showed an increase of 2¼ millions over net in October the preceding year. The last three months of the year showed both gross and net substantially above a year ago, but down from October.

The following figures show the total results for 1920:—

	1920.	1919.	Increase.
Gross . . . . .	\$216,641,349	\$176,929,060	\$39,712,289
Expenses . . . . .	183,488,304	143,996,023	39,492,281
Net . . . . .	\$ 33,153,044	\$ 32,933,036	\$ 220,008

From total earnings of \$216,641,349 were deducted \$183,488,304 in operating expenses, leaving net earnings for the year at \$33,153,044, an increase of barely a quarter of a million over the previous year. Deducting the 1919 fixed charges, amounting to \$10,161,510, pension fund of \$500,000 and preferred dividend of \$3,227,276, the balance left for application to the common stock amounted to \$19,264,258, which was equivalent to 7.4 per cent., as compared with 7.3 per cent. the preceding year, the fraction above the company's dividend requirements, the remaining 3 per cent. of the 10 per cent. dividend being payable out of special income.

Gross and net earnings back as far as 1910, show the following interesting results:—

1920 . . . . .	\$216,641,349	\$33,153,044
1919 . . . . .	176,929,060	32,933,036
1918 . . . . .	157,537,698	34,502,387
1917 . . . . .	152,389,334	46,546,018
1916 . . . . .	139,729,687	50,476,499
1915 . . . . .	109,397,246	43,525,235
1914 . . . . .	110,466,785	31,788,067
1913 . . . . .	141,155,657	46,326,160
1912 . . . . .	134,279,363	45,959,144
1911 . . . . .	110,946,516	38,553,520
1910 . . . . .	100,851,629	36,368,781

# Mortgage Loan Situation Pressing for Solution

**Mr. W. E. Rundle Points Out to National Trust Shareholders the Bearing of Scarcity of Capital on Country's Requirements for Farm and City Mortgage Loans—Exchange and High Interest Rates Make Importation of Capital Impossible.**

That the mortgage loan situation has become of national importance was a view expressed by Mr. W. E. Rundle, General Manager of the National Trust Company at the Annual Meeting of Shareholders on Wednesday, February 2nd. Mr. Rundle said:—

When addressing you a year ago I called your attention to a problem which, in my opinion, was then looming large on the horizon, and one which bid fair to assume national importance. The problem was as to where Canadians were, in the immediate future, to get money for farm and residential loans in view of the war having completely cut them off from one of their principal sources of supply—Britain and Europe. The passing of the last twelve months has served to emphasize the importance of this question. Our cities and towns are woefully short of houses. For many years the demand throughout Canada for farm loans has not been as great as it is to-day. Even in the Province of Ontario, where for some years the lending companies have experienced difficulty in placing farm loans, a striking change is taking place.

Before the war many farmers in Ontario who had money to lend placed it out on Mortgage to those of their neighbors who desired to borrow. It is well known that due to the educational effect of the Victory Loan Campaigns during the war, those who live in the rural districts of this province have become purchasers of bonds to no inconsiderable extent. If my recollection serves me aright about one-half of the amount subscribed in the last two Victory Loan Campaigns was taken by the people of the Province of Ontario; and of the amount subscribed by Ontario a goodly percentage was contributed by the rural population. If this tendency to invest in bonds continues—as it probably will—the farmers are likely to have less to lend on Mortgage than formerly, and those of their number desiring to borrow will doubtless return to the lending companies which twenty years ago were the Ontario farmers' only source of supply for Mortgage Loans. The companies must be prepared to meet the demand.

## Canada Must Supply Capital for Farm and City Building.

It is well recognized throughout the world—and Canada is no exception—that if the several countries are to compass their debts and obligations incurred by the war they must develop to the utmost their natural resources and their various industries. Agricultural pursuits are followed by at least 40% of the Canadian people. Agriculture is Canada's greatest single industry. Our agricultural possibilities are limited only by the men and money we can find for them. Our manufacturing industries, which mean so much to the

country and are capable of great expansion, must see to it that their work people are properly housed in order to be efficient in their work. Already there are abundant signs that whatever immigration Canada may desire to help develop the country, and of whatever texture, will be available both from Europe and the United States. There will be no lack of men. But it is not so easy to see where the necessary supply of Capital is to come from in the near future, especially for mortgage Loan purposes. There is no doubt that very large sums in the aggregate have had to be repaid to Great Britain and Europe by Mortgage lending companies during the last year. How long this movement will continue it is difficult to say. International exchanges are so demoralized that it will take some time to re-establish them. No one can say how long, although all are free to guess. The fluctuations in exchanges during the last year have been so great that even if for a period they were to approximate more normal conditions the uncertainty of their continuance and their susceptibility, while Europe is in its present condition, to sharp reactions will tend to deter an early re-establishment of pre-war relations. Moreover, it is abundantly clear that Europe in its present state has little, if any, surplus Capital for export, but on the other hand has a crying need in the reverse direction. This is one of the main reasons why she is at present unable to get upon her feet.

## Scarcity of Capital Remains, Even if Building Costs Drop.

In emphasis of the need for Mortgage Loan monies, it has been estimated that it would require from fifteen to twenty million dollars of Mortgage Loan money to assist in providing the dwellings necessary to properly house the population of the City of Toronto alone. A great deal is heard nowadays about the stimulation which would be given to the building trade if prices of material and costs of building were to take a substantial drop. This is, no doubt, true. But I venture to think that unless some source of supply for Mortgage Loans, which is not now in sight, is found there will be great disappointment in building activities even should the cost of building materially fall. The situation in Toronto is but typical of that which prevails throughout the whole Dominion. Like most problems it is easy to point out the difficulties. It is not so easy, however, to construct a way out of them. But when a question assumes national proportions, as the question does which we are now discussing, the people will insist on a way being found. Some solution of the Mortgage Loan situation must be forthcoming.

## Companies Must Share More in Liquid Funds.

We have made this question the subject of much examination and study, and I submit that the practical solution of the difficulty must come largely through the Companies—Trust Companies and others—which society in Canada has so far evolved for meeting Mortgage Loan needs, obtaining a larger share of the liquid funds which are available in Canada itself. It is unfortunate that Canada is shut out from her old sources of supply for Mortgage Loan money. But she is. It is a practical situation which has to be met and not a theoretical one, and no one I think will hold in the national interest—aside altogether from the interests of the Companies themselves—that those who need money to assist them in the rebuilding of their farms and their homes should be denied their rightful participation in a fair share of the country's liquid resources.

## COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended January 28th: McKinley Darr, 80,654; La Rose Mine, 88,073; total, 168,727. The total since January 1st is 665,028 pounds or 332.5 tons.

"Letters from the Front," Volume I., has been issued by the Canadian Bank of Commerce.

G. A. Stimson and Co., investment brokers, Toronto, who have for some time past occupied premises in the Union Bank Building, are moving their offices, and will occupy the ground floor of 36-38 King St. East.

## RECENT FIRES

Forum Building, Toronto, Stovel Building, Winnipeg, and Billiard Parlors in Halifax were Destroyed with Loss of \$100,000 Each—Four-story Building in Ottawa Destroyed with Loss of \$70,000

Beauceville, Que.—January 26—The store of Jean Poulin and neighboring houses were damaged by fire. The loss is estimated at \$20,000.

Bedford, Que.—January 28—Damage estimated at \$8,000 was caused by a fire which destroyed the post-office and the Serland Garage.

Belleville, Ont.—January 26—A frame and roughcast dwelling situated on the east side of James Street, occupied by John Potts, was damaged by fire. The loss is covered by insurance.

Brookville, N.B.—January 26—A cottage and barn, the property of H. G. S. Adams, and occupied by A. W. Harvey, was destroyed by fire. The loss is \$4,500, with \$1,200 insurance.

Callander, Ont.—January 24—Wilson's grocery store, Dr. Shaw's drug store and the Hydro-Electric power line from Nipissing were destroyed by fire.

Cardston, Alta.—January 25—Residence of Mrs. Walsey was destroyed by fire. The total loss is \$2,600, with no insurance.

Cooksville, Ont.—February 2—Turner's garage, the pool-room and the barber shop were destroyed by fire. The blaze was caused by an overheated stove. The total damage is estimated at \$10,000.

Edmonton, Alta.—January 27—A two-story building, opposite the Fairview Hotel, was destroyed by fire.

Fauquier, Ont.—January 26—Two children of Postmaster J. A. Daigle were burned to death in a fire which destroyed the post-office. It is believed the children had been playing with matches.

Halifax, N.S.—February 3—Fire, believed to have been caused by an explosion, did \$100,000 damage to the Olympic Billiard Parlors on Gottingen Street.

Holland, Man.—January 28—Fire started in the rear of F. E. Campbell's drug store and completely destroyed the Holland Estate Block, comprising Campbell's drug store, A. S. Ole's general store and two lodge halls. The loss is partly covered by insurance.

Indian Lorette, Que.—January 30—The Armand Bastien factory was destroyed by fire with an estimated loss of \$60,000.

Kingston, Ont.—January 28—Residence of Patrick Byrnes, 259 Queen Street, was destroyed by fire. There were three fatalities.

London, Ont.—January 31—Residence of Jas. H. Glover, 519 Bathurst Street, was destroyed by fire. The fire was caused by an overheated stove. There were four fatalities.

Meacham, Sask.—January 23—Residence of Mr. Haleschuk was destroyed by fire. One fatality.

Montreal, Que.—January 27—The plant of A. Hollander and Son, 64-66 Queen Street, was destroyed by fire. The loss is partly covered by insurance.

Odessa, Sask.—January 27—Fire, which started from a gasoline explosion in the poolroom and barber shop of A. Nillius, did \$1,000 damage.

Ottawa, Ont.—January 29—A four-story building, occupied by the Sach Bros. on Queen Street, was destroyed by fire. The loss is estimated at \$70,000, of which \$6,000 is covered by insurance.

Ridgetown, Ont.—January 28—Barns on the farm of David L. McDonald were destroyed by fire. The loss is estimated at \$7,000, partly covered by insurance.

## NEED FOR MORE MONEY TO LOAN

The directorate of the Toronto General Trusts Corporation was re-elected at the annual meeting held on February 2nd. The president, Hon. Featherstone Osler, said: "We have much to encourage a reasonable optimism, and if only you learn to discourage extravagance, to promote economy and thrift, home production and buying, we may look at the future with confidence. Lean years may, and, in the cycle of change, must come; perhaps they are necessary to teach us the lessons I have suggested, for few seem willing to learn them just now."

In reviewing the corporation's year, A. D. Langmuir, general manager, mentioned that an office had been purchased for the Vancouver branch at a cost of \$100,000. The demand for mortgage loans had been a steadily increasing one during the year, particularly in the west, but loaning operations would have to be considerably curtailed on account of the present difficulty in obtaining funds at a rate which would leave a reasonable margin of profit. While mortgage rates had increased in Ontario from 6 to 7 and 7½ per cent. in some instances since 1914, there had been no increase in the west, where the rate was still 8 per cent.

## NATIONAL TRUST COMPANY ANNUAL MEETING

At the annual meeting of the National Trust Co., held on February 2, three new directors were elected, namely, Leighton McCarthy, K.C., Toronto; Carl Riordon, Montreal, and Edward Fitzgerald, Winnipeg. Herbert C. Cox, who has been a director for several years, was made vice-president. Another change was the elevation to the position of directors of the members of the Winnipeg advisory board of the company, comprising Sir Douglas Cameron, K.C.M.G., A. McT. Campbell, Kenneth MacKenzie and George W. Allan, K.C., M.P., all of Winnipeg. The three new directors first named replace Justice Britton, Elias Rogers and Alexander Bruce, K.C., who passed away during the year.

Sir Joseph Flavell, president, in a review of financial conditions during the past year, appealed for greater production as a means of bringing better times. "It should be understood," he said, "that cheaper agricultural products, cheaper raw materials, call for lower cost of production, including labor, lower cost of supplies and lower profits to manufacturers and merchants. If two tons, or two pounds, or two yards, or two articles can be purchased by the consumer for the recent cost of one, there will be added comfort to the buyer, added orders from other nations, and added employment to the worker. Labor, when well employed, establishes liberal production. Liberal production, to be absorbed, calls for prices within the consumer's resources. There cannot be work for all, unless the prices of commodities keep step with the available cash resources of consumers at home and abroad."

## Casualty Insurance Man

Experienced, wanted for Head Office work, particularly agency development and claim adjusting. Good salary to the right man.

Apply, stating past experience,

"CASUALTY"

Box 391, *Monetary Times*, Toronto.

GENERAL INSURANCE AGENCY and Brokerage office requires the services of clerk (either sex), capable of attending counter. Must have had some fire insurance experience. Box 389, *Monetary Times*, Toronto.

## Increase in Workmen's Compensation Proposed

Payments Would be Still Further Increased by 100 Per Cent. Proposal  
Made in Ontario — 1920 Results Show Rapid Growth of Operations —  
Manitoba Now Has Public System, While Adoption in Quebec is Probable

**A**BNORMAL increases in the number of industrial workers and in wage scales during the past few years have combined to enlarge the financial operations of provincial workmen's compensation boards in Canada. In addition to this the scope of the acts in some provinces has been extended by including more classes of workers, and in Ontario last year the maximum rate was increased from 55 per cent. of wages to 66 $\frac{2}{3}$  per cent. 1920, therefore, found payments and assessments greatly increased.

Ontario was the first province to change from the old system under which the workmen compelled payment through the ordinary law courts. Since the Ontario Act of 1914 was passed, Nova Scotia, New Brunswick, British Columbia, Alberta and Manitoba have adopted similar legislation.

The adoption by Manitoba, on January 1, of a state workmen's compensation system, leaves only Quebec, Saskatchewan and Prince Edward Island with private companies operating in this field. Workmen's compensation has been operative in Manitoba since 1919, but the employers have hitherto dealt with the insurance companies, whereas from this year they will deal directly with the body representing the state, the Workmen's Compensation Board, which will maintain a common accident fund, out of which compensation payments and the cost of administration will be met. Under the new act the compensation to be paid to a worker for total disability is 66 $\frac{2}{3}$  per cent. of his wages. In the event of death the widow will get \$30 a month until she dies or remarries, and, in addition, she will be allowed \$7.50 for each child up to the fourth, the maximum allowance thus being \$60 a month.

Increase in disbursements under the Manitoba Workmen's Compensation Act during 1920 totalled \$97,863, or 49.6 per cent. more than in 1919. Disbursements during the year amounted to \$295,221, as compared with \$197,357 during 1919. There were 3,920 accidents reported to the board, an increase of 38.56 per cent. over 1919.

### Ontario Results for 1920

In Ontario there was a large increase in the number of accidents dealt with, and an even larger advance in the sum paid in compensation, due to greater benefits having been provided for. A total of 54,851 accidents were reported to the board during 1920. This was 10,591 more than in 1919. Fatal accidents reported during 1920 were 452, as against 429 in 1919, being an increase of 23. The daily average was 183 accidents, or one accident every three minutes of the working day.

The amount awarded for compensation during the year was \$7,076,439, and the amount for medical aid \$703,705, making a total of \$7,780,145, as against a total of \$4,192,859 during 1919, and \$3,883,994 during 1918. The increase is largely by reason of the larger benefits provided for under the amendments to the act, including the increase in death pensions for accidents happening in previous years. The

total number of cheques issued by the board during the year averaged 494 per day, and the benefits awarded \$26,000 a day.

About half a million workmen are now under the protection of the act, and, including the pensioners from former years and the families of workmen and pensioners, it is estimated that over 100,000 people every year are receiving some part of their maintenance from the benefits provided for by the act. The total yearly wage roll of industries covered by the act is estimated at \$450,000,000.

### British Columbia

There were 20,508 accidents in all industries in British Columbia in 1920 up to December 23, according to a statement by E. S. H. Winn, chairman of the Workmen's Compensation Board. This number is 2,323 in excess of the total for 1919. The number of fatal accidents was 197, while in 1919 195 deaths occurred. The total amount of money paid for compensation, pensions, widows' pensions and medical aid was \$1,981,755, while the 1919 total was \$1,323,990.

During 1920, as in 1919, logging was the most hazardous occupation in the province, logging claims for compensation numbering 4,377.

The figures prepared by Mr. Winn show that the payroll in the industries of the province totalled in 1919 \$126,829,760, and the number of men employed was 109,227. For eleven months of 1920 the total paid in wages was approximately \$130,000,000, and the number of men employed was 112,000.

### Results in New Brunswick

In the province of New Brunswick the total number of claims reported were 5,012 made up as follows:

Temporary disabilities .....	3,419
Permanent partial disabilities .....	255
Deaths .....	49
Claims partially disposed of and in process of assembly .....	448
Claims (minor accident in which no compensation was paid) .....	841
Total .....	5,012

The amounts paid out for—

Compensation .....	\$170,592
Medical aid .....	19,911
Hospital fees .....	9,704
Pensions .....	55,069
Set aside in pension reserve .....	211,766

The gross administration expenses were \$43,074 less the amount paid by Dominion and provincial government \$5,631, leaving a net cost to the employer of the province of New Brunswick of \$37,442.

Estimated income for 1920 will be about \$558,000.

The Association of Canadian Workmen's Compensation Boards, at its annual meeting held early in October last,

adopted recommendations for still further enlarging the scope of the work, as follows:—

"Resolved that this Association interpret Section 1 of Chapter 15-8-9 George the Fifth, as meaning that all employees of His Majesty in every department or branch of the service, without regard to the nature of the service, shall be entitled to compensation in case of personal injury by accident arising out of and in the course of his employment, and that the Dominion Government be requested to so amend the said Act as to give effect to the foregoing interpretation.

"That where necessary, legislation be obtained to bring into being accident prevention legislation, and that its enforcement be vested in the various Workmen's Compensation Boards.

"That the Association is of the opinion that the collective liability system is a much better form of Workmen's Compensation law than the individual liability law, and that no workman or dependent should be left to depend upon the solvency of the individual employer for payment of pensions or other compensation.

"With the view to obtaining uniformity as far as possible in Workmen's Compensation Laws, we recommend for adoption to their respective governments, the following provisions where such do not already obtain: 1. That compensation other than in fatal cases be computed on the basis of a percentage of the workman's earnings. 2. That in case of death or injury the provinces should adopt a uniform scale of compensation. 3. That as far as practicable the benefits of the provincial Workmen's Compensation Acts be extended to all workmen. 4. That the scope of provincial Compensation Acts be extended so as to include all employees of provincial governments and municipalities, including police and firemen. 5. That medical and surgical aid, hospital and skilled nursing services, and such artificial members and apparatus as may be necessary as a result of the injury shall be provided free to the workman during the period of his disability. 6. That the various Compensation Boards be empowered to make rules and regulations for the prevention of accidents, and that employers be required to install first-aid service and equipment in their plants. 7. That where under any Compensation Act an employer has the right to elect to bring his industry under the provisions of the Act, the employees shall have the same right where the majority so elect."

The next annual meeting of the association is to be held on October 3, 1921, in St. John, N.B.

#### The 100 Per Cent. Movement

A movement is now on foot in Ontario to extend the rate of payment to 75 per cent. At the last session of the legislature, when the increase from 55 per cent was effected, a vigorous effort was made to have it raised to 75 per cent., resulting in a compromise at 66½ per cent. Organized labor in the province has a far-reaching program, including:—

(1) They will attempt to have the Workmen's Compensation Act pay 100 per cent. instead of 66½ per cent. at present, and the increases shall be retroactive to July 1, 1920. The increase from 66½ to 100 per cent. will involve an increased cost of \$3,000,000.

(2) There will be an attempt to provide old-age pensions. No details at present.

(3) Legislation for unemployment insurance will be strongly advocated for by a certain section of organized labor.

The proposal of one responsible leader is that boards shall be established throughout the country to ascertain the nominal working conditions and number of employees in each factory during good times, and, in the light of their findings, there should be levied an assessment similar to that levied under the Workmen's Compensation Act, in order to have some incentive to limit the amount of unemployment. To quote the words of the labor leader in question: "Employers should be assessed according to the number of men they lay off."

In Quebec an effort is also being made to have public workmen's compensation adopted. Labor men are asking that a commission of three men be appointed and that the act apply practically to all classes of labor. The only classes they wish excluded are domestic servants, farmers and executive officers, while they insist particularly on the inclusion of firemen and other municipal employees. It is understood that the attitude taken by employers officially at Quebec will be to ask that no action be taken at this session, and that a decision be deferred until labor conditions become more stabilized. On the other hand the government may decide to commence an inquiry into the advisability of such legislation as is proposed, in which event no action would be taken naturally until a subsequent session.

#### MANITOBA LEGISLATURE NOW IN SESSION

Housed in Ten Million Dollar Structure—General Improvement in Western Business—Indications of Building Activity

(Staff Correspondence.)

Winnipeg, February 10, 1921

THE thirty-third annual bonspiel is in full swing in Winnipeg this week, and curlers are gathered in the western metropolis from all over Canada, and from points in the United States. This makes business somewhat more active, as many country merchants are included in the visitors, and this is the time of year they place their spring orders. Wholesale business is, therefore, fairly active, and it is expected that during March business will show a still greater improvement.

Building this year in the west is expected to be fairly heavy. From many sources it is learned that there will be a continued downward tendency in the price of commodities and a reduction in wages of labor may be anticipated in some quarters. The prices of material are also expected to be lower. There does not seem, however, to be any great over-production in building material, while the demand will necessarily increase as the building season opens up. It is not expected that the 1921 season will show any great decrease in building costs, but there is undoubtedly a downward tendency.

#### The Grain Situation

The latest report of the Northwest Grain Dealers' Association issued this week gives the following figures of the grain situation in the three western provinces. The total crop is placed at slightly over two hundred and eighteen million bushels, showing a reduction of about twelve million from the previous report. Wheat in farmers hands still to market is given as only twenty four million bushels.

New companies with a total capitalization of eight million dollars were reported this week from the provincial secretary. The most important being the Canadian Mining and Leasing Corporation capitalized at five million dollars, and the Prairie Cold Storage Corporation, capitalized at two million dollars. The Continental Credit Corporation, four hundred thousand dollars, and the Western Sales Book Co., three hundred and fifty thousand dollars.

The Manitoba legislature assembled this week and met for the first session in the palatial new parliament buildings, the total cost of which have been in the neighborhood of ten million dollars. These new buildings now fully completed, are reported from many sources to be the finest of any on the North American continent.

Holders of participation certificates who did not surrender them to the Canadian Wheat Board on or before December 31, 1920, will be given another chance to redeem them, according to a statement issued by the board on February 9. Producers and others still holding these certificates are requested to surrender immediately same to the board, when due consideration will be given to the matter of making payment thereon.

# Parliament Ready for Opening on Monday

Government Will Avoid Contentious Measures, and May Face an Election—Some Possible Legislation—The Cost of the Navy—Settlement of Amounts With Germany

(Special to *The Monetary Times*.)

Ottawa, February 10, 1921.

EVERYTHING presages that the Parliamentary session beginning Monday will be an unusually stormy one. The return of a Liberal, G. N. Gordon, in the West Peterboro bye-election will encourage the Liberal Opposition to demand more strenuously than last year a general election, and in this, they will be supported by the Progressive members. Certain of its journalistic supporters are exhorting the government to make an appeal to the people in a general election immediately after the debate on the address, after voting supply, but it is not expected that the government will follow this advice unless it finds itself weaker in the House than it supposed.

## Avoid Contentious Measures

In a session where every government measure can expect rough riding, it is not intended to introduce any more contentious legislation that can be helped. The tariff revision proposals will necessarily be contentious although nothing drastic is expected. The Excess Profits Tax will probably be abandoned, and the chief interest will be to see what will be proposed to take its place. An extension of the sales tax is expected.

Of interest to the financial world is the legislation in view by Senator Robertson with regard to Unemployment Insurance, amendments being devised for the purpose of allowing insurance companies to do more than one kind of business, a movement on foot to bring provincial and federal officials in agreement on amendments needed to the Bankruptcy Act, the desire of loan and trust companies with some exceptions to get an extension of their powers to take deposits, co-incident legislation arranged for in the federal and Ontario houses to appoint an engineering board to control the disposal of power developed on the Winnipeg and English rivers from the Lake of the Woods and Lac Seul districts to the Manitoba boundary, and the intimation that the government is considering making considerable changes in the land settlement regulations and policy of the country.

## Railways to Oil Fields

Although the government had intended to undertake no new railway building this session, nor to purchase any more branch lines for the Canadian National Railway, it is possible that the discovery of oil at Fort Norman will lead to certain petitions for franchises to build such railways being presented, and that the government will be asked to make a declaration of policy on the point. Certain small railways running out of Edmonton which the government would not look at before may acquire a new importance for a time. Certain building arranged for at the last session of Parliament will continue during the coming season, but as a policy no new building will be attempted unless new discoveries of oil in other parts of the north make it an economic necessity. During the session it is hoped that the Grand Trunk Railway Board of Arbitration will come to a conclusion with regard to the value of the shares in dispute, and that the final merging of the Grand Trunk and Canadian National railways will be accomplished this year. The policy of nationalization will again be attacked by those against it when the government once more asks for more than sixty million dollars to make up the operating deficit.

Amendments to the Franchise Act are expected in view of the referendum vote in Ontario, and the whole question of appointments to the Civil Service by the Civil Service Commission will again be under debate. The Pensions Com-

mittee will sit again to hear complaints and suggestions from organizations of veterans.

## Naval Expenditure

That the net expenditure of the Canadian Department of Naval Service during the last fiscal year was \$9,638,876, is shown by the annual report of the department. The gross expenditure for the year was in excess of fifteen millions, but the amount of refunds exceeded six millions, the total being thereby very greatly reduced. The revenue for the year was slightly in excess of half a million dollars. Under orders issued in March last by the Minister of the Naval Service, Hon. C. C. Ballantyne, a complete reorganization of the dockyards was instituted, with the object of bringing them up to date, and ensure their future operation on lines of strict economy and efficiency. The reorganization involved a large reduction of staff throughout the department, and only the most efficient and necessary employees were retained. The section of the report dealing with the fisheries protection service says that on the Great Lakes one vessel has been in commission. This will be replaced by three smaller ships providing a better system of protection at little additional cost.

## Seed Grain Loans

The government is making arrangements with the banks for advances to those farmers of the west who lost their crops last year and who are unable to personally finance the purchase of seed grain. It is estimated that the amount of the advances will be about half a million dollars. The advances are to be made only to homesteaders, actually engaged in farming, on the security of their personal notes, the government undertaking to make good in the event of default.

## German Debts

Notice is given that Canadian creditors who have registered with the clearing office at Ottawa their claim against German nationals in respect of pre-war debts, must make the necessary statutory declarations in support of their claims on or before March 31, 1921. No claim in respect of pre-war debts will be admitted after that date, unless the controller of the clearing office is satisfied that the omission to lodge the declaration by the date mentioned arose from circumstances for which the creditor could not justly be held responsible.

## Central Purchasing Commission

The Purchasing Commission of Canada supersedes the late War Purchasing Commission, it has just been announced. Its duties are in part to supervise the purchase of all supplies for all departments of the Government throughout Canada, and the policy is to purchase direct from the best source of supply.

Requisitions or demands for supplies are forwarded by the local officers to their respective departments at Ottawa, which in turn submit same to this Commission, which directs the action to be taken. In so far as possible all supplies demanded are purchased by tender, and the business given to the lowest tenderer for goods required. The Commission is of the opinion that supplies should be purchased in the districts where they are required. That statement may have to be modified according to the kind and quantity of the goods required.

The rural municipalities of Manitoba voted against the adoption of a municipal hail insurance scheme at the recent elections.

## CANADIAN GUARANTY TRUST COMPANY

At the annual meeting of the shareholders of the Canadian Guaranty Trust Co., held in Brandon, Man., good reports of the operations of this institution were presented. There has been a marked increase in the assets of the company, and a considerable addition to the paid-up capital which now amounts to \$263,637. The assets total \$2,896,955. The volume of business transacted shows a substantial increase and many estates have been placed with this company for administration. Considerable sums have been transferred to the reserve and contingency funds, and there are substantial undivided profits.

The business of the company is carried on in the four western provinces of Canada, and an agency has been opened at Swift Current, Sask. The company has a creditable record of achievement, and since and including the year 1914, has regularly paid a six per cent. dividend.

## TRUSTS AND GUARANTEE COMPANY

The annual statement of the Trusts and Guarantee Co., Toronto, shows that the estates, trusts and agency account at the end of 1920 stood at \$16,383,751, compared with \$14,046,958 at the end of 1919. The guaranteed trust account increased from \$5,363,413 to \$5,422,655. Net profits for the year at \$111,975, showed a small increase of \$2,000 over the previous year.

The progress of the company since 1907 has been rapid. Guaranteed trust funds held thirteen years ago amounted to \$785,421, while now they are close to five and a half millions. Estates, trusts, etc., have increased from about \$2,000,000 to more than \$16,000,000. Total assets are now \$23,542,212, compared with \$4,830,482 in 1907.

E. B. Stockdale, general manager, in his report at the annual meeting, stated that the company's experience with real estate mortgages has been a most satisfactory one. Properties that have been foreclosed from time to time and disposed of have resulted in a net profit to the company, and the officials are confident that not one dollar of loss will result from the many millions of dollars of mortgages held by the company. The late Matthew Wilson, K.C., of Chatham, who joined the board in 1908, having died during the year, Col. F. H. Wigle, K.C., of Windsor, was nominated and elected to look after the same interests.

During the year, stated President J. J. Warren, the company's asset had been thoroughly reappraised and certain non-producing assets had been disposed of at a sacrifice in order to turn the money received into producing channels. It is understood that the property disposed of consisted of lands acquired by a previous administration which had been carried, it was considered long enough.

## LONDON AND CANADIAN LOAN AGENCY COMPANY

Business of the London and Canadian Loan and Agency Co., Ltd., was well maintained during the year 1920, and the returns therefrom proved satisfactory. Gross revenue was about \$4,000 lower, and this, together with an increase in general expenses and administration, brought net profits to \$173,540, as compared with \$188,118 in 1919. The usual dividend of 9 per cent. was maintained, however, and a smaller balance carried forward.

The balance sheet shows that mortgage loans amount to \$4,399,105, as against \$4,381,380 at the end of 1919. Holdings of debentures show a reduction, but cash is about \$50,000 higher at \$288,046. Debentures, debenture stock and certificates are slightly changed at \$2,774,372.

The London and Canadian Loan and Agency Co., Ltd., has now been in business for forty-seven years, and has assets of \$5,067,253. The reserve fund amounts to \$1,000,000, or 80 per cent. of the paid-up capital.

## HURON AND ERIE REPORT

The Huron and Erie Mortgage Corporation, one of Canada's strongest and oldest mortgage corporations, with a charter bearing the date of 1864, being three years before the provinces of British North America became the Dominion of Canada, has just issued its 1920 statement, showing the same healthy growth which has been noted in former years. A few of the salient features of the progress made during 1920 are noted below:—

As at December 31st.	1919.	1920.	Increase.
Total assets .....	\$20,435,520	\$22,647,815	\$2,212,295
Reserve (the paid-up capital and reserve are now \$6,150,000 .....	1,000,000	1,150,000	150,000
Deposits (this represents an increase of over 35 per cent. in one year) .....	4,054,841	5,543,487	1,488,646
Huron and Erie debentures sold to Canadian and American investors .....	6,326,129	7,721,586	1,395,457

Loans on mortgages are shown at \$15,073,875, as compared with \$13,339,194 at the end of 1919. Holdings of securities are some \$250,000 higher at \$4,292,043. Another feature of the report which is worthy of mention is that for the thirteenth consecutive year there is no real estate on hand other than office premises. This is recognized as the "acid test" of a mortgage corporation's financial stability.

Net profits increased to \$549,600 from \$535,610. The usual dividend of 6 per cent. was paid, and in addition a bonus of 1 per cent. The amount of \$150,000 was transferred to the reserve fund, and \$22,317 was carried forward, as compared with \$16,373 previously.

At the annual meeting on February 9 it was decided that the dividend for the year would be 6 per cent., with a 1 per cent. bonus. This is the same as last year.

The following officers were elected for the ensuing year:—President, T. G. Meredith; first vice-president, Hume Cronyn, M.P.; second vice-president, Frank E. Leonard; general manager, Hume Cronyn; assistant general manager, M. Aylsworth; secretary, D. McEachern; treasurer, C. J. Clarke; auditors, J. C. Pope, F. G. Jewell, F. C. Turner and J. F. Kern. Mr. Kern took the place of M. H. Rowland, who resigned owing to ill-health. Directors chosen were George T. Brown, H. E. Gates, A. H. M. Graydon, Philip Pocock, Dr. F. R. Eccles and N. H. Howden.

## HOME INVESTMENT AND SAVINGS ASSOCIATION

An increase in mortgage loans, in deposits and in net profits are the outstanding features of the 1920 statement of the Home Investment and Savings Association, Winnipeg. Mortgage loans are shown as \$1,612,338, compared with \$1,523,788 a year ago, while contracts receivable on real estate, foreclosed and resold, are some \$37,000 higher at \$320,191. Interest on mortgages accrued due is \$103,933, being a slight decrease as compared with 1919. There has been some increase in the number of properties on which the interest is two or more years in arrears.

The number of properties in the hands of the association has been reduced by 65 per cent., and now stands at \$59,174, compared with \$137,579 in 1919, notwithstanding the fact that a large number of properties were taken over during the year. The inspector also takes the view that the loans of the company would be in a much better position but for the moratorium and other legislation enacted by the western provinces. A contingent fund of \$50,000 has been established, however, which is considered ample provision for any losses which might occur. A complete report will be found elsewhere in this issue.

### BROAD ISSUES FOR THE COMING SESSION

WHEN parliament assembles on Monday it will have three broad questions which must be handled with an eye single to the wishes of the electorate. First and foremost there is the tariff. The free trade forces have weakened, and a policy of tariff reduction is specially difficult in a period of contraction and falling prices such as that upon which we are now embarked. Nevertheless the movement has spread, gaining favor as the more extreme elements have been eliminated, and politicians have their ears to the ground to detect the sound of a movement capable of carrying a party to power in the federal house.

Along with the tariff, other big issues in the field of Dominion and provincial politics are public ownership and social legislation. Where is the economist who would care to decide, on behalf of the nation, in either direction on these issues? The ultimate success or failure of public ownership as compared with private ownership, or the advisability of the appropriation of wealth for the material advancement of the poor, cannot be decided scientifically. But here as in the case of the tariff there are details with which the people as a whole, in their capacity of electors, are not concerned. Although the public has demanded a measure of progress on both questions, the particular field to which public ownership is to be applied, or the methods for the transfer of wealth from those that hath not, has been left largely to the ingenuity of politicians. The ramifications in both cases are already extensive, however; we already have in Canada experiments in public ownership of railroads, steamship lines, power development, street railways and telephones, and a few municipal attempts at the distribution of vegetables, milk and other products; our social legislation includes regulations as to the hours and conditions of labor, minimum wages, mothers' pensions and employment service.

There is, therefore, a big field for the testing of political power on economic issues alone. A glance back at the political campaigns of the past few years, however, shows that

the economic questions have been the big issues. Material forces guide the course of politics at the present time, though religious or racial feelings may occasionally break through their shackles. Even patriotism as a political factor seems to be extinct since the end of the war; no popular interest can be aroused in the league of nations or relations with the empire. The test of the wisdom of new legislation is how it will affect the pocket of the voter.

Big material forces are therefore driving ahead movements which would never meet the approval of a commission or board of experts. It is on the broad questions, however, that the public is most apt to be nearest the truth, and much real progress must be attributed to its stubborn insistence on principles seemingly unsound. Would any Royal Commission have approved of the extension of the franchise in the United Kingdom last century? Scarcely so, nor would any body of experts now enforce the principles of free trade, public ownership or social legislation except in limited degree and with reference to a specific field. These are subjects which must be left to the guiding hand of public opinion, which "errs not, seeing but the thing it wills."

### THE PROGRESS OF SOCIAL LEGISLATION

FURTHER socialization of private wealth in Canada will be achieved this year, if the hopes of supporters of some proposed measures are realized. The most far reaching proposal is that for a system of national unemployment insurance whereby all workers would be paid whether they work or not, the payments to the unemployed being on a reduced basis of course, and coming from a fund maintained by assessments on employers, employees and on the government. Unemployment insurance is already in force in Great Britain and in Germany. The main difficulties are the prevention of abuse, and meeting special conditions such as the industrial depression of the present time.

There is also a movement to extend workmen's compensation by enlarging its scope and increasing the rate of

payment. Last year in Ontario the latter was raised from 55 per cent. to 60 $\frac{3}{4}$  per cent., and this year an attempt will be made to secure 75 per cent., with 100 per cent. as the final objective. There is also a desire in Quebec to have a system of public compensation.

Mothers' pensions are now provided by several of the provinces, including Ontario, Alberta and Manitoba. Already the expenditure on this account is piling up, and no doubt will continue to do so until the experimental stage is passed. Other social measures to be operated through the departments of education and public health are also contemplated.

All these measures mean increased expenditure on the part of the Dominion and provinces, and whether the money is provided by the governments themselves or by an assessment on the public, the effect is the same—the expense of running a business or of merely being a useful citizen is increased. There are times when business is in such a state of expansion that social reforms can go ahead with leaps and bounds. But in the face of shrinking government revenues it will be the part of wisdom to use caution in incurring new non-productive expenditures.

#### FELGER LIVESTOCK AND GRAIN LTD.

SOMEONE is wanted to buy \$250,000 notes of the Felger Livestock and Grain, Ltd., of Lethbridge, Alta., but before doing so a careful inquiry should be made as to the company's antecedents. L. A. Felger was formerly in control of the Felger Farming Co., Ltd., located seven miles southeast of Lethbridge. Under his management and supervision the concern became hopelessly involved, and the land is encumbered for more than it is worth to-day. In addition there are several executions registered against the company.

The prospectus of Felger Livestock and Grain, Ltd., which was incorporated early in December under an Alberta charter with an authorized capital of \$250,000, states that no public offering will be made of the shares. The amount subscribed is \$5,000, which is to be fully paid up by May 1st. Twenty \$100 shares are to be given to L. A. Felger on account of preliminary expenses incurred in connection with the organization of the company. The company is offering \$250,000 of 10 year 8 per cent. notes, particulars of which will be found in *Corporation Securities Market* in this issue.

The claims made regarding possible profits are rather far-reaching, and do not make up for the obvious narrowness of the margin of capital to be paid up. The business of Felger Livestock and Grain, Ltd., is moreover complicated by an insurance premium arrangement which may or may not be successful. While there are good opportunities for large scale farming in Canada, by the investment of capital by parties not actively engaged, the security offered by Felger Livestock and Grain does not appear to be satisfactory on the basis of the facts presented.

#### THE SHAREHOLDERS' MEETING

NOW and again some belligerent shareholder will enliven proceedings at stockholders' meetings of some of our Canadian corporations, but nothing that can be said or done at such meetings can compare with the proceedings which occur at some of the British corporations' meetings. For instance, at the meeting of one of the small gold mining companies in London last year the following scene took place:—

Directors and officers seated on a dais with about 200 shareholders seated on camp chairs in the foreground. After preliminaries, including remarks by officials, the shareholders took part in proceedings:

First shareholder: "Why don't we get dividends now?" This was carefully explained by the chairman.

Second shareholder: "In these times you officers ought to get less wages and apply the cut to the shareholders." No remark from the chair.

Many shareholders: "Hear, hear! We want dividends! Give up some of your cash! You're wasting money, etc." Still no remark from the chair.

First shareholder: "What are we paying you chaps for anyway? How much do you each get?" Chairman then rises and reads off the salaries paid officials and sits down again.

Lady shareholder: "I have had to give up my servants since you stopped paying dividends and I want to know when you will begin paying again?" Chairman politely intimates it is beyond his ken to make any statement on the matter. At this juncture meeting is adjourned by some hungry ones for lunch.

Meeting is again called to order in afternoon when heckling continues but to no avail. Chairman finally promises a printed statement later, and as tea time is nigh, the shareholders adjourn for tea and cake.

The effort of western municipalities to broaden their basis of taxation is an enlightened reaction from the single tax movement of several years ago.

\* \* \* \* \*

Iron and steel is a fundamental industry—a key to others. The dullness now being experienced does not speak well for the general business outlook in the spring.

\* \* \* \* \*

The illuminating paper in this issue by G. D. Finlayson shows that, whatever may be said as to the cost of fire insurance, the shareholders have received a very small return from the business.

\* \* \* \* \*

The January fire loss, estimated by *The Monetary Times* at \$2,237,900, is favorable compared with that of other years, and indicates that incendiarism is not too prominent a result of present business conditions.

\* \* \* \* \*

A Toronto church of 300 members has sold its property for \$60,000. How long will municipalities permit private property to benefit by town and cities growth without being taxed for its share in the cost of municipal services?

\* \* \* \* \*

Newfoundland's industries suffered badly in the business slump of 1920. The maintenance of an independent system of tariffs and the whole machinery of government is one of the factors which retards the development of the colony.

Outside of a \$12,000,000 Grand Trunk Railway issue and a \$10,000,000 Ontario issue, bond sales in January totalled \$16,054,035. Municipal and corporation issues totalled only \$7,804,000. The provinces are certainly not taking the lead in the economy movement.

\* \* \* \* \*

"The Spirit of Enterprise" requires caution sometimes, just as it requires optimism and courage at other times. As is pointed out in the article by B. E. Howard in this issue, the banks made a positive contribution to Canadian development by helping to bring about a gradual recession in business, thus avoiding a crisis.

NO CHARGE FOR THIS

With reference to the newspaper reports of a boy who, upon returning \$100 to the proper owner, after he had picked up a wad in the street, was rewarded with a "Thank you," it has been pointed out that in Scotland the courteous "Thank you" would have been a matter of course, and would not call for any special mention in the papers.

## PERSONAL NOTES

L. E. BUTLER, who has been with the investment house of A. E. Ames and Company for the past thirteen years, has been appointed to the position of manager of the bond department of Edward Cronyn and Company, members of the Toronto Stock Exchange.

CHARLES R. HEGAN, C.A. (Canada), formerly assistant general auditor of the overseas military forces of Canada, has now resumed his practice at 24 Coleman St., London, Eng., and is prepared to act as correspondent for Canadian accountants not already represented in London.

PERCY A. VALE, a well-known Toronto banker, has been made a member of the firm of Turner, Sprague and Company, members of the Toronto Stock Exchange. Mr. Vale was for years with the Traders', and afterwards with the Royal Bank, and was manager of the Yonge and Richmond Streets branch of the Royal Bank for the past 11 years.

J. D. CHAPLIN, St. Catharines, Ont., has been elected to the directorate of the Bank of Toronto. Mr. Chaplin is well-known in business and political circles, having been elected member of parliament in December, 1917, as Unionist. He is president of the Welland Valve Manufacturing Company, manufacturers of agricultural tools; president of the Canada Axe and Harvest Tool Company, and president of the Wallingford Manufacturing Company. For four years he has been councillor of St. Catharines.

While most of the bank's directors are Toronto men, Mr. Chaplin, along with one or two others, bring important connections from other cities.

JAMES C. WILLAR, C.A., chief auditor to the Canadian Wheat Board, late of the contract costs department, Ministry of Munitions of War, London, Eng., and WALTER JAMES MACDONALD, C.A., late assistant auditor to the Canadian Wheat Board and of the 44th Battalion, C.E.F., have entered into partnership under the firm name of Millar, Macdonald and Company, with offices in the Home Bank Building, 428 Main St., Winnipeg. They will carry on a general practice as chartered accountants, specializing in cost accounting, investigations, grain accounting and income and business profits war taxation.

SIR ERNEST CABLE, senior partner in the East India house of Bird and Company (Calcutta and London), has been made a baron in recognition of his public services during the war. The new baron has for years been a member of the London board of directors of the Western Assurance Company and of the British America Assurance Company, of Toronto. His firm has represented the "Western" at Calcutta since 1900 and has built up a large premium income for the company. It was the first agency appointment made by W. B. Meikle, the present president, on assuming the London management of the company.

## BANK BRANCH NOTES

The following is a list of branches of Canadian banks which have been opened recently:—

St. Georges Beauce, Que. ...Banque d'Hochelega  
Beloil, Que. ....Banque d'Hochelega  
White Rock, B.C. ....Royal Bank of Canada

The Bank of Montreal announces the following: A. A. E. Tetreault, manager at Verdun, appointed manager at Maisonneuve, Montreal; A. J. Hamel, appointed acting manager at Ste. Anne de Bellevue; J. F. Jewell, manager at Ste. Anne de Bellevue, appointed manager at Verdun; H. H. Hobbs, appointed acting manager at Thorndale.

J. G. Rappell, manager of the South Hill branch of the Merchants Bank, has been transferred to the branch at Eaton, Sask. J. E. Clarkin, of the Moose Jaw branch, has been appointed manager at South Hill.

The Bank of Montreal announces the following:—A. G. McCosh, appointed manager at Kelowna, B.C.; P. DuMoulin, manager at Kelowna, appointed manager at Kingston; G. B. Gerrard, manager at 140 St. James St., Montreal, appointed assistant manager at Montreal. R. Broughton, appointed assistant manager at Montreal, in charge of office administration; A. A. Stewart, appointed acting manager at 140 St. James St., Montreal; F. B. Carter, appointed acting sub-agent at Whitney Pier, Sydney, N.S.

Chas. F. MacKenzie, accountant of the Merchants Bank at Galt, has been transferred to London, and promoted to manager of the East End branch, at the corner of Dundas and Adelaide Sts. He is succeeded by D. A. Wood, of Collingwood.

## MANITOBA FARMERS' MUTUAL HAIL INSURANCE

Operating on a purely mutual basis and confining its operations to Manitoba, the Manitoba Farmers' Mutual Hail Insurance Co. enjoyed its best year in 1920. Insurance written amounted to \$2,400,000, being an increase over the previous year of \$410,000. The balance sheet published elsewhere in this issue shows total assets of \$143,198, an increase for the year of \$52,631, while the surplus is shown as \$132,400. G. S. Francis is manager of the company, and under his guidance the company is making good headway. Rebate or discounts returned to policyholders last year amounted to \$21,500.

## SECURITY LIFE INSURANCE COMPANY

Premium income of \$112,648, of which \$45,345 was from first year and \$67,103 from renewal premiums, is reported by the Security Life Insurance Co. in its annual statement for 1920. Other receipts were \$11,101 from interest and rents, \$32,054 from premiums on capital stock, and \$48,371 on capital stock. This makes a total of \$204,175, compared with \$121,689, of which \$83,550 was from premiums, in 1919. Claims paid were \$17,377 in 1920, against \$14,752 in 1919. Agents salaries, travelling expenses, advances, commissions, etc., were \$47,505, or about 42 per cent. of premium income, compared with \$32,644 in 1919. After other disbursements a balance of \$90,509 was carried to investment account. Last year the balance so carried was \$37,736, the large increase this year being, of course, due to the higher payments on capital account.

Assets now total \$299,000, an increase of \$83,000. The principal changes are in the holdings of real estate, which increased from \$472 to \$33,972, and increases of \$30,000 in bonds and debentures, \$3,000 in mortgages, \$1,100 in interest due, \$3,000 in policy loans, and \$7,000 in outstanding and deferred premiums. The reserve on policies in force has increased from \$148,923 to \$218,079, and the company's surplus assets over liabilities, excluding capital stock, is now \$74,394, against \$38,710 last year.

## RECORD VALUE OF CANADIAN FIELD CROPS

Total for 1920 Estimated at \$1,455,000,000—Higher Yields Are Offset by Reductions in Price

**A**REAS and yields of grain crops in Canada, as announced by the Dominion Bureau of Statistics in a final report on January 17, were as follows:—

The total yield of wheat in Canada for the year 1920 is now finally returned as 263,189,300 bushels from 18,232,374 acres, as compared with 193,260,400 bushels from 19,125,968 acres in 1919, and with 254,480,440 bushels from 16,342,969 acres, the annual average for the five years 1915-19. The total yield for 1920, as now reported, is 30,171,700 bushels less than the provisional estimate of 293,361,000 bushels, issued by the Bureau on October 29, 1920, this difference being mainly due to the disappointing yield per acre in Saskatchewan, which turned out to be only 11.2 bushels instead of 13¾ bushels as then reported. The average yield per acre for Canada is 14½ bushels, as against 10 bushels in 1919 and 15½ bushels, the five year average.

For oats, the finally estimated production is 530,709,700 bushels from 15,849,928 acres, as compared with 394,387,000 bushels from 14,952,114 acres in 1919. The total is 12,348,300 bushels less than the Bureau's provisional estimate of October 29 last. The average yield per acre is 33¾ bushels as against 26¼ bushels in 1919 and 32 bushels, the five year average. Barley yields 63,310,550 bushels from 2,551,919 acres, as compared with 56,389,400 bushels from 2,645,509 acres in 1919, the average yields per acre being 24¾ bushels for 1920, 21¼ bushels in 1919 and 24½ bushels the five year average. Flaxseed gives a total yield of 7,997,700 bushels from 1,428,164 acres, as compared with 5,472,800 bushels from 1,093,115 acres in 1919 and with 6,367,340 bushels from 840,375 acres, the five year average. The yield per acre in 1920 is 5.6 bushels, as against 5 bushels in 1919 and 7¾ bushels, the five year average. For the remaining grain crops the total yields were in bushels as follows, the corresponding totals for 1919, and for the five year average, being given within brackets: Rye 11,306,400 (10,207,400 and 5,586,320); peas 3,528,100 (3,406,300 and 3,285,678); beans 1,265,300 (1,388,600 and 1,472,396); buckwheat 8,994,700 (10,550,800 and 8,583,520); mixed grains 32,420,700 (27,851,700 and 21,554,696); and corn for husking 14,334,800 (16,940,500 and 11,911,680). The average yields per acre of these crops are in bushels as follows: Rye 17½ (13½ and 15½); peas 19 (14¾ and 16¼); beans 17½ (16½ and 15¼); buckwheat 23¾ (23¼ and 20¾); mixed grains 40 (31 and 33¾); and corn for husking 49¾ (64 and 50¾).

## Root and Fodder Crops

The finally estimated production of potatoes is 133,831,400 bushels from 784,544 acres, as compared with 125,574,900 bushels from 818,767 acres in 1919 and with 86,692,620 bushels from 633,937 acres, the quinquennial average. The yield per acre is therefore 170½ bushels, which compares with 153½ bushels in 1919 and with 136¾ bushels, the average. Both in average and total yield the figures for 1920 are the highest on record. Turnips, mangolds, etc., yielded 116,390,900 bushels from 290,286 acres, as compared with 112,288,600 bushels from 317,296 acres in 1919 and with 79,107,060 bushels from 231,819 acres, the five year average. The yield per acre is 401 bushels, the highest average on record, and compares with 354 bushels in 1919 and with 341¾ bushels, the five year average. Sugar beets yielded 412,400 tons from 36,288 acres, as compared with 240,000 tons from 24,500 acres and with 149,920 tons from 17,900 acres, the five year average. The yield per acre is 11.37 tons as compared with 9.80 tons in 1919 and with 8.40 tons, the average. The yield of hay and clover is 13,338,700 tons from 10,379,292 acres, as compared with the previous year's record of 16,348,000 tons from 10,595,383 acres, and with the five year average of 13,988,800 tons from 8,992,659 acres. The average yield per acre is 1.30 ton, as against 1.55 ton

for 1919 and for the average. Grain hay in British Columbia yields 136,400 tons from 60,612 acres, as compared with 151,000 tons from 60,390 acres in 1919, the respective averages being 2¼ and 2½ tons to the acre. Alfalfa yielded 583,790 tons from 238,556 acres, as against 494,200 tons from 226,869 acres in 1919 and 350,144 tons from 146,192 acres, the five year average. The yield per acre is 2.45 tons as against 2.20 tons in 1919 and 2.40, the five year average.

## Grain Yield of the Prairie Provinces

The finally revised total grain yields from the three prairie provinces (Manitoba, Saskatchewan and Alberta) are as follows: Wheat 234,138,300 bushels from 16,841,174 acres, as compared with 165,544,000 bushels from 17,750,167 acres in 1919; oats 314,297,000 bushels from 10,070,476 acres, as compared with 235,580,000 bushels from 9,452,386 acres in 1919; barley 40,760,500 bushels from 1,838,791 acres, as compared with 36,682,400 bushels from 1,800,745 acres in 1919; flax 7,588,800 bushels from 1,391,076 acres, as compared with 5,232,300 bushels from 1,068,014 acres in 1919.

## Quality of Grain Crops

The average weight in pounds per measured bushel of grain crops for the whole of Canada is as follows, the average weights for 1919 and for the five years 1915-19 being given within brackets: Fall wheat 60.14 (61.20, 60.20); spring wheat 59.07 (58.53, 58.70); all wheat 59.35 (59.12, 59.06); oats 35.62 (34.16, 34.76); barley 47.62 (46.32, 46.89); rye 55.44 (55.09, 55.80); peas 60.44 (59.60, 59.99); beans 59.73 (59.99, 59.59); buckwheat 47.95 (47.23, 47.10); mixed grains 44.65 (44.83, 44.75); flax 54.99 (55.14, 54.77); corn for husking 56.45 (55.74 five year average). Spring wheat, oats, barley, peas and buckwheat are thus superior in quality both in the crops of 1919 and to those of the five year average, rye is better than in 1919, but is not quite equal to the five year average. Corn for husking is superior to the average. Only fall wheat and mixed grains are below 1919 and below average. Beans and flax, whilst below 1919, are above the five year average.

## Values of Field Crops

The average values per bushel of grain crops for Canada in 1920, according to the prices returned by crop correspondents as received by farmers are as follows, the corresponding average prices for 1919 and for the five year period 1915-19 being placed within brackets: Fall wheat \$1.88 (\$1.97, \$1.56); spring wheat \$1.60 (\$1.88, \$1.49); all wheat \$1.62 (\$1.89, \$1.42); oats 53 cents (80c., 62c.); barley 83 cents (\$1.37, 97c.); rye \$1.33 (\$1.40, \$1.37); peas \$2.42 (\$2.86, \$2.68); beans \$3.88 (\$4.48, \$5.36); buckwheat \$1.28 (\$1.50 \$1.32); mixed grains 90 cents (\$1.36, \$1.08); flax \$1.94 (\$4.13, \$2.62); corn for husking \$1.16 (\$1.30, \$1.31); potatoes 97 cents (95c., 90c.); turnips, mangolds, etc., 41 cents (50c., 42c.). For fodder crops the prices are per ton, as follows: Hay and clover \$26.10 (\$20.72, \$14.90); grain hay \$33.12 (\$29 for 1919); alfalfa \$23.79 (\$21.85, \$16.10); fodder corn \$7.75 (\$6.92, \$5.82); sugar beets \$12.80 (\$10.86, \$8.62).

The total values of crops on farms in 1920 are estimated as follows, the corresponding values for 1919 and for the five year average 1915-19 being given within brackets: Wheat \$427,357,300 (\$364,857,000, \$360,097,320); oats \$280,115,400 (\$317,097,000, \$261,497,260); barley \$52,821,400 (\$77,462,700, \$55,501,114); rye, \$15,085,650 (\$14,240,000, \$7,670,740); peas \$8,534,300 (\$9,739,300, \$8,801,120); beans \$4,918,100 (\$6,214,800, \$7,885,380); buckwheat \$11,512,500 (\$15,831,000, \$11,316,100); mixed grains \$29,236,200 (\$37,775,400, \$23,333,370); flaxseed \$15,502,200 (\$22,609,500, \$16,679,560); corn for husking \$16,593,400 (\$22,080,000, \$15,636,000); potatoes \$129,803,300 (\$118,894,200, \$77,875,200); turnips, mangolds, etc., \$48,212,700 (\$4,958,700, \$33,076,280); hay and clover \$348,166,200 (\$338,713,200, \$208,489,340); grain hay \$4,518,000 (\$4,379,000 in 1919); alfalfa \$13,887,700 (\$10,800,

## AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

399 Branches in Canada, extending from the Atlantic to the Pacific  
New York Agency: 63 and 65 Wall Street: W. M. Ramsay and C. J. Crookall, Agents

Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

200, \$5,636,020); fodder corn \$43,701,000 (\$34,179,500, \$20,692,420); sugar beets \$5,278,700 (\$2,606,000, \$1,292,060). The aggregate value of all field crops in 1920 was \$1,455,244,050, as compared with \$1,452,437,500 in 1919 and with \$1,372,935,970 in 1918. The total value for 1920 is the highest on record, but the difference was between 1920 and 1919, which also was the highest figure to that date, is chiefly due to the better harvest, as the average prices for each crop are lower, except in the case of hay and clover and alfalfa, the average prices and total values of which in 1920 are the highest on record.

### CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended February 4, 1921, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P. E. I.	Total.	1920.
Feb. 4	6	15	0	0	4	4	13	0	0	42	18
Jan. 28	12	20	4	1	1	4	3	1	0	46	..
Jan. 21	15	35	6	3	5	1	4	2	0	71	20
Jan. 14	13	23	4	1	3	0	0	0	0	44	14

### EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	13½ pm	13¼ pm	.....
Mont. funds	Par	Par	½ to ¼
Sterling—			
Demand	4.38	4.39	.....
Cable transfers	4.39	4.40	.....
Bank of England rate, 7 per cent.			

### TRADE SITUATION UNCHANGED

"The trade situation has undergone little change," says R. G. Dun and Co., in their report of February 5, on conditions in Montreal. "The return of general activity is as yet slow of development, but the spirit of confidence in the future is steadily growing, and the failure list is proving to be much lighter than generally anticipated. In the east collections are generally fair, but western collections leave a good deal to be desired. In the iron market matters still rule comparatively quiet, but there is a little more enquiry evident and some few sales of car lots reported. In prices another substantial cut of \$4 a ton went into effect on the 1st inst., making \$41.80 the present figure for domestic foundry iron. In the grocery line the month has opened rather quietly, and there is an evident disposition in some quarters to work off present stocks before ordering freely. The sugar situation is entirely unchanged, the general refinery figure for standard granulated being \$10.50 a cental, while supplies are regular. Santos coffees and better grade teas are reported firmer. Norwegian brands of sardines and herrings are advanced. In general provisions eggs are growing cheaper with the advancing season and lengthening days. Butter and cured meats are not appreciably lower. Boot and shoe retailers are still deferring any active buying, and as a consequence manufacturers are but lightly employed, and are not buyers of leather to any extent. One of the features of the week is the sale of raw and dressed furs being held by the Canadian Fur Auction Sales Co., Ltd. Some 350 buyers are said to be in attendance, but at the moment of writing it is too early to definitely gauge results or comparisons, although it is claimed some recovery is being shown in values.

### WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended February 10, 1921, compared with the corresponding week last year:—

	Week ended Feb. 10, '21.	Week ended Feb. 12, '20.	Changes.
Montreal	\$109,027,316	\$137,920,302	—\$28,892,986
Toronto	105,128,124	101,590,571	+ 3,537,553
Winnipeg	44,069,161	43,076,009	+ 993,152
Vancouver	13,753,325	15,050,393	— 1,297,068

## Are You a Trustee?

If so, you may be interested to learn that this Corporation also acts as agent for personal Trustees, taking charge of the administration of estates for them and performs such duties as keeping estate funds fully employed in high-class investments, collection of revenue, cutting coupons, management of real estate, rendering statements and remitting balances to beneficiaries at regular intervals, keeping securities in Safety Deposit Vaults, etc. Many Trustees find this the most satisfactory way for them to administer an estate—by turning it over to us as their agent and at the same time retaining the responsibility imposed on them under the Will.

Write or call for our rates on this class of business.

# Fifty Years of Fire Insurance in Canada\*

Underwriting Profit, While Fairly Good For Past Five Years, Has Been Low For Whole Period—Record of Canadian Companies Discouraging to Capital—Expenses, Commissions and the Possibility of Government Control

By G. D. FINLAYSON

Superintendent of Insurance for Canada

THE record of fire insurance in Canada is fairly complete for a period of fifty-one years, from 1869 to 1919. The following figures give in summary form the experience of the companies during this period:—

Cash premiums received .....	\$557,971,971
Premiums earned .....	\$535,111,024
Losses incurred .....	\$327,676,803
Expenses incurred .....	176,863,919
	504,540,722
Underwriting profit .....	\$ 30,570,302
Profit per cent. of cash premiums .....	5.48%

In 1869 the companies and their business were classified as follows:—

	No.	Premiums.	
Canadian .....	5	\$ 501,362	28%
British .....	12	1,119,011	63%
Foreign .....	2	165,166	9%
	19	\$ 1,785,539	100%

In 1919 the figures are quite different:—

	No.	Premiums.	
Canadian .....	39	\$ 6,415,838	16%
British .....	40	20,377,871	51%
Foreign .....	55	13,237,765	33%
	134	\$40,031,474	100%

## Many Canadian Companies Quit

The most striking change in these comparative figures is the reduction in the percentage of Canadian business, and for the explanation of this we must look to the discouraging experience of Canadian companies, particularly in the earlier years of the period.

In the year 1877 the St. John conflagration occurred, involving an insurance loss of over \$5,000,000, and an estimated property loss of over \$13,000,000. This conflagration brought to ruin three of the thirteen Canadian companies then doing business and two others disappeared within a few years, after a vain struggle for existence, and thereafter the number gradually decreased until in 1896 the number reached five, the same number as is found in 1869. It was not until 1905, twenty-eight years after the conflagration, that the number of Canadian companies reached that of 1877, thirteen.

During the fifty years 25 Canadian companies have disappeared, and their bleaching bones by the wayside appear to have deterred capital from venturing on the perilous journey. Of the twenty-five companies, five disappeared by liquidation and cancellation or expiry of their contracts and twenty by reinsurance. The experience of the five is summed up as follows:—

Premiums .....	\$ 5,221,840
Losses .....	\$4,005,023
Expenses .....	2,347,610
Total .....	6,352,633
Loss .....	\$ 1,130,793

The experience of the twenty is as follows:—

Premiums .....	\$22,494,978
Losses .....	\$16,345,638
Expenses .....	13,129,112
Total .....	29,474,750

Loss .....

Loss .....	\$ 6,979,772
------------	--------------

Total loss on underwriting .....

Total loss on underwriting .....	\$ 8,110,565
----------------------------------	--------------

Some of this loss may have been recovered in reinsurance by way of commission on risks in force, but the amount of this is not ascertainable from the official statements.

## Rewards Not Attractive to Capital

In the case of many of these companies a comparatively small amount of additional capital would have enabled the companies to overcome the final crisis, and to have re-established themselves in the insurance field, but the appeal for such assistance invariably failed to bring any response, nor is this to be wondered at. The underwriting profit of Canadian companies for the fifty-year period has been 0.84 per cent.

If we confine our attention to the last five years the record is a more cheerful one. The underwriting profit of Canadian companies is 8.37 per cent. of the cash premiums, and for all companies 8.53 per cent. It is, however, evident that the change in this respect is not sufficient to attract capital to the fire business, in view of the high rates of interest prevailing in other forms of investment.

Another evidence of the reluctance of Canadian capital to enter the fire insurance business is to be found in the fact that many nominally Canadian companies are controlled or owned practically entirely by non-Canadian companies.

Ten years ago in 1909, of the 21 Canadian stock companies then doing business, all but three were owned by purely Canadian capital. At December 31, 1919, of the thirty-three stock companies licensed for fire business, sixteen, or about one-half, were owned or controlled by companies other than Canadian, and during the present year, at least three more have joined what is now the great majority.

## Statutory Conditions

The fifty years under review has seen material changes in the legislation respecting the conditions to be contained in the policies. At the commencement of the period fire insurance policies contained such conditions as the companies chose to insert, and in time it came to be felt that in some cases these conditions bore too hardly upon the insured. It was recognized that in a business subject to such great moral hazard, the companies had to be protected, but it was considered necessary to limit the extent to which they should go in their own defence. In 1876 the province of Ontario enacted statutory conditions to be inserted in the policies and subject to variation only in a manner prescribed. These conditions, while designed for the protection of the public, are practically all protection for the companies, but the amount of protection permitted is such as was deemed reasonable and fair.

There was considerable doubt at first in the minds of the public and of the Courts, which, indeed, has persisted until the present day, as to the effect of a variation in the

\*An address before the Montreal Fire Insurance Brokers' Association.

**Where There is No WILL There is No WAY**

of overcoming the necessary legal delay in settling an estate consequent on intestacy.

You know what intestacy means? The dictionary will tell you, and a lawyer will confirm it.

But what it really means to those you wish to protect cannot be described so shortly. It cannot be IMAGINED WITHOUT ALARM.

Every man and woman should make a Will at the earliest possible moment, and should appoint The Union Trust Company as executor. Then his or her wishes will be carried out faithfully.

Call and see us, or phone or write and we will send an officer of this Company to see you. In any event, write for our booklet, "Why a Will." It is interesting.

W. M. CONNACHER Pres. and Managing Director

policy from the statutory conditions not set forth in the manner prescribed. We thus find in 1877 in the decision of the Court of Queen's Bench in the case of *Ulrich v. the National Insurance Company*, that it is stated that in such an event the policy must be treated either as containing no conditions or the statutory conditions only, and one of the judges held that the statutory conditions not being printed in the policy could not be deemed a part of the policy as against the insured.

#### Recent Legal Decisions

Again in 1878, in the case of *Frey v. the Mutual Fire Insurance Company of the County of Wellington*, the Court of Queen's Bench held that where there are conditions in the policy other than the statutory conditions which are not printed thereon, the policy as against the insured must be read as if without conditions, and this judgment was affirmed by the Court of Appeal. Again, in the case of *Parsons v. the Citizens Insurance Company*, it was held in the lower Court that the company in such a case could not resort for their defence to their own conditions nor to their statutory conditions as they were not printed on the policy. This decision was reversed by the Court of Appeal, but reaffirmed by the Supreme Court of Canada. On appeal to the Privy Council, however, this part of the judgment was reversed, and it was there held that whatever may be the conditions sought to be imposed by insurance companies, no such conditions shall prevail against the statutory conditions, and the latter shall alone be deemed to be part of the policy and resorted to by the insurer, notwithstanding any conditions of their own, unless the latter are indicated as variations in the manner prescribed by the Act. The penalty for not observing that manner is that the policy becomes subject to the statutory conditions whether printed or not. Notwithstanding this decision the view has since that time been expressed by the Canadian courts that in particular cases the statutory conditions do not interfere with the right of contract between the company and the insured, even if such contract involves a variation from the statutory conditions not set forth in the prescribed manner. The recent judgment of the Privy Council, and the *Curtis Harvey* case appears to confirm the opinion expressed in the earlier cases that failure to observe the statutory conditions, even if the variation is consented to by the insured, does not entitle the company to resort to conditions other than the statutory conditions. Notwithstanding the enactment of statutory conditions there has been a great mass of litigation in connection with the interpretation of provisions of policies, and it would appear to be impossible to so frame the conditions that misconstruction will be impossible. Up to date there has been a regrettable lack of uniformity in the conditions prescribed by the various provinces, and it is to be hoped that the efforts at present being made by the Bar Association for uniformity will meet with success.

We have seen that from the experience of the companies up to date, there can be little ground for the belief, often expressed, that an undue profit has been made by the fire insurance companies. The loss ratio has been approximately 59 per cent. of the premiums received, the expenses incurred being about 36 per cent. Criticism has frequently been directed towards this latter item of the companies' business, and it has frequently been charged that the expenses are unduly high. Of these expenses, particular attention has been directed to the commission paid to the agents for writing the business.

#### Expenses and Commissions

Looking at the average commission paid by British and foreign companies in Canada, it is evident that there has been in recent years a perceptible increase in the rate. In 1909 the average rate of commission paid was 18.74 per cent., and in 1919 this had increased to 20.56 per cent. In the foreign companies the average commission in 1909 was 19.38 per cent. and in 1919 21.20 per cent. During the nine years the rate for both British and foreign companies increased by 1.82 per

cent. of the cash premiums received. During that period the business of the British companies increased by approximately 100 per cent., and the foreign companies' business by over 200 per cent. The total cash premiums of all the British and foreign companies in 1919 amounted to approximately two and one-half times the total premiums in 1909, and with the increase in the rate of commission, it follows that the payments to insurance agents during 1919 have amounted to more than two and one-half times the amount paid in 1909. If the payments in the latter year had been made to the same individuals, and to them only, as the payments in the former year, there could be little cause for complaint on the part of fire insurance agents, that their incomes had not kept pace with the expense of transacting business. If we go further, however, and ascertain to whom these payments were made, we would probably find that the recipients in 1919 far outnumbered the recipients in 1909. In other words, the additional payments in 1919 have been distributed among a greatly increased number of agents, so that the average payment in 1919 has not increased in the ratio above stated.

#### Reasons for Dissatisfaction

The dissatisfaction which at present exists with prevailing commission rates may be traced to the public, on the one hand, and to the agents themselves, on the other, and so far as I can judge the feeling at the present time, the criticism by the former is less marked than criticism of the latter. It is doubtful whether the public are so much concerned over a few points one way or the other in the rates of agents' commission. There can be no doubt, however, that there is very much concern on the part of some agents operating at a low rate of commission over the fact that other agents, many of them in a position to transact business at a lower remuneration, are receiving rates of commission greatly in excess of what they receive. This feeling is widespread, and is not confined to any particular section of the country. We find in British Columbia, for instance, that agents in certain larger cities are paid rates of commission 5 and 10 per cent. in excess of the rates paid the agents in the smaller centres. This would be felt to be an injustice if the business of the agents in the larger cities was confined to the risks located in those cities, but the grievance becomes still more acute when the preferred agents are permitted to write all the business they care to in the smaller centres at the higher rate of commission; nor would this be so bad if these agents took from the smaller centres only such business as is offered to them without solicitation, but we find the contrary to be true. These agents are ever on the alert for a risk in the smaller centre which can be transferred to the larger agency and command the larger rate of commission. So much is this so, that the agent in the larger centre has become somewhat hardened to the idea that it is perfectly proper for him, as an agent of his company, to transfer to his own agency as much business outside his own district proper as he can, and to exact from his company the higher rate of commission.

The conditions here described apply in the case of large centres more or less throughout Canada. It is found, for instance, in the city of Vancouver, the city of Winnipeg, and to a very marked degree in the city of Toronto. Much of the dissatisfaction in the agency field at the present time is caused by this tendency on the part of agents in these larger centres, and more often than not the rates that the public hear of, are the high rates, until it becomes the common belief that the entire business is burdened to the same extent.

It does not appear to have been considered by the agents referred to that the practice of switching business from outside agencies to their own would if pursued to its logical conclusion tend to abolish the agency system altogether; for if a general agent can by a salaried representative, or without a representative at all, handle a risk hundreds of miles away, the same course should be open to the head office or Canadian branch in respect of the entire business and the employment of agents on a commission basis would disappear.

If the increase in the rate of commission has been necessary to provide insurance agents with reasonable re-

muneration, there would be little objection taken by the public to the increase. If the increase in commission has not been necessary for this purpose, then it is in the public interest that the tendency to increase should be checked, and it is most desirable that this check should be imposed by the companies themselves. It does not seem too much to expect that the companies, by arrangement among themselves, should remove the discrimination which at present exists between various sections of their territory, and all would prefer that the companies should be given an opportunity to set their own houses in order in this respect. If this cannot be done, it is the duty of the government to do so. It must be realized, however, that if the aim is the benefit of the public, the control of commissions leads logically to the control of rates and the control of rates leads logically to an illogicality, for how a particular rate can be effectively controlled when there is no obligation on the part of the insurer to assume the risk, is difficult to understand. The public will be little benefited if the saving in commissions is retained by the companies and some means of diverting to the public the benefit of lower expenses must be sought if control of expenses is to be justified.

As an alternative to supervision or control of rates in detail, some attention is now being paid to arriving at some basis which will indicate when rates in the aggregate should be increased or decreased.

#### Allowance for Reserves

The proposition which is being considered in the United States is that there should be an agreement as to what allowance should be made for conflagration reserve; what profit should be allowed the companies on their underwriting; on what basis the premiums and losses should be calculated for the purpose of determining that profit; and what portion, if any, of the interest earnings of the company should be taken account of in the profit. Agreement appears to have been reached on all points except the last, the tentative basis being as follows:—

1. The conflagration allowance shall be 5 per cent. of the premiums.
2. The premiums entering into the computation of profit shall be the premiums earned.
3. The losses shall be the losses incurred.
4. The period shall be not less than five years.
5. A conflagration shall be deemed to be a fire causing a loss of \$1,000,000 or over, losses under \$1,000,000 to be included in the underwriting account.
6. The question of interest on the reserve fund is still undecided. A suggestion is that 2 per cent. of reserve be included in the underwriting account.

On this basis a computation would be made covering a five-year period as follows:—

Premiums earned .....	\$.....
Interest on reserve fund ..	..... \$.....
Losses incurred .....	\$.....
Expenses incurred .....	.....
Conflagration allowance ..	.....
Profit .....	\$.....

If this profit exceeds 5 per cent. of the premiums in any state a reduction of premiums will be regarded as necessary, if it is less than 5 per cent., an increase should be made.

This method of attacking the problem will be admitted to be much preferable to an attempt to fix or control or supervise individual rates on particular classes of property. It recognizes the fact that rating is an intricate science, which must be performed by properly equipped experts if discrimination and guesswork is to be avoided, while it aims to bring together the companies and their clients in a general agreement as to when rates in the aggregate shall be increased or decreased. It does not fix profits, for within the five-year period the profits may be very large; on the other hand the losses would have to be great enough to bring the five-

year profit below 5 per cent. before increased rates would be justified. If such an agreement could be arrived at, legislation on the question would be unnecessary.

#### The Future

As to the prospects for the future, I realize that the role of a prophet is a dangerous one, and what I shall say on this part of the subject will be brief and more in the nature of a hope than a prediction. I believe we are facing a period of lower fire losses than we have experienced in the past. Better construction, the inducements offered by the system of rating to install fire protective devices and the increased attention being paid to fire prevention by the public generally, warrants this belief. We are, no doubt, at a critical period at the present time, but we have already come through what has always been regarded as a period of great moral hazard and the consequences have not been serious.

I believe the future holds in store a better prospect for the fire insurance agent. With increasing experience the field by useful public service widens and evidence is not lacking that fire insurance agents are being more and more attracted by the opportunity to conserve property which is presented to them by their profession. This tendency will be increased with the perfection of the organization of the agents, and I am glad to see that the example of the Montreal agents is being followed in other cities and provinces. I have just one suggestion to offer and that is that as soon as possible there should be formed the Dominion Fire Insurance Agents' Association, meeting in annual conference at which your problems will be considered and solved. And in the constitution of that association give prominence to the fire-prevention idea. A proper recognition of the public service to be performed is the surest guarantee against the development in such an organization of a purely selfish or class movement and when we consider that the agency ranks are filled by many of the best citizens in the towns and cities of this country, I believe that any fear that may exist on that score may be dismissed.

The increase in volume of business during the next decade is bound to be enormous. The proper development of our manufactures, trade and commerce, calls for adequate insurance facilities and the degree to which the public demand therefor is satisfied will depend very largely upon you. For myself, I have every confidence that your response will be satisfactory to the public and to the companies you represent.

#### CLAY PRODUCTS ASSOCIATION CONVENTION

The nineteenth annual convention of the Canadian National Clay Products' Association was held in Toronto, January 25 to 27. It was attended by about 150 members from all over Canada. The officers elected for the ensuing year are as follows:—President, Ryland H. New, Hamilton; first vice-president, Millard F. Gibson, Toronto; second vice-president, T. H. Graham, Inglewood; third vice-president, Andrew Dodds, Mimico; secretary-treasurer, Gordon C. Keith (re-elected).

The convention was opened with an address by the past president, Wm. Burgess, who strongly denounced the proposed bill to fix an eight-hour day limit for the province. Mr. J. Clark Reilley spoke optimistically on the "Outlook in the Building and Construction Industries." He said that unemployment was no worse now than in 1913-14, but was more emphasized, which, he thought, aggravated the condition. He strongly urged the commencement of government work, which had been planned, and was being held up. That the brick industries had lowered their prices during the winter by \$1 to \$4 per thousand, according to the grade, was a fact which he thought should be given more publicity. To keep wages at their present level, but in turn to exact value in the work of the employees, he preferred rather than the cutting of wages.

# The Awakening

"So Jim is getting \$5,000 a year—  
I can hardly believe it—  
It's just three years since Jim and I gradu-  
ated from High School together—  
We started in the same office—  
\$18.00 a week—  
That seemed big to us then—  
We were enthusiastic—  
Planned big things—  
It's over a year since I heard from Jim, and  
now the news—  
'3 increases within the year and now  
head accountant for Jones & Co.'  
This sure is a record"—

"Well—here's congratulations, Jim—old  
boy—you deserve it—  
Yes—and here I am plugging away at \$25  
a week—  
*Some difference between Jim and me now—*  
It's just a year since Jim saw the SucCesS  
coupon—  
It was the turning—  
It pointed to bigger things—  
He studied"—

"With me—well, it's just 3 years wasted—  
no progress—no advancement—still doing  
junior work—still receiving junior pay—  
Jim followed Lincoln's example—  
He studied—got ready—his chance came—  
But Jim is not the only one—Many have  
climbed by this *sure road*—  
Thank goodness *I am now awake*—  
I've mailed that Coupon to-night—

From now on I'll make the hours count—  
and, believe me, a year from now I'll have a  
surprise for Jim."

.....  
Example is usually better than argument.  
Jim has set the pace—  
His friend follows.  
*What about you*—you who are reading this  
message now?  
Here is the coupon that started Jim—the  
coupon his friend has just mailed—the  
coupon that will start you, too, on the *sure road*.  
Sign it.

CANADA'S JANUARY BORROWINGS, \$38,000,000

Provincial and Railroad Financing was Largely Responsible for this Substantial Amount, Although Municipal Bond Sales Were Also Heavy—Bulk of New Issues Last Month Were Placed Here

CANADA'S borrowings in the first month of 1921 totalled \$38,054,035, compared with \$34,770,555 in December, 1920, and \$20,504,077 in January a year ago. Last month's total was made up largely of provincial and railroad issues, although municipalities participated to a considerable extent.

A comparison of the figures with a year ago shows some interesting facts. For instance, in January, 1920, all the provincial bonds, totalling some \$9,000,000, were placed in

the United States, while this year out of an amount of more than eighteen millions only two millions went across the line. All of the Grand Trunk issue was disposed of to our southerly neighbors, but outside of this, with the exception of a few odd transactions which are always taking place, the balance of the financing was arranged here.

The following figures show the amount of bond sales in January, 1920 with comparisons:—

	Jan., 1921,	Dec., 1920,	Jan., 1920.
Provincial . . . .	\$18,250,000	\$17,750,000	\$ 8,950,000
Municipal . . . .	5,754,035	5,370,555	3,404,077
Railroad . . . . .	12,000,000	.....	7,500,000
Corporation . . . .	2,050,000	11,650,000	650,000
Totals . . . . .	\$38,054,035	\$34,770,555	\$20,504,077

## JANUARY FIRE LOSSES UNUSUALLY SMALL

Estimate of \$2,237,900 is Lowest Since 1917—Halifax, Sydney, Toronto and Winnipeg Had Biggest Fires

**F**IRE losses in Canada in January are estimated by *The Monetary Times* at \$2,237,900, made up as follows:—

Fires exceeding \$10,000 .....	\$1,625,000
Small fires reported .....	112,900
Estimate of unreported fires .....	500,000
	<b>\$2,237,900</b>

Depreciation in the value of stocks has undoubtedly led to some incendiary fires. These have fortunately been small for the most part. There were only four fires in January causing a loss of \$100,000 and over. These were at Halifax, Sydney, Toronto and Winnipeg.

The following are the January fires causing damage of \$10,000 and over:—

Glace Bay, N.S., Jan. 12, hotel, \$30,000.
Quebec, Que., Jan. 2, store, \$25,000.
St. Hyacinthe, Que., Jan. 4, stores, \$25,000.
Beamsville, Ont., Jan. 19, factory, \$40,000.
Caribou, N.B., Jan. 8, Ritchie Block, \$50,000.
Halifax, N.S., Jan. 19, store, \$150,000.
Hull, Que. Jan. 17, factory, \$10,000.
Narcisse, Man., Jan. 12, warehouse, \$10,000.
North Sydney, N.S., Jan. 10, warehouse, \$25,000.
Ottawa, Ont., Jan. 16, building, \$15,000.
Paris, Ont., Jan. 15, rink, \$20,000.
Sarnia, Ont., Jan. 17, icehouse, \$40,000.
Swift Current, Sask., Jan. 10, city hall, \$65,000.
Sydney, N.S., Jan. 14, business block, \$200,000.
Toronto, Ont., Jan. 7, building, \$60,000.
Toronto, Ont., Jan. 15, building, \$24,000.
Upper Cross Creek, N.B., Jan. 12, mill, \$25,000.
Whitby, Ont., Jan. 13, hospital, \$60,000.
Montreal, Que., Jan. 14, plant, \$60,000.
Moose Jaw, Sask., Jan. 23, building, \$50,000.
New Liskeard, Ont., Jan. 26, building, \$10,000.
Prince Albert, Sask., Jan. 20, theatre, \$90,000.
Tyron, P.E.I., Jan. 12, workshop, \$12,000.
Weston, Ont., factory, \$30,000.
Winchester, Ont., Jan. 20, offices, \$12,000.
Beauceville, Que., Jan. 26, store, \$20,000.
Indian Lorette, Que., Jan. 30, factory, \$60,000.
Ottawa, Ont., Jan. 29, building, \$70,000.
Sackville, N.B., Jan. 13, University building, \$35,000.
Toronto, Ont., Jan. 28, Forum building, \$200,000.
Winnipeg, Man., Stovel building, \$100,000.

## Analysis of Causes

Among the causes reported were:—Explosions, 7; overheated furnace, 4; defective wiring, 3; sparks, 2; incendiary, 1; cigar stub, 1; matches, 1.

The following structures were destroyed or damaged:—Stores, 21; buildings, 15; factories, 12; residences, 13; barns, 8; apartments, 3; garages, 3; business blocks, 3; mills, 3; ice-houses, 2; hospitals, 2; post offices, 2; pool-rooms, 2; car, 1; lighthouse, 1; hotel, 1; rink, 1; clubhouse, 1; bakery, 1; city halls, 1.

The following is a list of deaths from fire in January:—

Glace Bay, N.S., Jan. 12, burnt in building .....	1
Toronto, Ont., Jan. 11, explosion .....	1
Fauquier, Ont., Jan. 26, playing with matches .....	2
London, Ont., Jan. 28, burnt in building .....	3
London, Ont., Jan. 31, burnt in building .....	4
Montreal, Que., Jan. 28, clothing caught fire .....	1
Brampton, Ont., Jan. 12, burnt in dwelling .....	1
LaSarre, Que., Jan. 17, burnt in building .....	1

Windsor, Ont., Jan. 12, explosion .....	1
Parkhill, Ont., Jan. 12, clothing caught fire .....	1
Montreal, Que., Jan. 9, clothing caught fire .....	1

17

## Comparison of Deaths

The record of deaths from fire has been as follows:—

Month.	1914.	1915.	1916.	1917.	1918.	1919.	1920.	1921.
January .....	26	3	10	21	28	13	22	17
February .....	18	11	23	19	87	26	30	..
March .....	27	23	23	20	34	9	35	..
April .....	22	14	6	15	7	27	8	..
May .....	8	5	14	12	10	15	13	..

August .....	3	14	30	12	7	24	14	..
September .....	9	27	6	21	13	23	13	..
October .....	9	7	39	23	11	16	13	..
November .....	14	12	12	21	3	14	31	..
December .....	19	11	94	15	26	19	18	..
Totals .....	175	142	531	207	241	225	227	17

*The Monetary Times'* record of the past four years shows the following monthly losses:—

Month.	1918.	1919.	1920.	1921.
January ...	\$ 2,688,556	\$ 3,915,290	\$ 2,637,850	\$ 2,237,900
February ...	2,243,762	1,091,834	1,895,575	.....
March ...	1,682,286	2,154,095	1,793,200	.....
April ...	3,240,187	1,080,070	3,229,500	.....
May ...	3,570,014	1,785,130	2,001,819	.....
June ...	3,080,982	3,337,530	1,424,319	.....
July ...	3,369,684	1,118,377	1,426,850	.....
August ...	3,110,445	1,374,495	1,857,800	.....
September ..	917,286	1,940,272	2,480,485	.....
October ...	5,119,145	1,023,288	2,467,901	.....
November ..	1,059,580	2,339,870	2,769,800	.....
December ..	1,733,917	2,047,496	3,721,475	.....
Totals ..	\$31,815,844	\$23,207,647	\$27,706,574	\$ 2,237,900

## CANADIAN LUMBERMEN'S ASSOCIATION

The thirteenth annual convention of the Canadian Lumbermen's Association was held in Montreal, January 12 and 13, with an attendance of some 150 of the 175 members. An address was given by President D. McLachlin, of Arnprior, Ont., in which he expressed doubt as to whether the price of lumber would materially decrease for a considerable time, chiefly on account of high freight rates and because present production for various reasons is away below the pre-war record.

The Board of Railway Commissioners came in for a great deal of criticism. Various speakers charged that it was unfair to the lumbermen that the personnel of the board did not include the right type of men, that freight rate increases were allowed almost automatically without the lumbermen being properly notified, and that the usefulness of the railway board was past because of the fact that Canada now owned half of the railroads.

The action of Ontario in connection with the Workmen's Compensation Act was also criticized. When one speaker said the province proposed at next session to pay injured workmen 100 per cent. of their former salary or wage, instead of 75 per cent., as now, A. E. Clark termed the proposal "so utterly ridiculous" that he said reasonable men should get together and take action.

Action was taken to combat a proposal pending before the Ontario legislature to limit the use of wooden shingles, because of fire considerations. This was strongly opposed and a committee appointed to deal with the matter.

# Service On Victory Bonds

Our Victory Department will give you at any time, the exact quotations of all Victory issues now traded in on the open market, either to buy or to sell.

We will buy any Victory Bonds on our partial payment plan.

# The Twenty-Eighth Annual Meeting of The Home Investment and Savings Association

The 28th Annual Meeting of the Shareholders of the above Association was held at the Head Office, Winnipeg, on Monday, February 7th, at 4 o'clock p.m.

The president, Mr. M. Bull, acted as Chairman, and the Assistant Manager, Mr. W. E. Hobson, as Secretary.

The Directors' Report, and Financial Statement as follows, were presented.

To the Shareholders:—

Your Board has much pleasure in submitting herewith the Balance Sheet of the Association, as at December 31st, 1920, as well as a statement of the Profit and Loss Account, showing the result of our operations for the twelve months ending on that date.

As is our custom, the Loans have been examined by an Inspection Committee, whose report will be presented to the Meeting.

The general feeling of regret felt by this Community in the death of Mr. P. C. McIntyre last autumn, was fully shared by the Members of your Board. Mr. McIntyre had been the Vice-President of the Association since its inception, and had taken a great pride in its continued prosperity. We will miss him very much, and would tender to Mrs. McIntyre, and other members of his family our very sincere sympathy in their great loss.

M. BULL, President.

Winnipeg, January 31st, 1921.

## Balance Sheet at 31st December, 1920

### ASSETS.

Loans on First Mortgage on Improved Real Estate .....	\$1,612,338.64

	<b>\$169,513.39</b>
Four Quarterly Dividends at rate of 8% per annum .....	79,391.40
	<b>\$90,121.99</b>
Balance Carried Forward .....	<b>\$90,121.99</b>

Mortgages in the amount of \$88,951.77 are deposited as collateral with trustees for debenture holders.

We have to report to the Shareholders that we have audited the books of The Home Investment and Savings Association for the year ended December 31st, 1920.

We hereby certify that the accompanying Balance Sheet, and Profit and Loss Account are in accordance with the books, and, in our opinion are properly drawn up so as to exhibit a full and fair statement of the financial position of the Association as at December 31st, 1920, and the result of the operations for the year ended that date. All our requirements as Auditors have been complied with.

MARWICK, MITCHELL & COMPANY,

Chartered Accountants.

Winnipeg, Man., January 30th, 1921.

### REPORT OF INSPECTION COMMITTEE.

To the President and Directors of The Home Investment and Savings Association:—

Your Committee, appointed to inspect all the loans on the ledgers of the Association, has completed its work and begs to report as follows:—

During the past year there has been a gratifying decrease of about 40% in the monthly loans, which are four instalments or more in arrears.

There has been some increase in the number of town and city properties on which the interest is two or more years in arrears. This is partly accounted for by the increase of loans of this character, due to the sale of properties acquired by the Association.

There has been a considerable increase in the number of farm loans on which interest payments are two years or more in arrears. This is largely due to crop failures in certain parts of Saskatchewan and Alberta.

The number of properties in the hands of the Association has been reduced 65%, notwithstanding the fact that a

#### THE HOME INVESTMENT AND SAVINGS ASSOCIATION

*(Continued from page 28)*

large number were taken over during the year. The income derived from properties still held has increased, and it seems probable that most of these will be sold during the coming year.

It must be borne in mind that many of our loans would be in better condition were it not for the Moratorium and other legislation enacted by the Western Provinces.

After a careful survey of the loans, we believe that the securities held by the Association are ample for the advances made.

Annotated lists of loans in arrears are submitted herewith.

Your Committee wishes to express its appreciation of the efforts of the office staff in securing prompt payments on the loans and of the assistance so readily given during this inspection.

F. H. SCHOFIELD,

JOHN A. FLANDERS,

Inspection Committee.

Winnipeg, January 21st, 1921.

The retiring Directors, Messrs. M. Bull, W. A. Black, F. W. Drewry, F. H. Schofield, W. H. Cross, W. A. Windatt, G. W. Allan, K.C., M.P., and W. A. Matheson, were unanimously re-elected. At a subsequent meeting of the new Board Mr. Bull was re-elected President; Mr. W. H. Cross, Vice-President, and Mr. W. A. Windatt, Managing Director.

## FURTHER BOARD OF TRADE REPORTS

### Newfoundland's Industries Underwent Strain and Trade Contracted—Moose Jaw District Benefited by Crops

GENERAL trade conditions which prevailed in Newfoundland in 1920 were not different from those in almost every part of the world. There was, however, this difference, that whereas in other countries the effect of business readjustment has been divided over many industries and trades, in Newfoundland it has fallen almost entirely on the main industry which is the fisheries.

During the past year the cod fishery has been small as compared with other years, the shortage amounting to from 400,000 to 500,000 quintals, and at the present time the stocks on hand are also considerably smaller, amounting to 450,000 quintals, as against 1,000,000 quintals in 1918 and 700,000 quintals in 1919.

The problem of marketing the catch has been one of great difficulty from a variety of reasons, according to the twelfth annual report of the Newfoundland Board of Trade. Commencing with the stock of fish on hand at the beginning of the year, and continuing on to the fish season of 1920, difficulties after difficulties had to be met with the continual decline in value. There were serious losses made on the marketing of the old 1919 fish; further losses on the new fish, and still more losses must be faced before the stock now on hand can be disposed of. It is considered fortunate that the stock now on hand is smaller than for many years.

Under normal conditions the position of the Dominion's stocks would mean a very strong market and would contain every element tending to profit making on the part of holders. The only condition against such a result is the unsettled financial conditions of the world and the general nervous state of all traders. The stock on hand is not more than sufficient to meet the demands and it is the opinion that if holders will avoid forcing supplies, the fish can be marketed satisfactory.

#### Other Fisheries

The seal fishery of the past season was one of the smallest on record, and the ships prosecuting the fishery only brought in 33,985 seals of a net weight of 757½ tons. The failure of the fishery was due to the inability of the steamers to reach the main body of seals. An attempt was made to send some of the steamers on a second trip, but this was prevented by the refusal of the crews to continue the voyage.

Poor returns to the packer and exporter were given by the herring fishery. The spring pack of split herring was comparatively small, and although fair prices were paid to the packers it did not leave any margin of profit on account of the high cost of salt, nets and barrels. The exporters who purchased the spring pack have found some difficulty in disposing of them. The American market is not consuming any quantity of split herrings and the West Indian markets are not active. Exports from July 1, 1919, to June 30, 1920, were: Salt bulk and frozen herring, 13,142 barrels and pickled herring, 129,980 barrels.

The lobster situation opened with good prospects, but prices have rapidly declined, and for some months the position has been that there were no buyers. Cost of production was higher than ever before, and a loss will have to be taken all round before the catch is marketed. There are now only about 2,800 cases held on the Island, and it is expected that these will be disposed of before next season's pack commences.

Exports of cod oil for the twelve months to December 31, 1920, were only 2,800 tons, which is short of the previous year's export by 1,700 tons. The consuming markets ceased to be active about October, and since then prices have been declining.

#### Production in Other Lines

There was an over-production of lumber during the past year, and this winter's operations will be curtailed. Pulp and paper mills have been working to capacity, the output find-

ing a profitable market. Timber limits are bringing good prices.

The output of iron ore from the Bell Island mines was about normal. There are prospects of coal being mined in paying quantities at two points in the Island and copper mines may also be operated in the near future.

Manufacturers of clothing, oil clothes, boots and shoes, cordage, etc., are heavily overstocked and are operating on a reduced scale. Both wholesale and retail trade have been dull for several months; cash sales are light and requests for renewals are being made.

The trade of the Dominion for the fiscal year ended the 30th June, 1920, shows a further advance over all previous records of \$5,317,026, as will be seen by the following figures:

	1918.	1919.	1920.
Imports ...	\$26,892,946	\$33,297,164	\$40,533,388
Exports ..	30,153,517	36,784,517	34,865,438
	\$57,046,463	\$70,081,681	\$75,398,826

There are no figures available from the 30th June to the end of December, 1920, but it is thought the imports do not compare favorably with the corresponding period of the previous year and there is not the least doubt that the value of the efforts has seriously declined.

#### Moose Jaw Board of Trade

Moose Jaw, Sask., and district enjoyed a prosperous year in 1920, according to the annual report of W. T. Thorn, president of the Board of Trade. There was a bumper crop, and even though operating costs were high the local situation was satisfactory. There was good development in industry chiefly in manufacturing based on local raw materials. Wholesale and retail business was active and building was almost three times as much as in 1919, and nearly equal the combined figures of the preceding four years.

With reference to the outlook, Mr. Thorn admits that the prospects for the immediate future are not bright, but expects an exceptionally good situation for Moose Jaw and district in the latter part of 1921, depending of course on the crop.

Three new industries established at Woodstock, Ont., during 1920, and six others already operating in the municipality extended their operations, according to a statement made in the annual address of E. A. Rea, president, who has been again elected chief of the organization. The board is also negotiating with nine other industries, and it is hoped that they will locate in the city in the near future.

#### Cornwall Growing Industrially

President O'Callaghan, who has been re-elected president of the Cornwall, Ont., board of trade, in reviewing events of the past in his annual statement, presented industrial statistics of the town from 1900 to 1918, showing that in the former year there were 32 establishments, with 1,619 employees, in which \$500,849 was paid in wages and salaries, while in the latter there were 65 establishments, 1,877 employees, and \$1,132,751 paid in wages and salaries. This was the last year for which the figures were available. In addition he mentioned the fact that there was sold on the Cornwall cheese board during 1920 some 55,000 boxes of cheese, at a total value of \$1,250,000.

At the annual meeting of the Timmins, Ont., board of trade last week, D. Ostrosser was re-elected president for 1921. In reviewing the past year Mr. Ostrosser said: "Timmins is out of the baby class and will be a mighty good place to live in this year." Freight receipts for the past year was only exceeded by one town in Ontario of equal size and amounted to the sum of \$725,000. Payrolls totalled \$4,500,000, assessment had reached a high mark of \$2,225,000 and the revenue from taxes, royalties, and rates came to \$170,000.

After reviewing to some length general business conditions and the work of the Edmonton board of trade during 1920, at the annual meeting last week, retiring president W. J. Thompson, stated: "It has been the policy of this board

NEW ISSUE

MONTREAL, February 8, 1921

# \$3,000,000

## The Spanish River Pulp and Paper Mills LIMITED

### 8% General Mortgage Bonds Series "A"

Dated March 1st, 1921. Maturing March 1st, 1941. Principal and semi-annual interest payable at The Royal Bank of Canada, Montreal and Toronto. Interest payable May 1st and November 1st. Coupon Bonds of \$1,000 and \$500 Denominations with privilege of registration as to principal only. Trustee — The Montreal Trust Company, Montreal.

**CAPITALIZATION**

Common Shares (Paying 7%)	Authorized	Outstanding
7% Cumulative Participating Preferred Shares	\$10,000,000	\$8,995,500
6% First Mortgage Bonds and 6% Serial Notes, maturing 1921-1941 (Including Bonds of Lake Superior Paper Company, Limited)	10,000,000	8,571,493
8% General Mortgage Bonds, Series "A" (this issue)	Closed	10,655,113
	20,000,000	3,000,000

At current market prices on Montreal Stock Exchange the Preferred and Common shares have a market value of approximately \$15,000,000, ranking junior to these Bonds. Approximately \$500,000 of the securities senior to this issue mature each year 1921 to 1931 inclusive. These annual reductions together with annual Sinking Fund of 2% per annum on General Mortgage Bonds rapidly increase the equity behind this issue.

Complete prospectus, copies of which will be mailed on request, contains a letter from the President of the Company, from which he summarizes as follows:

The Spanish River Pulp & Paper Mills, Limited, was incorporated in 1910 to acquire the properties and assets of the Spanish River Pulp & Paper Company, Limited, and the Ontario Pulp & Paper Company, Limited. In 1913 it acquired all the capital stock of the Lake Superior Paper Company, Limited. The Company is the largest manufacturer of newsprint in Canada.

Bonds will be secured by direct mortgage and charge on all the fixed assets and properties of the Company and on all Bonds, Debentures and Shares now owned or hereafter acquired by it and by floating charge on all other assets of the Company, subject only to \$10,655,113 par value of Bonds and Serial Notes of the Company and Bonds of Lake Superior Paper Company, Limited, the mortgages securing which are to be closed at the amounts now outstanding.

Annual Cumulative Sinking Fund will commence in 1924 — Sufficient to retire half of this issue before maturity.

Timber Areas — 11,520,000 acres, containing sufficient pulpwood for many years' operation at present capacity.

Water Powers — 60,000 horse power, of which 50,000 horse power is developed and in operation; of the balance, 7,500 horse power will be in operation by August, 1921.

The three mills operated by the Company produce the following tonnage of newsprint paper annually:

Sault Ste. Marie Mill	72,300
Espanola Mill	90,600
Sturgeon Falls Mill	23,100
Additional, Sturgeon Falls, in operation June, 1921	16,900
<b>Total</b>	<b>203,100 tons</b>

Plant and Property Valuation — \$30,000,000 against \$13,655,113 of Bonds outstanding, including this issue.

Net Liquid Assets (Working Capital) after deducting all Current Liabilities and including the proceeds of this issue, will be in excess of \$9,000,000.

Average annual Net Earnings after depreciation available for interest charges on these Bonds for the five years ended June 30th, 1920, were \$1,229,472 — over five times interest charges on General Mortgage Bonds now to be issued.

Net earnings after depreciation for year ended June 30th, 1920, available for interest charges on General Mortgage Bonds amounted to \$2,552,069 — over ten times the amount required to pay General Mortgage Bond interest.

Net Earnings for six months ended December 31st, 1920, after depreciation and prior interest charges, were in excess of \$2,500,000 — at the rate of twenty times annual interest on this issue.

*We offer the unsold balance of this issue if, as and when issued and received by us at the price of*

**99 and accrued interest, to yield 8.10%**

to concentrate on the development of our agricultural and dairying industries and immense possibilities are without doubt obtainable in this direction. Some effort should be made, however, by the city to provide funds for an advertising campaign to "make Edmonton known to the world," and in this we should co-operate to the fullest extent. During the past five years the total amount spent by the city in this way was less than \$1,000, and this has principally been in financial publications. It is true that these years were not ones when much money could have been expended to good advantage, but we are now on the eve of a development period, when advertising our city and district can be done to splendid advantage."

S. B. Woods is the new president for 1921, while Frank Pike is first vice-president, P. W. Abbott, second vice-president and W. Ross Alger, third vice-president.

#### DOMINION GOVERNMENT SAVINGS INSTITUTIONS

THE Post Office Savings Bank and the Dominion Government Savings Bank, two institutions operated by the government, sometimes called the "poor man's" savings banks, inasmuch as they operate for the benefit of the poorer class of people and those who are ignorant and suspicious of the safety of the chartered banks, did not enjoy a very favorable year. As will be seen from the figures given below, withdrawals tended to greatly exceed the deposits. It will be noticed that the deposits were affected by the Victory Loan in the fall of 1919, but apart from that the tendency was to reduce the amount available for use by the government.

##### Post Office Savings Banks

1919 —	Deposits	Withdrawals
October -----	\$858,054	\$2,431,647
November -----	884,322	2,985,925
December -----	956,771	2,090,357
1920 —		
January -----	\$597,100	\$1,409,435
February -----	519,822	1,215,902
March -----	682,979	1,212,686
April -----	537,316	1,214,707
May -----	575,186	1,064,902
June -----	561,829	1,034,504
July -----	614,814	858,221
September -----	580,047	761,619
October -----	591,725	775,766
November -----	621,354	854,377

##### Dominion Government Savings Banks

1919 —	Deposits	Withdrawals
November -----	\$192,829	\$859,307
December -----	190,490	203,450
1920 —		
January -----	\$158,650	\$144,112
February -----	150,329	122,244
March -----	196,855	180,606
April -----	214,559	267,157
May -----	192,518	218,459
June -----	213,331	216,279
July -----	182,622	202,270
August -----	145,393	198,885
September -----	137,521	183,253
October -----	155,350	180,441
November -----	181,132	181,142
December -----	199,186	547,746

The balance at the credit of depositors in the post-office savings banks at October 31, 1919, was \$35,810,419, but by November, 1920, this figure was reduced to \$29,156,896 at November, 1920. In the case of the Dominion government savings banks, the balance was reduced from \$11,074,418 at the end of October, 1919, to \$10,188,315 at the end of December, 1920.

#### RELATIONS WITH OTHER BANKS

In the course of their business, which is becoming world-wide, Canadian banks find it necessary to keep adequate funds on deposit with banks abroad. Other banks also find it convenient to keep an account here. Because New York is the favorite call loan market, the largest sums are kept on deposit there. Substantial sums are also due from the United Kingdom. The indebtedness of Canadian banks to banks in Canada is not large, the branch system making that unnecessary.

Exchange has played an important part during the past year, particularly in connection with the flow of money between Canada and the United Kingdom and the United States. Banks have undoubtedly found it necessary to withhold or remit funds, which would otherwise have followed the usual course, in order to avoid loss, and in other cases to make profit.

The following table illustrates the relations of Canadian banks with other like institutions, and reflects to some extent the expansion of our business abroad:—

1919 —	Due from banks in Canada	Due from banks in U. K.	Due from banks elsewhere
January -----	\$6,960,719	\$11,821,623	\$41,501,475
February -----	8,409,585	9,250,181	42,595,838
March -----	7,287,982	10,763,482	44,583,970
April -----	9,515,060	7,445,880	41,230,016

# Canadian Guaranty Trust Company

The Eleventh Annual General Meeting of the Shareholders of the Canadian Guaranty Trust Company was held in the office of the Company, 1031 Rosser Avenue, Brandon, at 2.30 o'clock, p.m., February the 2nd, 1921. The following reports were presented:

## TO THE SHAREHOLDERS,

### CANADIAN GUARANTY TRUST COMPANY:

Your Directors beg to submit the Eleventh Annual Report of the Company for the year ending 31st December, 1920. The earnings of the Company for the year have been the greatest in its history, and we have been able to add \$5,000.00 to our Reserve Fund, place \$2,000.00 in a Contingent Account, and carry forward \$5,753.19 in undivided profits, making a total Reserve Account of \$17,753.19, or approximately 18% on the Paid-Up Capital Stock. While our securities and other assets are carefully valued, we have thought it advisable to provide a Contingent Fund until financial conditions become more settled.

During the past year a sub-committee of the Board has carefully examined all our various assets, securities, etc., and reported all in good order. The books and accounts of the Company have been audited regularly by the Shareholders' Auditor, and his report for the year 1920 is attached hereto.

On behalf of the Board of Directors,  
Brandon, Manitoba, January 6th, 1921.

A. C. FRASER, President.

## AUDITOR'S CERTIFICATE

I hereby certify that I have made a monthly audit of the books and accounts of the Company, and that the above Balance Sheet and Profit and Loss Statement are true, correct, and full Statements of the condition of the affairs of the Company as on December 31st, 1920, as disclosed by the said books of accounts.

The Cash and Bank Balances have been certified, and the Mortgages found duly certified as valid by the Company's Solicitor. The Trusts and Estates are in good order and are being carefully administered.  
Brandon, Man., January 6th, 1921.

J. B. BEVERIDGE, Auditor.

The Shareholders reported the following re-elected as directors for the ensuing year.

A. C. Fraser, Col. A. L. Young, John R. Little, William Ferguson, H. L. Adolph, E. O. Chappell, J. S. Maxwell, John A. McDonald, G. S. Munro, Hon. W. M. Martin, F. N. Darke, Alex. A. Cameron, D. A. Reesor, Alex. Rose, W. C. McCulloch.

At a meeting of the Directors held subsequent to the Shareholders' meeting, A. C. Fraser was appointed President; A. L. Young, Vice-President, and John R. Little, Managing-Director.

# The Ontario Loan and Debenture Company

The Fiftieth Annual General Meeting of the Shareholders of this Company was held on Wednesday afternoon, 9th instant, at the Company's Offices, London, Ontario.

The chair having been taken by the President, Mr. John McClary, the Manager, Mr. A. M. Smart, who acted as Secretary, read the notice calling the meeting and the minutes of the last Annual Meeting, which, upon motion, were confirmed.

The Annual Report was then presented, as follows:—

London, Canada, 25th January, 1921.

To the Shareholders:—

It affords the Directors special pleasure to present their Annual Report for the year 1920 — the Company having now completed fifty years of service in its field of activity.

In addition to paying the Shareholders in each of those years Dividends averaging throughout the whole period over 7½% per annum on their Stock, a strong Reserve Fund equal to 128½% of its paid-up Capital has been built up, thus placing your Company in this respect second to none.

Investments in Bonds and Debentures have increased during the past year, but latterly good Mortgage Loans are offered in larger volume at fair rates, and attention is again turning to this class of security. Payments both of interest and principal have been well met and the outlook is favorable.

The earnings have been in excess of those of the previous year, and a Bonus equal to 1% in addition to the usual Dividend was distributed, in all 10% for the year.

After payment of Provincial and Municipal Taxes, Interest, Expenses and Charges, and making provision for possible losses and contingencies, the

Net earnings for the year 1920 are	\$279,893.74
Surplus realized from sale of old office building	23,000.00
Balance brought forward from previous year	32,623.71

From this Total available	\$335,517.45
Dividends (Quarterly) at the rate of 9% per annum have been paid with bonus	
1%	\$175,000.00
Transferred to the Reserve Fund	100,000.00
	\$275,000.00

Balance	\$ 60,517.45
Dominion Government Income War Tax	28,864.08
Balance carried forward	\$ 31,653.37

The transactions and books of the Company have been subject to exhaustive continuous audit throughout the year, and the Auditors' Certificate is attached to the financial statement which is presented herewith.

Your Directors desire to acknowledge the care and attention devoted to the Company's interests by your valued representatives in Scotland, and also record their entire satisfac-

tion with the manner in which the Officials and Staff have performed their duties.

All of which is respectfully submitted.

JOHN McCLARY, President.

To the Shareholders of The Ontario Loan and Debenture Company:

We hereby certify that we have audited the books and accounts of The Ontario Loan and Debenture Company continuously throughout the year ended December 31st, 1920, and find them correct and the above statements in accordance therewith. We have verified the Cash and Bank Balances, and have examined the Company's securities and find them in order. All our requirements as Auditors have been complied with, and, in our independent opinion and according to the information and explanations given us, the above statements are properly drawn up and set forth fairly and truly the state of the Company's affairs.

All transactions that have come within our notice have, we believe, been within the powers of the Company.

F. G. JEWELL, F.C.A. } Auditors.  
J. F. KERN }

London, Ont., 25th January, 1921.

The President, moving the adoption of the Report, said in part:—

With the year 1920 your Company has now passed its fiftieth anniversary, and I am sure the Shareholders will be as gratified as are the Directors at the success that has attended our efforts. Throughout all this time the objects for which it was formed, namely the promotion of thrift and the development of the community, have been kept constantly in view, rather than the acquisition of excessive profits. Yet in all of these years the Shareholders have received every year a fair return in Dividends on their Shares and your Capital of \$1,750,000 has been considerably more than doubled, as shown by the present amount of the Reserve Fund which now stands at \$2,250,000. These facts speak louder than any poor words of mine for the wisdom with which your Company has been conducted.

During the period of the war and the time since peace was declared the nature of our Assets has altered materially. The needs of the Empire have been very great and your Directors conceived it to be their duty to render assistance in supplying funds by investing considerable sums in the Bonds of the United Kingdom, of the Dominion and the Provinces, even at rates much below the average yield of our other advances. Investments in these Bonds together with Securities fully guaranteed by the Dominion and the Provinces and those of Canadian Municipalities now amount to one-third of the Company's total invested assets, whereas in 1914 mortgages on Real Estate made up nearly 95% of the then total. Now that the Dominion Government issues have an open market and the embargo against the return from abroad of Canadian Securities has been raised and the import of all others is abso-

A. M. SMART, Manager.

lutely free from interference, their marketable value is established on the logical (if perhaps old-fashioned) foundation of supply and demand.

The coming year seems likely to develop a greater demand for advances upon Real Estate Mortgages at possibly better rates. Rates for this class of service have, I think, shown less increase than any commodity either material or labour, being but little higher than they were in 1914.

While I consider our Company should endeavor to do its share toward overtaking the requirements of this department of the reconstruction activities, it will be wise to bear in mind the present inflated cost of building. Cost is not always a true gauge of value. Especially at present it should not be taken as such in making these mortgage loans. I believe the members of the Board fully realize this and if re-elected the policy should and will be to face the future with confidence and to proceed with caution.

The Vice-President, Mr. A. M. Smart, in seconding the adoption of the Report, said:—

In seconding the resolution which Mr. McClary has just proposed I would like to say in connection with the new form in which the balance sheet is presented that it is in the form required by the Registrar of Loan Corporations from all similar Companies. This uniformity is a step in the right direction as making it much easier of comparison of the position of one Company with another. With others we are of opinion it might be further improved were the items on the assets side differently grouped and presented in sequence of cash and quickly available securities first, followed by those not so readily convertible into cash, then those of a more fixed and permanent nature. However, we have no option in this.

Some of the Loan Companies, fearing a shortage of supply of money for mortgages, are urging that the limit to which money may be received on Deposit be raised, by amending the Loan and Trust Corporation Act to the end that funds available may be thus augmented. The present limit is fairly reasonable and by it provision is made that in effect moneys which are repayable by the Companies on demand or short notice will not be tied up in long-term mortgages. The so-called safeguard that is suggested is misleading, fallacious and would be, in my opinion, quite ineffective and positively detrimental to the Companies and to the public. The Board of

Directors are, for these and other reasons, not in sympathy with the proposal and trust that wiser counsels may prevail.

Our Securities, Bonds, Debentures, etc., which the President has mentioned as now forming 33% of our invested Assets, amount with cash on hand at the end of the year, to \$2,930,000 and (quite apart from our Mortgage Assets) are equal to about 80% of our total liabilities to the public. The Bonds of the Dominion of Canada have now a definite market value, being quoted and dealt in daily on the Exchanges. They and all other bonds that are so quoted, have been taken into the balance sheet at not exceeding their market values as on the 31st December last. Against all other Bonds and Debentures, amounts have been reserved to bring them all well within the values authorized by the Government Department in charge of the matter.

Like reservations are also provided as heretofore against Real Estate held for sale, in which item is included all properties in the possession of the Company whether by foreclosure, power of sale or otherwise; with the exception of office premises. Experience in the past has repeatedly proved our former appropriations more than ample.

The office premises item is again reduced to \$40,000, which is barely 57% of the assessed value for taxation. This is brought about through the sale of the Agricultural Savings and Loan Company building not required by your Company. The surplus derived from this sale is shown in a separate item apart from the profits, and rightly so, as it is in no sense part of the earnings of the Company. If there is any further information desired by any Shareholder, I shall be glad to furnish it.

The Report was then adopted unanimously.

The Scrutineers were then appointed and the election of Directors proceeded with, Messrs. John McClary, A. M. Smart, Lieut.-Col. William M. Gartshore, John M. Dillon, M. Masuret, C. R. Somerville and J. G. Richter being re-elected for the ensuing year.

It was moved by Mr. A. B. Greer, seconded by Prof. Bowman, that Messrs. Frank G. Jewell, C.A., and John F. Kern be and are hereby re-elected Auditors of the Company. Carried.

The meeting then adjourned and at a meeting of the Board of Directors held subsequently Mr. John McClary was re-elected President and Mr. A. M. Smart, Vice-President of the Company. 412

# The Security Life Insurance Company of Canada

## SYNOPSIS OF ANNUAL REPORT FOR 1920

During the year the applications for New Insurance, Increases and Revivals amounted to \$2,204,900. The amount actually accepted and issued was \$2,023,100.

The Gross Insurance in force at the end of the year was \$4,513,132, an increase for the year of \$1,500,695, being over 74% of the New Business issued.

The Gross Cash Premium Income for the year was \$112,648.46, an increase over the previous year of \$29,098.01, and an increase over the year 1918 of \$66,101.04.

The Death Claims during the year were (net) \$13,492.01 as against \$15,592 in 1919 and \$29,550 in 1918.

From the Cash Receipts during the year the Company after payment of Claims, Re-insurance Premiums and Expenses was able to carry the substantial sum of \$90,809.89 to Investment Account.

The Balance Sheet as at December 31st, 1920, showed Assets of \$299,405.95 with Liabilities, including Reserve Value of all Policies in force with provision for additional Guarantees of \$225,011.42, leaving surplus Assets over Liabilities (excluding Capital) of \$74,394.53, an increase for the year of \$36,216.87.

At the Annual Meeting on February 8th, much satisfaction was expressed over the progress of the Company and the policy of the Directors to substantially increase the volume of business was unanimously approved by the Shareholders.

Intending Insurers should enquire for rates and particulars of the "All Guaranteed Policies" being issued by this Company. During the year 1920 not a single letter or message was received at the Head Office indicating either misunderstanding of, or dissatisfaction with, the policy held in the Company.

Vice-President and General Manager

BRIG.-GEN. SIR HENRY M. PELLATT, C.V.O.

President

## CROWN LIFE INSURANCE COMPANY

Applications for \$7,153,834 of new business were received by the Crown Life Insurance Company in 1920. This is about \$1,000,000 more than the total in 1919. The amount of policies actually issued was \$6,832,325, the net gain in insurance in force being \$4,407,487, and the amount now is \$25,745,826. The cash premium income was \$896,302, and the net premium income \$848,576. The average premium was \$38.10 per \$1,000 of insurance.

Assets of the company have increased from \$2,871,714 at the end of 1919 to \$3,389,960 at the end of 1920. The average rate of interest earned in 1920 was 6 per cent., and profits were also realized through appreciation in market value of securities. Total cash receipts were \$1,030,614. Death claims paid netted \$126,455, the mortality experience being 49 per cent. of the table used, or 44 per cent. in the participating section and 62 per cent. in the non-participating section. Policyholders' reserve has been increased from \$2,650,323 to \$3,159,136, and in addition \$215,816 was paid to policyholders and \$47,275 added to their surplus. It was announced that dividends to policyholders would continue to be paid on the same scale.

## CANADIAN ELECTRIC RAILWAY ASSOCIATION

A convention of the Canadian Electric Railway Association was held in Ottawa, January 31 and February 1. G. Gordon Gale, vice-president of the Hull Electric Railway Company, was elected president, and Major F. D. Burpee, manager of the Ottawa Electric Railway Company, was chosen first vice-president. Thomas Ahearn, also of Ottawa, was elected honorary president, and the other officers chosen were: Honorary vice-president, George Kidd, Vancouver. Executive—R. M. Reade, Quebec; H. H. Cousens, Toronto; C. C. Curtis, Cape Breton; C. L. Wilson, Toronto; E. P. Coleman, Hamilton; A. W. McClimont, Winnipeg; W. S. Hart, Three Rivers; and Col. G. C. Boyce, Toronto; treasurer, A. Gaboury; auditor, H. E. Weyman Lewis.

R. Mayne Reade, superintendent of the Quebec Railway, Light, Heat and Power Co., spoke on "Accident Prevention," referring more especially to street railways. The safety movement has progressed rapidly, he said, but it should go still further. "Ten years ago," said Mr. Reade, "the steam railroads headed the list in the number of fatal accidents, followed by electric railways, industrial establishments and others. To-day it is known that automobile accidents not only are at the top of the list in the United States and Canada, but the total fatal ones credited to them is more than the combined total of all other classes of accidents on the calendar. This fact most assuredly indicates that there is something radically wrong in the administration of our traffic laws throughout the country." Mr. Reade suggested a drivers' license law, providing for the mental and physical examination of applicants, as the remedy.

J. E. Hutcheson, general manager of the Montreal Tramways Co., discussed the "Practical Operation of a Service at Cost Contract." This plan was adopted in Montreal in 1918. Control is exercised by the Montreal Tramways Commission, from which there is an appeal to the Quebec Public Service Commission. After meeting operating expenses and taxes, maintenance and renewals return upon capital value, city rentals, and making an appropriation to contingent reserve, the surplus is divided on the basis of 20 per cent. to the company, 50 per cent. to a tolls reduction fund and 30 per cent. to the city.

"After more than two years' trial," said Mr. Hutcheson, "it is my belief that the plan now in operation in the city of Montreal is working out to the advantage of the citizens. It is true that the rates of fare have been increased, but had they not, the company would have been obliged to greatly curtail the service and defer maintenance in order to make the revenue pay operating expenses."

## ROYAL LOAN AND SAVINGS COMPANY

The forty-fifth annual report of the Royal Loan and Savings Company, Brantford, Ont., shows mortgage loans of \$1,638,236, as compared with \$1,631,298 in the previous year. Profits were not quite so high at \$70,806, but the usual dividend of 9 per cent. was maintained and a balance of \$8,223 carried forward.

The liabilities side of the balance sheet shows a good increase in deposits from \$578,556 to \$745,047. At the same time debentures were reduced from \$910,836 to \$772,029.

Total assets of the institution now amount to \$2,617,476, compared with \$2,568,555 in 1919. The reserve fund has been increased \$20,000 to \$470,000.

## BRITISH COLUMBIA TELEPHONE SYSTEM GROWING

The growth of the British Columbia Telephone Company in 1920 was greater than in any other year, topping that of 1919 by 79 stations, with a net gain of 8,549. The total number of telephone stations of the company now is 67,672.

Expansion was noted in 41 of the 44 exchanges, exceptions being Sandon, New Denver and Greenwood, small mining towns in the Kootenay. Even in these, however, the aggregate net loss was only twelve, showing that these places are about holding their own, despite adverse conditions. Not only has there been growth in the large cities, but throughout the territory, on Vancouver Island, the lower mainland, Kamloops and the Kootenay the increase during the year was steady, and in the coast cities marked.

## SUN LIFE ASSURANCE COMPANY

Assets totalling \$114,839,444 are shown in the annual statement of the Sun Life Assurance Company for 1920; at the end of 1919 they were \$105,711,468. The reserves on policies and annuities are \$102,134,336, an increase of \$8,500,000. The cash surplus to policyholders is \$8,864,667, compared with \$8,537,440 at the end of 1919. This is made up of capital paid up, \$500,000, and net surplus, \$8,364,667. Holdings of bonds increased from \$60,766,106 to \$67,757,963, mortgages from \$6,850,761 to \$7,634,427, preferred and guaranteed stocks from \$11,505,667 to \$11,635,387, while holdings of other stocks decreased from \$4,389,920 to \$3,994,405. These are all entered at their market value. Loans on policies increased by \$1,100,000, and outstanding and deferred premiums by \$350,000.

The income for the year was \$28,751,578, against \$25,704,201 in 1919. Receipts on account of annuities decreased from \$2,103,318 to \$1,567,943, while life premiums went up from \$17,933,794 to \$20,950,348. The remainder of the increase in income is due to the fact that net income from interest and rents was \$6,073,714, compared with \$5,489,205 in 1920. Disbursements totalled \$18,977,865, leaving an excess of \$9,773,713; last year the figures were \$17,995,899 and \$7,708,301, respectively. Lower payments to policyholders, chiefly on account of death claims and matured endowments, made this increased balance possible. Expenses were somewhat higher than in 1919, while a "net adjustment in ledger assets, due to change in value of foreign currencies" of \$847,539, compared with a similar item of \$43,107 last year, was also added to disbursements.

At the annual meeting on Tuesday the shareholders voted on an increase in the subscribed stock from \$1,000,000 to \$2,000,000. The amount already paid on the subscribed stock was \$500,000, and, as the payment on the additional million is to be \$350,000, this will increase the paid-up capital to \$850,000. Just before the close of 1920 \$350,000 was distributed to the shareholders from the profits of the non-participating and annuity branches, so that the increase in capital is virtually a distribution of stock.

\*The office premises are vested in the Trusts Buildings, Limited, all the stock of which is held by the Trust Company and were appraised in 1920 by the Canadian Appraisal Company, Limited, at \$939,398.27. Certain of the lands are subject to a first mortgage of \$100,000.00, and the holding Company has outstanding \$350,000.00 first and \$250,000.00 second mortgage bonds and shares of a par value of \$250,000.00.

JAMES J. WARREN,  
President.

E. B. STOCKDALE,  
General Manager.

We have audited the books for the year ending 31st December, and verified the cash, bank balances and securities of the corporation. We have examined the statement, and it agrees with the books of the corporation. After due consideration we have formed an independent opinion as to the position of the corporation; and with our independent opinion so formed and according to the best of our information and the explanations given us, we certify that in our opinion the statement sets forth fairly and truly the state of the affairs of the corporation; and that all transactions of the corporation that have come within our notice have been within the powers of the corporation.

GEORGE EDWARDS, F.C.A., }  
H. PERCY EDWARDS, C.A., } Auditors.

Toronto, 25th January, 1921.

of EDWARDS, MORGAN & COMPANY,  
Chartered Accountants.

## BRITISH COLUMBIA ELECTRIC RAILWAY

The TWENTY-FOURTH ORDINARY GENERAL MEETING of the members of the British Columbia Electric Railway Company, Limited, was held on Thursday, Jan. 20, at the Institute of Chartered Accountants, Moorgate Place, Moorgate Street, London, England, Mr. G. P. Norton presiding.

The SECRETARY (Mr. R. W. Bartlett, A.C.A.) having read the notice convening the meeting and the report of the auditors,

The CHAIRMAN said: Ladies and gentlemen, it is very pleasant for us to meet you again with a report which shows clearly the improvement which has taken place in the company's affairs during the past year. As a result of increased population and expanding trade our revenue has increased. Until last year, as you are aware, no dividend had been paid on the preferred ordinary stock since the year ended June 30, 1915, or on the deferred ordinary stock since the year ended June 30, 1914.

We should, however, be satisfied with the results achieved this year if we were assured of being permitted to carry on our business permanently under reasonable conditions. With permanent conditions established on a reasonably remunerative basis we could secure the necessary capital to proceed on the progressive lines adopted in the past with great advantage to British Columbia. Without satisfactory permanent conditions we cannot secure the required capital and shall be tied down to a very confined policy.

We realize, and British Columbians must realize, that pre-war returns are not sufficient to attract capital for the development of public utilities such as ours, the growth of which is inevitable if the districts we serve are to receive in the future the services they have been accustomed to in the past. I trust it is no longer necessary to tell the British Columbian public, and the local authorities, that the development of our utilities is essential to the development of the Province, and that we must be allowed to earn a return sufficient to attract capital at the current market rates.

As you are aware the company's debentures are irredeemable and consequently a considerable part of the provision which the Directors have always made for depreciation has accumulated in cash and is being utilized for necessary extensions and developments. It is, I think, unprecedented for a company of this size and character to be financed on perpetual debentures. Had our debentures been redeemable, much of the provision made for depreciation would have been absorbed by the redemption fund and we should have been compelled to ask you for fresh capital to meet the further needs of the communities we serve. Both the public in British Columbia and the Shareholders may congratulate themselves that the sound policy of the company in the past has enabled it to meet the continued growth of the company without having recourse to the issue of fresh capital which at the present time would, of course, command a much higher rate than the return we are now earning.

British Columbia has an enormous supply of lumber and minerals and the raw materials of which the world stands in need to-day, her industries and shipping are increasing, and all that is needed is to develop a sense of security in the minds of investors. I am constantly asked what is wrong with this company to account for the low prices of our securities and stocks. There is nothing wrong with the company. It is in a thoroughly strong and healthy position with excellent prospects. The low prices are due to Stock Exchange conditions and to a lack of complete confidence among investors that a thoroughly fair arrangement for the control of rates and fares will be arrived at. There is no reason why the company should not share to the full in the prosperity of the Province which we have done so much to create.

I feel I cannot conclude my remarks without an expression of gratitude to our management for the splendid ser-

vice they have rendered to the company. Times have been difficult and the work strenuous, but all situations have been met with courage, zeal and ability.

On your behalf, ladies and gentlemen, and on behalf of the board I thank them sincerely for their efforts.

MR. J. DAVIDSON: A year ago, when we had the pleasure of meeting you, I had just returned from a visit to British Columbia. You will recollect that I then described to you the great growth which had taken place in the cities and districts served by your company during the six years previous to 1914, in which year the war called a halt to development. I also described to you the greater railway and ocean transport facilities which Vancouver and British Columbia generally enjoy to-day as compared with then, and the greater opportunities for future growth which now exist, and I suggested that it would be a disregard of precedent to anticipate that the growth of Vancouver and the districts served by your company would be less during the next six years than it was in the six years previous to 1914.

There cannot be any growth in a modern community without a corresponding growth in demand for the essential utility services. These again cannot be provided without capital outlays, as is evidenced by the manner in which our capital investment has increased.

In 1908 our capital, including debentures, was £1,880,458; in 1910 it had increased to £3,535,341; in 1912 to £6,164,855; and since then it has increased to £8,913,870.

Ample and enterprising public utility services are a necessary asset to a progressive community, and communities in general recognize that dependable and ample services attract new population and industries. It has been our policy in the past to provide for services reasonably well ahead of the immediate requirements of the communities we serve. We were able to do this in the past because the return which we could give you on the capital employed, and promise you on the further capital required, was reasonably attractive and stable. In the past, wages, cost of materials and the other factors which enter into working expenses were within certain limits, comparatively stable, and we were thus able to forecast with considerable accuracy the return which could be expected from the expenditure of additional capital. In other words, we could develop with a feeling of confidence that the charges which we were permitted to make for our services would be sufficient to meet the working expenses and leave a reasonable return upon the capital employed.

Well managed and prudently financed public utility companies in Canada and the United States were in pre-war days in similar position, and their securities, like ours, were regarded as safe and attractive investments. Owing, however, to the economic changes produced by the war, public utility companies everywhere had to face enormously increased costs of operation which made it impossible for them, while restrained from collecting higher charges, to continue to pay a reasonable return on the capital employed, or even, in many cases, to continue to give an efficient service.

In most cases no legislative or other authority at that time existed enabling public utility companies to increase their charges to meet the increased cost of operation, and, in consequence, their securities became discredited. As a result, many of them reached such a condition of embarrassment as to be unable to raise fresh capital for necessary extensions or even to maintain their properties in a satisfactory state of repair.

To meet this serious condition of affairs, which was injurious alike to the companies and to the public they served, Public Utility Commissions, where such did not previously exist, were established in the Provinces of Canada and in most of the states of the American Union charged with the duty of considering the altered conditions and fixing rates on a scale sufficient to meet operating expenses and pay a reasonable return on the capital employed. When I addressed you last year I had hoped that the establishment of such a Public Utilities Commission in British Columbia was to prove a permanent solution of the difficulties of your company in

regard to the matter of rates. Owing, however, to the circumstances explained in the report, this is not the case.

A way out of the difficulty is being sought, and until we can be sure of being able to continue to collect charges which will give a reasonable and dependable return, it must obviously be impossible to obtain the further capital necessary to meet the future expansion of business.

The growth in the cities and districts served by us has in the past been greatly encouraged, and has followed closely the expansive policy adopted by your company, and in the interests of the communities concerned, the directors would like to continue the policy of the past if operating conditions are reasonable and it is possible to continue such a policy without sacrificing the interests of the shareholders. It seems to me that it should be a matter of concern to the communities themselves, and also a matter of concern to the Province, that your company should be put and retained in a position which will enable it to adopt in the future an expansive policy as in the past. It seems to me also that this is a matter which has an importance beyond the Province, because your company handles interchange of traffic both with the United States lines and the main Canadian railways to an increasing extent each year. Last year we handled 9,861 freight cars, as compared with 7,463 the previous year.

There is yet another aspect of the case which is, I venture to think, a matter which affects Canadian interests as a whole, and it is this: Your company has now grown to very great importance, it and its subsidiaries have a combined share and debenture capital of £8,913,870, almost the whole of which is held in Great Britain by some 12,000 separate registered holders. Each of these holders is a potential advertiser of Canadian investments either for good or for ill. If conditions securing you a fair return upon your existing investments are maintained by stable and reasonable legislation, you will keep your existing investment and be encouraged to add to it as convenience dictates: if conditions are allowed to become such that we cannot earn for you a reasonable return on your investment, it would be no more than natural that you should refrain from investing any further in that direction and discourage others who might be inclined to do so.

I have every hope that stable conditions will be reached and retained. Apart from any other considerations it seems to me that a strong and healthy public utilities company is so essential to the well being and expansion of progressive and ambitious communities that they may be relied upon to insist that the company providing their utility services is permitted to operate under conditions which will ensure a reliable service capable of immediate expansion to meet increasing requirements.

In conclusion, I desire to associate myself with the remarks which your Chairman has made regarding the splendid service which the management have rendered to the company. I met Mr. Kidd, your general manager, in Toronto last November and discussed with him the affairs of the company, and I have great pleasure in acknowledging the debt which the company owes to his ability and resourcefulness and to the untiring energy and zeal of himself and his assistants. (Applause.)

The CHAIRMAN: Ladies and gentlemen, I have now formally to move: "That the balance sheet as at June 30, 1920, and the revenue account for the year ended on that date, together with the reports of the directors and auditors thereon, be and are hereby received and adopted."

MR. DAVIDSON seconded the resolution and after the Chairman had replied to a few questions it was put to the meeting and carried unanimously.

On the motion of the CHAIRMAN, seconded by MR. HAROLD G. BROWN, the dividends recommended were approved.

SIR. ERNEST HARVEY, K.B.E., proposed the re-election of the retiring directors, Mr. G. P. Norton and Mr. Harold G. Brown, and the motion was seconded by Mr. T. Blundell Brown and unanimously agreed to.

#### Thanks to the Staff

MR. HAROLD G. BROWN, in proposing a vote of thanks to the general manager, the assistant general manager and the staff in British Columbia, said that the company had had a much more prosperous year than it had experienced for many years past, and he was sure that all his colleagues on the board would agree with him when he said that its success was due in a large measure to the zealous and untiring way in which Mr. Kidd, Mr. Murrin and the other principal members of the staff in British Columbia had stuck to their guns at a time when they received very little thanks and when there was very little visible result for their efforts. All through the war they experienced an extremely difficult time, and he felt that the stockholders could not thank them too heartily for all they had done during the last six years. (Hear, hear.)

MR. T. BLUNDELL BROWN seconded the motion, remarking that the difficulties of running a company of this magnitude were very great, but he believed that in the hands of the present management the future of the undertaking was very bright.

The vote was unanimously accorded.

The auditors were re-elected, on the motion of MR. NICHOLSON, seconded by MR. BINSTED, and a hearty vote of thanks to the Chairman and directors concluded the proceedings. 407

#### EQUITABLE SECURITIES, LTD.

Purchase of the entire real estate holdings of the Equitable Trust Company, Winnipeg, to the value of \$235,000 by the Equitable Securities, Ltd., has been announced. The Equitable Securities, Ltd., is a new corporation, and has been formed for the purpose of carrying on a general real estate business, and the holdings secured from the Equitable Trust comprise both city and farm properties. The incorporators of the new company are E. E. Hall, president of the Dominion Loan and Securities, Ltd.; Arthur Congdon, president of Congdon and Marsh; J. T. Haig, K.C., M.L.A.; W. P. Riley, president of Western Grocers, Ltd.; F. S. Harstone, of Harstone Coal Co., Ltd.; W. L. Parrish, of Parrish and Heinbecker; and Dr. J. N. Hutchinson.

The officers of the Equitable Securities, Ltd., are: E. E. Hall, president; Arthur Congdon and J. T. Haig, M.L.A., vice-presidents; O. S. Clefstad, secretary. G. F. (Bert) Parker, formerly in the land department of the United Grain Growers, is the manager of the new organization. The offices of the Equitable Securities are at 208 Sterling Bank Building, Winnipeg.

#### BRITISH MANUFACTURERS IN CANADA

The Canadian Association of British Manufacturers and Representatives, organized two years ago, with branches in Montreal and Toronto, in adopting a new constitution at the annual meeting, held in Montreal on January 21, agreed upon having one official head for the organization, instead of having one for the Quebec and one for the Ontario association, with which they began their work, the object of the change being to accentuate the spirit of co-operation between the two organizations, looking to further extension of their power and influence. G. A. Marshall, Capt. John Harris and W. E. Bunny, president, vice-president and secretary, respectively, of the Toronto association, were present.

In conformity with the plan of the new constitution, the choice of officers was confined to the election of a first and second vice-president and an executive council for the Montreal association, which resulted as follows: First vice-president, F. I. S. Spielman; second vice-president, John E. Ritchie. Executive council—Allan S. Bain, St. Clair Tilley, Harold Brooks, W. T. Evans, N. W. Smythe, D. W. Clarke.

# The Spirit of Enterprise Deserves Fostering

Business Conditions Changed Almost Overnight—Agitation for Pre-War Prices Killed Buying—Bank Credit and Spirit of Enterprise Must Go Hand in Hand in Re-Building Business

By B. E. HOWARD,

Manager, Imperial Bank, Walkerville, Ont.

"DON'T overstock; watch yourself, or you will get pinched when the decline sets in." Mr. Editor, you have heard that phrase yourself. Bankers, who are always cautious and but seldom original have been shouting the words these four years. The right eye of a banker is set into a fixed focus with watching perpetually for unpleasant contingencies which experience has taught us to expect sooner or later. When prices soared in response to the economic situation created by the war, the word was passed, "don't overstock." When prices continued to soar in spite of every prophesy after the war, and while the public continued to buy up every luxury in sight between intervals of demanding more wages, bankerly advice was about the only thing which could be counted upon not to advance over night.

Up until recently many a client had a comeback; here was one, "Good morning—now just a minute please, let me speak first to-day—I'm not overstocked. If you want to be really useful tell me where I can get a little stock—enough to meet trade demands this month, or this week, or this day." The year 1920 seemed full of business, literally brimming with trade and prospects when . . . a stop came. The armistice itself was not more sudden. Trade orders were cancelled almost over night. Why? If there be an overstock of goods on the shelves of Canada, bankers have been wasting great efforts of breath for four long years. If the shelves be not glutted, who called, halt?

## Banks Can't Do Everything

One answer to the question will certainly be, "the banks." Time of trades depression are open season for attacks on banks, but probably there is less criticism of this kind now than in days gone by. Old Father Economy is generally recognized as an irresistible force behind the banks, and behind us all. When things get out of hand he is bound to let us know that settlement day is approaching. Things were out of hand—everybody knew it. While production was not even up to standard, consumption was extravagant—even wasteful, with both wages and profits claiming higher rewards. Could any banking system dodge that situation? Of course not, readjustment was inevitable.

Father Economy was out of patience with us. He had been hinting at readjustment for some time and we would not listen. Exports of our goods were steadily declining all year, while we were steadily increasing our demands for the goods of foreign lands. Sometimes on the farm there is a hen which eats her eggs. Any farmer knows what to do with a hen like that. She is not worth her corn, and her status is forthwith readjusted with an axe. Hints did not affect our optimistic extravagance, but at last the call came very loud and clear. And then the ranks of the consumer heard, and hearing came to a full stop.

Now the long-heralded movement towards deflation has set in, and with it public confidence has switched over and become centred in the rise of the lowly dollar. I think the tendency now is to boom the dollar. We Canadians grow too enthusiastic over trying to make a profit quickly. Whatever it may be—real estate, oil wells, money, or anything else that is rising in value through economic pressure, we are inclined to seize upon and boom along the heights beyond natural boundaries. Usually the band plays while the boom marches on, but we cannot hold the position very long, and the tune turns out to be the one the old cow died on. We may try to reform a metaphorical hen by having her eat

nothing, forgetting that if she eats nothing she also produces nothing. The hen, too, must obey natural laws. We may postpone dinner for, say, an hour, washing perhaps one day, clothing while the seasons permit, and building until the roof leaks. We are in limited time compelled to come to market.

## Public Mind is Upset

I questioned a manufacturer upon how his business was turning and when he expected to open his large factory. This was the answer, "I don't know any more than you do. The agitation for return of pre-war prices has killed business by upsetting the public mind. My trade is not stocked up—hand-to-mouth orders come in. But we do not look for much business, and we cannot start our factory until the air is clear of false price theories and agitations."

This charge should be gravely considered. We have seen many comparisons between present-day and pre-war prices, and heard a great deal too much about pre-war standards of exchange coming back. It is all beside the mark. No matter what prices were before the war, business men recall that in 1914 a trade depression had started which looked serious. Prices were falling and men were out of work. Only a Spirit of Enterprise awakened by the demands of war saved the situation.

The Spirit of Enterprise is a great National asset. It is as necessary to industrial prosperity as is the credit supplied by banks. It is the will which applies power to factory wheels. It is the spark which ignites human effort and so keeps progress rolling. Strong though it be in our civilization, this element is not able to stand against market upheavals. A boom to drive up the value of money will shut down factories. Then when everything has ceased, earnings and production alike, we have a case of stagnation, or, bad times. I am not trying to prove that we should, or could avoid readjustment in the trade relationship between goods and the dollar. But it would seem that there is no necessity for a general dislocation of trade such as a money boom would threaten. The readjustment, left to the sole direction of Father Economy, will be a true level, with the balance between purchasing power and goods accurately adjusted. Once set in the new position, trade should go on better than ever, and confidence would return soon. At least, this would be the position so far as I am able to make it out.

And if moralizing be permitted in *The Monetary Times* I would say, "Be hopeful and cheery, and let natural law take its course unhampered by speculation and legislation."

## CANADA LANDED AND NATIONAL INVESTMENT CO.

A profitable year was experienced by the Canada Landed and National Investment Company, Ltd., in 1920, net profits amounting to \$194,874, as compared with \$151,683 for 1919. After making provision for interest on debentures and other expenses, the dividend of 10 per cent. was paid, as compared with 9 per cent. previously, and a balance of \$50,596 was carried forward.

Loans on mortgages amounted to only \$4,374,089, as compared with \$4,657,839 in 1919, but the company's holdings of securities increased from \$1,586,521 to \$1,768,876. Under liabilities to the public, sterling and currency debentures were reduced from \$3,931,754 to \$3,578,894. The reserve fund is now \$1,355,000, or \$150,000 in excess of the paid-up capital.

# The Toronto Mortgage Company

The Annual General Meeting of the Shareholders of the Toronto Mortgage Company was held at its offices, 13 Toronto Street, at 12 o'clock noon, Wednesday, February 9th. On the motion of T. H. Wood, seconded by T. Gilmour, the President, Mr. Francis, took the chair, and the Manager acted as Secretary. The Secretary read the notice calling the meeting, after which he read the minutes of the last Annual Meeting, which were confirmed. The Secretary then read the Financial Statement, the Profit and Loss Account for 1920, and the Annual Report. The Financial Statement and the Profit and Loss Account follow:—

HERBT. LANGLOIS, *Vice-President*.

We have audited the Books and Accounts of the Toronto Mortgage Company for the year ending 31st December, 1920, and have verified the cash, bank balances and Securities of the Company. After due consideration we have formed an independent opinion as to the position of the Company. In our opinion, so formed, and according to the best of our information and the explanations given to us, we certify that, with the reservations provided, the above statements set forth fairly and truly the state of the affairs of the Company and are in accordance with its books. All transactions of the Company that have come within our notice have been within the powers of the Company.

TORONTO, 11th January, 1921.

E. R. C. CLARKSON, F.C.A., } *Auditors.*  
J. HARDY, F.C.A., }

### REPORT OF SCRUTINEERS.

TORONTO, 9th February, 1921.

We hereby certify that the following gentlemen have been unanimously elected Directors of the Toronto Mortgage Company at the Twenty-second Annual Meeting, held at the offices of the said Company this day, at 12 o'clock noon:— Wellington Francis, K.C., Thos. Gilmour, C. S. Gzowski, Hon. Geo. S. Henry, Herbert Langlois, Thos. H. Wood, Walter Gillespie.

(Signed) EDWARD R. GREIG, } *Scrutineers.*  
(Signed) WM. MARTIN, }

At a subsequent meeting held by the Board, Mr. Wellington Francis, K.C., was re-elected President, and Mr. Herbert Langlois, Vice-President.

## EXPRESS COMPANIES' SUBSTANTIAL INCREASE

Board of Railway Commissioners Recognizes Necessity of Fair Return Upon Capital—Some Reduction in Expenses Anticipated

**I**n a lengthy judgment, the Board of Railway Commissioners grants to Canadian express companies an increase of 35 per cent. on first-class rates, 25 per cent. on second-class and 20 per cent. on commodity rates, including, principally, cream, fish and fruit. The judgment, which is concurred in by all the commissioners who sat in the case, was written by Chief Commissioner Frank B. Carvell, and was made public on February 2. In addition to the increases mentioned above, it provides that the rate on all spirituous liquors in the future is to be increased to first class. The cartage differential at non-cartage points has been eliminated, and as a result express charges will be the same to all points whether city, town or country.

### Entitled to 7 Per Cent.

Taking into consideration future profits from investments and money order business, which the judgment decides shall be accounted for as revenue, the increases it is stated, are expected to produce "only sufficient revenue to take care of operation and depreciation and provide a sufficient sum with which to pay interest on investments at 7 per cent." Mr. Carvell takes the ground that the express companies have proved that they are entitled to an increase. He states that the figures filed by the applicants show that the Dominion Express Co. claims its deficit for the past year will be \$1,609,444. He prefers to accept the figures presented by this company in preference to those submitted by G. R. Geary, K.C., counsel for the city of Toronto, and compiled by Messrs. Clarkson, Gordon and Dilworth, accountants, on the ground that "the company which is doing the business and paying the bills must have a much more intimate knowledge of actual conditions than any accountant could have."

"The express companies asked for a 40 per cent. increase," says the judgment, "and I have given their best estimate of the results, should this request be granted. They have stated that if the cartage differential were eliminated, they could produce practically the same results on an increase of 33½ per cent. I have decided that this differential should be eliminated. I am also of the opinion that there will be some reduction in the cost of carrying on the express business during the coming year, especially in the maintenance and feed of horses, maintenance of equipment and purchase of supplies, and, while it will not be very great, yet, with the allowance that should be made for the revenue from the money order business, I am of the opinion that an increase of 30 per cent. would produce them about the amount of money which they should receive—viz., sufficient to pay the costs of operation, maintenance and depreciation, and leave sufficient to pay interest upon the actual investment and possibly a small amount of money for reserve. These figures relate more particularly to the Dominion Express Co. and to the Canadian Express Co., as the whole case seemed to be based upon their requirements."

The chief commissioner goes on to say that the result of one day's shipments by the Dominion Express Co. showed that, by weight, the goods moving on first-class rates amounted to 61.36 per cent. of the whole, those moving on second-class rates to 32.68 per cent., and those moving on commodity rates to 5.96 per cent.

It is set out that the increases authorized in the judgment may be provided for by the publication and filing on one day's notice at all express offices of blanket supplements to the existing tariffs.

In opening the chief commissioner refers to the date of the application by the Express Association of Canada for a flat increase of 40 per cent. in all existing express rates. This application, he says, was made on July 22 last on behalf of the American Railway Express Co., the Canadian Express Co., the British-American Express Co., the Central Canada Express Co., and the Dominion Express Co. It was

alleged that the companies were operating at a loss, and that this increase would be required in order to take care of the actual deficit and give a small return sufficient to pay interest on the actual moneys invested and leave something for reserve. The case was opened in Toronto, sittings subsequently being held at many points all over the Dominion. When the board sat at Saskatoon, a supplementary statement was filed by the Dominion Express Co., in which it showed increases in operating expenses, and estimated that the total deficit for 1920 would be \$1,821,026.

The chief commissioner says that at the final hearing in Ottawa practically every phase of the express situation in Canada was discussed. The city of Toronto, the National Dairy Council, the Boards of Trade of Toronto and of Montreal and the Canadian Manufacturers' Association were all represented. Mr. D'Arcy Scott, appearing for the National Dairy Council, it is stated, directed his case entirely against increases in commodity rates. Mr. Geary, representative of the city of Toronto, dealt very exhaustively with the financial aspects of the Dominion Express Co., whose books had been audited by the firm of Clarkson, Gordon and Dilworth. "It was admitted," says the judgment, "that the books were intelligently and honestly kept, the only difference of opinion, as I construed the evidence, being as to what the results would be to some extent for the year 1920, and to a much greater extent for the year 1921."

### Effect of Freight Increases

Mr. Carvell draws attention to the fact that freight rate increases granted in September, 1920, greatly increased the amount which the Dominion Express Company had to pay the C.P.R. for carrying goods. The Dominion Express Co. pays the C.P.R. on the basis of one and one-half times the first-class freight rate for its goods of that class carried by the railway company. In the case of the Canadian Express Co. the increase in freight rates played no material part, because this company pays to the Grand Trunk Railway Co. and other lines over which it operates, 50 per cent. of its gross earnings.

"It is important," he says, "that the express rates should be considerably higher than the freight rates; in fact, sufficiently high to force the transportation of ordinary freight upon freight trains rather than upon passenger trains. It is quite evident to any person who travels, that passenger trains are being constantly delayed, both as to making running time and at junction points and at all stations, by the handling of express business. A large amount of heavy commodities is carried by express, which might be just as well carried by freight, and thus relieve the passenger trains of much unnecessary traffic."

Assistant Chief Commissioner S. J. McLean and Commissioner A. C. Boyce, while in agreement with the conclusions and rate adjustments provided for in the main judgment, issued a supplementary statement, commenting on certain features of the judgment.

## DEBENTURES FOR SALE

### DRUMHELLER MUNICIPAL HOSPITAL BOARD No. 3

Sealed tenders will be received up to and including March 26th next by the Drumheller Municipal Board Number 3 for the purchase of Twenty-eight thousand dollars (\$28,000) twenty-year seven per cent. Hospital Debentures. Repayable in equal annual instalments of Principal and Interest in total.

The highest or any tender not necessarily accepted.

For further information write

S. P. WILLIAMS,

Secretary-Treasurer,

Drumheller.

Expert Accountant, thorough knowledge of railway and construction materials, well informed in financial matters, seeks engagement. Box 381, *Monetary Times*, Toronto.

**WANTED.**—By Established Brokers—Toronto General Agency for British fire company. Can guarantee good premium income first year. Box 393, *Monetary Times*, Toronto.

**SECRETARY-TREASURER**, age 30, of large company in British Columbia desires connection in similar capacity with well-established business in Ontario, Hamilton preferred. First-class accountant, with excellent credentials; the more responsibility to be assumed, the better. Prepared to go east immediately for interview for any legitimate proposition. Apply by wire or letter to H. Anscomb, 1921 Government Street, Victoria, B.C. 405

## CAPITAL TRUST COMPANY'S BUSINESS DOUBLED

Estates and agencies under administration by the Capital Trust Co., Ottawa, more than doubled in 1920, the figure now being \$2,719,350. The guaranteed investment account also increased from \$605,302 to \$779,351. Net profits for the year increased slightly at \$27,256, and the usual dividend and provisions were made.

The paid-up capital of the company has now passed the half-million mark, and is now \$546,000. Total assets are \$4,109,581, as against \$2,286,122 at the end of 1919. A branch office of the company was opened in Toronto during the year to meet the growing business in western Ontario.

## NORTHERN TRUSTS CO.

Starting with but a very small business in 1904, the Northern Trusts Co., Winnipeg, Man., has established itself as one of the leading trust companies of the Dominion, with its operations largely in the west. The annual statement for 1920 shows a substantial increase in business over a period of one year. Estates, trusts, etc., are shown as \$15,979,708, compared with \$11,072,120 at the end of 1919. Guaranteed accounts are slightly lower at \$1,327,755. Net profits for the year were \$136,447, compared with \$137,265. The usual dividend of 8 per cent. was paid.

The paid-up capital is unchanged at \$1,500,000, but the reserve and surplus has been increased from \$440,918 to \$452,040. Total assets are now \$19,510,250, which compares with \$14,603,458 in 1919, and \$8,295,703 at the end of 1918.

## CANADIAN MORTGAGE INVESTMENT COMPANY

Net income of \$105,524 for the year ending December 31, 1920, is shown by the Canadian Mortgage Investment Company in the annual report submitted to the shareholders at the annual meeting last week. This is an increase of nearly \$8,000 over the net earnings of the company in the previous year. With the sum of \$42,084 brought forward from last year, the amount available for distribution was \$147,608. Out of this the usual dividends at the rate of 6 per cent. per annum were paid, amounting to \$74,375. Dominion of Canada war taxes were \$1,245, while the sum of \$8,224 was reserved under the Income War Tax Act for 1920 taxes. Fifty thousand dollars were transferred to the reserve fund, leaving a balance carried forward of \$13,764, as against \$42,084 in 1919. The reserve fund is now \$500,000.

Total assets at the close of the year were \$2,382,504, as compared with \$2,386,927 a year ago. Loans on first mortgage, less repayments thereon, stand at \$1,421,733, as against \$1,413,457 in 1919.

## WESTERN CANADA INVESTMENT CO., LTD.

The thirteenth annual general meeting of the Western Canada Investment Co., Ltd., was held in London, Eng., on December 21. J. B. Colmer, the chairman, said: "The total revenue for the year was £19,094, as against £16,894 in the preceding year, an increase of £2,200. As stated in the report, the interest collected showed an increase of £1,186, which is due partly to increased investments and to certain loans, on which, during part of the war, no interest had been charged or collected, having now been placed in good standing. The balance of the increased revenue is due to the low rate of exchange prevailing between England and Canada. The interest in arrear is less this year by £1,142, and our local advisers in Winnipeg report that we may look upon most of the arrears as good."

"After paying management expenses, debenture interest, etc., the net revenue is £7,748, as against £6,170. To this has to be added the amount carried forward of £3,552, making a net available balance of £11,300. After deducting the preference dividend there is a surplus of £7,800. It is proposed to recommend the payment of a dividend on the ordinary shares of 5 per cent., amounting to £2,500, and to carry forward to next year £5,300."

"The directors are of the opinion that the position of the company is satisfactory, considering the times through which we have passed and are still passing. The company has to pay a higher rate for its debenture money, while the rates on loans in Canada have not materially increased."

"In addition, income tax in the United Kingdom is still very high, and the general expenses, like those of other companies, have advanced. The same remark applies to Canada, where taxes have now to be paid which were not charged at all before the war. According to the reports which reach the directors Canada is recovering from the effects of the war more rapidly than many other countries. Local trade appears on the whole to be fairly good, although, as elsewhere, they have difficulties to overcome."

## CANADIAN PACIFIC'S NEW YORK OFFICES

Canadian Pacific Railway Co. has signed a 21-year lease, covering the first two floors and basement of the new 21-story building nearing completion at the corner of Madison Avenue and Forty-fourth St., New York. The deal calls for an aggregate rental of close to \$3,000,000. The building will be known as the Canadian Pacific Building.

The company has been maintaining five different offices in the city, and it is planned to centralize its activities, housing them under one roof. The new move will bring together the passenger departments of both rail and shipping interests, lands, colonization, and development work. The freight department will continue to maintain an office at the Woolworth building. Company intends to make the new building a transportation centre, and negotiations are now under way with other transportation interests to have them located in the same building. Officials believe that competition in coming years will be keen in the transportation field, and the company is making plans to secure its share of immigration traffic on its steamship lines. New York City is regarded as a strategic point.

## SOVEREIGN LIFE ASSURANCE COMPANY

While the history of the Sovereign Life Assurance Company, Winnipeg, is comparatively short, the company is able to present a favorable record of progress. The following figures show the development over the past few years:—

	1920.	1919.	1913.	1910.
Total assets.	\$ 1,876,792	\$ 1,656,878	\$ 1,050,050	\$ 781,000
Business in force . . .	14,528,336	12,305,211	4,900,000	2,901,502
Premium income . . .	466,452	385,504	156,344	113,186

After making provision for all liabilities, including a net increase in policy reserves of \$219,666 and payment to shareholders and policyholders of dividends amounting to upwards of \$20,000, the surplus at the end of December, 1920, stood at \$109,816, as against \$106,491 for the previous year. Payments to policyholders, death claims, maturities, surrenders, etc., amounted to \$123,861, which compares with \$204,386 for 1919. Total receipts for the year were \$531,863, while the previous amount reported was \$477,155. The increase in assets is largely the result of increased investment in bonds and securities and loans on policies. First mortgages on real estate show a decrease of nearly \$7,000 at \$456,871.

## COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt Station for the week ended February 4th:—

Dominion Reduction Co., 171,000 pounds. The total since January 1 is 836,028 pounds, or 418.01 tons.

## ACTION ON LOAN BY COMPANY TO SHAREHOLDERS

## Supreme Court of Canada Holds Cheque Endorsed for Purchase of Goods is Not a Loan to Shareholder

IN the case of *Henderson vs. Strang*, recently reported in the "Dominion Law Reports," a question of a loan to a shareholder by the company arose, and on the facts it was held that when, by a by-law of a company, a cheque in payment of a majority of its stock, was authorized to be endorsed over to a subscribing shareholder's firm to finance certain purchases of the company, this transaction cannot be regarded as a loan to a shareholder.

The statement of the facts and the decision of the Supreme Court of Canada, per Justice Mignault, are: "The two main questions here are the following: (1) Did the respondent Strang pay for the 510 shares which he agreed to take in J. B. Henderson and Co., Ltd.? (2) Was the agreement signed on August 24, 1910, between J. B. Henderson and Co., Ltd. and William Strang and Son, *ultra vires* of the company?"

## Formed Joint Stock Company

"The facts of the case are not at all complicated. It appears that for some years James Black Henderson, of Toronto, was the Canadian purchasing and selling agent of the Scotch firm of William Strang and Son, of Glasgow, Scotland, composed of William Strang and four of his brothers. In the summer of 1909, Henderson was in rather poor health, and Strang being in Toronto, it was decided to form a joint stock company to take over Henderson's business, under the name of J. B. Henderson and Co., Ltd. Strang desired to have a controlling interest in this company, which was natural, as it was to handle his firm's goods, and upon its formation, with a capital of \$100,000, he subscribed for 510 shares, representing \$51,000 at par. Henderson, on the other hand, sold to the new company his stock-in-trade and good will for \$23,500, taking in payment 235 fully-paid shares. (Four other persons subscribed \$6,200).

"All parties fully recognized that the authorized capital of the company was more than it required to carry on its business, and as its purchases of goods were almost entirely to be made in Europe, and principally from the firm of William Strang and Son, it was also evident and fully admitted by the interested parties that adequate financial arrangements would have to be made in Europe in order to buy goods there on the most advantageous terms.

## Preference and Common

"Several schemes were devised and discussed, and finally it was agreed that the stock subscribed by all save Strang would be issued as preference stock, entitled to a 6% dividend, and that Strang's stock would be issued as common stock. And as to Strang's stock, inasmuch as he was advised that it would have to be paid, he agreed to send over to the company his cheque for \$51,000, or its equivalent in sterling, it being understood that the company would endorse the cheque and remit it to William Strang and Son as a special deposit free from interest, where it would serve to finance purchases made by the company on the European market, the company paying interest at 6% on all sums withdrawn by it, or advanced by William Strang and Sons on account of purchases made by the company. Strang was not to be entitled to interest on his \$51,000, and no dividend was to be payable on his common stock until the 6% on the preference stock had been paid, and then the latter stock would rank equally with the common stock on any dividend that might be declared.

"This arrangement was duly carried out and authorized by a by-law of the company and by a contract made by it with William Strang and Son. The question was whether what was done is equivalent to a payment by Strang of the stock subscribed by him.

"Had Strang's cheque been cashed by the company, and had the latter immediately remitted the sum of \$51,000 to William Strang and Son as a special deposit in accordance with the arrangement made, it could not have been contended that Strang had not paid for his stock, whatever opinion might be entertained with regard to the deposit of this sum with William Strang and Son. But by cashing Strang's cheque and remitting the proceeds to William Strang and Son, the company would have incurred expense for exchange and brokerage, and this expense it avoided and absolutely the same result was attained by indorsing over Strang's cheque to William Strang and Son. There is no question whatever as to the absolute good faith of all the parties, and this being so, I cannot but think that Strang paid for his stock as effectually as he would have done had this cheque been cashed by the company and the proceeds remitted to William Strang and Son. And, in my opinion, this conclusion is fully supported by the decision of the Judicial Committee in *Laroque v. Beauchemin*, [1897] A.C. 358.

"I am therefore of opinion that Strang paid for his shares.

"The question whether the arrangement arrived at was *ultra vires* of the company should, in my judgment, be answered in the negative. I cannot look upon the deposit of Strang's cheque with William Strang and Son as being a loan to a shareholder. It was what it purported to be, a mere deposit for the benefit of the company, in order to secure the most advantageous terms for its purchases on the European market. And moreover, the firm of William Strang and Son was, by the law of Scotland, duly proved in this case, a legal entity entirely distinct from Strang personally."

## PAYMENT FOR PROPERTY ENFORCED

David Moscovitch and Louis Moscovitch, trading as Moscovitch Brothers, manufacturers, were, on January 19, condemned by a judgment of the Quebec-Superior Court to pay to Delima Forget, wife of Daniel Riopel, contractor, \$20,250, being the balance of the price, and interest, of a property defendants agreed to purchase from Joseph Pierre Gingras on June 2, 1914.

According to the agreement, defendants undertook to buy the property for a sum of \$16,000, payable \$1,000 annually for five years and the balance of \$11,000 on December 1, 1919, with interest on the outstanding amount at the rate of 7 per cent. per annum. On July 17, 1914, the credit under this agreement was transferred by deed to the plaintiff. It was alleged that defendants were now indebted in the capital sum of \$15,000, and this was the amount sued for in the present action, plus \$5,250 accrued interest. Defendants pleaded that the transfer of the credit to plaintiff was not made in good faith, and further urged that Gingras had consented to a further delay of the claim to the balance of the purchase price of the property.

Judge Archer said defendants had failed to appear and reply to the questions submitted in the "facts and articles" of the pleadings, and as the record showed they had agreed to pay the price of this property, it must be held that the latter had failed to substantiate the allegations of their defence.

The irrigated tract of the Canada Land and Irrigation Company, which lies on both sides of Suffield-Blackie branch of the C.P.R., in southern Alberta, is rapidly coming to the fore and will soon be recognized as one of the famous agricultural districts of the west. Water was delivered to this tract during the last part of May, 1920, and was immediately put into use to irrigate some 4,000 acres which had been seeded during the spring. In spite of the fact that on newly-broken land the first irrigation is a difficult matter, a very good crop was harvested and all the farmers concerned were pleased with the results.

# News of Industrial Development in Canada

**Growth of Pulp and Paper Trade since its Infancy has been Phenomenal—Development Briefly Outlined Before Engineering Institute—Iron and Steel Output Increased Largely in 1920 — Dominion Steel Receives Small Orders—Twenty-seven New Industries Secured by Hamilton Last Year**

**T**RACING the development of the pulp and paper industry in Canada, a subject of very wide interest at the present time, T. L. Crossley, in a paper delivered before the Engineering Institute of Canada, which was in convention in Toronto last week, pointed out that paper was first made in Canada at St. Andrew's, Quebec, in 1803, but so vast had the industry now become that in the year ending March 30, 1920, this country's pulp and paper exports were valued at \$104,000,000, while the exports to the United States "made exchange" at the rate of over \$340,000 every working day in the year. The most marked progress was made in the period since 1890, as in that year the Dominion's exports of pulp and paper were valued at only \$120. Mr. Crossley remarked that the development and maintenance of this industry called for the display of great engineering ability offering a field for the structural, hydraulic, electrical, mechanical, chemical and forestry engineers. The average per capita consumption of paper per year was about 125 lb. in the United States and 100 lb. in Canada and the United Kingdom.

## Iron and Steel

Production of iron and steel in Canada for 1920, as indicated by reports of two of our largest companies, was very favorable, while shipments were also ahead of 1919. The review by months, however, shows the falling off which took place in the latter months. The Nova Scotia Steel and Coal Co. produced 374,091 tons of iron and steel during the twelve months, compared with 197,455 tons in 1919. Shipments amounted to 94,222 tons, as against 44,786 tons for the previous year. Production of pig iron amounted to 73,829 tons, being an increase of the year of more than 38,000 tons. The output of Wabana iron ore was 262,755 tons, as compared with 213,410 tons previously.

The output of the Algoma Steel Corporation, Ltd., for the six months ended December 31, 1920, with comparisons, follows:—

	1920.	1919.
	Tons.	Tons.
Magpie ore .....	83,387	120,273
Coke .....	269,385	181,507
Pig iron .....	233,332	125,662
Steel ingots .....	190,052	141,337

The decrease in the Magpie ore production was due to the plant being shut down for a time for development work on the sixth level. Unfilled orders for iron and steel on December 31, 1920, were approximately 69,500 tons. Two contracts have been closed for rails for delivery during the first half of 1921, and the directors expect further sales to be completed shortly. Orders have been received by the Dominion Steel Corporation, according to a dispatch from Sydney, N.S., which will keep the company's plant partly operating for a short while longer, and in the meantime it is hoped that further orders will be received which will prevent a complete shutdown.

The city of Hull, Que., through the efforts of its civic publicity commission, has succeeded in the establishment of another large industry which will furnish employment for upwards of two hundred residents there. The secretary of the publicity commission, E. St. Jean, has announced that plans had been submitted to the commission for the erection of a branch of the Alloy Steel Forging and Milling Co., Ltd., of Montreal, Boston and New York, which will erect a half million dollar foundry and rolling mill, on the property adjacent to the Canada Cement Works. Construction work on the new plant, which will occupy 37 acres and will use 2,000 h.p., will be commenced in March next. In addition to

a foundry the company will erect forging and rolling mills, which will be used largely in connection with the manufacture of automobile parts.

## Hamilton's Growth in 1920

Industrial Commissioner Kirkpatrick has submitted a report to the Hamilton, Ont., Board of Control of the activities of his department last year. He stated that 27 new industries were secured, representing a capitalization of \$7,500,000. In commenting on these he drew attention to the fact that they were diversified, a number of new kinds of industries being established. A number are branches of American industries, and some will carry on their business for the entire British empire from the local plants. There is one British firm among the lot. In addition to the new industries several plants that recently located here made large additions to their works. Mr. Kirkpatrick reported that he had several promising prospects. One difficulty he had met was in securing suitable accommodation for industries requiring large sites, and he recommended the acquisition of the Stipe property and its development for industrial purposes. Another difficulty he encountered during the year was lack of power, and this is still a problem, he states. No bonuses or like inducements were offered to industries which located here.

## Other Lines of Industry

Conditions arising from unemployment are gradually righting themselves in Owen Sound, Ont. The Owen Sound Chair and the North American Furniture factories are operating after being closed down. The North American Bent Chair Co. has taken on 60 hands, after being closed down for some time. The situation is much less acute than a week ago, and prospects are bright for resumption of normal in the near future.

The new \$100,000 plant of the Milton Worsted Yarn Mills for the manufacture of worsted yarn commenced operations last week at Milton, Ont. Orders have been secured which will provide steady employment for a large number of hands. In addition to the manufacture of worsted yarn, a modern dye house has been built and equipped with the latest and most up-to-date machinery for the dyeing of yarn and cloth. There are now ten of these industries operating in Canada.

The Port Arthur Shipbuilding Co., Port Arthur, Ont., announces that its plant will operate on a forty-hours-a-week basis. The reduction in hours means the loss of one full day per week to the employees.

Conditions in the flour milling industry are good, according to the reports of officials. J. W. Horn, manager of the Western Canada Flour Mills, states that of the company's 90 elevators, 80 or more are in operation, while all milling facilities are being operated full time. Officials of the Ogilvie Flour Mills state that the mills are operating fully. Good business is reported by the Lake of the Woods Milling Co.

A mill has been operating for several months past in Upper Aboujagane, N.B., a few miles from Shediac, under the management of A. M. Hudson, and is at present processing flax grown in this country. Mr. Hudson is trying to interest farmers of New Brunswick sufficiently to induce them to grow flax, while at the same time he intends to sow a large number of acres himself this year in connection with the new industry.

Tentative arrangements have been made by the Canadian Fibre Co. for the purchase of 750 bushels of hemp seed to plant 1,000 acres of Manitoba land this year, according to Col. Wm. Grassie, managing director of the company.

## CAXTON INSURANCE CO. OBTAINS LICENSE

License has been issued by the Dominion government to the Caxton Insurance Co. of London, Eng., authorizing the company to transact in Canada the business of fire insurance. The head office of the company is to be situated in the city of Toronto, and A. H. C. Carson has been appointed chief agent. To provide the necessary deposit the company has deposited with the Bank of Montreal, London, Eng., £17,000, British National war bonds, the accepted value of which is \$77,706. This company was incorporated in the year 1907 under the Companies Acts, 1862 to 1900.

The Security Mutual Casualty Co. has ceased to transact business in Manitoba.

The Sun Life announce the following appointments in connection with their agency department: D. L. Macaulay, inspector of foreign agencies; C. B. Buckley, general secretary of agencies; C. A. Nourse, secretary of foreign agencies; J. S. Ireland, supervisor of conservation and secretary of Macaulay Club.

W. A. Hines, branch manager, Canada Life Assurance Co., Brantford, has moved to Toronto and has become inspector for Ontario for the Travellers' Life Assurance Co. of Canada. Geo. Nixon, Canada Life, was elected to the presidency of the Hamilton Life Underwriters' Association at their annual meeting, held January 19th.

A. G. Roberts, formerly superintendent of the Metropolitan Life at Peterboro, Ont., has become head of the company's conservation department at Toronto.

L. Swartz has become district manager of the Ontario Equitable Life and Accident Insurance Co. at Hamilton; he was formerly district manager for the Mutual Life at Brockville.

R. G. Grieve, formerly of McClory, formerly of Grieve, provincial managers at Edmonton for the Continental Life, has moved to Victoria, B.C., and will represent the Continental Life, with his headquarters at Vancouver.

Walter H. Armitage has been appointed city manager for the Continental Life at Toronto. F. C. Alward and Geo. Burdett have opened a special agency of the Continental Life.

E. S. Miller, past-president of the L.U.A.C. and provincial manager for Saskatchewan for the Imperial Life Assurance Co., has moved to Ottawa as branch manager. A. S. Wickware has retired from the position of branch manager, Imperial Life, Ottawa, but will still keep his connection with the company and represent them in that district.

T. A. Marsten, late of the Calgary branch of the Imperial Life, has become branch manager for Southern Saskatchewan for the Imperial with headquarters at Regina.

W. C. Gordon, Imperial Life, Moose Jaw, has become branch manager for the northern section of Saskatchewan, and will open offices at Saskatoon.

D. W. Mason, Metropolitan Life, Brantford, and secretary of Brantford Life Underwriters' Association, has moved to Hamilton, and will become superintendent at that city.

A. G. Bradley, who has been superintendent of the Metropolitan Life at Hamilton, and president of the Hamilton Life Underwriters' Association, has been moved to head office in New York, becoming a supervisor in the Canada, of which Harry H. Kay is superintendent.

The North American Life Assurance Co. announces the following field changes:—

R. D. Bell, for the past six years city manager at Winnipeg, has been appointed to the position of district manager of that branch. A. R. Piper of the Moose Jaw agency has been appointed district manager of the Regina office to fill a vacancy there. Following the resignation of W. S. Newman, of Moose Jaw, E. H. Rowse of that agency has been appointed Mr. Newman's successor as district manager. A new district office has been opened at Owen Sound, Ont., and S. J. N. Glazier, formerly an inspector working under head office, has received the appointment of district manager. The new position of city manager at St. John, N.B., which has been vacant for some time, has been filled in the person of W. K. Tibert.

## Fifty-one Years of Steady Progress

One of the most brief yet impressive histories of Canadian financial institutions is contained in the annual record of The Mutual Life of Canada. The current issue will be ready in a few days. A copy will be sent to you on application. It contains fifty-one successive summaries, showing in the parallel columns the increase from year to year of the company's various receipts, expenditures, etc. No other document could better convey the idea of solid, uniform achievement, and the momentum of the advance is now greater than ever. The prospects are bright for a still more rapid expansion within the next few years. The assets of the company exceed \$40,000,000, and the assurances in force have reached \$206,000,000. There is a gross surplus of more than five million dollars over and above the amount necessary to guarantee all policies, so that the position of the company, in spite of the strain of recent years, is one of uncommon strength.

# News of Municipal Finance

**Edmonton Proposes to Broaden its Basis of Taxation by Rental Assessment—Oak Bay Presents Good Financial Statement—Manitoba Borrowings for Municipal Housing Plans will Approximate Three and a Half Millions**

**St. Thomas, Ont.**—The city council has struck a tax rate of 34 mills for 1921, which is the same as for 1920. The assessment is about \$1,500,000 higher this year.

**Regina, Sask.**—The total amount registered by the city against borrowers from the cyclone loan fund was \$337,082 at December 31, 1920, according to a report prepared by the city commissioners and city treasurer. Of this amount, \$109,991 represents outstanding principal not yet due under the extension agreements, the balance of \$227,091 being arrearages of principal and interest and borrowers' charges.

**Winnipeg, Man.**—The Winnipeg Electric Railway Company contributed to the city \$1,547,024 between January 1, 1892, and December 31, 1920, under the terms of a by-law by virtue of which the railway operates. The company pays the city 5 per cent. of its gross earnings and \$20 a car a year for every car in operation. Car tax receipts aggregated \$92,100 and percentage earnings \$1,454,924 since 1892.

**Manitoba.**—Transcona, East Kildonan and St. Vital have asked loans of \$100,000 each from the provincial government for housing purposes. These appropriations will be decided on at the coming session of the legislature. The sum of \$2,580,000 has been advanced by the province for municipal housing purposes, and the government has offered Winnipeg \$500,000 of 1937 Victory bonds at par to finance its 1921 housing program in return for city of Winnipeg debentures. If all appropriations are provided as asked, the total loaned will be \$3,458,000.

**Canora, Sask.**—Canora School District has paid in full the debenture coupons which were in arrears for 1919 and 1920. The money became available when the town of Canora paid to the school district at the order of the Local Government Board the sum of \$19,116, being its share of \$50,000 held by the town as the proceeds of a certain compromise arising out of the arrears of taxes with respect to Graham interests in that vicinity. It is reported that the Union Bank, which held a note against the school district for the sum of \$12,500, has been paid on such note the sum of \$11,616, leaving a balance of \$884.

**Edmonton, Alta.**—Seeking a broader basis of taxation, the city council is considering the inauguration of a rental assessment. Mayor Duggan states that he will recommend to the charter amendments committee the passage of a rental tax, but is not inclined to favor exemptions for those paying other taxes. The proposal at present is to impose a rental tax on citizens who pay no taxes to the city in any other way. It is felt that with an additional per capita tax it will be a more equitable way of taking care of the city's burden. If this course is adopted, states the mayor, the city will secure from a large section of the community now exempt, a just and proper contribution towards education and the city's maintenance and upkeep for such public services as street lighting, fire and police protection.

These services are now at the disposal of all classes of the citizens without discrimination, and it is felt that the burden of carrying them should be more evenly distributed. Although the proposed rental tax is in but a tentative stage until it is thrashed out before the charter amendments committee, the plan is to impose it on a rate of 10 per cent. on the rental premises of all persons living there. At the same time, it is proposed that persons paying other taxes would be entitled to a set-off, much in the same way as the income tax is set against payments on land taxes.

**Haileybury, Ont.**—Owing to the delinquency of taxpayers the municipality was unable to meet certain interest payments on debentures last fall. The situation is partially

explained by the fact that large properties in the town are held by non-resident owners. In the past these have been prompt in meeting their tax payments. Last fall, however, the general business depression had the effect of delaying payments. Many workmen who had been employed in the mines of Cobalt had been forced into idleness through the scarcity of power in that district, and the closing down of mining operations in consequence. Tax payments were being made by this section of the population with the utmost difficulty.

Bondholders are assured that the stringency is only temporary. The work of collecting taxes is being speeded up, and as soon as the money is available it is applied in paying off the arrears, which now amount to about \$8,000. The total debenture debt of Haileybury stands at \$233,690, and the interest on these amounts to about \$32,000. During the year three debentures have been retired, and for the present year the annual payment will be reduced by \$4,000. During the next three years seven different debentures will be fully paid off.

**York County, Ont.**—The aggregate assessment of York County as arranged for county purposes by the equalization committee which presented its report at the county council last week, is \$70,481,833. This represents a net increase over the local assessments of \$1,081,416. The assessment of the townships was increased from \$56,308,506 to \$58,415,182, while that of the villages and towns dropped from \$13,091,911 to \$12,066,651. Objection was taken to the decrease in the assessment of the villages and towns when there was an increase on the townships. It was stated that this was like an unloading of some of the city dwellers' burdens on the shoulders of the rural residents.

It was explained, however, that the principal increase had been in three northern municipalities in which the percentage of assessment to ruling market values had been particularly low, and the equalization had merely brought the districts up to the common level. The general rule followed, it was pointed out, was an increase of fifteen per cent. over last year's assessment. It was also pointed out that some rural municipalities had benefitted having received reductions while some urban centres had had their assessments increased.

**Oak Bay, B.C.**—A good financial report is submitted by S. J. Drake, reeve of the municipality. The surplus of revenue over expenditure for the year just ended amounted to \$11,295, while the current account overdraft was reduced from \$53,122 to \$37,603. The school levy was increased from \$35,060 to \$47,612. Up to December 31, 87.64 per cent. of the year's taxes had been paid, while 79.71 per cent. of the arrears had been collected. The usual tax sale was held, at which all property on which taxes were delinquent up to December 31, 1917, was put up.

All moneys available for sinking funds are invested in British Columbia bonds and bonds guaranteed by the province. The increased interest rate obtained over the amount required by the various by-laws will eventually result in a large sum being procured, states Reeve Drake's report. Victory bonds payable in Canadian funds were sold for \$251,473, and this amount was invested in longer term British Columbia bonds or bonds guaranteed by the province, with interest and principal payable in New York, thus saving the heavy exchange charges on this proportion of the municipality's debentures. The sinking funds required amount to \$409,751, while the funds actually on hand are \$442,427. This amount consists of \$438,212 invested in provincial and Dominion bonds and debentures, and \$4,215 in the bank.

# Government and Municipal Bond Market

**Trend of Prices Shows no Departure From Recent Tendencies—Victories Active and Steadier on Toronto Exchange—Toronto Calls for Tenders on New Issue—British Columbia Cities Pay High for Their Loans**

A NUMBER of Ontario municipal issues found their way on the market this week at rates which gave no indication of a departure from the trend of the past month or two. A comparison of the present interest rates with a year ago shows that the level is still considerably higher, but in February, 1920, there were signs of stiffening, while now the movement is in the opposite direction. The decline since the latter part of 1920 has been quite pronounced, which can be illustrated by a few typical instances. In September last, Saskatchewan paid 6.47 per cent. for a loan which was made in Canada, while in January the province paid only 6.23 per cent. Ontario paid 6.80 per cent. for its money in December, as compared with 6.28 per cent. just recently.

Of the municipalities a good example is Oshawa which paid 6.94 per cent. in November, 6.80 per cent. in December and 6.48 last month. York Township paid 7 per cent. for a loan in December, compared with 6.40 per cent. about two weeks ago. The amount of financing in other provinces has not been sufficient to give a very definite idea as to the trend, but the movement is unmistakably downward.

Western municipalities are still paying high for their money, although Cornwallis, Man., got a loan on a 6½ per cent. basis just recently. The yield on two British Columbia municipal issues, however, was high. Winnipeg, of course, being one of the bright spots in the western bond market, received the best rate the market could offer, the basis of last week's loan being 6.19 per cent., which compares with 6.68 per cent. in December.

There continues to be a ready absorption of investment securities. For instance, last Tuesday, the turnover of Victory bonds on the Toronto Stock Exchange approximated a million and a quarter dollars. The effect on prices was not unusual, and all Victories are steady to stronger, while it is expected that there will be a material appreciation in the near future. The trend of prices in recent weeks is illustrated by the following figures:—

	Control price.	Last week.		This week.	
		High.	Low.	High.	Low.
1922 .....	98	99¼	98¾	99¼	98¾
1927 .....	97	99	98¾	98¾	98
1937 .....	98	99¾	98	99¾	99¾
1923 .....	98	99	96½	98½	98
1933 .....	96½	99	98	99	98¾
1924 .....	97	96¾	96	96½	95½
1934 .....	93	95%	95	95%	95%

## Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Grantham Tp., Ont.	\$ 9,542	5½	20-years	Feb. 14
Fredericton, N.B.	120,000	5	Serials	Feb. 15
Chilliwack, B.C.	46,000	6	10-years	Feb. 21
Dauphin S.D., Man.	30,000	6½	20-years	Feb. 25
Transcona, Man.	48,000	6	20-years	Feb. 28
Danville, Que.	33,000	6	Various	Mar. 7
Trail, B.C.	37,000	7	20-years	Mar. 7
Drumheller, Alta.	28,000	7	20-instal.	Mar. 26

Grantham Tp., Ont.—Tenders will be received until February 14, 1921, for the purchase of \$9,542 5½ per cent. 20-year debentures. L. S. Bessey, St. Catharines.

Chilliwack, B.C.—Tenders will be received until February 21, 1921, for the purchase of \$46,000 6 per cent. 10-year debentures. Chas. W. Webb, clerk and treasurer.

Dauphin S.D., Man.—Tenders will be received until February 25, 1921, for the purchase of \$30,000 6½ per cent. 20-year debentures. R. M. Cardiff, Dauphin, Man.

Transcona, Man.—Tenders are being called for until February 28, 1921, for the purchase of \$48,000 6 per cent. 20-year school debentures. J. M. Fowles, Transcona, Man.

Trail, B.C.—Tenders will be received until March 7, 1921, for the purchase of \$37,000 7 per cent. 20-year waterworks debentures. (See advertisement elsewhere in this issue.)

Drumheller, Alta.—The municipal hospital board is calling for tenders until March 26, 1921, for the purchase of \$28,000 7 per cent. 20-instalment debentures. (See advertisement elsewhere in this issue.)

Danville, Que.—Tenders will be received up till March 7, 1921, for \$18,000 6 per cent. debentures maturing May 1, 1940. Offers are also invited for \$15,000 6 per cent. debentures maturing Nov. 1, 1957. C. C. Brown, secretary-treasurer.

Burnaby, B.C.—Debentures are being offered "over the counter" to citizens at par and accrued interest. The securities, which bear 6 per cent. interest, are to be issued as follows: \$60,000 for waterworks, maturing December 31, 1940; \$74,000 for schools, maturing December 31, 1934.

## Debenture Notes

Corrie, Ont.—Ratepayers have carried a by-law authorizing the borrowing of \$12,000 for hydro-electric purposes.

Sherbrooke, Que.—The Roman Catholic School Commission of the municipality wishes to borrow \$100,000.

Fordwich, Ont.—Ratepayers have carried a by-law authorizing a debenture issue of \$12,000 for hydro-electric.

Peterboro, Ont.—A by-law authorizing the borrowing of \$350,000 to be used in the purchase of a site and the erection of a filtration plant, has been passed by the council.

Toronto, Ont.—Finance Commissioner Ross has stated that he has definitely decided to issue bonds for the purchase of the Toronto Railway Co. in Canada, and not to place them in the United States market.

Montreal North, Que.—The municipality wishes to borrow \$50,000 for waterworks extension and to cover any loss which would be suffered in selling the bonds. The interest rate will not be more than 6 per cent.

Greater Winnipeg Water District, Man.—The board will shortly consider a by-law authorizing the issue of \$200,000 20-year debentures to be sold at a price yielding not more than 6½ per cent. to the purchasers.

Cap Madeline, Que.—The municipality has purchased from La Compagnie d'Aqueduc Cap de la Madeline, the water and sewer works at a price of \$210,000. Payment will be made by a debenture issue, bearing interest at 6 per cent., and maturing in 1927.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from January 15 to 29, 1921:—

Schools.—10-years annuity, 8 per cent.: Crest, \$5,000; Cupar, \$3,000; Meeting Lake, \$2,500; Little Bridge, \$4,600; Harptree, \$3,500; Pretty Valley, \$5,000; Natika, \$4,300. Ten years 8 per cent. instalment, Bukowina; 4-years annuity 8 per cent., Middle Lake.

Rural Telephones.—15-years annuity, 8 per cent.: Eastwood, \$8,000; South Church Bridge, \$2,500; Dewar Lake, \$25,000; Round Plains, \$6,500; Dinsmore, \$1,500.

## Provincial and Municipal Bonds at Attractive Prices

Our February Bond List describes a wider variety of Provincial and Municipal Bonds than it has been possible for us to offer for some time.

Interest rates are substantial, and the wide range of maturities permits the purchaser to invest his money for whatever period of time may best suit his purpose.

## Bond Sales

Newmarket, Ont.—An issue of \$20,000 6½ per cent. 20-year debentures has been taken up locally at par.

New Westminster, B.C.—The city has sold \$35,000 6 per cent. debentures, due December 1, 1939, to the Royal Financial Corporation, Ltd., at 87.06.

Rossland, B.C.—Gillespie, Hart and Todd, Ltd., have purchased \$11,500 7 per cent. 20-year debentures, and are offering them at 102.69, to yield 6¾ per cent.

Gilbert Plains, R.M., Man.—The municipality has sold \$30,000 6 per cent. 30-instalment bonds, guaranteed by the province of Manitoba, to W. L. McKinnon and Co.

Cornwallis R.M., Man.—An issue of \$100,000 5½ per cent. 30-year, good roads debentures has been sold to Unicume and Burns. Brandon, Man., on a basis of about 6½ per cent.

North Vancouver, B.C.—The Royal Financial Corporation, Ltd., has purchased \$41,000 6 per cent. debentures of the district, due July 1, 1940, at a price of 84.58, which is on about a 7½ per cent. basis.

Sarnia, Ont.—The Canadian Debentures Corporation has purchased \$164,747.68 debentures, bearing 6 and 6½ per cent. interest, and maturing in 10 and 15 instalments, at a price of 99.80, which is on about a 6.35 per cent. basis. Other tenders received were:—

Wood, Gundy and Co. ....	99.41
A. E. Ames and Co. ....	98.91
Dominion Securities .....	98.841
R. C. Matthews and Co. ....	98.716

Victoria, Ont.—The city has sold \$50,000 6½ per cent. debentures to Eastern Canadian interests, and has given an option on another \$50,000 to the same party. The money will be used to finance the construction of the Johnson St. bridge. Already \$21,000 of these debentures had been sold locally, sufficient to allow the carrying on of the work, and it is the intention of the city to make further local sales, although good offers from outside will receive consideration.

Port Colborne, Ont.—Paying a price of 101.418, which is on a basis of about 6.35 per cent., the Dominion Securities Corporation has been awarded \$115,000 6½ per cent. 30-instalment debentures. Tenders were as follows:—

Dominion Securities Corp. ....	101.418
Wood, Gundy and Co. ....	101.08
C. H. Burgess and Co. ....	100.87
Harris, Forbes and Co. ....	100.72
Canadian Debentures Corp. ....	100.67
A. E. Ames and Co. ....	99.29

For half the issue:—

Dominion Securities Corp. ....	101.487
C. H. Burgess and Co. ....	101.06
Harris, Forbes and Co. Inc. ....	100.89

Kitchener, Ont.—The Dominion Securities Corporation has been awarded \$20,000 6 per cent. 2-instalment debentures at a price of 97.587, which is on about a 6.30 per cent. basis. Other bids were: Harris, Forbes and Co., Inc., 97.578; Æmilius Jarvis and Co., 97.06; C. H. Burgess and Co., 96.77; Wood, Gundy and Co., 96.88; Macneill, Graham and Co., 96.838; A. E. Ames and Co., 96.40; R. C. Matthews and Co., 96.27; W. A. Mackenzie and Co., 95.11; United Financial Corporation, Ltd., 96.17; Dymont, Anderson and Co., 96.07; National City Co., Ltd., 96.52; Canadian Debentures Corporation, 96.784.

Simcoe, Ont.—Paying approximately 6.35 per cent. for its money, the municipality has sold its \$28,976 5½ per cent. 30-instalment debentures to Wood, Gundy and Co. at a price of 91.11. Other bids were: Dymont, Anderson and Co., 90.07; A. E. Ames and Co., 90.60; Bell, Gounlock and Co., 89.55; Æmilius Jarvis and Co., 90.42; Harris, Forbes and Co., Inc., 89.587; T. S. G. Pepler and Co., 89.40; C. H. Burgess and Co., 90.114; National City Co., Ltd., 89.26; W. A. Mackenzie and Co., 89.11; United Financial Corporation, Ltd., 89.62; R. C.

Matthews and Co., 89.10; Brent, Noxon and Co., 90.19; Canadian Debentures Corporation, 89.80; Macneill, Graham and Co., 89.93.

Brockville, Ont.—The Dominion Securities Corporation has purchased \$143,964 6 per cent. 10-instalment debentures of the town at a price of 97.839, which is on about a 6.45 per cent. basis. The following tenders were received:—

Dominion Securities Corp. ....	97.839
A. E. Ames and Co. ....	97.64
Harris, Forbes and Co., Inc. ....	97.627
Æmilius Jarvis and Co. ....	97.58
C. H. Burgess and Co. ....	97.43
Dymont, Anderson and Co. ....	97.079
R. C. Matthews and Co. ....	97.07
Turner, Spragge and Co. ....	97.057
Canadian Debentures Corp. ....	97.01
Wood, Gundy and Co. ....	96.93
Brent, Noxon and Co. ....	96.71
United Financial Corp., Ltd. ....	96.34

Saskatchewan.—The following is a list of sales reported by the Local Government Board from January 15 to 29, 1921:—

Schools, 8 per cent.—Pizarro, \$1,000 10-years; W. Foster, Marengo, and A. Tisdale, Loverna. Winter, \$1,100 8-years; J. B. Dearing, Senlac. Lake Valley, \$16,000 20-years; Waterman-Waterbury Mfg. Co., Regina. Neepawa, \$4,200 15-years; H. J. Birkett, Toronto. Findlater, \$7,800 20-years, Khedive, \$7,000 15-years; Harris, Read and Co. Regina. Hoosier, \$1,100 10-years; Mrs. S. Doyle, Hoosier. Trombley, \$1,200 10-years; Chas. Bouchier, Crystal Springs. Belleville, \$1,500 20-years; Frank Hourd, Kennedy. Grain Belt, \$4,275 10-years; K. Julson, Gull Lake. Campbellville, \$1,000 10-years; W. H. Coak, Star City.

Rural Telephones, 15-years 8 per cent.—Shell River, \$12,300, Marcelin, \$8,000, Balgonie, \$10,900; Harris, Read and Co., Regina. East End, \$12,500; T. P. Taylor, Regina. Balgonia, \$1,000; H. Langdale, Regina. Horse Lake, \$7,300; R. O. Berwick, Regina. West Hague, \$8,000; E. T. Channell, Prince Albert. Leask, \$31,500; H. E. Shackleton, Prince Albert. Springside, \$1,000; A. Welby, Springside. Biggar-Neola, \$14,700, Spalding, \$16,000, Naseby, \$3,000; T. W. Brown, Saskatoon. Stockholm, \$5,700, Quill Plains, \$8,024. Ibtstone, \$4,600, Sylburn, \$10,000, Storthoaks, \$6,300; C. C. Cross and Co., Regina. Northfield, \$5,000; T. J. McVicar and Co., Regina. North Springside, \$8,500; Bank of Montreal, Springside. Yellow Lake, \$3,100; S. L. Ross, Regina. Lilyholme, \$7,950; S. L. Platt, Regina. Fern Glen, \$3,000; W. Ward.

Village.—Buchanan, \$800 10-years 8 per cent.; O. Voge, Buchanan.

## Toronto Calls for Tenders

The city of Toronto is calling for tenders up till February 22, 1921, on \$5,037,000 serial bonds, which are to be issued on account of the acquisition and rehabilitation of the Toronto Railway Company and for school purposes. The securities bear interest at the rate of 6 per cent., and both principal and interest is payable in Toronto. Offers must be for the whole of the issue. For further particulars, see advertisement in this issue.

## Ontario Municipalities Call Tenders

Oshawa, Ont., is calling for tenders until February 16, 1921, for \$132,475.09 6 per cent. 30-year sewer debentures and \$48,864.05 6 per cent. 20-year sidewalk debentures. Principal payable in equal annual instalments. F. E. Hare, deputy treasurer.

Guelph, Ont., will receive offers up till February 18, 1921, for \$125,000 6 per cent. 20-year waterworks improvement debentures and \$50,000 6 per cent. 20-year sewerage extension debentures. H. J. B. Leadlay, treasurer.

The village of Point Edward, Ont., is offering up to February 23, 1921, \$24,000 public school debentures, which bear interest at 7 per cent. D. Suhler, clerk.

CORPORATION SECURITIES MARKET

Stock Markets Reflect no New Constructive Developments—  
Spanish River Paper Bonds are Offered to Public—  
Mount Royal Hotel Issue

THERE were no new developments to alter the tone of the Canadian stock markets during the past week, and, with the exception of one or two issues, the exchanges were void of interest. Canada Steamships took a sharp drop on the report of a cut in dividend, but evidently there was very little foundation to the rumour, and the price started to pick up. This little incident, however, created a general disturbance, indicating how sensitive the market is and the uncertainty of conditions.

Trading figures show that the turnover of listed stocks in Montreal was only 30,157 shares, as compared with 49,272 in the previous week, while the turnover of listed shares in Toronto was 12,939, as against 13,102 previously. It was well that very few stocks came out, as the public shows no very great desire to participate in trading in speculative issues at the present time. Bond trading in Montreal was lower, being \$1,563,800, compared with \$1,900,360 previously, while in Toronto there was also a falling off from \$2,417,850 to \$2,269,150.

Pulp and Paper Securities

Pulp and paper securities are attracting a good deal of attention at the present time in view of the movement of prices on the stock exchange and of the new financing which is being arranged. In the opinion of a prominent investment house, which has specialized in such securities for a number of years past, both here and in the United States, the pulp and paper industry is one of the most stable and essential, because the use of paper is increasing directly with the growth of population and with the extension of education. With reference to the newsprint situation, it is further stated that, though it would be unreasonable and undesirable to expect a continuation of the acute shortage of this product which has existed for so many months, the paper companies are fortunate in being assured of a steady demand for their product, even in these times of depression. They have no surplus stocks to be worked off at a loss in order to adjust themselves to new market conditions, and their earnings have been and continue to be so good that they can look forward without misgiving to a possible curtailment in the use of paper if advertising drops back from the high point of last year.

The principal announcement this week of new financing is the offering of \$3,000,000 8 per cent. 20-year general mortgage bonds of the Spanish River Pulp and Paper Mills, Ltd., by the Royal Securities Corporation at 99 and interest to yield 8.10 per cent. The Spanish River company is one of the largest manufacturers of newsprint in this country, and within the past few years has worked itself into a very strong position. Some interesting facts in this regard will be found advertised elsewhere in this issue.

This week N. A. MacDonald and Company, Montreal Toronto and Ottawa, are making public offering of the \$4,

000,000 8 per cent. convertible debentures of the Mount Royal Hotel Company, particulars of which have already been fully outlined in these columns. The securities are being sold at par and interest, with a bonus of 40 per cent. of common stock. The Mount Royal Hotel will be operated as a link in the chain of twenty hotels in Canada and the United States, which are managed by the United Hotels Company of America. The hotel is being constructed to meet the urgent demand on the part of residents, transportation and other business interests of Montreal, commercial travellers and tourists.

The capital of the company, which consists of 8 per cent. debentures to be converted into 8 per cent. cumulative preferred stock, \$4,000,000, authorized and issued; common stock, par value \$100, \$5,000,000 authorized and issued; 8 per cent. preferred stock, \$5,000,000 authorized, of which \$4,000,000 is to be used in payment of a like amount of debentures and \$1,000,000 to remain in the treasury of the company, is to be subject to a first mortgage or bond issue of \$3,000,000, to be increased to \$4,000,000 on completion of a 400-room addition. It is understood that the \$3,000,000 bond issue has been disposed of, but particulars of the issue are not available.

Capital Increases

The Canadian Pulpwood Corporation, Limited, has been authorized to increase its capital from \$1,000,000 to \$1,500,000 by the issue of 5,000 shares of \$100 each.

Benson and Hedges (Canada), Ltd., Montreal, cigarette manufacturers, have been authorized to increase their capital from \$500,000 to \$1,500,000 by the creation of 10,000 shares of \$100 each.

Penman's, Limited, have declared a bonus of 2 per cent. on the common stock, payable on February 28 to shareholders of record February 16. The common stock is on an 8 per cent. basis, and a similar bonus was paid in February, 1920, while bonuses of 1 per cent. were paid in 1918 and 1917.

Application has been made to the Toronto Stock Exchange for the right to trade in the securities of the Imperial Tobacco Company of Canada in the unlisted department. The company's general office is at Montreal, but much of its stock is said to be held in Great Britain. The common stock outstanding amounts to \$27,002,500, of \$5 par value, and the preferred stock outstanding is \$8,030,000, par value £1. The dividend on common is 6, plus 1, and on preferred 6 per cent. cumulative. The common stock has been selling around par on the curb and the preferred is quoted at \$4.50.

The Felger Livestock and Grain, Ltd., is offering for public subscription at par \$250,000 of its notes, made up as follows: 300 notes of \$250 each, 1,000 notes of \$100 each, 800 notes of \$50 each and 1,400 notes of \$25 each. They all mature April 30, 1931, and interest is payable at 8 per cent. on April 30 and October 30 in Lethbridge. The company was incorporated under an Alberta charter in December with an authorized capital of \$250,000, of which \$5,000 is subscribed, and is to be paid up by May 1. It will engage in farming and raising live stock, and the notes are to be secured by the latter, the trust deed requiring that 80 per cent. of the proceeds be invested in this way.

**THE DOMINION LIFE ASSURANCE COMPANY**

The thirty-second annual report of the Dominion Life Assurance Company, which appears in condensed form in another column, and was presented to the members of the company at its annual meeting on February 11, is, in all essential respects, the best in its history. The new business written, amounting to \$15,756,762, is 44.4 per cent. of the amount in force at the beginning of the year, and the increase for the year shows \$9,878,820, which is a gain of 28 per cent.

The gross assets of the company increased by \$703,488 to \$6,167,935. Death claims were only 46 per cent. of the mortality provided for, and the cash profits distributed to policyholders were \$139,890.

**BEST YEAR FOR CONTINENTAL LIFE**

Nineteen-twenty was the most satisfactory year from every standpoint that the Continental Life Insurance Company has ever experienced, at least that is the indication from the annual statement, which has just made its appearance. The applications for new insurance and revival of policies exceeded the sum of \$5,000,000, while the insurance issued and revived amounted to \$4,897,164, which is an increase of 20 per cent., as compared with the amount issued for the previous year. The amount paid for death claims, matured endowments, dividends on policies, annuitants, etc., is \$237,473, as against \$249,746 for 1919.

Reserves for the protection of policyholders have been increased by the sum of \$232,835, and now amount to \$2,666,208. In addition, there has been added to the surplus for their benefit \$96,981, making a total surplus for the protection of policyholders of \$315,869. Net premium income and income from other sources amounted to \$731,473 during the year, compared with \$554,673 previously.

The following table is conclusive evidence of the progress of the company since 1900:—

	1920.	1910.	1900.
Net premium income .....	\$ 587,918	\$ 208,028	\$ 15,050
Other income .....	143,555	50,538	1,612
Death claims accrued.....	76,558	12,500	.....
Total assets .....	3,043,149	1,084,822	79,925
Reserves .....	2,666,208	831,820	17,321
Insurance in force .....	17,553,656	6,367,883	705,200

**ONTARIO LOAN COMPLETES FIFTIETH YEAR**

Very profitable was the experience of the Ontario Loan and Debenture Co., London, Ont., in its fiftieth year of operation. Net earnings for 1920 were \$275,893, to which was added \$23,000, being the surplus from the sale of the old office building, and \$32,623 brought forward from last year, leaving a balance for distribution of \$335,517, compared with \$314,779 in 1919. In addition to the regular dividend of 9 per cent., a bonus of one per cent. was paid to shareholders, and \$100,000 was transferred to the reserve fund, bringing that account up to 128½ per cent. of the paid-up capital of \$1,750,000.

The balance sheet shows that mortgage loans were lower, being \$4,619,201, as against \$4,759,917, but investments in bonds and debentures increased from \$2,319,634 to \$2,740,798. Latterly, however, mortgage loans are offering in larger volume at fair rates, and the company is again turning its attention to this class of security. Payments of both principal and interest were well met during the year, according to the report. Under the liabilities to the public, total outstanding debentures are slightly lower at \$2,604,309. Sterling debentures show a reduction of about \$265,000, but this amount was almost offset by an increase in currency debentures. Deposits have increased from \$900,872 to \$1,037,785. A full report of the company's operations will be found elsewhere in this issue.

**PORTAGE LA PRAIRIE FARMERS' MUTUAL**

New business amounting to \$27,186,910 was written by the Portage La Prairie Farmers' Mutual Fire Insurance Co. in 1920, as compared with \$22,134,648 in 1919. Loss claims were \$128,092, compared with \$137,508 in the previous year.

At the close of thirty-seven years in the mutual fire business in the west, the company had \$63,153,907 of assurances in force, being an increase of \$11,597,564 for the year. Total assets also showed a substantial increase from \$910,616 to \$1,024,708.

Officers of the company now are: E. H. Muir, president; S. Whitaker, manager and secretary; A. H. Thorpe, treasurer.

**DEBENTURES FOR SALE**

**CITY OF TRAIL, B.C.**

Sealed tenders, marked "Tender on Debentures," will be received by the undersigned up to 8 p.m. on Monday, March 7th, 1921, for \$37,000 7½% 20-years straight-term waterworks debentures. Denomination, \$500.00. Interest payable semi-annually. Principal and interest payable in Trail, Toronto or New York, at option of holder. Interest coupons attached.

WM. E. B. MONYPENNY,  
City Clerk.

415

**CITY OF TORONTO**

**\$5,037,000 SERIAL BONDS**

Sealed tenders, endorsed "Tender for City of Toronto Bonds," addressed to Thomas L. Church, Esq., K.C., Mayor and Chairman of the Board of Control, will be received by the undersigned until 12 o'clock noon, Tuesday, 22nd February, 1921, for the purchase of \$2,500,000 serial bonds, issued on account of the acquisition and rehabilitation of the Toronto Railway Company, also \$2,537,000 serial bonds issued for school purposes.

Full details as to the purposes for which the bonds are issued, and amounts maturing annually, together with financial statement of the City, will be furnished on application.

The legality of the issues has been approved by Mr. J. B. Clarke, K.C., Toronto, and his favorable opinion will be engraved on each bond.

The bonds are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, and are of the denomination of \$1,000.

They are payable both as to principal and interest in Toronto, and carry interest at the rate of 6½ per annum, payable half-yearly.

Engraved bonds will be ready for delivery on or about March 7th, 1921. Delivery and payment, with accrued interest, are to be made at the office of the undersigned.

Tenders will not be received for any part, but must be for the entire issue.

A certified cheque, payable to the undersigned, for 20 per cent. of the par value of the bonds tendered, must accompany the tender.

Tenders specifying for bonds other than those herein described, or containing conditions varying from the above, will not be considered.

The right is reserved to reject any or all proposals.

GEORGE H. ROSS,  
Commissioner of Finance.

Treasury Department,  
City Hall, Toronto, Canada, February 10th, 1921. 416

# Corporation Finance

Good Year for William A. Rogers—British Columbia Electric Railway Position Improved—  
Goodyear Tire Statement Contains Evidences of Expansion—Traction Companies Earnings Increase

**Brazilian Traction, Light and Power Company.**—During the current year of 1920 gross earnings of the company amounted to 134,906,000 milreis, an increase of 21,832,000 milreis over the previous year. Aggregate net earnings were 69,991,000 milreis, being an advance of 11,568,000 milreis. The net earnings for December last, which totalled 5,683,000 milreis, showed an increase of 795,000 milreis, which was the second smallest total for the last half of the year, and only three months of the year, March, April and July, provided smaller net increases.

**Winnipeg Electric Railway Company.**—The company's properties, exclusive of subsidiary lines, are valued at \$17,262,832, according to the final figures in the public utility commissioner's appraisal. Including subsidiaries, the valuation is placed at \$20,518,718, of which \$560,701 represents the Suburban Rapid Transit Railway, \$1,356,523 the Winnipeg, Selkirk and Lake Winnipeg Railway, \$979,951 the Winnipeg River power, \$292,787 the Winnipeg River Railway and \$65,923 the Gas Stove Company, Limited. To reproduce the entire system new would cost \$24,369,431, of which the cost to reproduce new the Winnipeg Electric Railway would be \$20,733,023, according to the statement.

**North American Pulp and Paper Trust.**—At a meeting in Montreal this week of shareholders of the North American Pulp and Paper Trust it was proposed to change the original offer for the sale or exchange of shares and to reduce the shares of the Saguenay Pulp and Paper Company to \$5 par value, which make an even exchange of the two stocks possible. The original offer was \$6 per share in cash (United States funds), or an exchange of existing shares for Saguenay shares on the basis approximately of one share preferred and four of common for each ten trust shares. The change would give two shares of preferred and eight of Saguenay common for the same ten shares.

The meeting gave the board powers to abolish the North American Pulp and Paper Trust. Further action was delayed to await the annual report of the Saguenay Company, which, it was stated, would show a surplus of \$1,500,000 after depreciation, bond interest, etc.

**Montreal Tramways Company.**—Official figures of the certified account, prepared by the city accountant, and made public by the Administrative Commission this week, reaffirms that the company owes the city of Montreal \$1,500,000 on the new contract. The Administrative Commission also gave out for publication a complete account of the indebtedness of the company to the city up to February, 1921, amounting to \$2,140,723. In addition to the \$1,500,000 first referred to, the city authorities also claim the company owes to the city \$227,152 on the old contract, making a total of \$1,727,152 under the head of what the city accountant classifies as percentage on earnings.

The Administrative Commission acknowledged this week that the city had received a cheque from the company for \$61,090 in part payment of the amount the company owes the city by the new contract.

**British Columbia Electric Railway.**—An improved condition was reported at the annual meeting of the company, held recently in London. The address of the chairman of the company, R. M. Horne-Payne, stated that gross receipts were the largest in the history of the company, and, despite increased costs of operation, dividends were £4 13s. per cent. on preferred and £6 4s. per cent. on deferred ordinary stock. He said that pre-war returns were not sufficient to attract capital for the development of public utilities such as theirs, and he asked for the opportunity to operate under reasonable conditions. Arrangements have been completed whereby the

majority of the share capital of the Western Power Company of Canada will be secured, thus giving the company ownership of a large source of additional power. There had been a continued improvement in business, and during the year the company carried 66,411,030 passengers and 430,921 tons of freight, as compared with 53,326,288 passengers and 331,794 tons of freight in the previous year.

As a result of the increased fares and rates which the company was permitted to charge, the profits for the year amounted to \$590,072, as compared with \$519,364 for the preceding twelve months. Allowance for depreciation absorbed \$164,745, as against \$153,545, and there was an additional liability for the year under review in the form of a corporation's profits tax of \$13,000, leaving the net profit at \$412,337, compared with \$363,019.

**Goodyear Tire and Rubber Company of Canada.**—Evidences of substantial expansion are shown in the statement of the company for the year ended September 30, 1920. Property and plant of the company have almost doubled in value, while inventories and accounts receivable show large increases. The capital of the company has largely increased as the result of the new stock issues during the year. Reserves are somewhat higher, but the surplus profits have been drawn on rather heavily. The principal changes in the balance sheet follow:—

	1920.	1919.
Assets.		
Plant and property .....	\$6,199,665	\$3,118,011
Inventories .....	7,150,945	3,481,185
Advances .....	92,528	41,760
Accounts receivable .....	4,817,535	2,890,018
Cash .....	130,397	1,180,391
Liabilities—		
Preferred stock .....	4,500,000	1,452,700
Common stock .....	5,332,000	888,500
Notes and accounts payable .....	5,905,967	3,609,763
Accrued government war tax.....	950,000	1,250,000
Reserves .....	1,341,062	1,138,514
Surplus .....	1,071,725	2,507,788

Total assets at the end of the year were \$19,100,754, as compared with \$10,891,390 as shown previously.

**Wm. A. Rogers, Ltd.**—A year of prosperity, both from the business and profits standpoint, is reported by the company for 1920. Profits were \$572,536, compared with \$526,382. This, with balance forward, made \$810,927 available for distribution. The sum of \$169,468 was transferred to realty and plant reserve, or an advance over last year by about \$8,000, while the reserve account was increased by \$50,000, as against \$70,000 a year ago.

"Business fell away toward the end of the year and is quiet at the opening of 1921," says S. J. Moore, the president, in his report to the shareholders. "We are seeing evidences of improvement, however, and look forward to a gradual restoration of confidence. It is our expectation that the curtailment that is likely to occur in the early part of 1921 will be made up in the later months, and that the year, as a whole, will yield a satisfactory and profitable volume. The inventories on hand have been written down to present replacement values, and the shrinkage has been charged off in the year's expenses. The inventories are in excellent condition, both as to character and prices.

Though inventories have been written down, the merchandise in the assets column amounts to \$1,614,916, against \$1,328,468 a year ago. Total current assets are \$2,425,085, compared with \$2,166,958. Current liabilities are \$657,708, compared with \$573,014. This leaves working capital of \$1,767,377, as against \$1,594,944 a year ago. Total assets are \$4,945,082, compared with \$4,583,436.

# SUN LIFE ASSURANCE COMPANY OF CANADA

1871

HEAD OFFICE MONTREAL

1921

## JUBILEE YEAR

HALF a century has elapsed since the Sun Life Assurance Company of Canada issued its first policy in 1871. The figures submitted herewith indicate the size, strength and outstanding position to which the company has attained among the life assurance institutions of the world, as a result of its operations during those first fifty years.

## RECENT FIRES

Dingwall Block and Nokomis Block in Winnipeg Suffered Loss of \$300,000 and \$75,000, Respectively—Large Building in Toronto Suffered Loss of \$150,000

Danville, Que.—February 4—Residence of Chester Brock was damaged by fire. The loss is estimated at \$600, and was covered by insurance.

Hanover, Ont.—February 3—The factory of Knechtel Furniture Co. was damaged by fire. The fire, which was caused by spontaneous combustion, did \$8,000 damage.

Huntingville, Que.—January 28—The barns and all out-buildings of E. S. Andres were destroyed by fire. The loss is estimated at \$5,000, partly covered by insurance.

Lethbridge, Alta.—February 1—The washroom and blacksmith's shop at the Federal coal mines in the river bottom was damaged by fire. The loss is \$1,600.

London, Ont.—February 5—A vacant house, owned by George Madge, on the third concession of London township, was destroyed by fire. The loss is estimated at \$2,000, with insurance of \$300.

Montreal, Que.—January 30—Fire, believed to have been caused by an electric iron, did \$8,000 damage to the men's furnishing store belonging to Sam Grover, 114 St. Catherine Street West. There was \$5,000 insurance.

February 7—Fire, thought to have been caused by an overheated furnace, broke out in a house under construction at the corner of Dorchester Street and Claudeboye Avenue.

Nokomis, Sask.—February 3—The Nokomis Meat Market, theatre, tailor shop and picture gallery were damaged by fire. One fatality.

Ottawa, Ont.—February 1—Fire, believed to have originated from a spark from a chimney, caused damage estimated at \$1,500 to the residence of R. D. Baker, 325 McLaren Street. The loss is covered by insurance.

Parkman, Sask.—January 30—The barn and contents owned by John Green, of Cannington Manor, were destroyed by fire. The fire is said to have started from a lantern left burning in the barn. The loss is partly covered by insurance.

Pine Hill, Que.—February 7—Residence of Leo Carriere was destroyed by fire. There were four fatalities.

Sackville, N.B.—January 13—Linvley Hall, a part of Mount Allison University, was destroyed by fire with a loss of \$35,000.

Sandwich, Ont.—February 1—Residence of George Julian, King Street, was damaged by fire. The loss is placed at \$3,000.

Smith's Falls, Ont.—January 28—House owned by Mr. Phillips was destroyed by fire. The cause of the fire is not known.

St. Mary's, Ont.—January 31—Fire of unknown origin broke out in the flour mill on Queen Street, owned and operated by H. L. Rice. The loss is covered by insurance.

South March, Ont.—January 30—Residence of Robert Richardson was destroyed by fire. The fire, which was caused from the furnace, did \$30,000 damage.

Toronto, Ont.—January 28—Forum Building, at the corner of Yonge and Gerrard Streets, was destroyed by fire. The origin of the fire is unknown, but it seemed to centre towards Shaw's Business College. The building was valued at \$100,000, with insurance of \$50,000.

January 31—Hot ashes igniting a partition in the basement of the candy store of Burger's, Ltd., 92½ Yonge Street, resulted in an outbreak of fire which did \$2,300 damage.

February 2—The premises of the Woltz Moulding Manufacturing Co., 145 Van Horne Street, were damaged by fire. The loss is estimated at \$7,000.

Trenton, Ont.—January 26—Fire caused by an overheated stove destroyed the grocery store of T. P. Michand, also the home of T. L. Shaw and the barn belonging to B. Powers.

January 30—Home of Fred McQuoid, west of Trenton, was destroyed by fire. The property was insured.

Toronto, Ont.—February 3—The residence of Major D. N. Matheson, at Stop 18 on the Lake Shore Road, was

destroyed by fire. The loss to building is \$18,500 and to contents \$40,000.

February 4—A fire broke out on the second floor of a building at 167 King Street East, doing \$5,200 damage. The fire started on the floor occupied by F. Ellis, dry goods firm.

February 6—A summer cottage at 8 Fir Avenue, belonging to Harry Beefsly, 16 Fernwood Park Avenue, was destroyed by fire. The loss is \$1,600. The building at 20-22 Wellington Street West was destroyed by fire. The fire almost wiped out the M. L. Willinsky Co., importers and jobbers, and Suckling and Co., trade auctioneers. The loss is estimated at \$150,000.

February 7—A building in the rear of 8-10 Sylvan Avenue was damaged by fire to the extent of \$1,400. An electric stove caused the blaze.

Vernon, B.C.—February 4—Residence of Hugh Heggie was damaged by fire. The fire was caused by a cigarette stub. Two fatalities.

Windsor, Ont.—February 1—The east wing of the British-American Brewery, West Sandwich Street, was damaged by fire. The loss is estimated at \$25,000. The clothing store of Samuel Schwartz, East Sandwich Street, was damaged by fire.

Winnipeg, Man.—January 28—Loss estimated at \$100,000 was sustained by firms occupying space in the Stovel Building corner of McDermot Avenue and Arthur Street, when a fire broke out in the basement.

January 30—The C.N.R. gas-house in Fort Rouge yards was destroyed by fire. The loss is covered by insurance. The premises, 408, 410 and 412 Portage Avenue, occupied respectively by the United Meat Co., the Dominion Bank and Sigmond's Tailoring Co., were damaged by fire. The loss is estimated at \$5,000.

Winnipeg, Man.—February 3—The interior of the Dingwall Block, Albert Street, was destroyed by fire. The loss is estimated at \$300,000.

February 6—The upper part of the Nokomis Block, 344 Cumberland Avenue, was damaged by fire. The loss is estimated at \$75,000.

Yarmouth, N.S.—January 26—The house owned by C. N. Adams, just beyond the eastern limits of the town, was destroyed by fire. There is \$950 insurance.

## ADDITIONAL INFORMATION CONCERNING FIRES

Craik, Sask.—December 22—Two-story brick building owned by Craik, S.D. 891 was destroyed by fire. The total loss is \$40,000, with insurance of \$21,605 in the following companies: Hartford, \$6,835; Guardian, \$3,835; Pacific Coast, \$3,335; Home, \$3,000; Hudson Bay, \$600; British North Western, \$3,000, and Yorkshire, \$1,000.

Galt, Ont.—January 19—A roughcast structure, two stores and flat belonging to W. H. Pinkett. The fire was caused by the plumber's torch. Estimated loss, \$1,150, with insurance of \$3,200 in National Ben Franklin and Dominion fire insurance companies.

Hamilton, Ont.—January 26—Building and bank fittings, occupied by Royal Bank of Canada and owned by Globe Realty Co., Ltd., were damaged by fire. The total loss is \$75,000, with insurance in the Royal and Continental insurance companies.

Manitoba.—During the month of December there were 127 fires reported, with an estimated loss of \$102,765. During the month there were four fatalities. The following is a list of the class of structure destroyed or damaged: Dwellings 44, farm buildings 30, stores 8, garages 7, apartment buildings 5, hotels 3, stores 3, automobiles 3, stables 2. The following were the causes reported: Stoves and furnaces 31, matches 12, electricity 11, smoking 10, hot ashes 7, and explosions 3.

Ontario.—The fire marshal's report for the month of December shows that during the month there were 747 fires reported, with an aggregate loss of \$729,059. During the month there were three deaths from fires.

## Life Insurance Without Medical Examination

Canadian Companies Now Venturing Into this Field—Experience in Great Britain and United States—Should the Application Form be Different?—Some Proposed Regulations for Use in Canada

FOUR Canadian companies, the Confederation Life, London Life, Manufacturers' Life and the Excelsior Life, are now writing business up to \$1,000 without medical examination of the applicant. This form of insurance is by no means open to all, however, as many questions relating to the applicant's health must be answered on the special application form provided for this class of business. This innovation has been considered for some time by the life companies, but it was just at the new year that action was taken.

In an address before the Insurance Institute of Toronto on February 17, E. E. Reid, manager of the London Life Insurance Co., of London, Ont., discussed this subject fully. He said in part:—

"The business of life insurance in the period before the war was always considered of such a stable nature that no serious upheavals were thought to be possible, and its staid dignity became almost a bye-word among the more venturesome in the world of affairs. During the past six years, however, one shock after another has followed in quick succession, and if it were not a business crammed full of vitality and based on a rockbottom foundation of the most certain of all sciences, it would not have been surprising had many failures been recorded.

"No one will accuse the life companies of making undue profits in these past years, and as a result of the experience of the period in question, not only has the mind of the general public become imbued with the stability and safety of life insurance institutions, but even in the minds of those more or less directly engaged in the business, a confidence has been established greater than ever existed before.

"Fortunate it is that the executives of the various companies did not know in 1914 what the future held, and it is sufficient of a nightmare to them to look back over the intervening period. Even now, although the direct strain of the war and epidemic period is, if not relegated to the 'limbo of forgotten memory,' at least losing the sting of its immediate presence, we are confronted with a more or less artificial strain resulting from the very popularity which the business is experiencing.

### Present-Day Conditions

"This is not the time to discuss the intricacies of the Net Level Premium Reserve Basis, which has been the foundation stone of the stability of Canadian life insurance companies. It forms, however, a stumbling block to a realization on the part of the general public of the peculiar difficulties that accompany the development of the business of a life insurance company. Indeed, I venture to say that a considerable proportion of the staffs of the head offices of the companies who have had to handle the recent unusual rush of business would find it hard to believe that on account of the reserve requirements, this all meant additional strain rather than immediate prosperity.

"We have had, then, in succession, the war period, including the Halifax disaster; the epidemic period, far greater in its intensity than the war strain of a like duration; the strain of the readjustment of the financial market; the strain of the new business expansion; and the strain incident to conducting a business on pre-war premiums, but paying expenses on a post-war basis. It is not to be wondered at that the comfortable circumstances which characterized the position of most of the companies prior to the war have been rudely jolted, and the surplus resources of all the companies have been considerably depleted, without, however, affecting in the least their stability.

"After all these cruel shocks, it has been left to the medical examiners to threaten the final staggering blow. Rumbblings have been heard in many quarters as to the dissatisfaction of the local medical examiners that the fee for examinations has not been increased in recent years, and certainly no one can complain if the general experience of the medical profession points to the necessity of a raise in the fees for medical examination. It is not within the province of this paper to comment upon this problem. It might be pointed out, however, that no increase in the rate of commission to the agents has generally been made throughout the war period, but individual agents have, nevertheless, multiplied their incomes through the greater volume of business transacted. As the agent's remuneration has been multiplied, so has that of the local examiners, although, of course, more of their time has been required to dispose of the greater volume of business passing through their hands. Assuming, however, that the time spent on the individual examination is not sufficiently compensated by the fee heretofore paid and an increased fee must be faced by the companies, even for the smaller policies, another considerable burden will be added to a business that has already borne many heavy and unforeseen expenditures.

"If this additional burden must be faced, many companies will find it desirable to seek relief in a manner that will lighten the initial cost of procuring their business. Even if a system were adopted under which the ultimate cost would be the same or somewhat greater, there would be still be justification for a change if the expense can be adjusted from that of a first-year charge to a charge spread over a number of years."

### Advantages of Non-Medical Business

"In many sections of the country a great difficulty has been experienced in obtaining examinations after the agent's part of the work has been accomplished. The waiving of the medical examination will bring within the protection of the life insurance system a great many homes that are now without it. The introduction of such a system would go a long way in maintaining the popular interest that has in recent years been created in favor of the business. The multiplying of the number of small risks, provided they are of good quality, thereby more widely spreading the total

amount of risk, would be of benefit, as those engaged in the business of fire insurance can so well testify. Should the practice become fairly general, the effect would also be to enable such company to accept, without undue strain, a considerably larger volume of business than is now possible.

"Finally the system would relieve the companies in regard to the heavy first-year expense which is abnormally high, especially in the case of small policies.

"We may, therefore, give consideration to the questions that arise in putting into effect a non-medical system and the bearing it may have on the ultimate conduct of the business.

#### History

"Group insurance brought strongly to the attention of the Canadian actuaries the question of accepting risks without medical examination, and it was surprising to find how many thought either that it was not possible legally to transact such business, or that it was quite too dangerous an experiment to attempt it.

"Life insurance without medical examination, however, far anti-dates the business of group insurance, although not in this country, for policies of any considerable amount. In Great Britain the system has been in vogue for "ordinary" insurance for a great many years, and a very complete resumé of the plans in use there is contained in a paper by Mr. John Nicoll, read before the Faculty of Actuaries in 1904 and contained in Part IV., Vol II. of the Transactions of the Faculty. Mr. Nicoll deals most exhaustively with the subject, and any student will find his paper very interesting reading. It is not necessary, however, on the present occasion, to go over all the ground covered by Mr. Nicoll, but it will suffice to quote from his paper to the extent necessary to give a reasonably clear idea of the development of the system of non-medical insurance in the old country.

"It is, of course, known to most of us that in the early days of life insurance, the directors themselves formed the medical board which passed upon the suitability of the applicant for insurance. Stories are told of these applicants having to present themselves in person and go through such gymnastic exercises as the board of directors might think necessary to ensure a thorough test. It would appear that this system was adhered to for more than a century, but that in the early years of the nineteenth century some movement in the direction of regular medical examinations was in evidence. Although the Equitable Society was formed for the purpose of conducting insurance somewhat on modern lines, and was founded in 1762, it was not until the year 1858 that a regular medical examiner was appointed, and, generally speaking, it was subsequent to the middle of the nineteenth century before anything like the full reports now recorded were adopted for use.

"The practice of calling for a complete report having gotten well under way, one question after another was added until the report forms became so formidable that the examination 'became a serious business not only for the examiner but also for the examined.' The elaborateness of the report was such as to call forth protests both from medical examiners and actuaries, and in view of the present consideration of the subject, the statement of Mr. James Chisholm, in his paper read before the Institute of Actuaries in March, 1886, is worth noting:—

"We may be inclined to doubt the wisdom of our forefathers and to deride a practice which falls so far short of the requirements of the present day. But I am heretical enough to think, notwithstanding the advanced stage of scientific precision at which we have arrived, that in some respects we might do well to copy them, and that, with the addition of a statement of the family history, we might accept lives coming to us under the same conditions that surrounded and safeguarded these early prospects for life insurance without the necessity even of a medical examination. . . . We may discredit the cause of life insurance with the public by a too rigid adherence to forms and red tape, when they might easily be relaxed or dispensed with.

"Following this and similar opinions expressed on the subject, there was, in 1890, a proposal put forth by one of the English officers to accept applicants without medical examination.

#### Actual British Experience

"The initial proposition introduced in 1890 contemplated the issuance of a policy on the ordinary whole life with-profits plan, but during the first five years no insurance would be carried other than the return of premiums to be paid in the event of death. At the end of five years the policy, *ipso facto*, became a with-profit endowment insurance payable at the end of fifteen years or at previous death, and the corresponding endowment premium, at the attained age, became chargeable. The onerous restrictions thus imposed militated against the popularity of the scheme, but the company's experience seems to have been such as to encourage them to continue the system, but with very marked modifications. In 1900 the following regulations were adopted:—  
(1) Insurance could be effected on any of the regular plans.  
(2) In the event of death during the first year the amount payable was one-third of the sum insured.  
(3) If death occur during the second policy year, the amount payable was two-thirds of the sum insured.  
(4) If death occur after two years or by accident at any time, the amount payable was the full sum insured.

"A further restriction which still appears to be retained by all English companies was that no assignment of the policy is allowed within a period of two years from date of issue.

"The experience under this much more liberal scheme must have been well within the expectations, for the conditions now pertaining to business of this kind (adopted in 1912) in the English office, most actively engaged in non-medical business, and presumably the same office which in 1900 imposed the above limitations, are:—One-third of the sum insured payable in the event of death within the first three months. Two-thirds of the sum insured in the event of death during the second three months. The full face of the policy thereafter, with the limitation of a maximum amount not of £200 but of £1,000, and with the further modification that the full amount is payable in the event of death by accident, even during the first six months of the life of the policy.

"It might be thought that the application form of the English companies for such insurance would be a rather formidable document. As a matter of fact, the number of questions asked, other than that relating to the kind and amount of insurance; covers only questions relating to height and weight, name of family physician, questions relating to bodily deformity, rheumatic fever, diseases of the heart and lungs, history of any other disease, a single question as to family history, a single question as to the time and cause of death of any member of the family and the insurance history of the applicant. The form is not burdened, either, with a declaration at the bottom, which is so long and so cumbersome as to make it practically certain that no court would believe that the average applicant would either read it over or listen to it being read over, the declaration in the English form running as follows:—"I do hereby declare that the whole of the foregoing statements are full and complete."

"In spite of the great simplicity of the forms required by the English companies, the statement is made that the results of this business have proven very satisfactory. It cannot be said that English companies have moved without caution, and I don't think any of us would be prepared to accuse them of not knowing what they were doing. If, then, after thirty years' experience they are prepared to issue policies up to £1,000 without examination, on such a simple form as outlined, place no other restriction on the policy, except the very moderate one applicable for only six months, either as to extra premium or dividend distributions, we

# Parliament Opens with Political Battle

Financial Legislation Anticipated by Several Petitions, Relating to Dominion Life, Fidelity Company, and Others—Tariff Issue to be Prominent—Expansion of Soldiers' Insurance Scheme

## THE WEEK IN PARLIAMENT

Monday, February 14—Speech from the Throne, Petitions presented.

Tuesday, February 15—Address in reply to Speech from Throne, "No confidence" amendment by Liberal leader.

Wednesday, February 16—Debate on address continued.

(Special to *The Monetary Times*.)

Ottawa, February 17, 1921.

**T**HE Speech from the Throne at the opening of Parliament on Monday held no surprises. The character of the legislation to be introduced this session will be about as forecasted in *The Monetary Times* of last week. Contrary to custom the intention to revise the tariff was referred to in the Speech, this being an invitation to the two oppositions to make it an issue in the debate to follow. The Liberal leader, Hon. W. L. Mackenzie King, however, devoted his whole address to an amplification of his amendment to the motion of the address in reply to the Speech from the Throne to the effect that the House and country no longer had confidence in the Administration and that its continuance in office would constitute an usurpation of the powers of popular government. Progressive Party speakers will give more special attention to the tariff next week, but a long list of Liberal speakers will follow the line taken by Hon. Mr. King.

Up to Wednesday evening no bills of interest to the financial world had been introduced but a number of petitions had been presented indicating some of the legislation to be introduced later. The Dominion Life Assurance Co. wants its powers changed so that it may establish "a section on the principle of non-participation in profits," and providing that "in the distribution of profits, the directors shall allot to the policyholders in the participating section of the company at least nine-tenths of the profits declared from time to time, which shall be payable as the directors by by-law or regulations from time to time determine." This was signed for the company by the president, Mr. Thomas Hilliard and by Mr. Fred. Halstead.

The Fidelity Co. of Canada asks power "with such other persons as become shareholders of the company" to incorporate for the purpose of carrying on a general business of insurance under the Insurance Act of 1917. Those signing the petition are Lansing Belmont Campbell, Frederick Lane, Arthur James Ernest Kirkpatrick, Sidney William Bond and Herbert Abraham Clarke.

The James MacLaren Co., Ltd., which manufactures lumber, good goods and pulp in Buckingham, Que., more especially pulp for export to foreign countries, now wants power to erect paper mills in the same vicinity to manufacture this pulp into paper. It asks for the power to increase its capital stock, and wants the limitations on its borrowing powers removed.

Oil discoveries in Northern Canada seem responsible for the application by Messrs. A. J. Gillis, K. J. Robinson, R. B. Young and W. A. H. MacWillie for a franchise by the Mayo Valley Railway, Ltd., for a railway from the junction of the Mayo and Stewart rivers in Yukon territory to the McQueen River.

The London and Lake Erie Railway and Transportation Co. ask for power to dispose of right-of-way and all property with the written consent and approval of the Fidelity Trust Co. of Ontario, trustees for the bond holders.

The Montreal, Ottawa and Georgian Bay Canal Co., asks an extension of its time for commencing these great undertakings from May 1st, 1921 to May 1st, 1924, and of completing them from May 1st, 1927, to May 1st, 1930.

## Soldiers' Insurance

In order that information regarding the Returned Soldiers' Insurance Act may be made more easily accessible, arrangements have been made to establish insurance sections in connection with local offices of the Department of Soldiers' Civil Re-establishment throughout the country, Major C. B. Topp, who is in charge of the administration of the Returned Soldiers' Insurance Act under the Pension Board, has left for western Canada in connection with the organization of these sections, and will address meetings of returned soldiers at the principal points. Insurance is now being applied for at the rate of about \$250,000 a week, the total amount in force being approximately \$6,000,000.

The Dominion government will attempt to recover from all manufacturers selling direct to the retail trade the amount of the two per cent. manufacturers' tax, which, under the War Revenue Act of 1915, and amendments thereto, they are supposed to collect from their customers at time of sale. Many manufacturers have refused to pay this impost since May 19 last, and the government purposes to make a test case of the matter. The action of the government will affect thousands of manufacturing retailers all over Canada, including confectioners who sell at retail confectionery of their own manufacture, custom tailors, dressmakers, milliners, furriers, tinsmiths and men in other lines that will readily suggest themselves.

Sir Henry Drayton, Minister of Finance, has been appointed Acting Secretary of State in place of the late Right Hon. Arthur Sifton, and will continue until the time, now very indefinite, when the vacant portfolio is filled.

The Nigerian Customs Department has issued a comprehensive and well-illustrated report on the development of trade relations between Canada and Nigeria. It is stated that regular steamship communication between the chief Nigerian ports and Canada is essential to expeditious growth of Canadian trade with these markets, but it is equally important that the rates between these ports and Toronto and Montreal should approximate those for carrying between these ports and the ports of the United Kingdom. It is suggested that this would lead to the establishment of branches in Canada by British merchants now engaged in the West African trade, an increased supply of Canadian manufacturers to these places, and the establishment of Canadian firms in West Africa.

## Report of Insurance Department

Influenza was more costly to life insurance companies operating in Canada during the year ending March, 1920, than was the war. This information was given in the annual report of the Superintendent of Insurance, tabled in the House on Wednesday by Sir Henry Drayton. The Superintendent of Insurance, G. D. Finlayson, stated in his report that one of the outstanding features of the insurance business during the year ended March 31, 1920, was the excessive mortality in the early months, due to the influenza epidemic. Net death claims during the year totalled \$16,927,345, of which \$785,331, or 4.64 per cent., were due to the war, and \$2,995,228, or 17.69 per cent., due to influenza.

The Bank of Hamilton has declared a bonus of ½ of 1 per cent., in addition to its regular quarterly dividend of 3 per cent.

## MANITOBA'S FIRE LOSSES \$2,276,000

Report on Fires in 1920 Suggests Stricter Control—Sanford Evans Says Present Readjustment Period is Unprecedented

(Staff Correspondence.)

Winnipeg, February 17, 1921.

THIS week Winnipeg is in the grip of a real western blizzard—the first bad one of this winter. Business is fairly active on account of many conventions and the thirty-third annual Bonspiel, still in progress.

A. M. Fraser, one of the large taxpayers of Winnipeg, is agitating for some change in the taxation system of the city, and has sent a statement with reference to some of his properties for the year 1920 to each member of the city council. The figures of Mr. Fraser show that in the year 1920 taxation on four central properties took 42 per cent. of the net income, and that on six other central properties taxation took 65 per cent. of the net income. No allowance of any kind was made for depreciation in making these computations and no allowance was made for interest. Mr. Fraser's contention is that taxes of this kind must be based on the net revenue from the properties and not on the assessed value. He admits that it is quite proper to tax the unearned increment, but argues that this should be collected when the property changes hands when there are funds to pay the tax. The results of the present system are seen in many municipalities in western Canada where immense quantities of land have come into the possession of the municipalities, which at the same time are unable to secure enough actual money to carry on.

Mr. Fraser also urges that if a municipal income tax is imposed, which he favors, the disposition of this money ought to be guarded. It should not be treated as supplementary revenue, but should be used for designated purposes such as education, highways, etc.

### Insurance Developments

The provincial government, now in session, had presented to it this week the report of fire protection. It stated that the premiums collected during the year amounted to \$11,656,309. Losses paid were \$3,501,506. There are 31 licensed insurance companies doing business in the province and 135 registered companies are doing business under the Manitoba Insurance Act. The very heavy increase in the premium income, it was stated, would offset much of the increase in the amount of the losses which had been paid. The opinion that some sort of qualification should be required from insurance agents before a certificate of authority is issued to them, is gaining ground, and it is anticipated that it will not be long before strong representations will be made to the legislature that the grounds for the cancellation or refusal of an agent's certificate of authority be considerably increased.

There were 1,739 fires; the total loss is estimated at \$2,276,261; the increase in numbers is 136 and the increase in the loss \$641,399. In Winnipeg there were 893 fires and in Brandon 130. The loss ratio per capita of the province based on an estimated population of 613,000 amounts to \$3,713, against \$2,667 for the previous year. There were 24 deaths from fires. The report stated that 75 per cent. of the fires were due to "sheer carelessness or ignorance." Plans are under consideration for the creation of a greater interest in fire prevention.

### Cold Storage Enterprise

The minister of agriculture, Hon. G. H. Malcolm, has announced that unless private companies who are going in for cold storage establishments take the matter up at once, that the government would have to go in for the establishment of cold storage themselves. The Prairie Cold Storage Co. are therefore pushing their enterprise, which has a capitalization of \$2,000,000, and expect to secure the necessary capital in England.

Ex-Mayor W. Sanford Evans addressed the members of the Canadian Credit Men's Trust Association and the local branch of the Manufacturers' Association this week on the business outlook, strongly advising a "get-together attitude in all lines of business. Mr. Evans said: "This present period of readjustment is not preceded in the world's history; it has been the lot of nations. But without getting together, without co-operation and cohesion, no nation can go ahead in a commercial or any other sense. The get-together spirit is the very quality to be fostered if those many questions which vitally affect the commercial life are to be solved and placed upon a satisfactory basis. But while readjustment may be inevitable and performs a natural economic function, it need not prove disastrous to business. On the contrary, it will eventually place conditions upon a more stable basis." Mr. Evans believes Canada will emerge quickly. Already there are discernible signs of her getting around that corner which the commerce of the country commenced to turn with the beginning of the readjustment period.

### STANDARD BANK STATEMENT REFLECTS STEADY EXPANSION

In business for forty-six years, the Standard Bank of Canada has built up a substantial banking business, which is reflected in the annual statement just made public. As the result of steady expansion arrangements have been made for larger capital and reserve. With the payments already made, the capital now stands at \$3,802,001, compared with \$3,500,000 a year ago, while the reserve fund is \$4,800,000, as compared with \$4,500,000.

Of special interest to shareholders will be the satisfactory character of the profit and loss account. With larger capital and reserve at its disposal, there has been a substantial gain in net profits, and for the year these amounted to \$784,369, up from \$776,310 in the previous year. In addition there was a balance carried forward of \$360,537 and premium on new stock of \$226,500, which, when added to profits brought the total available for distribution up to \$1,371,407. Of this amount \$100,000 was written off bank premises, \$300,000 was transferred to reserve, and dividends at the increased rate of 14 per cent. were paid. The amount carried forward was \$378,643.

With the growth that has occurred in the bank's business, the current loans now stand at \$50,896,884, as compared with \$33,749,339, at the beginning of the war period. The total assets have gained to \$90,183,979, as compared with \$53,822,121 five years ago. Of the total assets, liquid assets amount to \$36,437,353, which are equivalent to 45 per cent. of the liabilities to the public, while actual cash on hand, as represented by coin current, Dominion notes and deposits in central gold reserves, amount to \$15,152,827, equivalent to 18 per cent of public liabilities. The gain in the interest bearing deposits is particularly striking, these now amounting to \$53,011,997. This compared with \$49,940,378 at the end of the previous year and \$33,986,616 five years ago.

The following comparison of some of the principal accounts makes the present condition of the institution more clearly apparent:—

	1920.	1919.	1913.
Total assets	\$90,183,979	\$93,405,405	\$45,661,015
Cash assets	15,152,827	16,425,123	6,232,972
Liquid assets	36,437,353	37,412,187	13,726,092
Current loans	50,896,884	52,463,278	30,506,319
Total deposits	67,389,710	74,019,022	35,018,592
Circulation	6,134,000	6,766,218	2,652,643
Capital	3,802,001	3,500,000	2,860,240
Reserve	4,800,000	4,500,000	3,760,240

The falling off in general business is reflected in the current loans, demand deposits and circulation, but the condition of the other accounts indicates that the bank is ready to take care of the commercial demands when the revival comes.

### THE OUTLOOK AT OTTAWA

THE fifth session of Canada's 13th parliament opened at Ottawa on Monday, under very favorable economic circumstances. The wave of unrest which followed the war has passed away. Everywhere a lack of interest in public affairs is becoming more evident, especially as regards those not directly relating to Canada. The radical stage has passed, and it is now a question how far public opinion will shift towards conservatism.

In the political field the government's position is not nearly so favorable. Several seats have been lost at by-elections, and the Liberals and Farmers, the only two strong groups in opposition, bid fair to form a working alliance. The Unionist government was elected in 1917 as a war administration, but has continued in power for over two years after the armistice was signed, the change in name to the "National Liberal and Conservative" party last year being followed by the loss of many Liberal supporters who felt that the change was a return to Conservatism.

It is to be expected, therefore, that contentious legislation will be avoided. The speech from the throne refers non-committally to unemployment insurance and to trade, and the affirmation of the principle of protection calls for no surprise. The only other legislation presaged is a bill to abolish the Conservation Act, and one or two other colorless measures.

In spite of this aim of the government, however, the session may prove a stormy one. The opposition parties have everything to gain and little to lose by aggressiveness. Recent electoral successes have strengthened their hand, and a general election will be brought about if possible. Moreover, apart from the government's so-called "usurpation" of power there is much else on which criticism may be based. The results of operation of the national railways have been conspicuously unsuccessful, and the merchant marine service may soon prove to be a financial loss as well. The complicated system of taxation also has political possibilities from the viewpoint of the opposition.

### THE FORDNEY TARIFF MEASURE

ON Wednesday the United States Senate passed by a vote of 43 to 30 the "Emergency Tariff Bill," which puts a tax on imports of certain farm products. As it is understood that President Wilson will veto the measure, there is little reason to believe that it will ever become law, since if all the Senators, Republicans and Democrats, who are known to favor the bill, were present and voting, they would still be eight or ten votes short of the necessary two-thirds to pass it over the president's veto. The bill, however, may be taken as an indication of what will happen when the Republicans get control of the house next month.

Among the new duties added by amendment were 30 cents a bushel on flaxseed, 10 per cent. ad valorem on shoes and other finished leather products, 60 cents per gallon on olives in bulk and 70 cents on olives in containers of less than five gallons. The duty on apples was raised from 20 to 30 cents per bushel, while a duty of two cents per pound was placed on lemons. A duty of two cents per pound was also voted on condensed, preserved and sterilized milk, and a duty of five cents per pound on sugar of milk. Cherries are taxed 4 cents per pound. An amendment by Senator Spencer of Missouri to place a duty of two cents per pound on sunflower seed was voted down. The duty on finished leather, which is compensatory, was offered by Senator Lodge. Two wool amendments for the benefit of the woollen industry were also voted down because, in the opinion of the supporters of the bill, it would have tended to lower the other duties on wool previously voted into the bill.

As the bill goes to the house for conference, it carries, in addition to the duties already named, a duty of 40 cents per bushel on wheat; 20 per cent. ad valorem on flour; 15 cents per bushel on corn and maize; 2 cents per pound on beans; 3 cents per pound on peanuts; 25 cents per bushel on potatoes; 2 cents per pound on cleaned, 1 1/4 cents on uncleaned rice and 1 cent per pound on rice flour, rice meal and other rice products. The tax on cattle is 30 per cent. ad valorem; on sheep of under one year of age, \$1, and over

one year \$2 per head; 2 cents per pound on fresh or frozen beef, veal, mutton, lamb and pork, and 25 per cent. ad valorem on preserved and prepared meats of all kinds not specified in the bill. Cotton with a staple of 1½ cents or more is taxed 7 cents per pound, as are also goods made of the cotton, while wool taxes vary according to the grade from 15 cents to 45 cents per pound. Sugar is taxed one cent per pound in addition to the present duty. Cheese and its substitutes, 8 cents per pound; butter, 8 cents; fresh milk, 2 cents; and cream, 5 cents per gallon. The new tobacco taxes carried in the bill vary from 35 cents per pound for unstemmed filler tobacco to \$3.50 per pound for stemmed leaf tobacco.

#### THE SMOOT SERVICE CORPORATION, LTD.

ONE call is the plan on which the Smoot Service Corporation, Ltd., Toronto, plans to sell securities. This firm is an offshoot of the Smoot Corporation, Buffalo, which has been in operation for some time. They are to be underwriting corporations, but for the present the Smoot Service Corporation is confining its activities to selling its own stock. The opportunity to invest in an underwriting house is not new in Canada, but previous enterprises of the kind have not been successful. As "one call" presumably means one opportunity to buy stock, the method may meet with the approval of prospective investors who have hitherto been the victims of persistent salesmen.

The plan the Smoot Corporation works on is, first to organize a local mortgage company—interesting some of the leading men of the city in the enterprise, who not only buy stock but become directors in the new "mortgage" company. The Smoot Corporation then push the sale of the preferred stock of the mortgage company, devoting the entire time of the local organization to the placing of the stock until the matter is cleaned up. This selling campaign, they state, might cover a period of eighteen months. The preferred stock of the local mortgage corporation is sold at 100—officials of the company state the mortgage corporation receives 100 cents for every \$1.00 of preferred stock sold—with no deduction for brokerage or promotion expense. Each purchaser of preferred stock is required to buy an equal number of shares of common stock—of no par value—at around \$50 per share—from the proceeds of the sale of this common stock the promotion and brokerage expense is paid—balance goes to the company.

One company of this kind has been financed in Buffalo. It commenced business under the name of the Frontier Mortgage Corporation, and started with an authorized issue of \$5,000,000 preferred stock—75,000 shares, no par value, common. Through the steady selling of stock, the company is constantly fed with new money, and its ability to buy short-term mortgages is supposed to about keep pace with receipts from sale of stock.

#### THE OPERATIONS OF A BOND HOUSE

BECAUSE of its private nature very little is known of the operations of an investment firm. Some years ago a Canadian underwriting house, which had a fairly large list of shareholders, made public the results of its operations to the extent of a brief annual report. This very soon ceased, however, and now the business of security underwriting and brokerage is entirely conducted by private concerns, having only a few shareholders, and strictly avoiding all publicity as to the profits of their business. This is true of Great Britain and the United States also.

Once in a while, however, some special occasion leads to publicity. This has just taken place in the case of the prominent bond house of Morris Bros., of Seattle, a firm which is well known in Canada, and which, as a matter of fact, had just arranged a deal with Edmonton before its failure a few

weeks ago. It is now in the hands of a receiver, and in a statement of its affairs, issued on February 1, assets of \$2,429,966 and liabilities of \$3,166,977 were shown, leaving a deficit of \$737,011. The principal assets were: Bonds, \$1,337,209, of which \$601,791 were collateral to bank loans, \$196,000 collateral to interims, and \$59,500 segregated for delivery; accounts receivable, \$266,048; cash in banks, \$303,376; bonds held by banks on repurchase agreements, \$265,900.

The chief liabilities were: Interims, unsecured, \$1,918,650; notes payable, \$478,000; secured interims and payables, \$200,200; and repurchase agreements, \$234,378.

#### A JOINT OWNERSHIP PLAN

WHILE the spotlight of public attention has to a large degree been removed from questions of industrial relations, evidence regularly comes to hand of new efforts towards an improved basis. One of these is the "Extra Compensation and Stock Ownership Plan" adopted by stockholders of the International Harvester Company and its subsidiary companies in Canada and the United States. It is designed to "strengthen the community of interest between the company and its employees, and to reward continued and efficient service," and is, in other words, "employee ownership in the company's stock." It is distinctly an incentive for the company's employees to contribute their full share towards the success of the business, for it cannot be doubted that a substantial part of each year's earnings depends on intelligent, unflinching team work throughout any such organization.

The International Harvester Company will set apart out of its earnings for 1920 and annually thereafter, for the benefit of those of its employees and employees of its affiliated or subsidiary companies in the United States and Canada who are not employed in any managerial or executive capacity (subject to certain conditions), an extra compensation fund which will equal forty (40) per cent. of the company's profit for the year in excess of seven (7) per cent. upon the invested capital in the business of the company.

This extra compensation fund is to be distributed to the said employees in the proportion which the actual earnings of each employee for the year bear to the aggregate earnings of said employees.

Arrangements are being made in London whereby all electric lights in the city will wink thrice to notify citizens when a burglary or hold-up is pulled off.—An alternating current, no doubt.

\* \* \* \* \*

A decrease of \$5,495,449 in the national debt was achieved in January. This is not however, a cue for tax reductions, for tax receipts are bound to fall of their own accord through the decline in prices.

\* \* \* \* \*

#### PROTECTING THE SHORTS

An old, honorable and ultra-conservative corporation was holding its annual meeting. A few stockholders straggled into the board room who were not readily recognized by the corporation's keeper of the inner portals. This fact was conveyed to the chairman and, lest some hitch occur in the plans of the annual meeting, he decided to poll the proxy and stockholders present.

Starting in at the first row and singling out each individual, the chairman asked how many shares of stock, held by whom, the visitor represented. "Five thousand shares of A. B. C. and Co.'s," replied one. "Two thousand shares of the estate of William Spivens," replied another. All answers were satisfactory until the chairman reached a small individual, the last man in the last row.

"May I ask whom you represent?" inquired the chairman.

"Yes, sir, you may," was the response. "I represent the short interest."

## PERSONAL NOTES

J. M. BOOTH has been admitted to partnership of the well-known insurance agency of Smith, Mackenzie, Hall and Hunter, Toronto. Mr. Booth's connection with the company dates back to 1905.

C. J. YORATH, formerly finance commissioner of Saskatchewan, Sask., has accepted a position with Edmonton, Alta., as commissioner of public utilities and assistant finance commissioner.

C. B. TOPP, who was appointed in August last to undertake the administration of the Insurance Act, is well known in Canada. Prior to the war he was a member of the staff of the Toronto Mail and Empire and in August, 1914, was sent overseas as war correspondent for that paper, a position which he filled until May, 1915, when he enlisted. Mr. Topp returned to Canada in December, 1918, and was appointed secretary of the Repatriation Committee of the Privy Council, in which capacity he was sent to England in 1919. When the business of the committee was closed in January,

1920, he became a member of the Board of Pension Commissioners and has been with the board since that time.

CHARLES LEE SCOVIL, who had been with Spencer Trask and Company, investment bankers, New York, for many years, as advertising and sales manager, has resigned to become first vice-president of Medley Scovil and Company, Incorporated. Mr. Scovil was born and educated in Canada.

G. M. BOSWORTH, chairman of the Canadian Pacific Ocean Service, is now en route to Vancouver, where he will board the "Empress of Asia," bound for the Orient. Mr. Bosworth is to make a tour of inspection in Japan, China and the Philippines, where he will also make the overland trip to Peking and visit Korea. The trip will extend over a period of three months.

CHAS. H. GUTHRIE, who has been in the service of the Canadian Surety Company for some years past, latterly holding the position of assistant accountant, has been appointed to the newly-created office of cashier. JOHN W. FREEBORN, formerly inspector, has been appointed to the newly created office of supervisor of claims department in the service of the company.

## OBITUARIES

LIEUT.-COL. F. W. HIBBARD, K.C., chairman of the Quebec Utilities Commission, died in Montreal recently after an illness of many months. He was born in Ireland in 1865, and came to Montreal in 1885.

JAMES GILBERT CANE, of Toronto, passed away recently after an illness of only one week. As head of the firm of J. S. Cane and Company, Mr. Cane was one of the best known lumbermen in the Dominion, having been engaged in the lumber trade for more than forty years.

A. B. SMITH former superintendent of construction of the Great Northwestern Telegraph Company and from 1912 to 1914 manager of telegraphs of the Grand Trunk Railway system, died in Montreal recently. He was 72 years of age.

CHARLES HARRY SCOTT, of Egan, Scott and Chambers, insurance brokers, Ottawa, died on February 16th after a month's illness. He came to Canada twenty-five years ago, and five years afterwards entered into partnership with the above firm. He was fifty years old.

DAVID H. HAYS, only brother of the late Charles M. Hays, former chairman of the Grand Trunk Railway, passed away at Pasadena, California, recently, in the 64th year of his age. Mr. Hays had been for some years past in the real estate and insurance business at Prince Rupert, British Columbia, but was compelled to retire owing to ill-health, and took up his residence in California.

## UNION TRUST CO.

In 1917 when the Union Trust Co., Toronto, made a stringent revaluation of its assets, and later James K. Pickett took charge as general manager, it was generally considered that the company had taken commendable action, and the reports since issued justify the contention. The net profits for last year amounted to \$110,141. The combined capital and guaranteed mortgage loans stands at \$4,891,376 as compared with \$4,721,637 at the beginning of the year, a net increase of \$169,739. A considerable sum was reinvested in new mortgages at the prevailing high rates and the expenses connected with such investments were written off in the year. The full advantage of the higher rates of interest on mortgage loans will be seen in the future earnings of the company.

Out of the net earnings of \$110,141 there were paid quarterly dividends amounting to \$70,000, the same as last year; \$13,342 in taxes as compared with \$10,446 in the previous year; \$6,632 on account of extraordinary expenses including the fitting up of new head offices and safety deposit vaults. The balance of the year's earnings \$20,166 was added to the profit and loss account bringing it up to \$96,835.

The trust deposits have increased by \$91,358 and now amount to \$1,266,146. Over 36 per cent. of these, or \$463,231, is invested in high class liquid securities such as Dominion, provincial and municipal securities and cash. The directors have strengthened the company's position by setting up a contingent reserve of \$50,000, besides making reserve appropriations for depreciation in values of bonds, debentures, mortgages and real estate.

At the annual meeting last week the president, Henry F. Gooderham stated that the year 1920 was marked by activity and development in all departments of the company's business especially so since moving into more commodious offices at the corner of Richmond and Victoria Streets, where all departments are on the ground floor of the building, conveniently arranged for the purposes of the trust company. The board of directors was further strengthened by the election, in addition to last year's board, of two well known and influential Toronto men in the persons of John B. Laidlaw, manager of the Norwich Union Fire Insurance Society and S. R. Parsons, president of the British American Oil Co.

## ONTARIO EQUITABLE HAS MILLION BUSINESS

During the six weeks when the Ontario Equitable Life and Accident Insurance Co. was writing business in 1920, it placed \$1,053,300 of new business upon its books. At the end of December gross assets were \$174,984, and surplus \$99,632, leaving a net surplus over all liabilities and capital stock of \$36,072.

## LIFE INSURANCE WITHOUT MEDICAL EXAMINATION

*(Continued from page 6)*

may safely conclude that the experiment they have made has proven eminently successful.

"In one particular, the British companies pursue a different course from that common in this country, and one that, perhaps, most of us would hope to see changed to the American system in the not far distant future. I have reference to the exceedingly liberal spirit which exists amongst the actuaries, at any rate, of the various insurance companies of this continent, and the freedom with which they exchange any information that comes into their possession, whether from the records of their own companies or through any investigation that may be made.

"In consequence of the established custom in the old country, the details of the regulations in force regarding non-medical business are not available for the guidance of other companies. Nevertheless, I wish to acknowledge the very generous response, within prescribed limits, of the actuaries of the British companies to the inquiries addressed to them. We may very well surmise, however, that the safeguards that are likely to be imposed by companies not experienced in this class of business will be more stringent than the circumstances really necessitate, and more rigorous than those actually in use by those companies having considerable experience with this system of insurance."

Mr. Reid then outlined the experience in the United States, where, after the Prudential of Newark had started on the non-medical examination plan, following the example of the Prudential of London, the practice of examining applicants grew up gradually. The extent of industrial business on this continent, has, however, made it necessary to accept small risks without examination.

**Proposed Regulations for Non-Medical Insurance.**

Mr. Reid then suggested the following regulations to govern the development of non-medical business should it prove acceptable to the companies:—

1. The main point of difference will be that the option at the outset is not left to the applicant to say whether he will or will not be examined. If his application comes within the limits upon which the company accepts risks without examination, there will be no examination unless specifically requested on account of some information in the application which indicates necessity for such further action.

2. The business will, in all probability, be conducted by a considerable number of companies acting more or less in harmony, so that no one company will be unduly overloaded.

3. The business will be limited to policies of \$1,000 generally, although this may be extended to \$1,500 or \$2,000 by individual companies or in special districts.

4. A report made by an inspector, independent of the company altogether, will cover habits, occupation and physical appearance of the applicant, with little or no reference to the financial circumstances.

5. Limitation of age to 40 or 45.

6. Some of the companies propose to accept married women without extra or lien. Others will not accept on any terms, and in at least one case such risks will be accepted with a lien, depending as to amount and duration upon the plan of insurance.

7. Chemical urinalysis will be made in the case of male risks only. Some companies will not require urinalysis even for male risks.

8. With the precautions taken the companies expect to obviate the necessity of making a special dividend class.

9. It is expected that a system will be worked out which will place a check upon any applicant applying to a number of companies for non-medical insurance.

10. One company will insert the clause referred to above as contained in weekly premium policies now being issued in

Canada making the policy void during the first two years in the event of the insured, previous to the date of application, having had consumption and the other diseases and disorders specified.

**Conclusion**

"A general survey of the actual developments of the non-medical system seems to me to fully warrant a trial of it on a moderate basis, with the reasonable expectation that, both as to age limitation and amount, we may, in the future, expect a considerable extension.

"It should, undoubtedly, popularize insurance in many directions, and more especially in the case of female risks. It will enable agents to do a profitable business in out-of-the-way districts, which must now be largely neglected. There may be no expectation that the cost of the business will ultimately be reduced, but, as already intimated, it will shift the cost from the strain of the first year, which is now so heavy a handicap to the companies in the prosecution of the business to the limit of their ability.

"Deliberately fraudulent cases should, with the present standing of the life underwriting forces, be largely eliminated at the outset, and these that are accepted may be much more successfully resisted in the event of a claim arising than would be the case if there had been a medical examination. This is a well established fact in the experience of the companies using the non-medical system.

"There is one serious drawback. In the discussion on Mr. Nicoll's paper, to which such full reference has been made, it was pointed out that the examination was almost as much protection to the applicant as to the office. That is not true in any bona fide case. In another sense, however, the system does remove a safeguard which every man should adopt for himself, but which is usually adopted only when applying for a policy of life insurance. I refer to the fact that many men find some defect in their condition only when they have made application for insurance. The ideal condition would be an annual examination, but even, as few people will consult their dentist regularly except when trouble arises, so few people will voluntarily submit to close medical examination unless there is some form of compulsion.

"No attempt has been made to suggest refinements which, in any event, would only be guess work, and would probably militate against the feasibility of the scheme. Thus, for example, the plan might be limited to limited pay life and endowments, or the English practice of a temporary lien for a few months, or the first year, might be made. It is undoubtedly a case where, with proper safeguards, no seriously unfavorable experience will be realized and yet a definite trial may result in great benefit to the business generally. The first two policy years will doubtless show the most unfavorable results, but these should not be allowed to interfere with the prosecution of the scheme to a point where very definite conclusions may be reached. In all probability the extra mortality experienced will be offset by the saving in initial expenses. Even if the ultimate additional mortality imposes a slight additional burden, but spread over a period of years, this should not deter any company from embarking upon a plan which has so many advantages in other directions. It is the hope of those who are already prepared to engage in the business or are now engaged in it, that before long all of the companies will have it in operation."

The Canadian Government Merchant Marine announces a general reduction in cargo rates between Canadian Atlantic ports and Great Britain, becoming effective immediately. The former rate in effect for general cargo to Britain from Halifax and St. John was 50 cents a cubic foot, or \$1 per hundred pounds; the new rate will be 40 cents a cubic foot, or 75 cents per hundred. General cargo covers practically all goods handled from this country to the Old Land. Exports only are affected.

## AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

399 Branches in Canada, extending from the Atlantic to the Pacific  
 New York Agency: 63 and 65 Wall Street: W. M. Ramsay and C. J. Crookall, Agents  
 London, England, Office, 53 Cornhill: J. B. Donnelly, D.S.O., Manager  
 Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

BANK BRANCH NOTES

Announcement has been made by the Royal Bank that in future the business of the institution in Alberta will be supervised from Calgary. This means that a number of officials of the bank will be transferred west from Winnipeg, and that a new department will be created in Calgary. The Royal Bank has at the present time 47 offices in Alberta, and with the opening of a supervisor's department in Calgary, it is believed that this number will be increased in the near future. The bank has 107 offices in Saskatchewan. S. L. Cork, who has been for several years the assistant supervisor in Winnipeg, will be in charge of the new office in Calgary. This will, however, be a temporary arrangement, and in the course of a few months he will return to Winnipeg. The bank has not yet decided who will be in permanent charge of the Calgary office. The Royal Bank has three offices in Calgary, with suitable accommodation already for a superintendent's department. J. A. Walker and J. G. Nickerson are in charge of the main office of the bank there.

Canadian Bank of Commerce announce the following changes: A. E. Arscott has been appointed assistant manager at the Ottawa branch; F. S. Stevens and W. S. Bogue, both formerly on the Victoria staff, have been transferred to Mexico City and New York, respectively; G. A. Stubbins, accountant at Lloydminster, Sask., has been moved to the Shaunavon branch; A. T. W. Tanner, of the Wilcox, Sask., branch, appointed to Lloydminster; D. G. Kennedy, who recently returned to Halifax from the outposts of Newfoundland, has been moved to Ontario, and promoted to the management of the Sault Ste. Marie branch; D. B. Falkner, inspector of Maritime branches, recently returned to the department after a sojourn of a month or more in St. John's, Newfoundland; C. E. Stock, of the Guelph branch, has been transferred to the Walkerton branch; J. I. Coil, of St. John, N.B., has been transferred to the Halifax branch.

The Provincial Bank will shortly move into its new offices at Loiselleville, Ont.

The Bank of Hamilton are now occupying their new premises at the corner of Ouellette Ave. and Chatham St., Windsor, Ont.

The Imperial Bank are planning to erect a new branch in Harrow, Ont.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended February 11, 1921, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total	1920.
Feb. 11	11	19	7	1	2	3	0	2	1	46	21
Feb. 4	6	15	0	0	4	4	13	0	0	42	18
Jan. 28	12	20	4	1	4	4	3	1	0	46	..
Jan. 21	15	35	6	3	5	1	4	2	0	71	20

EXCHANGE QUOTATIONS

Quotations of exchange on the United States and European countries as at February 17, 1921, with comparisons, are given below. The Canadian figures are supplied by the Imperial Bank of Canada, while New York quotations are given by the National City Co., Ltd., Toronto:—

	Par.	Can., Feb. 17.	N.Y., Feb. 17.
London, cheque	4.8666	4.49	3.90 1/4
France	19.30	8.59	7.36
Germany	23.82	2.01	1.70
Belgium	19.30	8.96	7.66
Italy	19.30	4.26	3.68
Switzerland	19.30	19.20	16.85
United States	1.00	14 1/16 p.	..

THE TRADE SITUATION

The easing off in money conditions is already having its effect on industry, and credit is now available in fair volume. Credit at this season of the year is probably more in demand than at any other period, and as the banks are the chief dispensers thereof, mercantile borrowers in a number of instances, have to depend upon them for their yearly credits, some of which are already reported to have been made at 6 1/2 per cent. Commercial paper has been discounted at 6 1/2 to 7 per cent. as to names and nature of account. A few gilt-edge notes have been discounted at 6 per cent. Call loans are steady at 6 1/2 to 7 per cent. Quite a few real estate loans have been put through recently at 7 to 7 1/2 per cent. Nothing, said a large lender outside of the banks, can be had under 7 per cent.

A slight improvement in business is reported by "The Trade Bulletin," Montreal, last week. Orders have increased a little in both woollens and cottons, due to prices getting down to more normal levels. A large business has been done by retail clothing establishments, prices having been sufficiently reduced to insure a big turnover. Quite a few orders have been received from the Lower Provinces, Manitoba, and Saskatchewan, consisting of underwear, chiefly woollen, and singular enough, sorting goods of heavy texture. A wholesale dealer said: "About this time we usually begin to ship spring goods, but evidently country storekeepers have bought sparingly of last year's fall and spring goods, owing to high prices, which they have run out of, and can now be bought at lower prices." A traveller who has just returned from a trip through Ontario states that the stores in that province were never known to have such light stocks of dry goods at this season of the year, as it is estimated they are 10 to 15 per cent. smaller than ever before known.

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended February 17, compared with the corresponding week last year:—

	Week ended Feb. 17, '21.	Week ended Feb. 19, '20.	Changes.

# Banking Opportunities and the Aftermath

Part Played in War Loan Campaigns Should Be Followed Up By Guidance of Depositors Regarding Investments—Expansion of Business Also Means New Firms and New Accounts

By "SEMPER PARATUS"

IT cannot be said of any class in the community that during the war it did not respond to the demands of the situation, but the real service given by the bankers during those trying years has to a large extent escaped the notice of the public. Not only did the members of the bank staffs respond nobly to the call to arms, but those who for one reason and another were unable to go to the front did a splendid work at home.

I refer particularly to the floating of the war loans. During the several war loan drives the bankers rendered invaluable aid to the salesmen in making those drives a success. Every bond the banker advised his client to buy meant the withdrawal of a deposit, but he was far-sighted enough to see that this temporary loss to his branch was a permanent gain to the country as a whole, and that in the long run he would participate in that gain. But his work in the investment field is not over. It has only just begun.

## Ninety Per Cent. Were New to Bonds

It is not an exaggeration to say that prior to the floating of the war loans 90 per cent. of the purchasers of those loans had never seen a bond, much less owned one. The several campaigns did a splendid work in educating those people to the advantages of safe investments other than mortgages. The purchasers of Victory bonds in the last few years are still saving money, but no Victory loan salesman is coming around to suggest that they buy bonds. Our monthly bank statements testify to the amount of this money that is now held by the public awaiting more profitable investment. This amount will be tremendously augmented when in 1922, 1923 and 1924 the Victory loans mature and are paid, as we are told they will be, as they mature. The figures for these maturities are as follows:—

December 1st, 1922	-----	\$194,842,150
November 1st, 1923	-----	194,881,800
November 1st, 1924	-----	106,365,100

## Many Are Persuaded to Sell

The owners of these funds, and their names appear to be pretty well known to the financial fraternity, are being besieged by salesmen for all sorts of "get-rich-quick" stock promotions and many investors have fallen victims of the arguments of these optimists. It is here that the bankers' responsibility comes in. Usually the damage is done before the banker knows anything of the transaction. His first intimation of it is when a cheque on his savings department is presented for payment. The banks should advertise more widely that they are in a position to sell bonds to those wishing to buy, and also to obtain authentic information and give worthwhile advice on any other investments which their clients contemplate making. They thus place themselves in a position to protect the hard-earned savings of their depositors from the "100-to-1 shots" that are being offered to them under the appellation of "sure things." We cannot too strongly urge that this advertising be increased, both through the press and by direct methods. It is a duty and a profitable duty that the banks owe to the public.

## Bank Should Advise Investors

A number of the banks have established bond departments to look after this business. In other banks a connection is made with some reputable bond house so that the country investor has exactly the same investment opportunities and advantages as the moneyed man in the city. The country banker should make a study of municipal and government bonds so that he can give real advice as to the relative value

and suitability of the various offerings to the client's needs. To do this requires at least a superficial knowledge of municipal finance that will enable him to pass judgment on municipal statistics. This knowledge enables the banker to talk and advise his customer intelligently. He should also keep himself thoroughly posted on the main industrial stocks and bonds that are being offered. In this connection there should be some restriction on the use of the words, "First mortgage gold bond," which are used to dazzle the eyes and dim the intelligence of the man to whom "First mortgage," "gold" and "bond" are the hall-marks of safety, and who is apt to take these expressions at face value instead of looking further into the real security behind the proposition. It is much to the credit of several of our financial journals that they have done much to protect the public from the many "promotions" that are being put out almost daily, but there are still many people who do not read these papers but who can be readily reached by the banker in their home town. All the "blue-sky" laws in the world will not stamp out the fake promotions half as quickly as the determined opposition of the banking fraternity to everything that will not pass the acid test of their good judgment.

## To Help Along New Business

There is another field of usefulness and incidentally of profit which the business activities of the war have opened up for the banker. For the last five years the demand for goods regardless of price has not only stimulated many of the old-established factories to increase their equipment but has resulted in the establishment of many new factories in almost every line. These new concerns were started for the most part by employees of the older companies, who saw, or thought they saw, in the situation an opportunity to start in business for themselves with every likelihood of success. The owners of these new plants were in the majority of cases comparatively young men who had acquired a lot of practical information about the business, had saved from their earnings a few thousand dollars, and were blessed with sufficient nerve and self-confidence to make a real start in life. These men are willing to work, and work hard, for success. They deserve success, but unless they are carefully watched and diplomatically advised, they are very apt to founder on one of the many rocks that lie in their paths during the period of reconstruction or rather business reorganization. It is here that the banker's duty and opportunity for profit comes in. If he can pull these new concerns through the next year he will not only be making good, satisfactory, and, in time to come, profitable accounts for his office, but he will be doing a real national service.

## An All-Round Business Adviser

In the old days a banker was looked upon as a reliable and competent adviser in almost every kind of business. Latterly the banker has lost this position. I say this with full knowledge of the conditions whereof I speak. It is a most regrettable condition. How often have we heard people speak of "business men and bankers." Bankers through their opportunity to see behind the scenes in so many different kinds of business should be the very best business men we have, instead of being, as in so many cases they are, the mouthpieces of a head office many miles away, or the buffer between that head office and its local customers.

Becoming a competent adviser is not a gift bestowed on a man with his appointment to the managerial chair. It is the result of study of the business of his customers through practical talks with the customers supplemented by his own observation. The business man worth while is always ready

**Make Your Money Work to Earn More Money for You**

Make it earn 4% per annum in a Savings Account instead of less. You wouldn't refuse an increase in your wages, would you? Then why refuse an increase in the interest on your Savings Account? It's as simple as A B C.

The Union Trust Company will pay you interest at 4% per annum, compounded regularly. Come and open your account here. If you cannot conveniently call, open your account by mail. Deposits promptly acknowledged and withdrawals by mail accurately and safely despatched.

**Every Man Intends to Make a Will**

But when one feels fit and eager for the day's work, can make the ninth hole in four, and help carry a canoe around a three-mile portage—it's hard to contemplate the idea of a WILL with any seriousness.

That is why so many men die without making any will. That is why so many a comfortable little fortune is wasted in legal tangles. That is why so much property gets into hands for which it was never intended.

Every man has rather decided views about the disposition of the wealth that he has created and saved. And he can enforce his wishes by a carefully drawn will and a wise choice of an executor. He can choose no executor who will administer his estate more prudently and faithfully than—

to talk "shop." He is also willing to have his banker make himself familiar with his factory, even to understanding the work of the various machines. If the banker will take the trouble to really inform himself about his customer's plant the knowledge thus obtained will enable him to get his customer's full confidence and to discuss the details of the business intelligently. The banker can combine that knowledge with his knowledge of general business conditions and his advice and directions will be followed much more readily than if he were the outsider that so many bankers are to-day.

It stands to reason that the practical man with little or no knowledge of business practices, conditions and storm signals must have competent direction in these matters if he is to succeed, and it cannot too strongly be impressed on the banking fraternity the real need for and the tremendous benefits to be derived from closer study of the customer's business and more sympathetic co-operation between the banker and his inexperienced customer. This is especially requisite in these days when many new businesses are going to have a long, hard fight before they are on a really solid footing.

#### COMMERCIAL SECURITIES CORPORATION, LIMITED

A charter has been issued to the Commercial Securities Corporation, Ltd., Winnipeg, with an authorized capital of \$500,000. The incorporators are: Captain William Robinson, formerly president of the Northern Crown Bank, and director in many corporations, including the Royal Bank of Canada, Northern Trusts Company, Northern Mortgage Company, etc.; George R. Crowe, of the British Empire Grain Company, and director of the Royal Bank of Canada, Great West Life Assurance Company, Canadian Fire Insurance Company, etc.; Alexander Brown, of the well-known lumber firm of Brown and Rutherford; James Auld, barrister, of Hunt, Auld and Warburton, and a director of the Fire Insurance Company of Canada; C. H. McFayden, insurance and financial broker.

The incorporators are all well-known business men, with interests in many of the leading financial institutions of the west. The powers granted are wide, covering a general financial business, and dealing in commercial securities.

#### RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the month of January:—

#### PULP AND PAPER ASSOCIATION ANNUAL

The annual meeting of the Canadian Pulp and Paper Association was held in Montreal, January 20-21. It was preceded on January 19 by a meeting of the woodlands section, which gave special attention to forest fires, the National Railways coming in for some criticism.

P. B. Wilson, vice-president and general manager of the Spanish River Pulp and Paper Mills, Sault Ste. Marie, was elected president, and George M. McKee, general manager of the Donnacona Paper Company, Ltd., Donnacona, Que., was elected vice-president of the association. George Chahoon, the retiring president, in his address said that government control of the industry had not been wise. Prominent speakers were Sir Henry Drayton and Sir Arthur Currie.

#### AN OPTIMISTIC VIEW OF BUSINESS

"Viewing both the past and the future in proper perspective, the beginning of 1921 affords solid grounds for optimism regarding business and financial conditions both in Canada and abroad," says February *Investment Items*, issued by the Royal Securities corporation. "It is our opinion, and fortunately one which we believe is shared by many others, that long before the close of this year, 1921, the entire commercial world, and particularly Canada, will have completed a widespread re-establishment of profitable commercial and industrial activity.

"Superficially, unfavorable factors would still seem to be in the ascendant. General trade is contracting in both volume and rapidity. Some few commodities are still in process of price readjustment. Retail and wholesale liquidation is regarded in many quarters as yet incomplete. But fundamental economic factors of great potency are silently, but none the less surely, making for betterment. Liquidation in the great majority of commodities has been drastic and is complete. Living costs have thereby been brought nearer the buying power of the average consumer. Marking down of wages and of raw materials is beginning to compensate the industries for reduced selling prices. Costs and profits will shortly be on a normal, stable basis for the first time since 1914. Business will proceed actively and along sounder lines than during the last four or five years, a period characterized in all too many cases by personal and corporate extravagance and inefficiency.

"Signs are not wanting that the era of governmental meddling with business is ended, and that taxation measures are to be readjusted on a business-like basis. With the safe passing of the danger-point in December last, the credit situation has shown decided improvement. Money for legitimate business undertakings is working gradually easier.

"European skies are clearing. Too much stress cannot be laid on the improvement in the financial and political outlook abroad, an improvement signalized by the rapid and sustained improvement in sterling exchange. The conflicts in Europe, which were an aftermath of the great war, have practically ceased. There has been measurable progress towards sympathetic understanding of common interests between all the nations of Western Europe. The final settlement of the reparation problem will be a long step forward. The European countries are steadily, if slowly, returning to a normal state of productivity. Limitation of trade possibilities, which resulted from the extreme shortage of shipping, has disappeared. Vast non-productive expenditures, incidental to war and to the after-war rehabilitation of great armies, are rapidly ending.

"The brighter outlook at home and abroad has been reflected in a definite upward move in the security markets from the unduly depressed levels touched in December, 1920. In short, the world is twelve good months nearer the restoration of normal peace time functioning than it was a year ago."

BUILDING PERMITS AGAIN DECLINE

December Figure Twelve Per Cent. Under Previous Month and Nine and a Half Per Cent. Below a Year Ago

**B**UILDING permits issued in fifty-six cities, showed a further decrease during December 1920, as compared with the preceding month, the total value of building permits falling from \$5,288,321 in November to \$4,654,479, a decline of \$633,842, or practically 12 per cent. New Brunswick, Alberta and British Columbia registered increases in this comparison, that of \$359,550, in the last-named being the most decided. Of the decreases in the remaining provinces, that of \$777,722 in Ontario was the largest.

As compared with the figures for the corresponding month in 1919 there was a decrease of \$489,699, or 9.5 per cent., the value for December, 1919, having been \$5,144,178.

SUBSTANTIAL SURPLUS FOR DOMINION IN JANUARY

National Expenditure Showed Big Reduction Last Month—Revenue Was Also Lower—Net Debt Reduced by \$5,495,440

**A** SUBSTANTIAL surplus of revenue over expenditure is shown in the January financial statement of the Dominion government, but receipts are about \$9,000,000 lower than in the previous month. For the ten months of the fiscal year the Dominion has collected almost \$100,000,000 in excess of the previous period, while expenditures have increased only \$42,500,000.

There has been a substantial reduction in the gross debt, but the net debt has increased as a result of the manipulation of the various assets which are taken into consideration when calculating the net debt. Last month there was a decrease of about \$5,495,449 in the net debt, but as this account is subject to so many changes the reduction has no particular significance. The following are the details of the government statement:—

PUBLIC DEBT	1920		1921

# IMPERIAL Lubricants

For Manufacturing,  
Mining and Milling

### CYLINDER OILS

- Imperial Valve Oil
- Imperial Cylinder Oil
- Imperial Capitol Cylinder Oil
- Imperial Beaver Cylinder Oil
- Imperial 29th Century Cylinder Oil

### ENGINE OILS

- Imperial Solar Red Oil
- Imperial Atlantic Red Oil
- Imperial Junior Red Oil
- Imperial Bayonne Engine Oil
- Imperial Renown Oil
- Imperial Gas Engine Oil
- Imperial Arlo Compressor Oil

## Can You Afford Trouble

PROPER lubrication keeps machinery running smoothly and steadily without a hitch. You cannot afford costly holdups in production when the correct grade of Imperial Lubricants will give you scientific protection against them.

Increased production, lower operating costs, small depreciation charges, fewer expensive repair bills follow the regular use of Imperial Lubricants.

You get a right grade of oil for every lubrication need. Quality is always strictly maintained. Supplies or service are conveniently available at all times. Here's what prominent users say about Imperial Lubricants.

### All Trouble Eliminated

*Since we started using Imperial Lubricants, five years ago, all our lubrication troubles have been eliminated. We are at present using your oils exclusively in nine factories from Halifax to Vancouver.*

—L'Air Liquide Society.

### A Twenty-Year Record

*We have been using Imperial Lubricants in our plant for over twenty years, and have had uniformly good results and good service in every respect.*

—Smith Manufacturing Co. Limited.

Imperial Engineers will gladly advise you on lubrication problems. Write to 56 Church St., Toronto.

		30,011,274.15

For the purpose of studying the economic conditions of a few of the principal South American republics Sir Edmund Walker, president of the Canadian Bank of Commerce, and S. H. Logan, supervisor of the foreign department, intend leaving shortly for that country. They will while there devote some time to determining the possibility of the development of Canadian foreign trade in that direction.

FIRE PREVENTION WORK APPROVED

The following resolution was, on January 20, formally approved by the Executive Committee of the Ontario Associated Boards of Trade and Chambers of Commerce: "Resolved, that the Ontario Associated Boards of Trade and Chambers of Commerce commend and urge the government to generously support the successful efforts and laudable zeal of the Ontario Fire Prevention League and the Ontario Safety League in the staying of waste, the encouragement of thrift and care, the preservation of life and property, and cordially approve of their public-spirited and practical patriotism in thus protecting the public domain and the industries of our province."

This resolution had previously been adopted at the seventh annual meeting of the Associated Boards of Trade and Chambers of Commerce, Belleville, on the 25th November last.

HAMILTON PROVIDENT AND LOAN CORPORATION

The annual statement for the Hamilton Provident and Loan Corporation for the year 1920, which has just been published, shows gross earnings for the year of \$338,720, an increase over the former year of \$18,669; interest on borrowed capital and general expenses amounted to \$157,488, and exceeded 1919 by \$8,098, leaving the net profits for the year \$181,231, an increase over 1919 of \$10,571. Government business and war taxes amounted to \$19,837, an increase of \$8,406. Dividends paid amounted to \$108,000, leaving a net surplus of \$53,894.40, and \$50,000 was carried to the reserve fund, making that fund now \$1,300,000—\$100,000 more than the paid-up capital of the corporation. The sum of \$3,894 was carried to the contingent fund. After providing \$16,207 to meet the income war tax, payable in April, 1921, the contingent fund still shows a credit of \$15,587.

The total assets amount to \$4,800,104, an increase of \$35,765. Of the society's assets, \$2,117,171 is invested in first mortgages on productive real estate in Ontario, valued at \$4,725,000, and \$2,101,224 is invested on first mortgages in Manitoba and Saskatchewan on productive real estate, valued at \$5,433,800. Payments falling due on mortgages during the year were promptly paid; the total payments amounting to \$948,393, of which \$302,312 covers interest, and the balance was applied in reduction of the principal. There has been a very active demand for mortgage loans at remunerative rates of interest. The company's holdings of debentures have been increased from \$249,106 to \$292,999, while cash on hand is also higher.

RUBBER ASSOCIATION OF CANADA

At the business session of the Rubber Association of Canada held on February 14 in Montreal, the following officers were among those elected: C. H. Carlisle, Toronto, Goodyear Tire and Rubber Co. of Canada, Ltd., president; W. A. Eden, Montreal, general manager, Canadian Consolidated Rubber Co., vice-president; C. N. Candee, Toronto, Gutta Percha and Rubber Co., Ltd., treasurer; John Westren, Toronto, Dunlop Tire and Rubber Goods Co., Ltd., assistant treasurer; A. B. Hannay, Toronto, manager and secretary.

The following were elected as directors: F. E. Partridge, Guelph, F. E. Partridge Rubber Co.; R. F. Foote, Merriton, Ont., Independent Rubber Co. of Ontario. Hon. Hugh Guthrie, minister of militia, addressed the association at its banquet, and stated that the Dominion government would maintain protection.

The "General" Athletic Club, composed of the staffs of the General Accident Fire and Life Assurance Corporation and the General Accident Assurance Company of Canada, has been formed for the purpose of engaging in various kinds of sports.

# Union Trust Company

LIMITED

## Twentieth Annual Report

Adopted by the Shareholders, February 10th, 1921.

**To the Shareholders of the Union Trust Company, Limited:**

The figures of the year's operations appearing in our Balance Sheet, presented herewith, and in the Profit and Loss Statement as of December 31st, 1920, show the year to have been a successful one.

Our Profit and Loss Account as of December 31st, 1920, stands at \$96,835.11, as compared with \$76,668.64 on January 1st, 1920. This addition is made after the deduction of all operating expenses, interest on Guaranteed Funds, a substantial portion of the cost of fitting up new Head Offices and Safety Deposit Vaults, an extraordinary expense at our Winnipeg Branch, and the usual quarterly dividends, amounting to \$70,000.

By balance brought forward from preceding year	\$ 76,668.64
By net profit for year, after detracting cost of management, expenses and interest on Guaranteed Funds	110,111.70
To payment of quarterly dividends	\$ 70,000.00
To portion of cost of fitting up Head Offices, Safe Deposit Vaults and other extraordinary expenses	6,632.50
To taxes and registration fees accrued and paid to Dominion and Provincial Governments and Municipalities	13,342.73
To balance carried forward	96,835.11
	\$186,810.34
	\$186,810.34

In every department of the Company's business the year 1920 has been marked by activity and development—especially so since moving into more commodious offices at the corner of Richmond and Victoria Streets.

It is the feeling of your Executive staff to-day that the Company is in better position to handle its business than it has ever been.

Messrs. Price, Waterhouse & Co. have carried on a continuous audit throughout the year.

The Directors have pleasure in again testifying to the excellent services rendered by the Staffs at Head Office and Winnipeg Branch.

Respectfully submitted,

HENRY F. GOODERHAM,

President.

Toronto, January 24th, 1921.

# Building Permits Reflect Business Depression

Good Record During Early Part of Last Year was not Sustained—Total Greatly Reduced Towards the Latter Part of 1920—Movement Over the Past Eleven Years Shows Building Operations to be Far Behind Pre-War Days

**B**USINESS depression, which set in last summer, is reflected in the value of building permits issued during the year 1920. It will be seen from the following figures that during the earlier part of the year, building permits were issued far in excess of 1919. In April, for instance, the increase over the previous year was \$9,000,000, or 150 per cent. This good record, however, was not sustained, and towards the end of the year there was a marked reduction. The following figures show the month to month movement during the year, as compared with 1919, and represent the total of permits issued in fifty-six cities in the Dominion, as taken from the Department of Labour Compilations:—

	1920.	1919.
June	13,295,041	7,577,346
July	13,025,560	9,274,125
August	9,439,807	11,916,045
September	8,921,374	13,303,832
October	9,660,538	10,390,454
November	5,289,321	7,733,263
December	4,654,479	5,144,178

\$109,728,500 \$86,672,576

	1920.	1919.
January	\$ 3,956,247	\$ 1,166,316
February	4,684,934	2,002,044
March	8,258,410	3,329,050
April	16,382,410	7,059,641
May	12,160,379	7,776,282

## Movement Over Eleven Years

As compared with the war years, 1920 and 1919 figures appear large, but it will be seen from the accompanying table, which has been compiled from the record of thirty-five cities as given by the Department of Labor, that building operations are still far behind pre-war days:—

†No record is available for New Westminster before 1911.

The Canadian Automobile Underwriters' Association have just made new rates for a special third party indemnity applicable either to property damage or personal injury for a limit of \$20,000. This \$20,000 third party limit is unique in so far as it is applicable every way—i.e., it may be available for damage to property, or injury to the public, or both, and the limit for one person may be \$20,000.

The third annual dinner of the staff of the Continental and Fidelity-Phenix Insurance Companies was held on January 19, 1921, in Montreal. It was attended by the entire staff and all field representatives east of Winnipeg. The guest of honor was Herbert Shaw, a member of the firm of Parkes, McVittie and Shaw, who represent the Continental Insurance Company at Toronto.

E. L. MORTON, Manager.

We have audited the books and accounts of the Real Estate Loan Company of Canada, Limited, for the year ending 31st December, 1920, and have verified the cash, bank balances and securities of the Company. After due consideration we have formed an independent opinion as to the position of the Company. In our opinion as formed and according to the best of our information and explanations given to us, we certify that the above statements set forth fairly and truly the state of affairs of the Company and are in accordance with its books. All transactions of the Company that have come within our notice have been within the powers of the Company.

## TENTH ANNUAL REPORT OF THE DIRECTORS OF

# The Canada National Fire Insurance Company

## To the Shareholders:—

Your Directors have pleasure in presenting for your consideration their Tenth Annual Report, also the Statement of Assets and Liabilities and Revenue and Expenditure Accounts for the year ending December 31st, 1920, certified by the Auditors of the Company.

It is with a feeling of satisfaction that your Directors beg to report that the Company has experienced another successful year, in fact, it may be regarded as one of the best years in the Company's history.

There were, during the past year, no outstanding features which had special bearing on the operations of the Company.

Business conditions were, on the whole, much the same as in the previous year, although contrary to the expectations of many, prices of practically all commodities continued to soar, and the wage standard was maintained as during the war period. As a result, owners of buildings, manufacturers, wholesalers and retailers found it necessary, for their adequate protection, to materially increase their lines of fire insurance. This resulted in a considerable increase in the volume of fire insurance written during the year.

While building operations were not very active, as compared with those during normal times, there was quite an improvement over the preceding year. After a period of several years' inactivity in building, followed by the return of many thousands of soldiers from overseas, and an increasing number of immigrants during the last three years, there was experienced a great shortage, particularly in housing accommodation. This reached a climax in the fall of 1920, not only in the Dominion, the United States, but in the British Isles and many other countries.

There was considerable agitation during the year to meet the growing requirements of the increasing population, and many plans were proposed and some carried out with a certain measure of success, but Capital did not respond very readily owing to the prevailing high cost of material and labor. This problem has yet to be solved. It is felt, however, that with a gradual readjustment along these lines, the building situation will show signs of improvement.

The business of a fire insurance company is closely associated with that of the building trades, as new buildings are an important source of business for a fire company. Even the moderate improvement in conditions during 1920 is reflected in the volume of insurance written by this Company, the increase over the previous year being \$3,205,450.00. The business written by the Company in 1920 was \$26,364,244.00, this amount eclipsing all previous records of the Company.

While this record is a gratifying one, your Directors have reason to believe that, with a change for the better in general conditions, the present year should show a material increase in business over that of last year.

The gross premiums on business written by the Company in 1920 were \$328,171.96, a gain over 1919 of \$40,794.41. Reinsurance premiums amounted to \$125,428.97, an increase of \$23,016.46. Gross insurance in force at December 31st, 1920, was \$36,891,896.00. This shows a gain over the figures of the previous year of \$5,137,562.00. Premiums on gross insurance in force were \$527,749.23, a gain of \$71,856.99. Reinsurance in force at the close of the year was \$10,625,149.00, an increase of \$1,718,101.00, the premiums thereon amounting to \$145,180.39, being \$26,015.66 greater than in 1919. Net fire insurance in force at December 31st, 1920, was \$26,266,747.00, the gain over the previous year's figures being \$3,419,460.00.

Before referring to this Company's loss ratio for 1920, it might prove of interest to know that the total fire losses in Canada for that year were the largest, with one exception, in the history of the Dominion, being estimated at \$27,706,574.00, or \$4,500,000.00 greater than in 1919, but approximately \$4,100,000.00 less than in 1918, Canada's record year for fires, several large munition plants being destroyed in that year.

Favorable comment was expressed at this Company's low loss ratio of 33.45 per cent. in 1919, but even a better showing was made under more unfavorable conditions in 1920, the loss ratio reaching the very low level of 32.82 per cent., which surpasses all previous records of the Company. The average loss ratio for the last fifty-one years, from 1869 to 1919, inclusive, for all Companies operating in Canada, was 58.19 per cent., or in other words, 25.37 per cent. in excess of this Company's record for last year.

Considering that the year 1920 was none too favorable for Fire Companies generally, due, among other things, to great extremes in weather conditions, a very severe winter followed by an unusually long, hot, dry summer, your Directors are very gratified at the year's results, and they take this opportunity of referring to the efficient and able administration of the Underwriting Department of the Company, realizing that while it is desirable and important to increase the volume of business from year to year, it is equally important, if not more so, to make a careful selection and decline, undesirable and hazardous risks, however profitable they might prove to be, even at the sacrifice of volume of business.

On referring to the Financial Statement it will be noted that of the Company's securities, mortgages on Real Estate form the chief item, these amounting to \$1,560,531.61, an increase for the year of \$126,427.72. Payment of Interest and Principal showed quite an improvement over the previous year. These loans are upon improved city and farm properties, and the fact that they have borne up so well during several years of depression, indicates the high character of these investments. There was a reasonably active demand for mortgage moneys during the year.

The item Stocks and Bonds remains practically the same as in the previous year, standing at \$676,615.11, made up largely of Dominion Government War Bonds, amounting to \$555,000.00.

Agents' Balances amounted to \$43,279.08, or a reduction of \$4,087.82 from last year.

Cash on Hand and in Banks amounted to \$25,646.44.

From the standpoint of liquid assets, the Company maintains a strong financial position, these liquid securities, comprising high-grade Stocks and Bonds and Cash Reserves, amounting to over \$700,000.00.

Due to the large increase in business in 1920, the reserve for unearned premiums now stands at \$157,574.75, or \$13,088.47 greater than at the close of the previous year. With reference to the business with Foreign Treaty Companies, this Company held on deposit, re-insurance premiums amounting to \$72,568.09, an increase over 1919 figures of \$8,748.86.

Revenue derived from mortgages, stocks, bonds and various other sources amounted to \$167,547.16, a gain of \$15,316.53 over last year, and net fire premiums, after deducting cancellations, rebates and re-insurance, were \$202,742.99, an increase of \$17,777.95 over 1919 figures. The total revenue for the year was \$370,290.15, as against \$337,195.67 for the previous year, showing a gain of \$33,094.48.

After providing for all management expenses, fire losses, taxes, Government Reserve, interest and sundry other

charges, as well as writing off \$3,536.25 for depreciation in Furniture and Fixtures, there remained net profits of \$156,332.67. Out of these profits there was apportioned the usual annual dividend of six per cent., which amounted to \$110,503.84, leaving a balance of \$45,828.53. This amount has been transferred to the reserve or net surplus to shareholders, bringing that fund up to \$343,414.25. This sum, added to the Contingent Reserve Fund, makes a combined reserve of \$443,414.25, or 23.97 per cent. of the paid-up Capital.

The Surplus to Policyholders shows a gain of \$69,606.98, now amounting to the large sum of \$2,193,150.60. This item requires no special comment; suffice to say, that, from the point of view of the Assured, there is absolute protection and security.

When considering the business of fire insurance, too much importance cannot be attached to the financial position of the insuring Company. A Company with a large surplus to its policyholders is a safer company in which to insure than one with a small Capital and Reserve, and in this respect your Company, while young in years, stands right at the top of our Canadian Fire Companies.

The past few years have been trying years to build up a large and successful business, but by an aggressive policy and careful underwriting, satisfactory results have been achieved, and as for the future, your Directors are confident

that, with the return to normal conditions, and it is hoped prosperous times in the comparatively near future, this Company will greatly extend its business and forge ahead more rapidly than it has done in the past.

Your directors again wish to thank the Shareholders for the many evidences of co-operation and support during the past year. They fully realize and appreciate the fact that the hearty co-operation of the Shareholders means much for the welfare and upbuilding of the Company.

It is with a feeling of warm appreciation that your Directors draw attention to the splendid services rendered by the Officers and Staff as well as the many Agents of the Company, and they take this opportunity to thank them for their good work during the past year, and trust that their efforts in the present year will meet with even a larger measure of success than they have hitherto enjoyed.

J. H. G. RUSSELL,

President.

Winnipeg, February 8th, 1921.

At a subsequent meeting of the newly-elected Board of Directors, J. H. G. Russell was elected President; W. J. Boyd and F. H. Alexander, Vice-Presidents; and W. T. Alexander, Managing Director.

# Ontario Treasurer Estimates Surplus of \$3,500,000

New Taxes Outlined in Budget Speech on Tuesday—Last Year's Accounts Show Deficit of \$802,748 — Capital Expenditure was \$56,963,946 -- Estimates for Present Year are Lower—Province Must Continue to be Heavy Borrower, Says Treasurer

ALTHOUGH the province of Ontario borrowed \$55,834,979 during the year ended October 31, 1920, and received \$25,078,094 on current account, these funds proved insufficient to meet the requirements. Capital expenditure was \$56,963,946, and ordinary expenditure \$25,880,843. The balance of cash on hand is accordingly reduced by \$1,931,716. These figures were made public when the treasurer, Hon. Peter Smith, presented the public accounts for the year ended October 31, 1920, in the legislature on February 11.

The financial results for the fiscal year are summarized in the public accounts as follows:—

Cash on hand, October 31, 1919	\$ 7,603,110
Ordinary receipts	25,078,094
Capital receipts	55,834,979

Total ..... \$ 88,516,183

Cash on hand, October 31, 1920	\$ 5,671,393
Ordinary expenditure	25,880,843
Capital expenditure	56,963,946

Total ..... \$ 88,516,183

## Estimates for 1921

Estimates for the current financial year, ending October 31, 1921, presented by the treasurer on February 15, shows receipts as follows:—

Land and forests dept.	\$ 2,000,000
Public institutions	1,000,000
Motor vehicle licenses	2,500,000
Amusement tax act	1,500,000
Succession duties	4,500,000
Corporation tax act	3,300,000
Hydro commission, interest	3,700,000
T. and N.O. Railway	500,000
Game and fisheries	750,000
Ontario temperance act	500,000
Mines dept.	300,000
Agriculture	200,000
Education dept.	400,000
Provincial secretary dept.	437,500
Insurance dept.	100,000
Law stamps	250,000
Casual revenue	500,000
Subsidy	2,396,378
Attorney-general's dept., miscellaneous	165,900
Treasury dept., miscellaneous	430,983
Provincial secretary's dept., miscellaneous	365,250
Lands and forests	1,454,450
Department of mines	202,900
Department of labor	1,251,952
Refund account	234,496
Miscellaneous expenditure	100,000

Total ..... \$20,880,202

Among the items of expenditure are:—

Civil government	\$ 1,901,590
Legislation	333,100
Administration of justice	860,343
Education	5,777,018
Public institutions	3,321,112
Agriculture	1,353,506
Colonization and immigration	173,500
Hospitals and charities	1,073,400
Maintenance and repairs of government buildings	492,312

Public buildings	\$ 488,467
Public works	155,900
Colonization roads	107,300
Highways dept.	154,220
Game and fisheries	482,500
Capital expenditure is estimated as follows:—	
Parliament buildings, for additional accommodation	\$ 200,000
Public institutions buildings	597,850
Agricultural buildings	181,000
Buildings in districts	263,000

Total expenditure, including capital, is estimated at \$22,122,052, and total receipts at \$25,683,878, which would leave a surplus of about \$3,500,000.

## Provincial Assets

The assets of the province are about \$645,983,000, while the taxable property in Ontario actually assessed by municipalities is given as over \$2,000,000,000. The liabilities, direct and indirect, amount to \$159,752,055. The province has bank balances of \$5,671,393.

There is nothing in the financial statement as to the amount to be spent on the Hydro this year, although supplementary estimates which were also tabled contain the estimate of capital expenditure by the Hydro-Electric Power Commission as \$29,347,700. Of this amount, some \$21,700,000 is put down for the Chippawa development, \$5,115,000 for the Niagara system, and the remainder to be spent on the other systems in the Hydro Power Commission. The supplementary estimates also contain \$1,371,737 for education.

The treasurer proposes the following new taxes: A two mill tax on all real estate transfers; one quarter of one per cent. tax on all bank reserve funds; extension of amusement tax to all poolrooms and billiard parlors; increase in railway taxes from \$25 to \$40 per mile; increased taxes under the Ontario Mining Act. It is estimated that these will yield new revenue of \$1,500,000.

In his remarks on the financial affairs of the province, Hon. Mr. Smith predicted heavy borrowings for some time to come, and he felt it incumbent on all parties to say nothing injurious to the credit of the province. Referring to last year's accounts, he said that ordinary expenditure amounted to \$25,880,842 and ordinary revenue to \$25,078,094, leaving ordinary revenue short of ordinary expenditure \$802,748. "You will readily see," he declared, "that this statement and this result could have been easily changed to a more favorable showing had the accounting been treated as in 1918 and in previous years." In spite of criticism last year as to his method of accounting, the provincial treasurer said he still maintained he was correct.

He illustrated the difference between his method of accounting and that of the late government, under whose regime numerous items were treated as ordinary revenue that were now being treated as capital revenue. "Had the financial statement been brought down and produced upon the old lines, that, on the lines which the old government adopted," he declared, "we would have shown a surplus of \$875,198."

"When I presented my budget a year ago we were untried members," said Hon. Peter Smith. "I said then that there might be some important changes, but when I look around I see the same ministers in the same places. They have been carrying on successfully that the chances are there will be no changes. I am proud of the small deficit we have this year. Governments in this country or any other

The Forty-Sixth Annual Report of  
**The London Life Insurance Company**

**Insurance Issued: \$31,826,696**  
 (A gain of \$7,007,920)

**Insurance in Force: \$96,600,075**  
 (A Gain of \$20,218,436)

Surplus on basis Dominion Government Standard \$1,453,455.  
 (A gain of \$297,557.)

**PROFIT SCALE MAINTAINED**

**Items from Report**

	1915	1920	Increase in 5 years
Income . . . . .	\$ 1,666,122	\$ 4,196,385	\$ 2,530,263
Assets . . . . .	6,075,323	13,105,083	7,029,760
Surplus (including Paid Capital, \$75,000, Standard of Dominion Insurance Act) . . . . .	753,025	1,453,455	699,830
Insurance Issued . . . . .	11,060,512	31,826,696	20,766,184
Insurance in force . . . . .	34,820,328	96,600,075	61,779,747

**The London Life and the Public**

The 1920 Report is of extreme interest to the Company's thousands of policyholders and those contemplating new insurance. It indicates the solid foundation on which the business of the Company was built and the strong position of the Company to render future service.

**Four Important Points**

1. Security—

High Standard of Reserves—over \$850,000 in excess of the Government Standard.  
 Quality Risks—All Canadian, measuring up to Best Standards.  
 Sound Investments—All Canadian. Bonds and mortgages of safest type. No losses during the year.

2. High Earnings—

Interest Rate—(6.61%) at high point, consistent with secure investments.  
 Mortality Experience—(37.4%) most favorable—characteristic of Canadian risks.  
 Profit results to policyholders are bringing great satisfaction—are due to high earnings and careful management.

3. Service—

Policyholders' interests are paramount.  
 Dividend record is unexcelled.  
 Obligations are met promptly.  
 Needs of Policyholders and Beneficiaries receive prompt and sympathetic attention.

4. New Policies—

The "Canadian" Series Policies.  
 Designed for Canadians of Vision.  
 With Unique Service Privileges.  
 With provision for Adjustment with Change of Circumstances.  
 With High Guaranteed Values.  
 Meet the Real Insurance Needs.  
 The Right Policies for Canadians—in a Good Canadian Company.

**Statement Showing Company's Progress**

Year	Income	Assets	New Business	Business in Force
1900 . . . . .	\$ 297,249	\$ 1,005,110	\$ 1,348,981	\$ 6,100,566
1905 . . . . .	475,015	1,866,425	2,360,906	9,102,751
1910 . . . . .	842,093	3,255,950	6,180,141	16,795,393
1915 . . . . .	1,666,122	6,075,323	11,060,512	34,820,327
1920 . . . . .	4,217,693	13,105,083	31,826,696	96,600,075

A more detailed Statement of the Annual Report will be mailed to every Policyholder in due course and to others upon request.

At a meeting of the Board of Directors, held subsequent to the Annual Meeting, Mr. John McClary was elected Honorary President; Dr. A. O. Jeffery, K.C., President, and Messrs. W. M. Spencer and J. G. Richter, Vice-Presidents.

country, should not be out to make large surpluses. We expected a much larger deficit. I think the country at large expected it."

#### Exchange Caused Heavy Loss

The late provincial treasurer, he said, had been forced into the financial market when conditions for borrowing were at their worst. On one occasion, he said, that official had been forced to go to the Dominion government to borrow enough to keep the province going. At another time the late provincial treasurer, he said, was forced to borrow \$3,000,000 in New York on a treasury note. When the present government repaid that note, he said, the exchange charges amounted to \$391,000. "Altogether," he said, "exchange rate on interest coupons and repayments of loans cost the government this year \$789,165, or, in other words, practically our whole deficit would have been wiped out if there had been no exchange between us and the United States."

Touching upon increased revenues during the past year, Hon. Mr. Smith mentioned the T. & N. O. Railway, which, he said, had just completed one of the most successful years in its history. "In another year," he said, "we hope to be able to say that the railway's profit will not only pay interest on investment, but leave a profit besides." To-day, he said, the T. & N. O. Railway was equal to any railway in Canada in the standard of its equipment and rolling stock.

Of a total expenditure of \$4,000,000 on public highways, the provincial treasurer anticipated refunds as follows: \$737,000 from the municipalities and \$1,426,000 from the Dominion government, or a total of \$2,163,000, leaving an actual expenditure of only \$2,326,000.

#### Increases in Taxation

"To offset the increased expenditure on certain lines next year," he proceeded, "We are amending the Corporations Tax Act, so that it will bring in an estimated revenue of \$450,000." The amendment, he said, will provide for a tax of one-quarter of one per cent. on all reserve funds of chartered banks.

"We are increasing the railway taxation from \$25 per mile to \$40 per mile," he went on. "While the Canadian National is likely to show a large deficit, other railroads are making money, and have increased their rates all along the line, and we feel we are perfectly justified in having a little more revenue. We are proposing to put a tax on billiard parlors which will increase our revenue \$280,000. It is an amusement tax. We are proposing to tax real estate transfers—two mills on the dollar all over the province. Our estimated revenue from that is \$250,000. We expect to increase our revenue from the Mining Tax Act \$100,000. The estimated increase in revenue from these sources will be \$1,500,000."

#### MERCANTILE TRUST COMPANY OF CANADA

A falling off in business, but slightly higher earnings are shown in the annual statement of the Mercantile Trust Co. of Canada, Ltd., Hamilton, Ont. Estates, trusts and agencies, under administration by the company amounted to \$3,547,626 in 1920, compared with \$4,271,700 at the end of 1919. Trust funds for investment or distribution are also considerably lower at \$413,272.

Net profits for the year were \$56,736, being slightly more than \$1,000 in excess of the 1919 results. The usual dividend of six per cent. was paid, and in addition a bonus of one per cent. was distributed to shareholders. The amount of \$2,500 was transferred to the contingent fund for possible depreciation of securities and overdue interest on mortgage loans in the western provinces, and this account now amounts to \$12,500.

Total assets of the company now amount to \$5,919,339, as compared with \$6,915,107 a year ago. The capital and reserve are unchanged at \$500,000 and \$125,000 respectively.

#### PEOPLE'S LOAN AND SAVINGS COMPANY

The People's Loan and Savings Co., London, Ont., reports 1920 earnings amounting to \$72,236, as against \$69,290 in 1919, although mortgage loans were slightly less at \$799,662. The usual dividend of five per cent. was paid, and \$5,000 was transferred to reserve, bringing that fund up to \$65,000, or 13.28 per cent. of the paid-up capital of \$489,388.

The amount on deposit and in debentures amounts to \$525,245, showing an increase of \$66,669 over the preceding year. Total assets are now \$1,094,702, compared with \$1,038,165 in 1919, and \$796,114 in 1914.

#### PREMIER TRUST COMPANY

Although still in its preliminary stages, the Premier Trust Co., of London, Ont., made good progress in 1920. Estates, trusts, etc., under administration by the company are shown at \$486,107, compared with \$344,604 in 1919, while guaranteed trust accounts are higher at \$42,540. Total assets are now \$627,469, as against \$517,167 for the previous year.

Interest, commission and fees, etc., totalled \$13,855 last year, being an increase of \$790. The paid-up capital of the company now amounts to \$127,794, while the reserve is \$10,000. There is also a contingent fund of \$3,504. The company was enabled last year to increase its dividend from four to five per cent.

#### WESTERN LIFE ASSURANCE COMPANY

The annual report of the Western Life Assurance Co. shows new policies issued and revived of \$1,308,750, and total insurance in force of \$4,233,907, an increase over 1919 of \$774,968. Gross cash revenue from premiums and interest was \$145,008, which together with an increase in the outstanding and deferred premiums of \$21,000, made a total income of \$166,098.

The assets of the company have now reached the total of \$383,681, and exceed the total liabilities to policyholders by \$75,487. The company's reserves now amount to \$291,969, an increase of \$80,472 over 1919. Death and disability claims in 1920 were paid to the amount of \$35,277. Some important changes were made in the company's directorate at the annual meeting, James Carruthers being elected president.

#### BRITISH COLUMBIA PERMANENT LOAN

Income of the British Columbia Permanent Loan Co. in 1920 was \$254,849, an increase of \$30,000 over that for 1919, although the interest from mortgage loans was less by about \$20,000. The principal items to show increase were recovered, improved property, rents, and sterling exchange. Expenses were \$70,436, compared with \$65,454 in 1919, and interest payments were \$57,945, a decrease of \$10,000, leaving net profits of \$126,467, compared with \$91,789 in 1919. This added to the balance of \$104,709 brought forward made a total of \$231,177 available; the sum of \$105,595 was transferred to reserve, \$10,000 to contingent fund, and 8 per cent. in dividends and bonus paid.

The assets are now \$2,917,422, an increase of \$9,000. Mortgage loans have decreased from \$2,368,891 to \$2,041,786, and properties acquired by foreclosure and sold by agreement have also decreased from \$322,800 to \$287,948. Cash assets are higher, however, and additional investments have been made in bonds. Debentures outstanding in Great Britain and the United States show a large reduction, but those in Canada have increased, while deposits are about three and one-half times what they were at the end of 1919.

# WM. A. ROGERS, LIMITED

## Report of the Directors to the Shareholders for the Year ended December 31, 1920

The Directors present to the Shareholders their Twentieth Annual Report with accompanying statement of Assets and Liabilities as at December 31st, 1920:

Profit and Loss Balance brought forward from 1919	\$303,448.83	
Less Federal Taxes on 1919 Earnings paid in 1920	65,057.68	
	<u>\$238,391.15</u>	
Profits for the year	572,536.78	\$810,927.93
<b>The appropriations were as follows:</b>		
Transferred to Realty and Plant Reserve	\$169,468.20	
Transferred to Reserve Account	50,000.00	
Dividends on Preference Stock for current year, at the rate of 7% per annum	78,596.00	
Dividends on Preference Stock of 5¼% on account of arrears	58,947.00	
	<u>\$357,011.20</u>	
Balance forward to 1921		<u>\$453,916.73</u>

The volume of business and the net profit for 1920 exceeded all former records.

The inventories on hand have been written down to present replacement values, and the shrinkage has been charged off in the year's expenses. The inventories are in excellent condition both as to character and prices.

In addition to the customary transfer to the Realty and Plant Reserve, the sum of \$50,000 has been appropriated to the General Reserve Account, which now stands at \$350,000.

Dividends totalling 12¼% were paid on the Preference Shares during the year. These included 5¼% on account of arrears, leaving 8¾% still unpaid. It is proposed to continue these payments as opportunity offers during 1921.

The Profit and Loss balance is subject to deduction of the United States Federal taxes on 1920 profits, the amount of which cannot be determined accurately at this time.

Canadian Wm. A. Rogers Limited had a good year in 1920, and is not expected to call upon this Company for any contribution under the Guarantee Agreement, which continues to April 1st, 1924.

Business fell away toward the end of the year and is quiet at the opening of 1921. We are seeing evidences of improvement, however, and look forward to a gradual restoration of confidence. It is our expectation that the curtailment that is likely to occur in the early part of 1921 will be made up in the later months, and that the year as a whole will yield a satisfactory and profitable volume.

By order of the Board:

S. J. MOORE, President.

### Statement of Assets and Liabilities, December 31, 1920

ASSETS		LIABILITIES	
Real Estate	\$ 458,779.63	Capital Stock Issued:	
Property Purchased for Employees	23,739.40	Preference Stock	\$1,122,500.00

	<u>\$4,945,082.17</u>		

Contingent Liability payable over four years for balance of purchase price for assets of Simeon L. and George H. Rogers Company, which will be reduced proportionately as dividends are paid on Preference Stock of this Company held by former shareholders of Simeon L. and George H. Rogers Company, \$62,384.00.

### AUDITORS' CERTIFICATE

We have audited the accounts of Wm. A. Rogers, Limited (and Wm. A. Rogers, Limited, of California), for the year ending 31st December, 1920, and we certify that in our opinion the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the Company's affairs according to the best of our information and the explanations given us and as shown by the books of the Company.

We have received all the information and explanations we have required.

CLARKSON, GORDON & DILWORTH, Chartered Accountants.

At the Twentieth Annual Meeting of Shareholders held on February 18th, 1921, the President, Mr. S. J. Moore, reviewed at length the Company's operations of the past year.

The Board of Directors was re-elected, as follows: S. J. Moore, W. D. Ross, Charles W. Colby, Ph.D., Hon. W. Caryl Ely, Hon. Holland S. Duell, R. E. Sage and E. G. Baker.

The officers were re-elected, as follows: S. J. Moore, President; W. D. Ross, Vice-President; R. E. Sage, General Manager, and E. G. Baker, Secretary.

## ORGANIZED FARMERS' MOVEMENT IS ECONOMIC

Political Activity Not Part of Early Plan—Some Real Improvements Have Resulted from Grain Growers' Movement—Special Privileges of Manufacturers are Now Contested

BY ANGUS LYELL

THE decision of the organized farmers to enter the political field as an independent body is but the development of a movement which was primarily and is essentially industrial and economic. Direct political action was not, as far as I can see, the result of a carefully prepared plan. Rather was it forced on some of the leaders of the movement. Since the grain growers' movement originated—on December 18th, 1901—the theory expounded has been that the farmers could take care of themselves through the creation of industrial associations, by exercising pressure on provincial or federal politicians, of both the old parties, to effect desired political reforms, chiefly shipping and marketing facilities for the grain crop and tariff reductions on agricultural machinery and certain necessities of life.

To-day, political activities are hardly similar, even in the three prairie provinces, where conditions may well be compared. There may be unity of effort on federal matters, but not on provincial. While in Alberta a fairly strong organization is being developed for a contest in both fields, there is little enthusiasm in Saskatchewan for a provincial fight. Conditions in Manitoba are well reflected in the result of the recent election. The "locals" there were evidently not very keen in defeating the Liberal administration, which had given them legislation pretty much according to their demands. The Rural Credits Act may be cited as an illustration.

Since first issued in June, 1908, the policy of the "Grain Growers' Guide," the main organ of the organized farmers in the west, has been governed by the resolutions passed at the annual conventions of the grain growers. The paper has discussed economic and social problems from the viewpoint of the farmers. It has endeavored to unify them in opinion, to secure combination and co-operation in order that they might produce and market their crops to the best advantage. There has been nothing altruistic in this policy, which has been essentially a class one, fundamentally industrial.

### Entered Commercial Field

While the grain growers' movement originated in December, 1901, it was not until 1906 that commercial business was undertaken. Since then, however, the farmers' industrial ventures have met with a good deal of success. The Grain Growers' Grain Co. was launched in Manitoba in 1906; the Saskatchewan Co-Operative Elevator Co. in Saskatchewan in 1911; and the Alberta Farmers Co-Operative Co. in Alberta in 1913. In 1917, the Manitoba and Alberta companies merged under the name of the United Grain Growers, Ltd. The Saskatchewan company, however, still retains its separate entity.

These companies market a large part—perhaps over one-third of the western grain crop. They have two public and two private elevators at the lake ports and over 600 inland. They have machinery and flour warehouses, coal sheds and so on. An export business is even transacted in New York by the United Grain Growers, Ltd. In Saskatchewan, the Grain Growers' Association has a business department, which acts as a wholesale house for numerous local associations which deal in farm produce and other products.

Long before the organized farmers decided to enter the political field, their organizations were helping to mold political thought on industrial matters. Back in 1910, when Sir Wilfrid Laurier made a tour of the west, "The Guide," the mouthpiece of the Grain Growers' Associations, was emphasizing the need of tariff revision. The Canada Grain Act, which provides regulation of terminal elevators, was passed largely because of their efforts, and it is doubtful whether we would have had government elevators at certain import-

ant points—Calgary, Moose Jaw, Saskatoon, Fort William and Port Arthur—but for them. Every fair-minded person must admit that the grain business has been placed on a sounder and more equitable basis mainly through the agitation of the Grain Growers' Associations.

The bone of contention to-day is the protection afforded manufacturers especially. The outlay of the average farmer for machinery—agricultural implements—is considerable, taking into consideration the risks involved in grain growing in the prairie provinces. And the sparks of discontent have been fanned into a flame by the action of the Canadian manufacturers in exacting the highest possible price for their implements, taking into consideration United States competition. In taking a firm stand on the question of the tariff, the farmers' motive is hardly one of altruism. Rather is it a case of bread and butter.

It cannot be denied, I think, that there is a large body of farmers in the west, as well as the east, who do not see eye to eye with Messrs. Crerar, Chipman and Co. The president of the United Grain Growers, Ltd., has a considerable following. So has the worthy editor of "The Guide." But outside of these groups are other groups, more daring and independent in spirit.

### Political Action to be Local

It was, for example, largely because of the efforts of the members of the Non-Partisan League that the United Farmers of Alberta decided to take political action both in the provincial and federal fields. But while the Non-Partisans in Alberta sunk their identity for the sake of unity, they are still engaged in active propaganda in Saskatchewan. The decision reached at the Farmers' Inter-Provincial convention held in Winnipeg last winter is still fresh in the memory. It was agreed that, on the question of provincial action, the "locals" in each province would do as they thought best. There was to be no overhead control for a very good reason.

But even if disruption should in time wreck the political movement, through conditions which may develop, yet such might not lessen the industrial power of the organized farmers.

So far the farmers have met with marked success in their industrial ventures. The United Grain Growers, Ltd., and the Saskatchewan Co-Operative Elevator Co. are both making rapid progress. These concerns are in name co-operative; but their members are limited to a class—a clanish class. What if they should grow weary of acting merely as distributors of commodities? What if they should undertake the manufacture of farm machinery and implements? What if they should decide to produce everything essential, barring luxuries, to life on the farm? I cannot see that there is anything particularly altruistic about the farmers' movement, whether political or industrial. The farmers are out to secure better living conditions for themselves, and who can blame them? Their lot is sometimes severe enough. And, perhaps, we should be near to a solution of the tariff problem if their own concerns engaged in manufacturing.

Some argue that there is danger of over-expansion; that the farmers in business will undertake too many things, on too big a scale, with final disastrous results.

There is both truth and error in this. For continued advance, expansion and prosperity, efficient management is essential. This factor is even more important than either labor or capital. With efficient management, labor can be obtained and capital secured. The question then is: Can the organized farmers secure and retain able men to direct their affairs? If they can, what is there to prevent them from controlling certain branches of industrial activity? M. Chipman, as editor of "The Guide," could boycott all the implement houses in the east, and likely would, if the farmers' own associations could produce the goods. He is proud of the clanish spirit evinced by his readers and adherents.

The farmers' political activity is, as far as I can see, dependent wholly on the larger industrial and economic movement. It is in this light, I think, that it should be considered.

# F. N. BURT COMPANY, LIMITED

## Report of the Directors to the Shareholders for the Year Ended December 31, 1920

The Directors present to the Shareholders their Twelfth Annual Report with the accompanying statement of Assets and Liabilities as of December 31st, 1920:

Balance brought forward from 1919	\$713,044.81
Less Federal Taxes on 1919 earnings paid in 1920	125,087.73
	<u>\$587,957.08</u>
Profits for the year	842,712.05
	<u>\$1,430,669.13</u>
The appropriations were as follows:	
Transferred to Realty and Plant Reserve	\$208,477.87
Written off Patents	23,201.42
Dividends on Preference Stock, Nos. 42, 43, 44 and 45, at the rate of 7% per annum	119,754.25
Dividends on Common Stock, Nos. 41 and 42, at the rate of 8% per annum, and 43 and 44 at rate of 10% per annum	94,378.25
	<u>445,811.79</u>
Balance carried forward to 1921	<u>\$984,857.34</u>

The year's profits have been arrived at after writing down the inventories to present replacement values. The shrinkage has been charged off in the year's operations. In view of this, it is gratifying to be able to report that the profits are the largest in the Company's history.

In accordance with the policy adopted a year ago, the balance in the Profit and Loss account is subject to deduction of Federal Taxes on the 1920 profits, the amount of which cannot be determined accurately at this time.

Commencing with the October 1st payment, the rate of dividend on the Common Stock was increased from 8% to 10%. Dividend payments on both classes of stock aggregate for the year \$214,132.50, which is about one-third of the year's profits. All dividends were paid in New York funds.

Additional Preference Shares to the amount of \$420,200 were converted into Common Shares during the year. Up to date a total of \$528,700 of Preference Stock has been converted.

Incoming business fell off during the last quarter, but we have entered the year 1921 with a substantial amount of orders on hand and look for a satisfactory volume of profitable business.

By order of the Board:

S. J. MOORE, President.

## Statement of Assets and Liabilities, December 31, 1920

### AUDITORS' CERTIFICATE

We have audited the accounts of F. N. Burt Company, Limited, for the year ending 31st December, 1920, and we certify that in our opinion the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the Company's affairs according to the best of our information and the explanations given us and as shown by the books of the Company.

We have received all the information and the explanations we have required.

CLARKSON, GORDON & DILWORTH,  
Chartered Accountants.

At the Twelfth Annual Meeting of Shareholders held on February 18th, 1921, the President, Mr. S. J. Moore, reviewed at length the Company's operations of the past year.

The Board of Directors was re-elected, as follows: S. J. Moore, A. E. Ames, F. N. Burt, Hon. W. Caryll Ely, James Ryrie, Alfred Jephcott, Wm. Findlay, Ph.D. and Hon. Holland S. Duell.

The officers were re-elected, as follows: S. J. Moore, President; A. E. Ames and F. N. Burt, Vice-Presidents; E. G. Baker, Secretary, and W. N. MacLeod, Assistant Secretary.

## ST. JOHN'S MUTUAL LIFE ASSOCIATION

The annual report of the St. John's, Nfld., Mutual Life Association shows that there were ten deaths in 1920, while twenty-six new members were added, bringing the total up to 433. After paying death claims and current expenditure there is a balance to current account of \$67, which, with the reserve fund of \$5,036, makes a total of \$5,103. last.

## LONDON AND WESTERN TRUSTS CO.

Twenty-four years of experience as a corporate trustee has brought the London and Western Trusts Co., Ltd., to a position of prominence among our Canadian trust companies. Total assets of the institution are now \$11,849,024, being an increase of \$736,491 for the year. Estates, trusts, etc., under administration by the company at the end of 1920 amounted to \$10,196,473, as against \$9,719,849 for 1919.

From the profits standpoint the company's operations were successful, net earnings totalling \$73,932, compared with \$66,327 for 1919. The usual dividend of 7 per cent. was paid and \$30,000 was transferred to reserve. There is a subscribed and fully-paid capital of \$500,000, while the reserve fund is \$220,000.

## FURTHER PRICE DECLINE IN JANUARY

The index number of wholesale prices constructed by Professor H. Mitchell, of McMaster University, Toronto, based on 40 commodities, 20 foodstuffs and 20 manufacturers' goods, stood at 212.6 for the month of January, a decline of 4 per cent. over the previous figure of 221.6 for the month of December, and a decline of 28.7 over the peak of 298.3 reached in May, 1920. Among the manufactured commodities declines were registered in rubber, cotton, silver, tin and hard maple. In foodstuffs, flour, lard, whitefish, coffee, potatoes, beans, canned peas, eggs and tapioca declined, while butter and cheese advanced slightly.

The remarkable regularity of the decline, amounting almost exactly each month to 4 per cent. from the peak, is to be noted. The deflation of wholesale prices is proceeding rapidly and without any disastrous break in the market, a most healthy and normal proceeding. Little expectation can be held out for any halt in the fall until the spring.

## EASTERN CANADA SAVINGS AND LOAN COMPANY

Another year of pleasing results was experienced by the Eastern Canada Savings and Loan Company, Halifax, N.S. Receipts for the year amounted to \$153,580, as against \$139,295 in 1919. Net profits were \$69,181, as compared with \$58,313 in the previous year. The usual dividend of 8 per cent. was paid, and \$14,335 was transferred to the reserve fund. Income tax for 1920 amounted to \$7,345 and lessened the net profit on the average capital, which was \$547,833, by 1½ per cent.

Loans to borrowers for the year came to \$497,500, all the available funds of the company being constantly employed. Outstanding debentures and deposits were considerably lower at \$1,155,870, compared with \$1,322,494, but new funds were secured by calls on subscribed capital, which approximated \$100,000 during the year. The paid-up capital is now \$600,000, and the reserve and contingent fund is \$292,000. Mortgage loans outstanding are now \$1,995,486, compared with \$1,942,382 at the end of the previous year, while real estate on hand has been reduced from \$12,535 to \$8,747.

Total assets are \$2,208,184, compared with \$2,320,106 previously. The decrease is largely the result of the manner in which the company shows its capital stock in the balance sheet. The sale of the Metropole Building was also a factor in the reduction of assets, the proceeds being carried to reserve.

# The London and Canadian Loan and Agency Company Limited

## FORTY-SEVENTH ANNUAL MEETING

The Forty-seventh Annual General Meeting was held in the Company's Head Office, 51 Yonge Street, Toronto, on Wednesday, February 9th, at 12 o'clock noon.

The President, Mr. Casimir S. Gzowski, occupied the chair and the Secretary, Mr. William Wedd, acted as Secretary of the meeting. Messrs. D'Arcy D. Grierson and W. Ridout Wadsworth were appointed Scrutineers.

The Annual Report was unanimously adopted, and also the statements for the year ending 31st December, 1920, as presented by the Manager, Mr. V. B. Wadsworth. The report was as follows:—

The Directors have pleasure in submitting to the Shareholders the 47th Annual Report of the Company and the Statement of Accounts for the year ending 31st December, 1920, the result being as follows:—

The gross revenue, including the balance (\$25,618.97) brought forward from last year, amounted to ..... \$385,269.49  
 And, after deducting the cost of management, interest on Debentures, Dominion, Provincial and Municipal Taxes (including War Tax) and other charges, amounting in all to..... 211,728.91

There remains a net profit of..... \$173,540.58  
 Out of which four quarterly dividends have been paid at the rate of 9 per cent. per annum, amounting to ..... 112,500.00

Leaving a balance of..... \$ 61,040.58  
 Of which \$50,000 has been transferred to the Company's "Reserve Fund," and \$11,040.58 is carried forward at the credit of "Revenue Account" to next year.

The Reserve Fund now amounts to \$1,000,000, being 80 per cent. of the subscribed and fully paid-up Capital Stock of the Company.

During the year applications for loans on mortgages were accepted and renewed to the amount of \$734,995 on real estate valued at \$1,924,000.

The total assets of the Company are now \$5,067,253.

The Company's business was well maintained during the past year, and the returns therefrom proved satisfactory.

During the year the death occurred of Mr. Thomas Long, a member of the Board of Directors and former President of the company. Mr. Long's efficient and valuable services, covering a period of upwards of twenty years, proved of much advantage, and assisted greatly in the upbuilding of the Company. The vacancy on the Board has been filled by the election of Mr. Gerard B. Strathy.

The Directors desire to acknowledge the continued valuable services of the Scottish Board and Agents.

The various officers of the Company performed their duties faithfully and to the satisfaction of the Directors.

The books, accounts, vouchers and securities have been duly examined by the Auditors, and their certificate of audit is hereto appended.

C. S. GZOWSKI, President.

Toronto, January 18th, 1921.

During 1920 the number of automobiles registered in Canada totalled 402,929. These cars were distributed among the various provinces as follows: Ontario, 172,065; Saskatchewan, 60,325; Quebec, 43,450; Alberta, 37,515; Manitoba, 36,455; British Columbia, 28,136; Nova Scotia, 12,455; New Brunswick, 11,101; Prince Edward Island, 1,426; total, 402,929. In 1907 the registrations totalled 2,130, made up as follows: Ontario, 1,530; Saskatchewan, 54; Quebec, 254; Alberta, 55; British Columbia, 175; Nova Scotia, 62.

## CITY OF TORONTO

### \$5,037,000 SERIAL BONDS

Sealed tenders, endorsed "Tender for City of Toronto Bonds," addressed to Thomas L. Church, Esq., K.C., Mayor and Chairman of the Board of Control, will be received by the undersigned until 12 o'clock noon, Tuesday, 22nd February, 1921, for the purchase of \$2,500,000 serial bonds, issued on account of the acquisition and rehabilitation of the Toronto Railway Company, also \$2,537,000 serial bonds issued for school purposes.

Full details as to the purposes for which the bonds are issued, and amounts maturing annually, together with financial statement of the City, will be furnished on application.

The legality of the issues has been approved by Mr. J. B. Clarke, K.C., Toronto, and his favorable opinion will be engraved on each bond.

The bonds are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, and are of the denomination of \$1,000.

They are payable both as to principal and interest in Toronto, and carry interest at the rate of 6% per annum, payable half-yearly.

Engraved bonds will be ready for delivery on or about March 7th, 1921. Delivery and payment, with accrued interest, are to be made at the office of the undersigned.

Tenders will not be received for any part, but must be for the entire issue.

A certified cheque, payable to the undersigned, for 2% of the par value of the bonds tendered, must accompany the tender.

Tenders specifying for bonds other than those herein described, or containing conditions varying from the above, will not be considered.

The right is reserved to reject any or all proposals.

GEO. H. ROSS,  
Commissioner of Finance.

Treasury Department,  
City Hall, Toronto, Canada, February 10th, 1921. 416

## Condensed Advertisements

"Positions Wanted," 3c per word; all other condensed advertisements 5c. per word. Minimum charge for any condensed advertisement, 65c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

The British-American Bond Corporation has purchased a seat on the Vancouver Stock Exchange.

The Standard Reliance Mortgage Corporation, by Liquidator G. T. Clarkson, and the Standard Reliance Assets, Ltd., on January 12 issued a writ against the London Loan and Savings Co., and J. Kent, and the Dovecourt Land, Building and Savings Co., asking for an accounting concerning certain mortgage securities, their recovery, and to discharge a mortgage made in March, 1914, for \$120,000 from the Standard Reliance to the London Loan Co.

# Corporation Finance

**Increased Cost of Production Curtailed Operations and Profits of Canada Cement—Maritime Telegraph Net Revenue Increased—Woods Manufacturing Company Had Deficit—Power Companies Experienced Good Year—Winnipeg Electric Railway Makes Best Showing Since 1914—Mackay Companies' Results Were Satisfactory—Provincial Paper Statement Reflects Prosperity**

**International Nickel Co.**—Net profits of the company for the nine months ended December 31, 1920, amounted to \$2,620,873, which is in excess of \$800,000 above the total net profits reported in the corresponding period the year before. The profits for 1920 were equal to \$1.33 per share on the \$41,834,600 common capital stock of \$25 par value outstanding. This amount compares with 83 cents per share earned in 1919. Total earnings for the period approximated \$4,415,000, but after payment of taxes, reserves for depreciation and other items deducted, the amount was reduced to \$2,620,000.

The balance sheet as of the close last year shows a rather sharp increase in inventory, that account standing at \$11,764,000, as against only \$7,890,000 at the close of 1919. Cash on hand totalled \$1,737,997, as compared with \$3,137,000, while the profit and loss surplus aggregated \$12,611,040. At the end of 1919 this item amounted to \$9,579,146.

**Woods Manufacturing Co., Ltd.**—The financial statement of the company, submitted at the annual meeting this week, shows a deficit from operations at December 31, 1920. Profit and loss account compares as follows: Surplus balance from previous year, \$1,385,664, compared with \$1,091,439; loss from operations, \$412,324, compared with profits of \$639,812; interest on bonds, \$23,850, compared with \$25,050, leaving deficit of \$559,332, less \$12,596 profit from sale of Winnipeg property, making total deficit \$546,736. This deducted from surplus balance leaves \$838,928, from which are deducted preferred dividend of \$108,255 and dividends and bonus on common of \$214,825, making profit and loss surplus for year \$515,842, compared with \$1,385,614 at end of 1919. Balance sheet shows current assets of \$3,183,911, compared with \$5,113,391, and current liabilities as \$1,829,391, against \$2,949,151. Cash on hand and in banks is \$22,198, compared with \$781, and working capital \$1,354,520, compared with \$2,164,240. Following the annual meeting the directors declared regular dividend of 2 per cent. on common for quarter ending February 28, payable March 1, record February 22.

**Winnipeg Electric Railway Co.**—Shareholders of the company were presented with the best statement of operations since 1914 at the annual meeting in Winnipeg, showing a net profit of nearly \$600,000. The gross earnings of the company for 1920, from operations, totalled \$5,233,700, with operating expenses, exclusive of depreciation charges of \$3,428,897, leaving the net operating revenue at \$1,804,803. Miscellaneous income amounted to \$76,700. Fixed charges amounted to \$1,084,928, leaving the net income, excluding depreciation at \$796,575. Included in the expenses under fixed charges is the sum of \$308,488 payable to the city of Winnipeg. This payment to the city consists of \$181,249 as the city's share of the operating revenue and car license taxes and \$127,239 as taxes.

The gross earnings for 1920 show an increase of \$949,221 over the previous year, and the net income shows an increase of \$498,720. Sir Augustus Nanton, president of the company in his report to the shareholders, referred with satisfaction to the growth over the previous year. During the year the company expended more than \$900,000 in extensions and improvements, including the replacing of property destroyed by fire.

The above are preliminary figures. More detailed results will be given in these columns later.

**Public Service Corporation of Quebec.**—As a subsidiary of the Shawinigan Water and Power Co., the corporation made good progress in 1920. Gross income for the year

amounted to \$305,627, an increase of \$42,222 over that of 1919 and of \$63,292 over that of 1918. After deductions for expenses, but before bond interest, net earnings were \$116,557, against some \$102,000 at the end of the preceding year. After bond interest of \$25,000 the balance applicable to the \$1,600,000 outstanding capital stock amounted to \$91,557, or the equivalent of 5.72 per cent., against \$77,862, or 4.87 per cent. in the previous period. The year's surplus added to that of 1919 made \$107,939 available for disposal.

In his review for directors, Julian C. Smith, the president, says that the company commenced to pay a 4 per cent. dividend on September 30, 1919, and continued until March 31, 1920. For the last three quarters of 1920 has been paying 5 per cent. "It is a great source of satisfaction to your directors," says Mr. Smith, "to feel that the affairs of the company have warranted reaching a 5 per cent. dividend within the relatively few years since the Public Service Corporation of Quebec started operations."

Some of the changes in the balance sheet are:—

	1920.	1919.
General plant, etc. ....	\$2,023,264	\$2,023,264
Depreciation reserve .....	100,000	85,000
Surplus .....	3,939	16,382
Total assets .....	2,352,796	2,320,485

**Provincial Paper Mills, Ltd.**—Prosperity is reflected in the annual report of the company for 1920. The figures given, however, cannot be taken as actually comparing the same scope of operations but can only be taken relatively, as it was during last year that the complete absorption of the Port Arthur Pulp and Paper Mills was effected, and the 1920 figures given the results of the consolidated operations, while the 1919 report does not. The profit and loss statement shows for the year, after allowing for 1921 war tax, of \$1,225,775. This compares with \$420,573 in 1919.

During the year, some \$200,000 was set aside for depreciation in buildings and plant, against \$75,000 in the previous year; and after paying preferred dividends and all other charges, there was available for common dividends some \$890,903, against \$223,408 in 1919. Some \$257,500 was paid in common dividends against \$90,000 in the previous year; and there was a surplus for the year of \$633,403, against \$133,408 in 1919.

The balance sheet of the company shows a good cash condition. Cash in hand totals \$315,166, against \$110,902; and accounts receivable are set down at \$811,600, against \$435,612. Victory bonds at market are placed at \$396,800, against \$15,000. Current assets aggregate \$1,791,052, against \$1,260,585, and surplus of current assets over current liabilities exceeds one million dollars.

**Laurentide Power Co., Ltd.**—The annual statement presented to the shareholders at the annual meeting in Montreal this week, showed earnings equal to 4.12 per cent., against less than 4 per cent. the previous year. Net profits were up \$100,000 to \$866,792. Expenses included an additional \$59,000 premium on United States funds in paying bond interest of \$375,000. This, with taxes and a contingent fund reserve, resulted in the reduction of surplus from \$19,806 in 1919 to \$3,340 for last year.

The balance sheet shows valuation of property at \$18,886,435, up about \$400,000, with a similar increase in total assets at \$19,272,683. Among the assets a cash item of \$198,260 the preceding year has been replaced by a bank

## VOLUNTARY WINDING UP DOES NOT CONSTITUTE INSOLVENCY

Supreme Court of Ontario Holds Dominion Winding-up Act Cannot Apply to Company Being Voluntarily Wound Up Unless it is Insolvent

IN a recent application to the Ontario Supreme Court by certain creditors of a provincial company, it was held that a company is not insolvent within the meaning of the Dominion Act when it is in the process of voluntary winding-up, and that when the insolvency is not proved, it is proper to refuse an order under the Dominion Act at the instance of a creditor for less than \$600 when creditors to the extent of more than \$14,000 are opposed to a compulsory winding-up.

Justice Orde in his written judgment gives the facts of the case and his opinions on the points in issue in the following words:—

"The Empire Timber Lumber and Tie Co., Ltd., is incorporated under the Ontario Companies Act and is now in process of winding-up voluntarily under the provisions of the Act, in pursuance of a resolution of the shareholders passed on the 3rd July, 1920. The resolution also appointed Mr. John S. Stewart liquidator. The company has a nominal capital of \$85,000. The evidence as to the nature and extent of the company's assets and liabilities is a little vague, but it appears to have certain sawmills and equities in or options upon timber lands and some lumber on hand, all valued at approximately \$35,000, with liabilities, secured and unsecured, of about \$30,000. The petitioners, Hall Brothers, Ltd., are creditors upon an overdue promissory note for \$591.70 and interest. No judgment has been recovered upon this note, nor has there been default for 60 days after demand made, under sec. 4 of the Dominion Winding-up Act.

### Insolvency Not Claimed

"The petitioners make no allegation of insolvency, but rely solely upon the fact that they are creditors, and that the company has passed a resolution to wind up voluntarily, and ask that it be declared that the company is a corporation to which the provisions of the Winding-up Act are applicable and that the company ought to be wound up under that Act.

"That the Court may make a winding-up order under the Dominion Act against a provincial corporation which it is proved has become insolvent is well-established. But the petitioners claim that, without establishing insolvency, they are entitled to have the company wound up under the Dominion Winding-up Act, R.S.C. 1906, ch. 144, para. (b) of sec. 6 and paras. (b) and (e) of sec. 11. Section 6 declares that the Act shall apply to "all incorporated trading companies doing business in Canada wheresoever incorporated . . . (a) which are insolvent; or (b) which are in liquidation or in process of being wound up," etc. By sec. 11: "The Court may make a winding-up order . . . (b) where the company at a special meeting of shareholders called for the purpose has passed a resolution requiring the company to be wound up; . . . or, (e) when the Court is of opinion that for any other reason it is just and equitable that the company should be wound up."

"There is no doubt that, if the question depended upon the mere construction of these sections, the Court would have power to bring a provincial corporation within the Dominion Act on grounds other than insolvency. But the question whether or not the Dominion Parliament can legislate so as to force a provincial corporation into a compulsory winding-up on any ground other than bankruptcy or insolvency is, in my judgment, not yet clearly settled.

"Now, assuming for the sake of argument that, in the exercise of its power to legislate upon the subject of 'Bankruptcy and Insolvency,' under sec. 91 (21) of the British North America Act, the Dominion Parliament can declare that the passage of a resolution to wind up voluntarily *ipso facto* makes the company insolvent, I am unable to see how

or where in the Winding-up Act it has so declared. Among all the different conditions which the Act, by sec. 3, declares shall be deemed to be insolvency, the voluntary winding-up of the company is not mentioned. On the contrary, sec. 6 makes the Act applicable in two classes of cases: (a) when the company is insolvent; and (b) when it is in liquidation or in process of being wound up—showing that there may be cases of liquidation or winding-up which do not necessarily constitute insolvency. With all due respect to the decision in the Manitoba case, I am utterly unable to follow the reasoning which leads to the conclusion that, because the Dominion Parliament has power to declare what shall constitute insolvency, the Winding-up Act has in effect declared that a voluntary liquidation or winding-up is 'a species of insolvency.' In my judgment, the Dominion Act has done no such thing. If it has declared anything at all in this respect, it is that a voluntary liquidation or winding-up may not involve insolvency at all. In my judgment, the mere fact that a provincial company is in process of voluntary winding-up does not of itself make the company insolvent under the Dominion Act.

"It was argued on behalf of the petitioners that the Dominion Act gives power to wind up a provincial company on grounds other than insolvency. But all the authorities are agreed, I think, that the only basis for federal interference with the constitution of a provincial corporation is its bankruptcy or insolvency.

"The petitioners object to the liquidator entering into a contract for the cutting and sale of a quantity of lumber, the details of which it is hardly necessary to go into here. Creditors to the extent of over \$14,000 appear to be willing that the liquidator should be given an opportunity of trying to realize the assets to the best advantage and are opposed to a compulsory winding-up. Under these circumstances, I do not think I ought, at the instance of a creditor for less than \$600, to make an order to wind up the company under the authority of the Court."

## BANQUE D'HOCHELAGA HELD LIABLE

On the principle that a creditor is liable for the deterioration of the thing pledged, the Quebec Superior Court held that the Hochelaga Bank was responsible in damages because it allowed the lapse of a policy of life insurance that had been transferred to its Quebec branch as collateral security for a certain indebtedness of Joseph Labonte, one of its clients. The full value of the policy was sued for (\$2,000), but the court considered the claim was exaggerated, and ruled that the measure of liability was the redeeming value of the instrument at the time the action was taken.

Labonte transferred the policy to the bank in 1905. The annual premiums (\$69.72) were paid by the bank half-yearly until July, 1914, when, owing to forgetfulness on the part of an official, the premium was left unpaid, and when the policy was returned to Labonte after he had paid off his indebtedness it was found to have lapsed. At the time he was so ill that he could not be reinsured, and he took the present action, alleging that the bank was liable to him for the face value of the policy in good standing, namely, \$2,000. Labonte died during the instance, and his cause was taken up by one Belanger, the curator of his estate.

The bank denied all liability, submitting that it made no undertaking to pay the premiums on the policy, and, though it inadvertently neglected to do so in one instance, which turned out to be fatal to the benefit, nevertheless this omission did not incur legal liability for any loss to Labonte.

"Canadian Government Loans, Production Statistics, Area and Resources of the Provinces," is the title of a booklet just issued by the Dominion Securities Corporation, Toronto. It shows, among other figures, the loans of the Dominion and provinces.

# News of Industrial Development in Canada

**Steel Expert Holds Out Encouragement for Producers—Predicts a World-Wide Boom—Ojibway Subsidiary of United States Steel Corporation is Making Good Headway—Demand for Cement Will be Good, Says Manufacturer—Peabody Company Tells of Good Demand and Better All-round Conditions**

**I**N spite of the rather depressed feeling in the iron and steel industry at the present time there is no lack of encouragement as to what there is in store for manufacturers. While in Toronto last week, E. P. Thomas, president of the United States Steel Products Co., which is the export organization of the United States Steel Corporation, stated that the steel requirements of the world are tremendous. Works of major importance that could not be undertaken during the war will take a huge tonnage of iron and steel sooner or later. The latent demand, which will make itself felt ultimately, will mean big business for producing interests the world over.

It is evident that the Dominion, as one of the steel-producing countries of the world, will be called upon to make its contribution to the great demand, while present business requirements and needs of the Canadian railways also point to substantial expansion of the domestic trade. In the United States, where the readjustment has proceeded farther than in the Dominion, most of the large plants report operations at fifty per cent. of capacity and upwards. Canadian companies are not yet able to report such favorable conditions, but the signs are unmistakable. About a month ago the Dominion Steel Corporation reduced its wage scale, and now announcement is made by the Nova Scotia Steel and Coal Co. of a reduction of twenty per cent. Such a step by these companies is a movement towards further stabilization, and is necessary in bringing about a revival in business. The Canadian plants have to meet American and other competition, and with wages being cut at the American plants it would not be possible to do this without scaling down the wages at the Canadian plants also.

Of late, very little has been heard of the development of the Canadian Steel Corporation, Ltd., at Ojibway, Ont., the Canadian subsidiary of the United States Steel Corporation, but some remarks made by Mr. Thomas show that big progress is being made. In spite of the apparent tendency to delay building operations, \$4,000,000 has already been spent, and two large blast furnaces are well on the way to completion. Incidentally, it was also mentioned that whereas the Ojibway plant would have cost \$20,000,000 according to the original estimates, the expenditure on the basis of present prices would be fully \$50,000,000. Mr. Thomas has emphasized the fact that the subsidiary will ultimately take its place as a Canadian manufacturer, thereby assisting in the development of the country.

## Cement Production

Some interesting and rather important views on the production of cement in Canada were expressed by Hon. Wm. Edwards, president of the Canada Cement Co., at the annual meeting last week. "Last year some people claimed that there was a shortage of cement in Canada," he said, "but we contend that Canada had a better supply of cement than any country in the world, and that any temporary shortage was not due to the cement manufacturers, but to the shortage of coal. Canada at the present time has an annual cement producing capacity of at least 50 per cent. more than Canada's annual consumption. Newspapers report that in some quarters there is uncertainty about being able to carry on work during the year 1921, on account of anticipated difficulty in getting delivery of cement. Such fears are without foundation, as Canadian cement manufacturers have more than ample capacity; in fact, your company alone can produce yearly considerably more cement than Canada has ever consumed in any year, and, we believe, more than Canada will consume in any year for some

years to come. It may be possible that if large users wait until they actually require their cement before ordering it, they may not be able to get delivery the moment they want it, but if they will place their orders a reasonable length of time ahead, as they do for other commodities, they need have no fear about getting their cement as and when required, provided, of course, that Canadian transportation systems can handle it at the time they want it."

## Textile Conditions

An interesting sidelight on the conditions in the textile trade is contained in a remark made by H. B. Peabody, of Peabody and Co., Walkerville, recently. "Within another thirty days we expect to be running at full force," he said. "At present we are employing about 35 men and about the same number of girls on short time production of between four and four and a half days a week. We expect to put on another 75 girls at least. Experienced operators, of course, will be given the preference. We will keep adding to this number as rapidly as possible. When running under normal conditions, we employ 125 men and between 450 and 500 girls. During the past few days orders have been coming in very well. The orders are coming from all parts of the country, including many points in Ontario. Conditions are bettering and prospects are much brighter. With our stock running low, we confidently expect that our plant will be in full swing in another month's time."

Following a recent interview between representatives of the textile industry in Quebec and the minister of labor of the province, in connection with the employment of children and women in textile factories, it was announced that the minister though admitting that a request for a maximum of 50 hours per week instead of 55 for women and children in the industries was sufficient, had suggested as a point of agreement fifty hours or even fifty-two for the present. Hon. Mr. Galipeault stated that he thought employers and employees could settle this question quite easily, and that as soon as the hour limit had been agreed upon the present regulations regarding women and children labor in textile industry would be amended so as to meet the demands made. At present 75 per cent. of the labor in the textile industry is composed of women and children.

## Dominion Industrial Products

The Dominion Industrial Products Co., Ltd., is being organized at Toronto, Ont., to act as the accredited representative in Canada of thirty or more United States manufacturers of numerous industrial products, including railway equipment, road contractors' equipment, and various metal specialties. It is not expected that warehouses will be opened before the end of the year, but there are immediate prospects of sales offices being opened in the principal Canadian cities. Those interested include W. P. Young, formerly general purchasing agent of the Canadian Edison Appliance Co., Ltd., Stratford, and J. M. Young, formerly with the Russell Motor Car Co., Ltd., James W. Derbyshire will be general sales manager.

A new canning factory has been erected by the United Fruit Companies of Nova Scotia, at Aylesford, N.S., and is now in operation. The capacity of the plant is from 600 to 800 bushels per day, and forty hands are engaged in operating the machinery of the plant.

Canadian Car and Foundry Co. recently disposed of its Rhodes Curry plant at Amherst, N.S. The plant was not in any degree a vital part of the company's organization and its disposal will enable the company to enter 1921 in a stronger liquid position than otherwise would have been

the case. The remaining plants of the company are capable of caring for the unusually large volume of orders now booked.

The new industry recently located at Smith's Falls, Ont., the International Button Co., Ltd., has commenced operations. The product is an ivory button such as in everyday use, and is manufactured from vegetable ivory, a nut imported from South America. It is expected that 100 persons will be employed.

Negotiations are under way for the establishment of a tire manufacturing company at Leamington, Ont. Under the proposed terms of incorporation, the new company will attempt to raise \$200,000 of their capital in Leamington, later increasing their stock to \$1,000,000. Representatives of the new company are seeking options on land in the municipality as a site for their plant, which will require between 200 and 300 acres. The plant will manufacture punctureless inner automobile tubes and casings. The principal promoter of the new firm was a former resident of Leamington, who has been engaged in the tire manufacturing business in Akron.

A factory for the manufacture of the Dominion Grain Cleaner and Grader will be established in Winnipeg this year, according to an announcement by R. H. Smith, of New York, while in the west last week. "The machine is the only one of its kind to go on the Canadian market," said Mr. Smith. "It will clean and grade grain in one operation and will save the farmer 100 per cent. on his total crop value." The machine is so designed as to eliminate impurities from the grain itself and can be used for cleaning seed grain as well as the general crop.

#### NEW INCORPORATIONS

Total Capital for Week Ended February 15 is \$17,098,100,  
Compared with \$9,375,900 Previous Week

**A**UTHORIZED capital of \$17,098,100 is represented by companies whose incorporation was reported to *The Monetary Times* during the week ended February 15, compared with \$9,375,900 the previous week. A comparative summary by provinces is as follows:—

	Week ended Feb. 8.	Week ended Feb. 15.
Dominion .....	\$1,400,900	\$10,294,000
Alberta .....	.....	479,500
British Columbia .....	1,665,000	940,000
Manitoba .....	250,000	.....
Ontario .....	3,820,000	3,580,000
Quebec .....	2,076,000	1,804,600
Saskatchewan .....	164,000	.....
Total .....	\$9,375,900	\$17,098,100

#### INSURANCE LICENSES AND AGENCY NOTES

The Merchants Casualty of Winnipeg, which has operated in the accident and health field for a number of years throughout the Dominion and Newfoundland, has obtained a Dominion license to write all forms of automobile policies. Captain R. C. Sanborn, who has played a large part in the promotion of the Zenith Companies, the parent company of the Merchants, has been appointed general agent and adjuster for the automobile department in eastern Canada, including Ontario, Quebec, the Maritimes and Newfoundland, with headquarters in Montreal.

The Prudential Insurance Co. has made some changes in the higher field staff positions, some of which affect the Canadian organization. G. H. Chace, manager Canadian division, is being transferred to the southern group of ordinary agencies and C. G. Lanning becomes Canadian manager. E. J. MacIver, supervisor, becomes supervisor of the group department. It was Mr. MacIver who opened the Canadian field for the company.

The Life Underwriters' Association of Toronto held their January meeting on January 14, the attendance being the best on record, numbering in excess of 200. Edward A. Woods, of Pittsburgh, was the guest of the evening, and gave an address on salesmanship and training for the life underwriter. The ballot for a new president for 1921 resulted in Walter B. Peace (Manufacturers Life) being elected.

## Fifty-one Years of Steady Progress

One of the most brief yet impressive histories of Canadian financial institutions is contained in the annual record of The Mutual Life of Canada. The current issue will be ready in a few days. A copy will be sent to you on application. It contains fifty-one successive summaries, showing in the parallel columns the increase from year to year of the company's various receipts, expenditures, etc. No other document could better convey the idea of solid, uniform achievement, and the momentum of the advance is now greater than ever. The prospects are bright for a still more rapid expansion within the next few years. The assets of the company exceed \$40,000,000, and the assurances in force have reached \$206,000,000. There is a gross surplus of more than five million dollars over and above the amount necessary to guarantee all policies, so that the position of the company, in spite of the strain of recent years, is one of uncommon strength.

# News of Municipal Finance

Sherbrooke Proposes to Enrich the Civic Exchequer by a Scheme of "High Financing"—Swift Current in Difficulty—West Vancouver's Report Shows an Improved Condition—Growth of Toronto's Assessment Has Been Rapid—St. Lambert Citizens Claim Bad Management of Affairs

THE city of Sherbrooke, Que., is considering the advisability of indulging in what appears to be a piece of high financing, and by so doing hopes to improve the civic exchequer by a substantial sum. The plan of the finance committee is briefly this: The city has a series of bonds due in London in 1933, bearing  $4\frac{1}{2}$  per cent., which amount to somewhat in excess of 100,000 pounds sterling. This actually represents a value in our own money of, roughly, \$440,000, whereas, at the time the loan was transacted, this would have amounted to some \$490,000. It is this difference which the finance committee wishes to save, in addition to the difference between the present low price of British Consols and their face value at maturity.

It is the committee's intention to borrow some \$400,000 in the States, interest and principal payable at New York, at a rate of not more than 6 to  $6\frac{1}{4}$  per cent. The money received for the issue of bonds disposed of in New York would be used to purchase British Consols 5 per cent., which are now selling around eighty-five pounds. One hundred thousand pounds of British Consols at to-day's prices would cost the city approximately \$375,000, while the 100,000 pounds sterling due by the city cost \$500,000.

Against this the interest on the loan in the United States would have to be considered. This would amount to about 6 per cent., against which would be offset the 5 per cent. on the British Consols, in addition to which we must consider that the 5 per cent. is payable in sterling and the 6 per cent. in dollars. There is also the possibility that exchange conditions will return to normal within the next ten years, so that, while \$400,000 United States money would give 456,000 Canadian dollars to-day, it might then only cost \$400,000. This depends on whether it is the intention of the finance committee to purchase the British Consols with "United States funds" or with Canadian funds.

Toronto, Ont.—Since 1912 there has been a large increase in the total assessment of the city, according to the annual report of Assessment Commissioner Forman. The following figures illustrate:—

	Year's inc.			
	1921.	1920.	1912.	Per cent.
Land .....	\$315,660,799	\$294,675,927	\$156,787,848	7.21
Buildings and improve. ....	253,665,093	236,563,880	146,294,561	7.23
Total real property ...	569,325,892	531,239,807	303,082,409	14.44
Business .....	78,404,872	69,189,511	38,241,909	13.31
Income .....	55,620,587	41,024,838	13,823,105	35.57
Total .....	703,351,351	641,454,156	355,147,423	9.69
Exemptions ...	98,271,202	92,616,595	46,037,672	...

Among the many other interesting statements given in the report, it is shown that the amount realized on tax sale lands sold since 1905 has been \$2,032,334, while the arrears of taxes on the land was \$655,954, thereby netting a profit of \$1,376,379 to the city.

West Vancouver, B.C.—Over a period of three years there has been considerable improvement in the finances of the municipality. The bonded indebtedness of \$780,200 has not changed any since 1918, but the amount in the sinking fund has increased from \$39,188 to \$74,830. There is still a shortage of sinking fund of \$33,000, but this compares with \$38,767 for 1919, and \$35,840 for 1918. There was \$9,585 cash on hand and in the bank at the end of last year, as against \$516 at the end of 1919, and \$936 at the end of 1918. There are no unpaid bank loans, while two years ago such an account was shown at \$27,433.

The total assessed value of the municipality is \$3,693,716, while exemptions are \$508,205, leaving a taxable value

of \$3,185,511. The total levy for 1920 was \$110,989, of which \$75,357 was collected. Arrears of taxes and interest collected last year was \$30,245.

The 1920 report shows liquid assets of \$284,597, of which amount \$103,587 represents tax arrears. Total current liabilities are shown at \$18,985. The excess of total assets over total liabilities is \$360,186.

St. Lambert, Que.—Becoming alarmed over the management and finances of their town, inhabitants have formed a Citizens' Association to prevent amendments to the charter which the council is trying to force through, among which are given unlimited powers for spending without consulting the proprietors and the ratifying of illegal acts of the council. This bill was not brought before the council in public, but only in committee before it was sent to Quebec. The financial condition of the town is seen from the following comparison:—

	1913.	1919.	Increase %.
Population .....	4,000	4,852	21
Value of taxable property .....	\$4,508,920.00	\$6,761,769.00	50
Municipal taxes collected .....	37,872.79	79,014.00	108
Interest-bearing debt .....	469,374.13	1,338,123.95	186
Interest paid .....	21,946.42	68,400.89	211

The printed financial statement for 1919 shows \$15,921 of "excess of expenditure over revenue." That means that St. Lambert did not pay its way. It is stated that last year's showing was worse.

Windsor, Ont.—The first annual report of the local hydro-electric railway shows a net profit of \$22,335. Total earnings of the company for the first year amount to \$296,373. Out of this came all expenditures for upkeep, wages and repairs. There was also set aside \$49,000 for interest on bonds and \$83,000 for a sinking fund. Assets of the system are estimated at \$2,144,755, while liabilities are \$1,849,000.

Moose Jaw, Sask.—The total net assessment of the city for the year 1921, as shown by a statement given out by W. J. Moffat, city assessor, is \$22,580,119, a net decrease of \$396,091 from the statement which was issued by the assessor as on May 15 last. There has been a decrease of \$715,225 in the net land assessment since May. The net land assessment as at December 31, 1920, was \$14,159,200, as against \$14,874,425 of May 15, 1920.

The total gross assessment at the end of December, 1920, was \$28,131,439; on May 15 last the total gross assessment was \$27,802,825. The assessments on improvements, business tax and income tax have all been increased since last spring. The exemptions have also increased, with the result that, while they were \$4,826,615 in May last, they are to-day \$5,551,320 gross. The total exemptions on land now are \$2,898,345, as against \$2,621,640.

Swift Current, Sask.—Details relative to the financial position of the municipality have been gleaned from the report of O. J. Godfrey, municipal expert, who recently made a survey of the city's affairs, and has submitted his report to the council. According to Mr. Godfrey, each resident of Swift Current should pay \$461.48 to pay off the per capita debt. The total liability of the city and school districts is \$1,845,920, made up as follows: City capital liability, \$1,224,603; school capital liability, \$247,500; city current liability, \$331,276; school current liability, \$42,540.

A liability of \$14,023.34 to the provincial treasurer in respect of uncollected taxes for public revenues is omitted, as it is contingent upon collection of the said taxes, and will take care of itself. To retire these liabilities, assuming the accounts receivable to be available for this purpose, is found only \$13,762.41.

# Government and Municipal Bond Market

Prices are Weakening Slightly—Ontarios Went Up to Par But Are Now Below that Level—Transactions in Victories Have Become Fewer in Number—No New Developments in the Edmonton Tie-Up—Many Western Municipalities Are Offering Securities

THE government and municipal bond market has tended to become draggy, with Victory bonds assuming the lead. It was stated in bond circles this week that there are still some Ontario, Saskatchewan and Winnipeg bonds to be had, and that prices have softened a little. Last week Ontario bonds went up to par, but it is understood that they are available under that price now.

The bond market in the United States is in a similar position. Bond houses report further softness in the market for new issues. Most recent offerings are declared to be going slowly because new issues have been too plentiful and glutted the market. Because of the large amount of undigested securities pending, offerings are expected to be held in abeyance until the market has had a chance to absorb the major portion of the floating supply of recent issues.

There has been a remarkably large amount of bonds absorbed here since the beginning of the year, and it is surprising that the market had not shown softness before now. The coming of the Toronto \$5,000,000 issue just now is not quite as welcome as it might be, and it is thought that the city will not receive quite as good a price as if the issue had been brought out a week ago. From the bond dealers' standpoint, however, it is just as well that the issue was delayed.

Transactions in Victory bonds have dwindled down considerably, and in one or two cases the prices have weakened, although the movement has been narrow. The trend of prices in recent weeks is illustrated by the following figures:—

	Control price.	Last week.		This week.	
		High.	Low.	High.	Low.
1922	98	99½	98½	99	98¼
1927	97	98½	98	98½	97½
1937	98	99½	99¼	99½	99½
1923	98	98½	98	99	98
1933	96½	99	98¼	98½	98
1924	97	96½	95½	96½	96
1934	93	95½	95½	95½	95¼

## Edmonton's Bond Tie-up

Although officials of Edmonton, Alta., are watching proceedings at Portland closely, owing to the city's bonds being tied up there, no new developments are reported. So far, there is nothing to show that a start towards getting a settlement of the claims will be made before March 1. Reports received show that the auditors' report on the assets of Morris Bros., which company has defaulted, does not include the Edmonton securities, that is, they are not put in the list of assets. All that the auditors allowed on the securities is the \$150,000 profit which the company would make on the resale of the bonds. This profit is set down as an asset.

Another point that occurs to the civic officials in connection with the auditors' estimate that the company would pay from fifty to ninety-six cents on the dollar. It is believed that this wide spread is made owing to the uncertainty of the fate of the Edmonton bonds. If the firm can succeed in converting them into assets the creditors would draw the higher rate given, the city being in a like position.

Morris Bros. had a turnover last year of \$14,000,000, but on this sum the gross profit was only \$17,000, and this not taking into consideration the \$430,480 for operating expenses. That the firm strongly believed in extensive advertising is shown in the fact that last year it expended \$84,000 in that way. In the meantime, Edmonton is paying 7 per cent. interest on the money borrowed from its bankers to meet the maturity in New York last January.

## Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Whitby, Ont. ....	\$ 60,000	6½	30-instal.	Feb. 19
Chilliwack, B.C. ....	46,000	6	10-years	Feb. 21
Toronto, Ont. ....	5,037,000	6	Serials	Feb. 22
Point Edward, Ont....	24,000	7	.....	Feb. 23
Morris R.M., Man....	50,000	6	20-instal.	Feb. 24
Walkerville, Ont. ....	85,000	6	15-instal.	Feb. 24
Dauphin S.D., Man....	30,000	6½	20-years	Feb. 25
Transcona, Man. ....	48,000	6	20-years	Feb. 28
Pointe Claire, Que....	130,000	6	Serials	Feb. 28
Danville, Que. ....	33,000	6	Various	Mar. 7
Trail, B.C. ....	37,000	7	20-years	Mar. 7
Drumheller, Alta. ...	28,000	7	20-instal.	Mar. 26

**Moose Jaw, Sask.**—It is understood that the city is offering for sale \$45,000 7 per cent. school bonds.

**Whitby, Ont.**—The town is calling for tenders up till February 19, 1921, on \$60,000 6½ per cent. 30-instalment debentures. Joseph White, treasurer.

**Morris R.M., Man.**—Tenders will be received up till February 24, 1921, for \$50,000 6 per cent. 20-instalment good roads debentures. W. A. Stevenson, secretary-treasurer.

**Walkerville, Ont.**—Tenders will be received until February 24, 1921, for the purchase of \$85,000 6 per cent. 15-stalment debentures. For particulars, see advertisement elsewhere in this issue.

**Stratford, Ont.**—The city is offering direct to the local public 6 per cent. bonds, maturing in 10, 15 and 30 years. The funds obtained from the sales made will be used to construct schools and other capital expenditures, while a sinking fund is provided out of the tax rate to retire interest and principal of the bonds when due.

**Pointe Claire, Que.**—Tenders are being asked until February 28, 1921, on \$130,000 6 per cent. debentures, dated November 1, 1920, and maturing in series until November 1, 1945. Tender must be accompanied by a certified cheque equal to 1 per cent. of the issue. Securities are in denominations of \$100 and multiples thereof.—L. J. Laurendeau, secretary-treasurer.

**Regina, Sask.**—A block of \$100,000 debentures will be placed on the market in about a month or six weeks' time to cover the cost of local improvements constructed last fall, according to Commissioner Thornton. Mr. Thornton told the council last week that he had received an inquiry from a bond firm and put it up to the council to decide whether to anticipate the passage of the necessary by-laws and call for bids now or wait until a later date. The commissioner stated that the bond house agent declared that present conditions were more favorable now than they had been for some time, but they were unable to forecast what the situation would be in a month's time. He was of the opinion that it would be more politic to wait, and with this view the aldermen concurred.

## Debenture Notes

**Sandwich, Ont.**—A number of by-laws have been passed by the council, authorizing the raising of funds for municipal improvements.

**Winnipeg, Man.**—The school board has decided to ask the citizens to approve of the issue of \$2,000,000 bonds, the

amount estimated as required for providing additional school accommodation during 1921 and 1922.

**Edmonton, Alta.**—Financial firms across the border are still seeking the city's bonds, despite a disposition in local quarters in future to deal with Canadian houses. An offer to take up \$1,500,000 of ten-year bonds, bearing five and a half per cent. interest, has been received from a financial house in Philadelphia. As the price is considered low in comparison with what the city secured some months ago, it is unlikely that it will be accepted. The securities which the Philadelphia firm is after are the unsold portion of the consolidated tax arrear debentures sold to the National Bond Corporation in Vancouver last year.

**Lethbridge, Alta.**—H. T. Lloyd, engineer, representing the Chattuck Construction Co., of Los Angeles, met with the board of trustees of the Lethbridge Northern Irrigation District last week to discuss submitting a proposal to the trustees. Mr. Lloyd desired to know if the trustees would consider a bond-contract proposal. The engineer was given all the information in the hands of the district, covering the district's affairs, and was told that if the company's proposal was sufficiently reasonable it would be considered. No definite promise was given to Mr. Lloyd, and it is understood Mr. Lloyd telegraphed his seniors to the effect that the trustees would receive a proposal.

#### Bond Sales

**West Kildonan, Man.**—J. A. Thompson and Co. have purchased \$38,000 6 per cent. 30-year bonds of the municipality at a price of 85.50, which is considerably above a 7 per cent. basis.

**Fredericton, N.B.**—The Royal Securities Corporation has been awarded \$100,000 5 per cent. serial bonds, maturing from 1924 to 1934, at a price of 90.676, which is on about a 6.45 per cent. basis.

**Decker C.S.D., Man.**—Debentures for \$40,000 at 7 per cent. of the district have been sold to Harris, Read and Co., of Regina, at 97. These were advertised last month, and the highest bid at that time was 92.50.

**Rockwood R.M., Man.**—J. A. Thompson and Co., of Winnipeg, have been awarded \$52,853 6 per cent. 30-instalment debentures of the municipality at 95.772, which is on about a 6.40 per cent. basis. Tenders received were:—J. A. Thompson and Co., 95.772; Strang and Snowden, 95.17; W. L. McKinnon and Co., 94.813; Harris, Read and Co. (Regina), 94.32; Bond and Debenture Corporation, 94.07; Wood, Gundy and Co., 93.89; Dominion Loan and Securities Co., 93; A. E. Ames and Co., 92.40; R. C. Matthews and Co., 89.

**Portage la Prairie, Man.**—A. E. Ames and Co. have purchased \$54,000 6 per cent. 20-year debentures of the municipality. The following tenders were received:—

A. E. Ames and Co. ....	93.69
T. S. G. Pepler and Co. ....	93.587
Strang and Snowden .....	92.28
Harris, Read and Co. ....	89.80
R. C. Matthews and Co. ....	88.10
Wood, Gundy and Co. ....	87.46

Also two bids received too late to be considered by the city council. Canadian Debenture Corp., Toronto, 94.28; Bond and Debenture Corp., Winnipeg, 93.85.

**Oshawa, Ont.**—The city has disposed of to Wood, Gundy and Co. \$132,475 6 per cent., 30-year sewer debentures and \$48,864 6 per cent., 20-year sidewalk debentures. The price paid was 96.65, and as the securities mature in annual instalments the municipality paid about 6.35 per cent., for its money. The following tenders were received:—

Wood, Gundy and Co. ....	96.65
R. C. Matthews and Co. ....	96.121
C. H. Burgess and Co. ....	95.69
National City Co., Ltd. ....	95.39
A. E. Ames and Co. ....	94.85
United Financial Corp. Ltd. ....	94.82

Brent, Noxon and Co. ....	94.646
Dymont, Anderson and Co. ....	94.432
A. Jarvis and Co. ....	94.293
Harris, Forbes and Co., Inc. ....	94.21
C. R. Clapp and Co. ....	93.891

**Windsor, Ont.**—The city has awarded an additional \$225,000 block of bonds to the Dominion Securities Corp., who recently secured an issue of about \$450,000. The bonds are twenty-year serials and bear 6 per cent. They are being offered to the public at prices to yield from 6.17 to 6.50 per cent., according to maturity.

#### NORTH WEST FIRE INSURANCE CO.

On another page of this issue are given details of the thirty-seventh annual report of the North West Fire Insurance Co., Winnipeg. The figures shown, as compared with the previous year, reflect increased operations and a better position. The premium income shows an increase of \$26,814 over 1919. Loss ratio is 42.93 per cent. and the reinsurance reserve is the full government standard and not taken in at 80 per cent., as allowed by the Insurance Department.

Total assets are \$448,134, and the surplus over all liabilities and paid-up capital is \$178,494. The figures in the previous year were \$387,379 and \$168,653 respectively.

The North West Fire is well-known and highly respected in the west. Geo. R. Crowe is present, T. L. Morrissey, general manager, and Thos. Bruce, deputy manager.

#### REAL ESTATE LOAN CO.

An increase in income from \$84,151 to \$90,637, an advance from \$1,095,594 to \$1,131,102 in mortgage loans, and much larger holdings of government, provincial and municipal bonds, are facts illustrated in the annual report of the Real Estate Loan Co., Toronto, which speak well for the operations of that institution in 1920. The securities now held total \$193,116, as against \$150,816 in 1919. Cost of management was slightly higher, but interest on money borrowed was about \$5,000 less, so that after paying the regular dividends and making the usual provisions, the balance carried forward was increased correspondingly.

The balance sheet shows a reduction in sterling debentures from \$587,050 to \$558,206, while currency debentures are about stationary at \$50,900. Assets are now shown at \$1,401,673, compared with \$1,419,423 a year ago, but the position of the company has improved in this regard. For instance, last year an item appeared showing real estate foreclosed at \$105,213. This year there is shown real estate held for sale of \$44,678. The capital and reserve are unchanged at \$500,000 and \$260,000, respectively.

#### CANADA NATIONAL FIRE INSURANCE CO.

A loss ratio of 32.82 per cent. in 1920, compared with 33.45 per cent. in 1919, is reported by the Canada National Fire Insurance Co., Winnipeg. The gross amount of insurance in force at the end of the year was \$36,891,896, an increase of \$5,137,562. Gross premium income was \$328,171, an increase of \$40,974. The amount of insurance written in 1920 was \$26,364,244, the largest in its history.

The total revenue for the year was \$370,290, and after paying losses and expenses there remained a balance of \$169,420. Out of this \$13,008 was transferred to government reserve and \$110,503 paid out in dividends at 6 per cent.; the balance of \$45,828 was carried to the net surplus to shareholders, which now amounts to \$343,414. There is also a contingent reserve fund of \$100,000, making a total reserve to shareholders of \$443,414.

President,  
Toronto, 31st January, 1921.

C. H. EANSOON,  
General Manager

### Auditor's Report to the Shareholders

I have compared the above Balance Sheet with the books and accounts at the chief office of The Standard Bank of Canada, and the certified returns received from its branches, and after checking the cash and verifying the securities at the chief office and certain of the principal branches on 31st January, 1921, I certify that in my opinion such Balance Sheet exhibits a true and correct view of the state of the Bank's affairs according to the best of my information, the explanations given to me, and as shown by the books of the Bank.

In addition to the examination mentioned, the cash and securities at the chief office and certain of the principal branches were checked and verified by me at another time during the year, and found to be in accord with the books of the Bank.

All information and explanations required have been given to me, and all transactions of the Bank which have come under my notice have, in my opinion, been within the powers of the Bank.

Toronto, February 14th, 1921.

G. T. CLARKSON, F.C.A.,  
of Clarkson, Gordon & Dilworth, Toronto, Canada.

## CORPORATION FINANCE

(Continued from page 40)

overdraft among the liabilities of \$215,347. A sinking fund investment of \$153,803 makes its appearance among the assets; other investments have been increased \$40,000 to \$100,000, and accounts payable are up about \$180,000 at \$530,189. There are few other changes of note.

In his report to the shareholders, J. E. Aldred, as president, said: "The company's gross income was increased very materially by increased sales of power on July 1, 1920, which, however, only added to the company's income during six months. Unexpected expenditures had to be made during the year by the payment of heavy exchange rates on the bond interest payable in New York. No serious accidents and no abnormal occurrences took place in the operation of the company's plant during the year. Steady progress has been made in the extension of the power plant and while this work has been somewhat delayed, it is expected that before July 1st of this year the two additional units will be in operation. This will bring the total capacity of your company's plant up to 165,000 h.p."

**Barcelona Traction, Light and Power Company.**—The December operations of the company and its subsidiaries produced the following results:—

	1920. Pesetas.	1919. Pesetas.	Increase.
Gross earnings from operation .....	3,147,789	2,134,986	1,012,803
Operating expenses .....	1,105,149	913,450	191,699
Net earnings .....	2,042,640	1,221,536	821,104
Aggregate gross earnings from March 1 .....	27,655,193	20,634,049	7,021,144
Aggregate net earnings from March 1 .....	18,117,501	11,808,913	6,308,588

**Canada Cement Co.**—Increase in cost of production much greater than the increase in the price received for their products of the company had the effect of curtailing the company's business last year and curtailing the profits on contracts performed, according to the annual statement just made public. Not only was coal cost up 540 per cent., but labor was up 145 per cent., helping to make an average increase in operating costs of 196½ per cent., during which time the increase in the selling price of cement had risen only 90 per cent. During the past fiscal year the company earned 3.1 per cent. on the common stock, but paid the full 6 per cent. dividend, which necessitated a drawing from surplus of \$525,887, in order to permit the writing off of a proper amount for depreciation, which last year amounted to \$810,491, against \$1,149,584 in 1919. During that year the write-off for depreciation was permitted after the common dividend had been paid, by the withdrawal from surplus of \$241,666, so that in the past two years the company, in order to pay the common dividend and at the same time allow for a proper depreciation reserve, has drawn from surplus the sum of \$767,553. This has resulted in helping to reduce the surplus account from \$2,677,643 at the end of 1918 to \$898,972 at the end of last year.

Net earnings last year, before depreciation, etc., were down 22 per cent. from the preceding year at \$2,362,742, depreciation allowance was \$330,000 smaller, bond interest \$18,000 smaller, and the balance left for common dividends amounted to \$424,630, or, as stated, 3.1 per cent.

The company's balance sheet contains, among other changes, a reduction of \$900,000 in investment account, and an increase of nearly \$2,000,000 in inventories, with a new item in the liability side of the account of \$275,000 bank loan. Accounts receivable are up \$250,000 and call loans are down \$40,000. Accounts payable have been increased \$1,500,000 to \$1,949,475. Total assets show slightly more than \$1,000,000 increase over the preceding year.

**Maritime Telegraph and Telephone Co., Ltd.**—The eleventh annual financial statement, covering the year 1920, shows net revenue of \$215,158, compared with \$153,147 in 1919. Dividends of \$188,795 were paid, as against \$164,980 previously, and after other provisions there was a surplus of \$23,677, while in the previous year the surplus was only \$1,642. Principal changes in the balance sheet are as follows:—

	1920.	1919.
Seven per cent. preferred .....	\$1,220,384	\$1,000,000
Six per cent. preferred .....	1,000,000	1,000,000
Common stock .....	850,000	850,000
Bonds .....	1,500,000	1,500,000
Accounts payable .....	235,311	128,838
Bills payable .....	210,000	.....
Reserve .....	1,184,876	1,109,987
Plant .....	5,789,233	4,981,442
Investments .....	99,625	113,533
Total assets .....	6,318,255	5,697,962

The number of telephones in use on December 31, 1920, was 29,163, the increase during the year of 2,761 being the largest in the company's history; 1920 was the first full year under the new schedule of rates. These rates proved to be not sufficiently high under existing conditions to enable the company to earn the full 8 per cent. on the value of its property allowed by statute, but it is hoped that with the gradual reduction in the cost of material the net earnings of the company may during the coming year fairly approximate this amount.

Many of the holders of the 6 per cent. preferred stock of the company have protested against the issue of 7 per cent. preferred stock ranking equally with the 6 per cent. In order to meet the wishes of these shareholders, a resolution was submitted at the annual meeting, and passed, authorizing the directors, with the consent of the holders of the 6 per cent. preferred stock, to exchange it for 7 per cent. preferred stock, when in their judgment such action is desirable. \$1,000,000 of 7 per cent. stock, authorized to be issued in 1920, was not well received by the public, owing to the high cost of money, such a security apparently not being attractive.

In order to provide necessary funds for capital expenditure, the directors were compelled to make an issue of 7 per cent. refunding mortgage bonds. \$500,000 of these bonds were issued and sold since January 1, 1921, the proceeds of which have taken care of the large amounts showing in the statement as of December 31, 1920, for bills payable and accounts payable, the company having, at the present moment, a comfortable cash balance.

**Mackay Companies.**—A slightly reduced income was reported at the annual meeting of the Mackay Companies held at Boston this week. The item described as "income from investments in other companies," which comprises the one source of receipts, according to the annual report, amounts to \$4,867,988, compared with \$5,021,094 a year ago. Disbursements in dividends were slightly lower, amounting to \$4,230,336, compared with \$4,355,988. Operating expenses, including Federal income tax, etc., amounted to \$535,400, compared with \$644,883, which enables the companies to carry forward a balance of \$103,251, compared with \$20,223 a year ago. The companies' present position is strong, there being cash on hand of \$129,148, as against \$30,581 last year, and the surplus is \$2,047,626, compared with \$1,944,374. Investments stand practically unchanged at \$93,298,878, and no change is reported in the outstanding stock, the preferred being \$50,000,000, and the common \$41,380,400.

Clarence H. Mackay, president, in his report to shareholders, said: "During the year your cable system was maintained in excellent condition and transmitted a volume of traffic greatly in excess of any pre-war year, and the prospects for a continuance of a heavy volume of cable business seem assured. Mention was made in our last annual report of experiments with, and trial of new devices, which promised to increase the efficiency of the cables. Your trustees are

Managing Director and Secretary

now able to announce that the promise has been fulfilled. London has been brought into communication with New York without relays, and without the sacrifice of any of the advantages of the old method of operation, and very distinct advantages of the new. The circuit over which this direct and constant transmission is maintained, is composed of 3,461 miles of submarine cable, and 168 miles of underground lines, the total distance amounting to 3,629 miles."

Interest of Canadian investors in Mackay is still very large, it being understood that the number of individual shareholders in the Mackay Companies in Canada exceeds the number in the United States, although the total holdings in the United States are considerably larger than those in Canada.

#### RECENT FIRES

Osborne Chambers, Hamilton, \$70,000—High School at Essex, \$60,000—Sterling Rubber Co., Guelph, \$50,000—Music Store, London, \$12,000

Brampton, Ont.—February 11—The residence of Mrs. Hunter Arnott was destroyed by fire. One fatality.

February 12—A fire occurred at the farm of William Hounslow, Lot 2, Fifth Line, West Caledon, when his barn and the contents were destroyed. The loss is partly covered by insurance.

Essex, Ont.—February 15—Fire caused by an overheated furnace did \$60,000 damage to the High School. There is insurance of \$18,000.

Guelph, Ont.—February 10—The factory of the Sterling Rubber Co. on Waterloo Avenue was damaged by fire. The loss is estimated at \$50,000.

Hamilton, Ont.—February 13—Fire of an unknown origin caused damage estimated at \$70,000 to the Osborne Chambers, owned by the Cumberland Land Co.

February 15—The premises of L. S. Garosowitz, 342 James Street North, were destroyed by fire. The loss is estimated at \$1,500.

Lethbridge, Alta.—February 8—A number of houses in the vicinity of 9th Avenue and 8th Street were damaged by fire. The barn of M. Moscovitch was destroyed by fire.

London, Ont.—February 10—Damage estimated at \$42,000 was done by fire, which broke out in Mason and Risch's music store.

Marbleton, Que.—February 10—The residence of N. Breton, of Earle, Que., a few miles from Marbleton, was destroyed by fire. One fatality.

Moncton, N.B.—February 14—Mrs. Oliver G. Steeves and five children perished when their house on the Niagara Road was destroyed by fire.

Montreal, Que.—February 16—The premises of the New Idea White Wear Co. at 34 Notre Dame Street West, was destroyed by fire.

Newcastle, N.B.—February 13—The home of Ernest Gardiner at Grand Downs, about 25 miles from Newcastle, was destroyed by fire. Two fatalities.

Ottawa, Ont.—February 11—A fire broke out in the watspe paper chute at the Government Printing Bureau, doing considerable damage.

February 13—The storeroom and steel door department of Messrs. McFarlane and Douglas Co., Ltd., cornice works, was damaged by fire. The fire, which was caused from an explosion from a bale of cotton, did \$12,000 damage. The loss is covered by insurance.

Port Arthur, Ont.—February 13—Fire of an unknown origin did upwards of \$20,000 damage in the "News-Chronicle" building. The plant was rendered useless for some weeks, though the fireproof building was itself scarcely damaged. The largest loss was caused by water to machinery and smoke and water to stock. The "News-Chronicle" and the "Fort William Bulletin," which was being published from its office, will now be issued from the office of the "Fort William Times-Journal."

Rothsay, N.B.—February 8—Fire destroyed the residence known as "The Willows," owned by Senator Domville. Loss about \$15,000.

Ste. Helene, Kamouraska, P.Q.—February 2—A fire destroyed the general store of N. Morin. Loss about \$10,000.

Shawinigan Falls, Que.—February 8—Two houses, belonging to M. Hormisdas Bourassa, were destroyed by fire. The loss is estimated at \$20,000.

#### ADDITIONAL INFORMATION CONCERNING FIRES

Belleville, Ont.—January 26—A frame and roughcast dwelling, situated on the east side of James Street, was damaged by fire. The loss to building and contents is \$592, with insurance of \$700. The fire was caused by thawing frozen water pipes.

London, Ont.—January 31—The kitchen and dining-room of J. H. Glover, 519 Bathurst Street, was damaged by fire. The loss is \$1,200, with insurance of \$700 in the Dominion Company. There were four fatalities.

London, Ont.—January 18—The new building at the Queen Alexandra Sanatorium was destroyed by fire. The fire was caused by heat through tiles and cement of fireplace. The total loss is \$2,200, with insurance of \$25,000 as follows: Dominion Fire insurance, \$6,000; Northwestern National, \$6,000; Nationale Fire, \$10,000; National Ben Franklin, \$3,000.

Manitoba.—The following is the statement of fire loss in December:—During the month there were 127 fires with a loss of \$102,765. Forty-four fires occurred in dwellings, and farm property suffered with 30 fires. Carelessness with matches caused 12 fires.

Ottawa, Ont.—January 18—Flax mill and offices belonging to Central Experimental Farm. The total loss was \$31,985.

Paris, Ont.—January 15—The skating rink owned by the Paris Amateur Athletic Association, Ltd., was damaged by fire, which is believed to have been caused by a cigarette stub. The loss is \$12,800, with insurance of \$6,050 in the Waterloo Mutual and Perth Mutual Insurance Companies.

Port Stanley, Ont.—January 26—Barn and stable belonging to Francis Stanton were destroyed by fire. The loss is \$1,500, with \$200 insurance in Merchants Fire Insurance Co.

Toronto, Ont.—Fire Department records for January show that during the month there were 212 alarms, with an estimated loss of \$225,025. Twenty-two fires were caused from stoves and furnaces, matches caused 11, dump and grass fires 9.

Whitby, Ont.—January 13—Infirmary at the Whitby Hospital for Insane was damaged by fire. The loss is \$5,000, with no insurance.

Woodstock, Ont.—December 13—The top flat of the three-story building owned by the Sentinel-Review Co., Ltd., was destroyed by a fire which was caused by a gas jet coming in contact with paper stock. The total loss is \$9,025, with insurance of \$85,820 in the following companies: Atlas, \$3,000; Guardian, \$21,100; Nationale, \$8,000; Northern, \$13,200; Norwich Union, \$9,500; Sun, \$3,000; Royal, \$2,800; North British and Mercantile, \$5,500; Hand-in-Hand, \$6,500; Liverpool and London and Globe, \$10,220; Waterloo and Mutual, \$3,000.

## Ontario's 1921 Legislation to be Comprehensive

More Revenue Required to Meet Higher Expenditures—Rural Credits System Recommended by Special Committee—Taxes on Mining May be Increased—London Wishes to Try Commission Government, and Other Municipal Proposals are Numerous

THE 1921 session of the Ontario legislature opened on January 25. This is the second session under the administration of the Farmer-Labor Government, and the first in which it had behind it a year of administration for which it was entirely responsible. The financial position of the province as set forth by the treasurer has already been reported in these columns.

The speech from the throne referred briefly to hydro-electric development, roads, education, and rural matters, reading in part as follows:—

"At the present time the civilized world is passing through a period of readjustment to peace conditions, presenting serious problems to this province. The situation calls for wise and generous counsels, in order that industry may be maintained and labor afforded every possible opportunity for employment. My government has found it advisable under the circumstances to extend financial assistance to provide relief for the unemployed, and will initiate legislation for public co-operation to the same end. I trust that before long a general revival of business activity will restore normal conditions in this province.

"The agricultural industry has suffered materially from the rapid deflation of the market prices of farm products, and the probable effect of this loss upon our rural districts is a matter of importance to the whole province. A consideration of the situation looking toward a better understanding and a more general co-operation between our rural and urban populations will, I trust, lead to beneficial results, and tend toward reducing the cost of distribution and bettering rural conditions in the province.

### Rural Development

"One of the most practical ways of improving the conditions of rural life is by means of a judiciously designed good roads system. This matter has been kept prominently before my ministers during the past year, and much progress has been made in the direction of broadening the scope of the plans for highway improvement. It is felt that good roads are among the greatest material needs of the province at the present time, by reason of the fact that they will not only help to solve the transportation problem and promote the economic welfare of the whole community, but will also contribute immeasurably to the convenience and happiness of the people.

"Scarcely less important to the general welfare is the distribution of electrical energy in the rural districts on terms more nearly approaching an equality with those on which the urban population is served. Special study has been devoted to this subject by a committee of the Legislative Assembly, and this committee has agreed upon findings which will be laid before you at an early date. It will be found that the report is not only a valuable contribution to the information available on this subject, but that it advances important suggestions for legislative action.

"During the recess the minister of agriculture visited Great Britain for the purpose of studying conditions in relation to immigration, the marketing of the products of the province to better advantage, and the removal of the embargo on cattle.

"The attention of the government has been directed unceasingly during the past year to the important subject of education, with a view to increasing the efficiency of both rural and urban primary schools, as well as the secondary schools of the province. The question of providing school organizations to meet the needs for fuller educational advantages in rural districts will be dealt with in a practical and comprehensive manner. A committee is at present engaged in considering the high school courses of study and their relation to general education and to vocational training. In due course a report will be laid before you giving the findings of the commission of inquiry into the subject of university finances.

### Labor Legislation

"The welfare of industrial workers is a matter in which all classes are deeply concerned. Under the legislation of last session a minimum wage board has been established and a plan for the payment of mothers' allowances has been put into operation. These measures have met with general acceptance and give promise of satisfactory results. A number of recommendations for legislation for the welfare of labor have been endorsed by the International Labor Congress. In this connection certain measures will be submitted to you, and in order to facilitate the consideration of such matters you will be asked to appoint a standing committee on labor legislation which will afford the House the opportunity of hearing and weighing the views of all parties interested. The earnest desire of the government and the people of the province is that your legislation will promote harmony and progress in our industrial relations.

"It is a matter of much satisfaction that the financial strength of Ontario is so well recognized by the investing public as to enable the government to secure advantageous terms on the money market for the securities of this province. This fact was demonstrated in a remarkable way by the success of the recent provincial loan. While the expenditure of the government under existing conditions of high cost and expanding undertakings has of necessity increased, the revenues are sufficiently buoyant to meet the public requirements.

### Hydro Development

"Much progress was made during the past year in the construction of the Queenston-Chippawa development, which, when completed, will greatly increase the quantity of electrical energy available in this province. Arrangements have been made for the purchase by the Hydro-Electric Power Commission of the plant and transmission lines of the Elec-

trical Development Co. The details of this important proposal will be submitted to you for your consideration and ratification. Projects for the construction and acquisition of certain radial railways have been made the subject of investigation and the result of that investigation will be laid before you in due course."

#### Bill to Aid Fire Prevention

Backed by the Ontario Fire Prevention League and by Provincial Fire Marshal E. P. Heaton, a bill is to be brought before the legislature to place restrictions upon the sale of apparatus designed to protect buildings against damage by lightning. The bill is entitled "The Lightning Rod Act," and provides for extensive penalties against firms or individuals engaged in the sale of lightning rods who do not comply with the regulations. It is set forth that all firms engaged in the sale of lightning rods pay a yearly fee of \$50 and an additional 80 cents for every \$100 received from sales. The apparatus must bear inspection and be passed by the Fire Marshal. Each agent must pay a fee of \$3 a year and must act for one firm only. The agent is made liable to a fine of \$200 for infraction of the regulations. It is further set out that, in the event of damage to a building properly installed with lightning protection, the firm selling is liable to the return of the money paid for the rodding of the building or to pay for the damage done. To insure this each firm must deposit securities of \$10,000 with the Fire Marshal.

The "Fire Departments Two-Platoon" bill brings up a question about which there is much difference of opinion in the province. It provides that the head of a fire department divide the force into two parts, working for alternate periods of twenty-four hours each, or for 10 hours of day work and 14 hours of night work, alternating every week.

#### Hydro-Electric Taxation

A special committee on hydro-electric affairs recommended a tax of \$2 per horse-power on all power generated, and the placing of the Hydro-Electric Commission under a government department. It is the opinion of those close to the government that a tax of some sort on all-power developed will come even if it is not found advisable to put such a measure through this session. It is pointed out that such a tax would reach not only hydro power but all the private power developments in the province which are now escaping taxation. The question of direct government control under a minister is not generally favored and is not likely to materialize.

#### Municipal Measures

London, Ont., is applying for permission to adopt a commission form of government. A private corporation, *Fecunis Ltd.*, has petitioned the legislature for power to expropriate property in connection with their establishment of a mining plant at Sudbury. Mimico's bill to allow the town council to apportion the share of cost to be paid by property owners whose property abuts on the new trunk sewers and the corporation's share passed the Private Bills Committee on February 15. The bill empowers the council, by a three-fourths vote, to set a rate under the Local Improvements Act. The bill allowing Belleville to issue debentures for \$30,000 to cover share of purchase price of the Belleville and Prince Edward County bridge also passed, but the committee rejected Kingston's bill providing for assistance from the city to Thomas Watson, of Woodstock, in establishing an industry. Kingston also had a bill passed which exempts for five years from all taxation, excepting school and local improvements, all dwelling houses built in 1920-21 up to the value of \$2,500.

There is very little likelihood that a bill providing for old age pensions will be introduced in the Ontario legislature at this session. Hon. Walter Rollo, at one time, had thought of sponsoring such a measure, but at a recent meeting of the Labor group opinion was divided on the matter. Some of the members were of the opinion that it was a matter for the Dominion government. A bill will probably be introduced

to permit the municipal railway of Port Arthur and Fort William to collect a 7-cent fare. A slight amendment is also made to the Succession Duty Act, 1914. A bill to amend the Bureau of Municipal Affairs Act requires that any organization receiving a grant from the province, from any municipality or trust fund, shall file not later than January 31st a statement of its finances, constitution and officers.

#### Rural Credits

The report of a special committee on rural credits proposes two branches of work, one for short and one for long-term loans. It suggests the establishment by private capital of a savings institution to accept deposits from farmers and others at 4 per cent. interest, the security of the savings being guaranteed by the government. From the fund established, loans would be made to farmers for short terms upon the certificate of a credit society made up of farmers who would be in a position to pass upon the needs of the applicant, his financial integrity and who would be jointly liable for the repayment of the loan. These loans would, it is thought, be available to the farmers at 5 or 5½ per cent.

The establishment of a "land mortgage bank" or some institution of the type implied by the term, would provide longer loans. This institution would be organized with a capital of \$500,000 or more subscribed by farmers, or, if necessary, partially by the government. This capital would be used to make loans upon first mortgages to the farmers. When the loans reached the sum of \$75,000 to \$100,000 the mortgages would be massed and debentures issued against them, the money secured being then available for new loans. The Commission believes that on the basis of 6% interest on debentures, borrowing loans could be made on mortgage security at 7 per cent. The loans would be from periods of five to thirty years, from \$500 up to \$12,000, and would be repayable in small annual instalments.

#### Attitude of the Banks

The report, after dealing at considerable length with systems in operation in other countries and in Manitoba, declares its conviction that a rural credit system would be of inestimable value to Ontario agriculture. The establishment of co-operative credit through rural credit societies in which a group of farmers became security for individual loans has been a success elsewhere, but it could not be recommended for Ontario owing to the attitude of the Canadian banks. "Strange as it may seem," says the report, "the officials of the Canadian Bankers' Association have stated to us that they do not see how they could be more liberal to borrowers organized into a rural credit society with collective liability than they are now to individual borrowers." Apart from this lack of co-operation, the fact that the banks are by recognized parties restricted to three months' loans, makes the ordinary bank loan of little value to the farmer. With the ordinary banks barred to them, the farmers, according to the report, must turn to other sources of credit, and the logical thing for them to do was to enter the banking field themselves.

#### To Increase Mining Taxes

It is proposed at the present session to increase the tax on gold and silver mines from three per cent. to four per cent. of the net profits up to \$1,000,000, and from five to seven per cent. on profits over that amount. In the case of nickel mines the proposal is to make the tax seven per cent. on all net profits over \$1,000,000. Now the tax is five per cent. on profits up to \$1,000,000. "Net profits" though the real basis of the tax, in each case is differently arrived at in the case of nickel profits. There, because of the fact that the nickel is largely refined in the United States where operating profits cannot, of course, be taxed by the province, the tax is technically upon the values of the nickel ore at the pit mouth, but the value is determined by the market value of the refined nickel less costs of refining, treating, shipping, etc.

## DEBATE ON SPEECH FROM THRONE CONTINUES

Government Still Criticized for Usurpation—Political Discussions are Feature of Week

## THE WEEK IN PARLIAMENT

Thursday, February 17

In Commons:—Debate on address.

In Senate:—(a) Debate on address; and (b) Dominion Elections Act amendment bill, second reading.

Friday, February 18

In Commons:—(a) Select Standing Committee appointed; and (b) Debate on Address.

In Senate:—(a) Hon. John A. Macdonald, Shediac, N.B., new Senator, introduced; (b) Dominion Elections Act amendment bill, third reading; (c) Debate on Address; and (d) Revision of Punishments Bill, second reading.

Monday, February 21

In Commons:—(a) Dominion Elections Act amendment bill, first reading; (b) Debate on Address.

Tuesday, February 22

In Commons:—Debate on Address.

In Senate:—(a) Debate on Address; (b) Gold and Silver Marking Bill, first reading.

Wednesday, February 23

In Commons:—(a) Debate on Address; (b) Dominion Elections Act amendment bill, second reading.

In Senate:—(a) Address in reply to Speech from Throne adopted without division; (b) Hon. J. A. Stanfield, Truro, N.S., new Senator, introduced; and (c) Senator Turriff crosses floor.

(Special to *The Monetary Times*.)

Ottawa, February 24, 1921.

Of the week's happenings in parliament as outlined above the most conspicuous event was the action of Senator Turriff, of Assiniboia, in crossing the floor of the Senate to the cross benches as the first, and, so far, the only member of the Progressive party in the Upper Chamber. Fiscal controversies, as a rule, find only a mild echo in the Senate, but it was because of his views on fiscal policy that Senator Turriff made the move. If by any turn of event a Progressive party government should come to power, this would give them as a government leader in the Senate the only Senator who has declared himself an adherent.

The debate on the address came to an end in the Senate Wednesday afternoon, but it will probably not be concluded in the House of Commons until Wednesday next. As in the first week, the debate has concerned itself mainly with the Opposition contention that the government has "out-stayed its mandate." The Opposition and Progressive parties are expected to vote "No Confidence" to a man, although in the Progressive party there is some difference of opinion as to the value of a general election just now when another year would bring about redistribution, and would increase the representation from the west. Four occupants of No Man's Land, however, have the present intention of voting with the government, and it is expected that this will enable the government to tide itself over the crisis in spite of the large number of members away from the House because of ill-health. The possibility of a general election this year is not overlooked, however, and indications are that the government may bring on an election if their majority should prove very slim.

The only legislation of importance introduced came from the Senate. One bill amends the Dominion Elections Act so that existing lists will be used in Ontario cities and towns as the basis of revision in order to save an expenditure of

\$300,000 in making new lists. It passed through the Senate, and will pass through the Commons before Monday. Another bill from the Senate calls for the revision by a Court of Appeal of punishments that are inadequate or too severe through an error of the judge in criminal cases. It has been passed by the Senate twice, but has not gone through the House of Commons because of lateness in arriving there. The only other bill introduced so far except the Gold and Silver Marking Act, which is as yet unexplained, is one by Sir George Foster to amend the Trade Mark and Design Act in order to adhere to the International Convention for the protection of industrial property.

## EASIER MONEY CONDITIONS IN WEST

Swift Current to Have Conference on Finances—Some Building Planned for This Year

(Staff Correspondence.)

Winnipeg, February 24, 1921.

**B**OTH wholesale and retail trade in Winnipeg and throughout the west is showing improvement. Retailers report good steady business for this season, in many cases somewhat better than expected. In wholesale circles a fine spirit of optimism prevails, and from reports trade all through the country is showing an improvement. Merchants who withheld orders are now finding their stocks very well depleted, and travellers are booking good orders for spring delivery. These conditions, from various mercantile agencies, indicate that improvement in trade conditions is general all over Canada, and resumption of manufacturing industries is everywhere taking place.

On inquiry from local financial institutions money is becoming easier and credit for business extension more easily obtained, prices for the present are regarded as pretty well stabilized, and further reductions are not looked for at present. There have been very few instances in this territory in cuts in cost of labor.

The real estate outlook is also improving, and from information received there are quite a number of inquiries for building property. It is expected that the Hudson's Bay Co. will proceed with their new building on Portage Avenue this spring, and others who contemplate building during the coming season have had plans prepared and submitted to builders for estimates on cost of construction. Building costs in Winnipeg are slightly lower than a year ago, and it is not expected that there will be any further reduction for the present, the contention being that the price of material has declined as far as possible without a readjustment of labor costs.

## May Increase Telephone Rates

John E. Lowry, new commissioner of the Manitoba government telephones states, that an increase of approximately 25 per cent. in the telephone rates throughout the province will be sought from the public utilities commissioner. Further extensions of the automatic system will be proceeded with. Mr. Lowry states that in the other large cities of Canada the rates are from 15 per cent. to 30 per cent. higher than in Winnipeg.

The bond holders of the city of Swift Current Sask., are holding a meeting there this week, at the request of Mayor Rule. In connection with the city's financial obligations an adjustment of present obligations will be asked for that will lessen the present heavy strain demanded of the ratepayers. Swift Current along with other western centres had a decided boom a few years ago, and will in time become a large distributing and trade centre as its optimistic citizens at that time predicted. Swift Current is in the centre of an excellent agricultural district and is bound to grow. As a result of what might be called "boom time development," the council have asked for a conference with the bond dealers to find a way out of their financial difficulties.

## NORTHWESTERN LIFE ASSURANCE COMPANY

While one of the infant organizations operating in the Canadian life underwriting field, the Northwestern Life Assurance Co. is able to report good progress. Last year policies actually issued amounted to \$1,505,000, an increase of \$524,106 over the previous year. Total assets of the company show an increase of \$64,004, and now amount to \$647,382. Liabilities to the public amount to \$485,857, an increase of only \$47,136. Reserves at \$230,756 are on a considerably higher basis than required by the Dominion government. Total revenue for 1920 amounted to \$155,243, being \$68,304 in excess of expenditures. Death claims were extremely light, being only 15 per cent. of the expected.

In view of the fact that the company was organized in the early stages of the war and underwent its initial stages of organization during a period of business turmoil, the showing is unusually good. Shareholders have approved the issue of \$1,000,000 additional shares, which the directors pointed out is needed to cope with the rapid increase in business.

One interesting phase of the company's business is the fact that for three years past it has written life insurance without medical examination. Mention of the Northwestern was omitted in the leading article in *The Monetary Times* last week.

## STANDARD BANK ANNUAL MEETING

At the annual meeting of the Standard Bank on February 23, the president, Wellington Francis, said that the policy of the bank would be to curtail future loans, as far as possible, having at the same time due regard for real requirements. While demand deposits, he pointed out, had decreased, it was interesting to note that savings deposits had increased, and that the bank had maintained its profit at an increase over the preceding year.

In referring to the business of the bank during the past year, C. H. Easson, general manager, explained that a reduction of \$9,700,000 in non-interest bearing deposits, as compared with last year's report was due to the withdrawal by the Dominion government of balances deposited with the bank. An item of \$4,494,000 shown as due the Dominion government represented advances under the Finance Act in 1914 by the government against Imperial government treasury bills, and, while these bills are drawn at short dates and have been renewed from time to time, it is a matter of satisfaction that the Imperial government had made arrangements to liquidate all bills held by the banks in Canada, and payments were now being received monthly. Note circulation was down \$632,218, which, he pointed out, was evident of the deflation which had been so long anticipated.

Mention was also made of the attention given by the bank to the requirements of the agricultural industry in Ontario and the western provinces. "We are taking deep interest in the rural credits bill now before the Ontario legislature," said Mr. Easson, and he indicated that the banks generally would probably support the government in carrying out the purpose for which the bill was designed.

Mr. Easson, in closing, stated that there were some indications of improvement in business generally. Problems had been brought about by the fall in prices of commodities, and it was gratifying to find conditions throughout Canada as good as they were. So far, the journey through the process of deflation had not been marked by any great disturbance in commercial affairs. The recovery, however, could not be expected to be rapid or pronounced for some time. Commercial profits had been reduced, and it was only right to expect that banking profits would be also. He expressed the hope that the Dominion government would see its way clear to do away with the war excess profits tax, as it was generally felt that this action would help towards thrift and economy.

## SAVINGS DEPOSITS UP TWENTY MILLIONS

An increase of about \$20,000,000 in savings deposits and large declines in current loans and note circulation, are the principal features of the January bank statement. The preliminary figures issued by the government show the following results:—

	Jan., 1921.	Changes from Dec., 1920.
Reserve fund .....	\$ 133,343,590	+ \$ 295,085
Note circulation .....	206,175,821	— 22,582,766
Demand deposits .....	584,025,710	— 73,471,032
Notice deposits .....	1,313,093,870	+ 20,086,382
Total deposits in Canada .....	1,897,119,580	— 53,384,650
Deposits outside .....	318,622,947	+ 38,148,062
Current coin .....	85,118,010	+ 2,430,451
Dominion notes .....	186,589,527	+ 9,100,247
Deposits, central gold reserve .....	89,702,533	— 23,650,000
Call loans in Canada .....	112,474,318	— 2,228,923
Call loans outside .....	191,854,003	— 9,588,649
Current loans in Canada .....	1,264,490,463	— 37,313,879
Current loans outside .....	173,379,729	— 11,160,694
Total liabilities .....	2,642,380,435	— 135,928,112
Total assets .....	2,926,867,072	+ 130,112,417

A more detailed analysis will be given in these columns next week.

## MACDOUGALL BROS., MONTREAL FAILS

Announcement was made on the floor of Montreal Stock Exchange on February 23 that the firm of Macdougall Bros., with offices at 13 St. Sacramento St., had formally assigned. No surprise whatever was occasioned by the development in the brokerage district, where it had been common knowledge for some time past that such action was pending, a seizure on the firm's affairs having been placed several weeks ago. The definite suspension of the firm was not accompanied by any effect marketwise, since its commitments and clientele are of a decidedly restricted order, and little, if any, liquidation of securities will follow the winding up of business, which was resorted to, it is understood, for family reasons.

Macdougall Bros. was one of the oldest stock brokerage firms in the city, and in recent years has been conducted by E. R. D. Applegath as sole partner. The firm, however, has done little business for some time past.

## WATERLOO COUNTY LOAN AND SAVINGS COMPANY

From every standpoint 1920 was a progressive year for the Waterloo County Loan and Savings Co., according to the annual report which is given in detail on another page of this issue. Mortgage loans are shown at \$1,040,532, compared with \$735,172 in the previous year. Holdings of government and municipal bonds are a few thousand higher at \$1,435,385. More capital was employed in the business, the paid-up shares amounting to \$638,764, as against \$604,331 previously. Deposits decreased from \$1,188,870 to \$1,127,700, but debentures outstanding increased from \$545,389 to \$643,225. Reserve account is \$120,000, being an increase of \$15,000 for the year.

As a result of the increased business the company is able to report profits of \$56,994, as against \$51,113 for 1919. Premium on new stock amounted to \$1,753. \$6,000 was transferred to special contingent fund.

Notwithstanding the fact that the company's career extends only a few years back, the company has built up a favorable business. Total assets are \$2,789,917, of which mortgages and government and municipal bonds are the principals. The company has two offices, one being at Kitchener and the other at Waterloo, Ont. A dividend of six per cent. has been maintained during the life of the organization.

## OUR CURRENCY INFLATION

HOW soon can the Canadian dollar return to par in New York? is a question which cannot be answered by any juggling of trade figures. Balances of trade do exert an influence upon rates of exchange, but they do not show the invisible balances, due to financial arrangements, nor do they take into consideration variations in the intrinsic value of the units of currency themselves. It is to the latter cause that the demoralization of some foreign rates of exchange is due. What is the use of saying that the German mark has only a fraction of its former exchange value, without also pointing out that the German mark of to-day has only a fraction of its former intrinsic value.

Our own Canadian dollars share to a lesser degree in this condition. The pre-war Canadian dollar was a gold dollar. The present Canadian dollar is a paper dollar. In other words, it is not worth as much to-day as it was seven years ago. Then how can it be worth as much in the United States? Moreover, since the dollars of the United States are still gold dollars, our currency shows a depreciation when compared with theirs.

On December 31 there were Dominion government notes outstanding to an amount of \$311,714,486, against which gold to the amount of \$97,145,774 was held. The government also held securities to the amount of \$158,707,960 against these notes. For some months past these figures have varied as follows:—

	Notes outstanding.	Gold held.	Securities held.
Dec., 1919	\$318,690,089	\$114,821,962	\$154,237,000
Sept., 1920	303,065,376	95,205,901	149,620,125
Oct., 1920	320,012,915	95,222,381	166,715,125
Nov., 1920	326,839,592	96,021,001	173,689,025
Dec., 1920	311,714,486	97,145,774	158,707,960

These figures, it will be noticed, show that about half of our currency is covered by securities, and that fifty to sixty

million dollars is not covered at all. In answer to the claim that we are meeting the business depression more easily than are other countries, it may well be pointed out that we are assisted in doing so by proceeding slowly with deflation. In this respect we stand between the United States, which has maintained its sound position, and the European countries, whose currencies are in such a hopeless state that deflation seems impossible for the present. Great Britain was also farther from being on a gold basis, but such rapid strides are now being taken that the future soundness of British currency is assured. In view of the firm attitude taken by Great Britain and by our neighbor to the south, is there not wisdom in the appeal recently made by Hon. Edward Brown, provincial treasurer of Winnipeg, and by Stephen Leacock, professor of political economy in McGill University, Montreal, that Canadian currency be restored to a gold basis as soon as possible?

## OPERATING A STATE BANK

WHEN it is customary on the part of some to compare Canadian banks with American ones, to the prejudice of the former, the experience of the Bank of North Dakota points a moral. It is interesting if not amusing. It further throws a light on the regime of the Non-Partisan League in the State, in the domination of its politics. Revelations in regard to the methods of the bank have been disclosed by F. W. Cathro, its director-general.

The bank was created by an act of the Non-Partisan Legislature of 1919. This act provided that the governor, the attorney-general and the commissioner of agriculture, composing the industrial commission, should control the bank. It also provided that the bank should be opened upon the sale of an authorized issue of bonds of \$2,000,000, the bonds to be sold by the commission and the money turned over to the bank. The bank was created the depository of all "state, township, municipal and school district funds, and the funds of all penal, educational and industrial institutions, and all

other public funds." And the deposits in the bank were guaranteed by the state.

The bank was opened in accordance with the state law in February, 1919. The bonds, however, had not been sold, and representatives of the commission took them to a number of cities—Minneapolis, Chicago, Philadelphia and New York—but failed to find any buyer for them, because financial interests were a little doubtful of the success of the league experiment. Then the bonds were brought back to Bismarck. In the meantime, upon the opening of the bank, a vast amount of public money—several million dollars in three weeks—came in to the bank. As Mr. Cathro said to an interviewer, "These deposits had to be put to work."

Then came the exchange of cheques. Mr. Cathro drew cheques on the bank totalling \$2,000,000. He took them to a meeting of the industrial commission and turned them over to buy the capital bond issue. But since the law provided that when the commission sold the issue the proceeds of the sale should be turned back to the bank as capital, the commission at once drew its cheque for \$2,000,000 and gave it back to Mr. Cathro for the bank. In other words, the Bank of North Dakota purchased its own capital with its own deposits and then was given back the purchase money.

#### THE MOVEMENT OF BANK LOANS

**L**AATEST bank figures show deflation to be proceeding slowly in Canada. The January statement records a decrease in current loans of \$37,000,000, compared with \$58,000,000 in December statement, \$45,000,000 in November, and \$12,000,000 in October, previous to which the volume of current loans had been steadily climbing for a good many months. The increases in the early months of last autumn, after the slowing down in business had definitely set in, could, of course, be attributed to the necessities for crop moving, and that necessity might also explain the comparatively small decline in current loans for the last few months of the year. The moderate decrease revealed in the January statement may mean that business has sufficiently picked up to be a factor in holding current loans at a relatively stationary level.

It is interesting to note in this connection that the reductions of the past four months have now brought the current loan total to a point \$37,000,000 above the total in January of last year. The peak, however, did not come until September, when the total was \$1,417,520,756, since when there has been a total reduction of \$153,030,293. It is of importance that, while the current loans in Canada are only \$37,000,000 above January, 1920, the notice deposits or savings have increased in that period by \$149,000,000, and the gain of \$20,000,000 in notice deposits in January alone is a matter for satisfaction. The drop of \$22,000,000 in note circulation for one month is a substantial step in deflation, and has more than overcome the gains of a year in that regard, as note circulation now is \$10,000,000 below January of last year.

#### THE LEGIBLE SIGNATURE

**O**NE of the good things that has come out of the war is the adoption of the custom of typewriting the name of the writer at the bottom of a letter; above or below this the name is written in ink. This has long been a custom in certain Washington departments but it had not permeated the business world until the thousands of business men who were in government service during the war saw the advantages of the custom and carried it with them when they returned to civil life. The convenience of it may be readily recognized. Every business man receives one or more letters daily, signed in such undecipherable scrawl as to make a reply impossible unless the name is obtainable from the letterhead. Some signatures are so attenuated that the letters get lost; others are so cramped as to need the services of

a chemist to break the name up into its constituent parts; others are worked up into more or less monogram form to look pretty though unintelligible, and so on. A prominent citizen of a country town enjoying the convenient name of "J. J. Jackson" had what many regarded as the prize "fist." In his handwriting his name bore more resemblance to a row of Lombardy poplars than to anything else.

The reopening of factories, and even some additions and extensions to plants, is an encouraging sign, not necessarily of present business, but of ability to sell at lower price levels.

As a solution of the problem of city congestion, why not try Russia's plan, which has in four years decreased Moscow's population by 50 per cent. and Petrograd's by 71 per cent.?

\* \* \* \* \*

January trade returns show a favorable balance of \$8,000,000. There is an unfavorable balance of \$20,000,000 for the ten months but by the end of the fiscal year we may break even.

\* \* \* \* \*

The price index of 281.3 for January is a big reduction from the figure of 336.4 in January, 1920. Meanwhile the consumer, who is unaware of this important movement, is patiently waiting to be shown.

\* \* \* \* \*

Subscriptions towards the family of the late Wm. Holland, shot and killed in his office on January 14 last, have reached over \$7,000. The list is on the floor of the Montreal Stock Exchange, and is open to brokers and their clients.

\* \* \* \* \*

If the judgment of a Quebec Court in the case of *Cahan vs. the Home Bank* means that a power of attorney is not conclusive evidence of authority to withdraw funds, will not the work of the bank be made much more difficult on this account?

\* \* \* \* \*

The enormous debts accumulated by Canadian cities, as shown on page 18, would discourage any but the most optimistic. As the appeals of some of our western cities show, this optimism is not always accompanied by the ability and willingness to pay promptly.

\* \* \* \* \*

A new form of insurance which covers electric motors against breakdown of the motor and damage to other property of the assured is offered by the Royal Indemnity Co., Toronto. The insurance company, however, is not liable if the breakdown is caused by a fire or sprinkler leakage.

\* \* \* \* \*

Fifty million dollars will be entrusted by the British government to the Canadian firm of Stewart and MacDonnell, headed by Major-Gen. J. W. Stewart, C.B., to be expended on enormous engineering works in the Gold Coast colony on the west coast of Africa. Major-Gen. Stewart has returned from England, after making final arrangements for the carrying out of the first unit of the great harbor works at Takoradi. This unit will cost \$17,000,000, and will take from five to six years to complete.

## PERSONAL NOTES

GEORGE L. LEGATE succeeds G. L. Smellie as manager for British Columbia for the Canada Permanent Mortgage Corporation.

JAMES FAIRLIE, formerly associated with the Manufacturers Life Insurance Company, of Toronto, has been appointed vice-president and actuary of the Mutual Life Insurance Company, of Illinois.

A. M. STEWART, chief clerk of the Canadian head office of the Northern Assurance Company, of London, England, has been promoted to be fire superintendent. A. M. Boucher, inspector for Ontario, has been appointed chief inspector. Both have been connected with the Canadian head office for a number of years.

W. C. NOXON has been appointed managing director of the Canadian Loan and Agency Company, Limited, to succeed V. B. Wadsworth, who has retired from that position. Mr. Wadsworth has been associated with the company for upwards of forty-four years, and has been manager for twenty-two years. His resignation takes effect on April 1. Mr. Noxon is well-known in Canada and in England, having been recently director of the overseas branch of the Dominion Trade and Commerce Department, London, England. He has been a member of the Canadian Loan and Agency board for a number of years. Mr. Noxon is also prominent in other financial circles having been at one time a member of the bond house of Brent, Noxon and Company, Toronto.

J. E. LOWRY, superintendent of the Edmonton telephone system has resigned to take the commissionership of telephones under the Manitoba provincial government, and W. R. Pearce, superintendent of the Alberta government telephone system, is going to New Brunswick to be the head of the telephone service in that province.

A. J. NESBITT, president of Nesbitt, Thompson and Company, Limited, has been elected a director of the Winnipeg Electric Railway. He is well-known in the bond and security investment field, having headed a syndicate which recently distributed a block of Winnipeg Electric preferred stock. Mr. Nesbitt is also a director of Southern Canada Power Company, Limited.

G. F. MACLURE, who recently joined the staff of the Royal Bank of Canada at Montreal, has been appointed to the position of assistant manager of the Ottawa branch of the bank. Mr. MacLure was formerly with the Bank of Nova Scotia, and for the past year or more has been associated with R. C. Holden in the work of the Victory loan special committee in Montreal.

SIR AUGUSTUS NANTON, of Winnipeg, has been elected to the directorate of the Royal Trust Company, Montreal.

Sir Augustus Nanton is associated with many of the chief business undertakings of the country. He is the senior resident partner of the firm of Osler, Hammond and Nanton, of Winnipeg, and is a director of the Canadian Pacific Railway, the Hudson's Bay Company and the Dominion Bank.

FREDERICK WILLIAMS, manager for Canada of the Motor Union Insurance Company, Limited, returned to Canada recently from New York, where he had spent several days. He left again on February 20, for special mission to South America, and in the meantime the business here will be under the charge of William MacInnes, assistant manager. The Motor Union has large colonial and foreign connections both on its own direct account and through its subsidiary or allied companies.

## OBITUARY

ANDREW J. DAWES, president of the National Breweries, Limited, and vice-president of the Merchant Bank of Canada, died in Montreal recently, at the age of 73 years. In addition, Mr. Dawes was director of the Bell Telephone Company, the Northern Electric, the Windsor Hotel Company, the National Locomotive Company, Ottawa Traction Company, the London and Lancashire Life Insurance Company and others corporations.

## UNION FIRE AND CASUALTY CO.

Gross premium income for 1920 of \$304,762, an increase of \$106,140, is recorded by the Union Fire and Casualty Co. Total income was \$216,002, compared with \$167,419 in 1919. S. D. Works is president of the company, A. E. Ham, vice-president, and J. O. Melin, secretary-treasurer.

The balance sheet now shows assets of \$270,691, an increase of \$60,559. Bonds total \$138,780, accounts receivable \$43,720, and cash \$20,393. Liabilities to the public total \$118,781, leaving paid-up capital, \$101,521, and surplus, \$50,389.

## MONTREAL STOCK BROKERS ASSIGN

Announcement was made on February 14 by Malcolm C. Oswald, senior partner of the stock brokerage firm of Oswald Brothers, of Montreal, that "owing to the fraudulent manipulation of the firm's books by Gerald H. Bruce, the junior partner, and owing to false and fraudulent statements sent by him to certain of the clients, the firm of Oswald Brothers has in the meantime ceased to do business. The frauds, which were of an extensive and complicated nature, were discovered by Mr. Oswald on February 10, and have been admitted by Bruce."

The house accordingly filed a declaration of voluntary assignment. The Montreal Stock Exchange has been officially informed of the firm's action. Gerald H. Bruce has been connected with the Oswald firm for about eleven years, and was admitted to partnership about two years ago. The firm of Oswald Brothers is one of the oldest stock brokerage concerns in the city. Mr. Oswald would not say what the defalcations amounted to, but intimated they exceeded \$200,000.

Bruce was later arrested, and when he appeared before the courts on February 22, new and substituted charges concerning losses of more than \$300,000 were preferred against him by Malcolm Oswald, senior partner. Bruce's bail was raised from \$20,000 to \$25,000, the largest amount ever demanded here from a prisoner.

At the annual meeting of the Commercial Finance Corporation, which was held in Toronto recently, A. S. Wigmore and Thomas Leeming, both of Toronto, were elected to the board of directors.

## BANK BRANCH NOTES

Bank of Nova Scotia announce the following changes: P. W. Murphy, formerly manager of the branch at 224 St. James St., Montreal, has been transferred to the Toronto office as superintendent of branches. W. B. Snow, formerly assistant manager of the bank at Ottawa, has been transferred to the Montreal branch as assistant manager. C. E. Fairweather succeeds Mr. Snow as assistant manager at Ottawa.

E. B. Hesson, manager of the Bank of Montreal at Schreiber, Ont., died suddenly on February 16th.

The Sterling Bank announces the following: J. B. Robinson, formerly accountant at Almonte, who has been at head office for some time, has been appointed acting manager at the new branch at Madawaska, Ont. M. A. McLaughlin, accountant at Port Stanley, is acting manager of the Varna branch. R. J. Moore, teller at Staffordville, has taken over the accountant's duties at Port Stanley. F. E. Watkinson has taken over the management of the Staffordville branch. J. B. Harwicke, of the credit department, head office, has taken charge of the Parkdale, Toronto, branch. Mr. Wilson is being transferred to other work.

The Imperial Bank of Canada, who have been doing business for the past two years in temporary quarters at 1246 St. Clair Avenue West, Toronto, have moved into their new office at the north-west corner of St. Clair and Boon Avenues, which is fully equipped to take care of every banking need, including a safety deposit box department.

A purse containing nearly two thousand dollars in gold was presented by the customers of the Standard Bank at Brantford to W. C. Boddy, manager, retiring from the bank's employ after some forty years' service.

The Dominion Bank is erecting a new building at the chief corner at Long Branch Park, Ont. The Merchants Bank will build a bank to the east of the main entrance on the Highway, and the Royal Bank office, which was erected this winter, will be opened in a few days.

The Canadian Bank of Commerce have opened a new building at Port Colborne, Ont.

The Bank of Toronto announce the opening of a new branch office in the Arcade building, Hamilton.

The Royal Bank of Canada announce the opening of branches at Montreal, Mount Royal, and St. Lawrence and Matanzas, Calzada de Tirry.

During the month of January there were twenty-seven branches of Canadian banks opened. The following have not already been mentioned in *The Monetary Times*: Annotto Bay, Jamaica, Royal; Brighthouse, B.C., Royal; Dauphin, Man., Royal; Dorenee, Alta., Imperial; Glasgow Station, Ont., Nova Scotia; Gwynne, Alta., Merchants; Hammond, Ont., Nationale; Lyster, Que., Hochelaga; Madawaska, Ont., Merchants; Madawaska, Ont., Sterling; Noire Dame de Pierreville, Que., Provinciale; Point Anne, Ont., Standard; Ste. Elizabeth, Que., Hochelaga; Toronto, Ont., Eastern Harbor, Dominion; Victoria, B.C., Chinese Branch, Merchants; Whitney, Ont., Sterling; Winnipeg, Kinsington Street, Nova Scotia.

The branches opened were distributed among the banks as follows: Royal, 9; Merchants, 3; Nova Scotia, 2; Hochelaga, 2; Sterling, 2; Dominion, 2; Imperial, 1; Hamilton, 1; Nationale, 1; Provinciale, 1; Standard, 1; Commerce, 1; Montreal, 1.

The following fifteen branches were closed: Adanac, Sask., Merchants; Bateman, Sask., Union; Bear Lake, Alta., Imperial; Campden, Ont., Commerce; Dewar Lake, Sask., Union; Grainger, Alta., Merchants; Griffin Creek, Alta., Imperial; La Durantaye, Que., Nationale; Neelin, Man., Toronto; Grion, Alta., Standard, Port Morien, N.S., Nova Scotia; Torquay, Sask., Montreal; Vimy, Alta., Hochelaga; Westerham, Sask., Standard; Wycollar, Sask., Commerce.

Col. B. M. Green, manager of the Royal Bank of Canada at Chatham, has been appointed assistant manager of a Toronto branch of the bank, and will be succeeded by E. Herman, manager of the Elmira branch.

## SUN LIFE ANNUAL MEETING

At the annual meeting of the Sun Life Assurance Co. recently the shareholders ratified a proposal of the board to issue \$1,000,000 par value of new stock, of which 35 per cent. will be called. This will increase the paid-up capital from \$500,000 to \$850,000, out of a total amount authorized of \$3,000,000. The old board was re-elected, with T. B. Macaulay chosen again as president and managing director; S. H. Ewing as vice-president; together with Robert Adair, W. M. Birks, Hon. R. Dandurand, J. R. Douglass, Sir Herbert Holt, C. R. Hosmer, Abner Kingman, Dr. H. R. Macaulay, Carl Riordon and John W. Ross.

## MONTREAL CITY AND DISTRICT SAVINGS BANK

From every standpoint, 1920 was the best year in the history of the Montreal City and District Savings Bank. Net profits amounted to \$247,286, which compares with \$240,590 in 1919 and \$234,642 in 1918. After dividends and other disbursements amounting to \$43,227, and the addition of the previous surplus of \$280,222, the present balance at the credit of profit and loss amounts to \$323,449, which compares with \$243,942 two years ago.

The balance sheet, which receives considerable attention in these columns every month, and which was given in detail two weeks ago, reflects substantial growth. Total assets are \$49,262,765, as against \$45,154,851 a year ago. A growth of more than \$5,000,000 in deposits speaks well for the prosperity of the city.

## NEW MUTUAL LIFE DIRECTORS

Important changes are announced in connection with the directorate of the Mutual Life Assurance Company of Canada, at Waterloo, as follows:—F. C. Bruce, of Hamilton, first vice-president, and a member of the board for many years, has retired and is succeeded as a director by Mr. Vincent Massey, of Toronto. R. O. McCulloch, of Galt, who has been for years a Mutual Life director, has been elected as first vice-president, while Major-General Hon. S. C. Mewburn, who was elected as director last year, succeeds Mr. Bruce on the executive committee.

## GUARANTEE CO. OF NORTH AMERICA

In the 1920 report of the Guarantee Co. of North America, income is shown as \$593,005, compared with \$748,529 in 1919. The difference is largely explained by the sale of controlling shares of the United States Guarantee Co. of New York, with which company mutual relations and reinsurance arrangements continue as heretofore. The income from premiums, interest and rents was \$561,174, as compared with \$538,244 in 1919.

During the year a dividend of 12 per cent., and a bonus of 10 per cent. on the paid-up capital was paid to shareholders, provision was made for all liabilities and the securities of the company were written down to accord with the values adopted by the Insurance Department of the Dominion, leaving a balance of \$49,904 to be carried over to surplus to shareholders, which now stands at \$1,803,834.

The total resources of the company are now \$3,003,630, compared with \$2,930,761 previously. The total amount of risks in force, less reinsurance stands at \$147,373,705, as against \$129,275,958 previously. At the end of 1919 it was shown that the total amount of claims paid and provided for since the establishment of the company was \$3,030,560, while at the end of 1920 the figure was placed at \$3,106,724.

## THREE PROFITS IN SAVING

There are three sources of profit in a Savings Account. In the first place you securely have the money you save; then you have the interest paid on your savings; and finally, as the habit of saving grows, the person keeping the Savings Account develops an instinct for business.

Branches and Connections Throughout Canada

## A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

## CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended February 18, 1921, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1920.
Feb. 18 . . . . .	6	28	2	2	2	0	4	0	0	44	16
Feb. 11 . . . . .	11	19	7	1	2	3	0	2	1	46	21
Feb. 4 . . . . .	6	15	0	0	4	4	13	0	0	42	18
Jan. 28 . . . . .	12	20	4	1	1	4	3	1	0	46	..

## EXCHANGE QUOTATIONS

Quotations of exchange on the United States and European countries as at February 24, 1921, with comparisons, are given below. The Canadian figures are supplied by the Imperial Bank of Canada, while New York quotations are given by the National City Co., Ltd., Toronto:—

	Par.	Can., Feb. 24.	N.Y., Feb. 24.
London, cheque . . . . .	4.8666	4.43	3.86½
France . . . . .	19.30	8.25	7.15
Germany . . . . .	23.82	1.92	1.62
Belgium . . . . .	19.30	8.67	7.47
Italy . . . . .	19.30	4.20	3.64
Switzerland . . . . .	19.30	18.98	16.55
United States . . . . .	1.00	14½	....

## WAWANESA MUTUAL INSURANCE CO.

The Wawanesa Mutual Insurance Co. continued its successful career in 1920, exceeding the record of 1919 by a substantial margin. The total amount of insurance in force at the end of last year was \$93,139,456, the increase for the year being \$9,849,346, compared with an increase of \$7,658,573 in 1919.

Actual receipts were \$341,234, as compared with \$301,062 for 1919. Losses were lower, being \$128,162, as compared with \$139,820. Salaries and agents commissions, of course, increased correspondingly with the increase in business.

The Wawanesa Mutual commenced business in Manitoba in 1896 under a provincial charter and is authorized to write mutual fire, lightning, wind and storm insurance. Its assets now total \$1,765,897, being an increase over the previous year of nearly \$350,000. The detailed statement is shown on another page of this issue.

## CROWN TRUST PROFITS INCREASE

The gross profits of the Crown Trust Co., Montreal, for the fiscal year ended December 31, as disclosed in the report submitted to the shareholders at the annual meeting this week, amounted to \$119,969. Total expenses amounted to \$64,869, leaving net profits at \$55,100. This, with a balance of \$15,288 brought forward from the preceding year, brings the total up to \$70,389. The above net earnings compare with \$44,326 the preceding year. Out of this year's profits a 6 per cent. dividend of \$30,000 was paid, and \$10,000 was allotted to a reserve covering depreciation in securities, leaving a balance of \$30,389 to be carried forward to profit and loss account.

In the balance sheet total assets show an increase of \$823,026 at \$5,378,751. First mortgage loans show a decrease of \$22,000 at \$269,000, and call and time loans are down about \$45,000 at \$125,976. The principal change is in the cash item, which has increased from \$24,000 in 1919 to \$185,759 in 1920. On the liabilities side, accounts payable are up about \$3,000, and amount due depositors about \$147,000.

## SPRING BUSINESS IN FAIR VOLUME

Depleted stocks are now found in many lines of trade, the small volume of sales being offset by a minimum of buying on the part of wholesalers and retailers, when business recovers, therefore, it may find stocks short. R. G. Dun and Co., reporting on Montreal conditions, say that a growing feeling of confidence in the gradual improvement of business conditions is plainly noticeable, and more particularly this week in a couple of lines that have for some months past been much depressed. Boot and shoe orders are at last beginning to come in more freely, and tanners report some increased enquiry, though the actual volume of leather sales is as yet moderate. Manufacturers of ladies' costumes, who had a particularly poor fall business, report in some cases that the volume of spring orders is beyond the average. The wholesale dry goods warehouses show further groups of outside buyers, who report good December and January sales, resulting in depleted shelves, and very fair sorting selections are being made, though buying for the future is being done more or less conservatively as yet. In groceries there is a steady moderate distribution. There has been some discussion of a possible advance in the sugar market, though nothing at all definite has as yet developed.

Indisputable evidence of an invigoration in trade is forthcoming from Toronto also, and the public interest in commodities becomes more substantial from day to day. The shoppers strike is a thing of memory only but it effectually restricted capacity and did its share in restoring values to a normal basis. Travellers for white goods, ladies' dresses and similar lines report really good business, while some plants are working to maximum capacity. Clothing manufacturers also feel an exhilaration over prospects despite a somewhat pusillanimous attitude on the part of retailers. It is also refreshing to hear wholesale dry goods merchants descanting on the possibility of a shortage in certain lines.

## WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended February 24, 1921, compared with the corresponding week last year:—

	Week ended Feb. 24, '21.	Week ended Feb. 26, '20.	Changes.
Montreal . . . . .	\$105,486,172	\$131,772,654	— \$26,286,482

## HOME BANK LOSES CAHAN CASE

On February 11 C. H. Cahan, senior, was given judgment in his action against the Home Bank of Canada in connection with the misuse by his son of a power of attorney. The judgment was for \$205,943, with interest from the date of action, and costs. Mr. Cahan, senior, one of the most learned and respected members of the Montreal bar, and a former leader of the opposition in Nova Scotia, who had been away for two months, and had left in the Bank of Montreal deposits aggregating \$25,000, was surprised upon calling on the bank that his account was overdrawn for about the same amount he had left at the time of his departure.

Before leaving as appeared by facts revealed at the trial, Mr. Cahan, senior, had given a power of attorney to his son, C. H. Cahan, junior. It was to the misuse of this power of attorney and to the fact that Cahan, Jr., was a director of the Corporation Securities, Ltd., a company controlled by his father, and through "kyting," by means of several accounts in banks, young Cahan secured over \$400,000 which belonged to his father. Of these amounts there were drawn through the Home Bank of Canada ninety-four cheques, representing the amount of the judgment which has just been rendered in Mr. Cahan's favor.

The judgment says in part: "I accept the evidence of Mr. Cahan, Sr., that at some time the defendant's manager informed C. H. Cahan, Jr., that the deposit of plaintiff's cheques and the proceeds of which were put to the credit of his own account with the defendant, had to be discontinued, the form of the cheques, the gradual increases in the number and in the amounts for which they were drawn, would naturally excite the suspicion of a bank manager of ordinary experience and intelligence."

W. K. McKeown and Aime Geoffrion, K.C., authorize the statement that the judgment would be appealed immediately by the bank to the court of Kings Bench, and if necessary would be taken to the privy council.

Assets and liabilities, as at the end of 1919, are as follows:—

**Every Man Intends to Make a Will**

But when one feels fit and eager for the day's work, can make the ninth hole in four, and help carry a canoe around a three-mile portage—it's hard to contemplate the idea of a WILL with any seriousness. That is why so many men die without making any will. That is why so many a comfortable little fortune is wasted in legal tangles. That is why so much property gets into hands for which it was never intended.

Every man has rather decided views about the disposition of the wealth that he has created and saved. And he can enforce his wishes by a carefully drawn will and a wise choice of an executor. He can choose no executor who will administer his estate more prudently and faithfully than

# ASSESSMENT AND POPULATION

In a preface to the report on municipal statistics, R. H. Coats, Dominion statistician, states:—"For some time past there has been a growing demand from officials, financial corporations, economists and others interested in taxation and similar problems, for comparative statistics of the more important municipalities throughout Canada, more

particularly statistics of municipal finance. Jurisdiction with regard to municipalities is vested in the provincial governments, and the first essential for comparative statistics is the adoption of a uniform system of municipal accounting and reporting. A memorandum outlining a system, and looking to co-operative action between the Dominion Bureau of Statistics and the provincial departments, was drawn up in the bureau in 1918 and submitted to the provinces. It was recognized, however, that the matter was complex and far-reaching in scope, and that definite action would not be feasible without careful discussion of details, such as might take place at a conference of Dominion and provincial officials.

and the provincial departments, was drawn up in the bureau in 1918 and submitted to the provinces. It was recognized, however, that the matter was complex and far-reaching in scope, and that definite action would not be feasible without careful discussion of details, such as might take place at a conference of Dominion and provincial officials.

"Pending such discussion it was thought that a useful purpose might be served if a limited survey was undertaken by the bureau on the lines suggested. A schedule was accordingly sent to urban centres having a population of 10,000 and over, and the present report is based on the replies received. The bureau tenders its grateful thanks to the municipal officers, who, sometimes at considerable difficulty, in view of the diversified methods of accounting which prevail, filled in the schedules with the data asked for. Without such co-operation a statement, even of the present limited scope, would have been impossible, the usual annual statements not being available for co-ordinated results in view of the different significance attached to items in various localities.

"Altogether, returns were received from fifty-three municipalities having a population of 10,000 and over. In a few cases, notably Guelph, Moncton and St. Catharines, the reports sent in were not sufficiently detailed to permit of co-ordination with others, whilst no returns were received from Chatham, Ontario; Shawinigan Falls, Quebec; and Glace Bay, Nova Scotia."

A historical table, showing the population and assessment of cities and towns of 10,000 and over, for the years 1901, 1911 and 1919 is reproduced herewith.

## DOMINION TOBACCO CASE

A judgment involving \$250,000, and of first importance to tobacco growers in the Essex county peninsula and to Montreal interests, was delivered in the Ontario Courts on January 22. The three test cases decided were brought by Norman Peterson, Charles Vamparys and David B. Stevenson, farmers and tobacco growers, against the Dominion Tobacco Company, the Macdonald Company and the Foster Tobacco Company, of Leamington, and their agents, Henry Deacon and George Jasparsen.

In 1919 Deacon was agent for the Dominion and Foster Tobacco Companies, and Jasparsen for Macdonald. The latter, it is stated, made an arrangement whereby Deacon was to buy tobacco for him (Jasparsen) in the name of Deacon's

principals. Deacon bought 1,100,000 pounds, of which he turned 300,000 pounds over to the Dominion Tobacco Company. Jasparsen, it is said, refused to take delivery of the remaining 800,000 pounds, and then the price fell from 40 and 45 cents a pound to 13 cents, with a net loss to the growers of about \$250,000.

It was decided by Justice Middleton that the growers are entitled to recover against the Dominion Tobacco Company, who, in turn, may make claim against Jasparsen, with interest from the date of tendering delivery and \$25 for change of contract.

A commission has been named in Cuba to take charge of the sale of the 1920-21 sugar crop, one of the members being F. H. Beatty of the Royal Bank of Canada.

<sup>1</sup> Census of Canada. <sup>2</sup> Estimated by City officials. <sup>3</sup> Year 1920. <sup>4</sup> Year 1918. <sup>5</sup> Improvements exempt 50%. <sup>6</sup> Land and buildings only. <sup>7</sup> Not available. <sup>8</sup> Land only. <sup>9</sup> Including building improvements, land and business assessment. <sup>10</sup> Totally exempt or liable for local improvement only. <sup>11</sup> Year 1903. <sup>12</sup> No assessed value placed on any of the properties. <sup>13</sup> Including business assessment. <sup>14</sup> Year 1905. <sup>15</sup> In 1911 the assessment on improvements was 60% of the value whereas in 1919 it was only 40%. <sup>16</sup> Property assessed for schools only \$1,646,790 included. <sup>17</sup> Business and income. <sup>18</sup> Of this \$2,507,135 is liable for school rates. <sup>19</sup> This includes widow exemptions and exemptions of manufacturers. Churches, school houses and government properties are also exempted but no assessed valuations is placed on them.

# January Exports Sixty-Eight Millions Lower

Decline in Shipments of Agricultural and Vegetable Products was Largely Responsible, Although All Accounts Showed Decreases—Value of Imports Further Impaired to the Extent of Thirteen Millions

**A**FTER the excellent showing of our exports in the last two or three months of 1920, the figures in the trade statement for 1921 appear somewhat deficient. Last month, according to the report of the Department of Customs, given below, exports were \$68,371,509 lower than in December. The falling off in sales of agricultural, vegetable and animal products was chiefly responsible for this large decline, although all of the accounts, with the exception of fibres and textiles, were lower. It is significant to note that wood and paper exports decreased about \$7,500,000 for the month, while animals and animal products sent out of the country are \$15,000,000 below the value of a year ago.

Notwithstanding the drastic decline in exports, the volume of our sales abroad was in excess of our purchases

by nearly \$9,000,000. Imports have been dropping steadily for the past few months, and the January figure was further impaired to the extent of \$13,000,000.

With only two more months of the fiscal year to go, there still remains an unfavorable balance of slightly less than \$20,000,000. While we may yet be able to show a balance on the other side, the indications are that the margin will be very small at the end of March, whether adverse or otherwise. From previous experiences it is reasonable to expect a further drop in exports of our basic products. Despite any tendency of the farmers to withhold their crops, the bulk of the grain, etc., for export has already left the country. Since the beginning of October, when the crop movement started, shipments have amounted to \$265,641,987, compared with \$158,255,206 in the previous year.

# Report of the 28th Annual Meeting

OF THE

# Winnipeg Electric Railway Company

*Held February 9th, 1921*

At the annual general meeting of the Shareholders of the Winnipeg Electric Railway Company, held in the head offices of the Company, on February 9th, 1921, the report of the President and Directors and the financial statements for the year ending December 31st, 1920, were presented and adopted.

The following directors were elected for the ensuing year and until their successors are appointed: Sir Augustus Nanton, A. W. McLimont, Hugh Sutherland, Geo. V. Hastings, J. D. McArthur, G. W. Allan, K.C., A. J. Nesbitt, W. J. Bulman and W. R. Bawlf.

The following are the officers of the company for the ensuing year: Sir Augustus Nanton, President; A. W. McLimont, Vice-President; F. Morton Morse, Secretary; L. Palk, Assistant Secretary; and J. S. Mackenzie, Treasurer.

The report of the President and Directors stated:

The gross earnings for the year 1920 show an increase of \$949,221.54 over the previous year. Notwithstanding the heavy increase in wages and other operating expenses, the net income shows an increase for the year of \$498,720.12.

The year 1920 began with prices of commodities and labour climbing upward at a rapid rate, and while it did not seem possible that this ascent could continue indefinitely, the first half of the year had elapsed before there appeared any sign of the peak having been reached.

In July a Board of Arbitration awarded increased wages to the Company's employees, such increase being made retroactive to the 1st May. As a result of the Company's application to the Manitoba Public Utilities Commission, increased rates were granted, and an appraisal of the physical value of the Company's property was arrived at. The increased rates and fares authorized assisted in offsetting the increased operating expenses which had resulted from the rising costs of material and labour.

In April last the Company's south Main Street car barn, together with 21 cars and other equipment were destroyed by fire. A new fireproof, fully modern car house has been erected on the site of the old one and all rolling stock destroyed has been replaced. Something over \$300,000 was recovered from insurance.

The different utilities of the Company all show a satisfactory growth over the preceding year. The gross earnings of the Company exceeded those of 1919 by \$949,221.54.

The Company has continued making extensive improvements in all departments, and in that connection has expended during the year more than \$900,000. This includes replacing property destroyed by fire.

It will be observed that after payment of all fixed charges, and making provision for depreciation, the Company made a net profit of nearly \$600,000.00, which is substantially the best showing of any year since 1914.

For the purpose of retiring as far as possible the Company's floating liabilities, a new issue of Preferred and

Common shares was authorized, which stock is being placed on the market and it is expected will all shortly be disposed of.

The Company has continued its policy of providing the public with adequate service, and seeks to establish and maintain good relations with the public, realizing that the welfare of your utilities is a matter of public consequence, which policy we believe has met with a marked degree of success.

Respectfully submitted.

A. M. NANTON,

President.

## INCOME ACCOUNT

For Year Ending December 31st, 1920.

Gross Earnings from Operations .....	\$5,233,700.65
Operating Expenses, before charging Depreciation .....	3,428,897.43

## WHOLESALE PRICES ON DOWNWARD MOVEMENT

No Indication of Slackening in Recent Tendencies—Index Number Shows Reduction of Nine per Cent. Last Month

THERE is no indication of any general slackening of the downward tendency of prices, according to the January index numbers compiled by the Department of Labor. The index number of all commodities for last month was 281.3, compared with 290.5 in December, 336.4 in January, 1920, 286.5 in January, 1919, 258.7 in January, 1918, 212.7 in January, 1917, 136.5 in January, 1914, and 137.1 in January, 1913.

On the whole, all groups showed declines, but under meats, mutton and poultry showed increases for the month. Foreign fruits were also higher, while silks also registered an advance. Raw furs were firmer, but all other commodities moved downward.

The following table gives the details with comparisons:—

(DEPARTMENT OF LABOUR FIGURES)	No. of Com- modities	INDEX NUMBERS			
		*Jan. 1921	*Dec. 1920	*Jan. 1920	Jan. 1911

\*Preliminary figures. †Eight commodities off the market, fruits, vegetables, etc. one line of speller was dropped in 1915.

The Manufacturer's Life Insurance Co. has purchased, for \$215,000, a site on Bloor Street East, Toronto, for a new head office building.

## IMPERIAL TRUSTS COMPANY OF CANADA

Profits of \$33,274 were made in 1920 by the Imperial Trusts Co. of Canada, compared with \$13,572 in 1919. The usual dividend was paid and a balance of \$20,942 was carried forward. Trust deposits again showed a substantial increase at \$641,305.

Guaranteed trust account showed a reduction from \$1,364,728 to \$975,716, but estates, trusts, etc., under administration increased \$882,731 to \$3,963,551.

Capital assets have increased from \$273,174 to \$299,735, while total assets are now \$5,239,003, as against \$4,718,724 at the end of 1919. During the year A. W. Marquis, St. Catharines, and George Lynch-Staunton, K.C., Hamilton, were added to the board of directors.

## EQUITABLE TRUST COMPANY, OF WINNIPEG

Operations of the Equitable Trust Company since the management was taken over a year ago by E. E. Hall, were reviewed at the annual meeting, held a few days ago in Winnipeg. A rearrangement of the policy and affairs of the company has taken place during this period. The board now consists of Arthur Congdon, John T. Haig, Dr. J. N. Hutchinson, W. L. Parrish, W. P. Riley and F. S. Harstone.

In his address to the shareholders Mr. Hall stated that the net earnings of the company for the year were in the neighborhood of 6 per cent. of the paid capital. The sphere of the operations of the company will be widened to take in a trust and estate department, and also a savings department. As has been announced, the real estate of the company has been turned over to a subsidiary concern, which will operate a general real estate business. Mr. Hall, in his statement, reviewed the history of the company through the war period, and indicated the steps which had been taken with a view to successful operations in the future.

## COLONIAL INVESTMENT AND LOAN COMPANY

Many changes took place in the capital of the Colonial Investment and Loan Company, Toronto, in 1920, all of which are reflected in the annual statement, which has just been made public. Nearly one-half of the permanent preferred stock has been redeemed, while provision is made for the redemption of the amount of stock certificates not yet presented. All of the sterling debentures, amounting to \$423,352, have been paid off, while an item of \$2,012,045 under "call and time loans secured" has disappeared.

Against these reductions in liabilities are shown similar changes in assets. Anglo-French bonds matured during the year to the extent of \$1,631,415 were paid, and the proceeds were applied to the capital reductions. In addition, \$651,569 Dominion war and Victory bonds were liquidated and applied on the same account. Canadian municipal bonds and debentures are also shown considerably lower at \$244,810, compared with \$612,367 previously, while cash has declined from \$269,702 to \$37,081. Mortgages and agreements for sale amount to \$1,069,185, as compared with \$1,119,009. A considerable amount of property on the company's hands was disposed of during the year, and as a result the amount of real estate now held by the company is \$336,761, being a reduction of more than \$150,000.

The reduction in capital has had the effect of increasing the reserve ratio. The reserve fund now stands at \$300,000, while there is also a real estate reserve of \$100,000. The liabilities to shareholders total \$1,250,926, as against \$2,458,421 in 1919. The action taken ensures payment of the dividend, according to J. H. Mitchell, secretary. Net revenue last year was \$92,134, as compared with \$136,433, but a substantial profit was made by the retirement of the sterling debentures, which, together with the balance brought forward, made the total for appropriations \$185,152. The dividends were paid and a balance of \$43,634 was carried forward.

# Mercantile Trust Company of Canada

LIMITED

## Thirteenth Annual Report

of the Directors of Mercantile Trust Company of Canada, Limited, for the year ended 31st December, 1920

### To the Shareholders.

Your Directors have pleasure in submitting their Thirteenth Annual Report, to which is appended the usual Financial Statement, giving the results of the Company's business for the year ended 31st December, 1920, and the report of the Auditors certifying its correctness, including their report upon the examination of the securities.

The earnings of the Company exceed those of any previous year.

The net profits for the year, after providing for all general expenses of management, War Taxes, Provincial and Municipal Taxes, and all other charges, amounted to \$56,736.10

The balance at the credit of Profit and Loss at the beginning of the year was	7,578.56
Making available for distribution	\$64,314.66
This sum has been appropriated as follows:	
Four quarterly dividends at 6 per cent. per annum	\$30,000.00
Bonus of 1 per cent. for the year 1920	5,000.00
Reserved for income tax payable in 1921	4,000.00
Reserved for difference between Book and Market value of Victory Loan and other Government securities as of 31st December, 1920	6,500.00
Transferred to Contingent Reserve	2,500.00
Balance carried forward	16,314.66
	\$64,314.66

To the Special Reserve Account for possible depreciation of securities and overdue interest on Mortgage Loans in the Western Provinces, has been added the sum of \$2,500.00, which, in the opinion of your Directors, makes ample provision for those purposes.

The accompanying Balance Sheet shows that the total assets in the hands of the Company amount to \$5,919,339.52.

Respectfully submitted,

Hamilton, January 27th, 1921.

CYRUS A. BIRGE, President.

# Work of The Quebec Legislative Session

Agriculture, Roads, Railways, Labor and Education Touched Upon in  
Speech from Lieutenant-Governor—Group Insurance for Public Employees—  
New Plan of Government for Montreal—Tax on Bankruptcy Proceedings

**D**URING the six weeks which have elapsed since the Quebec legislature opened its session on January 11, a wide range of subjects has been discussed. The government's intentions, as regards commercial and financial legislation, were outlined in the speech from the throne as follows:—

"With a view to constantly improving and increasing our agricultural production, my government proposes to establish demonstration farms, to be allotted according to the requirements of different districts. Our settlers continue to increase the extent of our land under cultivation. Thanks to the generous subsidy you voted for colonization, many roads, penetrating into the interior, have been opened and large areas have been cleared. To afford settlers better facilities for acquiring arable lands, a bill will be submitted to you assigning to the Colonization Department the granting of such lands and completely separating the colonization and forest domains.

"A railway will shortly be under construction which will connect the heart of the Temiscaming region with our great railway systems and hasten the development of that important district.

"The workmen in the towns continue to emulate the farmers and settlers. Our labor legislation contributes to inspire them with the spirit of equity and respect for order that distinguishes them.

"To meet fresh needs that are becoming manifest, a bill will be submitted to you for the establishment of a board of arbitration to prevent strikes among policemen, firemen and other public employees whose duty it is to protect the citizens' lives and property.

"In the interest of civil service officers, the government will ask you to establish a group insurance system. It will also request you to extend the benefits of the Pension Act to the employees of the outside service.

"Public education has made remarkable progress of late years. Higher education, however, calls for special assistance proportionate to the services it renders by forming a trained elite and improving the lot of all classes of the people. Following the course you have already pointed out, my government wishes to give to Laval and McGill Universities a generous aid as Montreal University received, and it will ask you to vote a million dollars to each of them. The government understands that these grants must not be given to the detriment of primary, secondary and agricultural education, to each of which it will devote zealous care."

## Labor's Requests

Organized labor's wishes, as expressed to the government on January 19, were as follows:—

An industrial accident compensation law based upon the principle of compulsory state insurance; an eight hour day; legislation regarding the employment of women before and after childbirth; a mother's allowance act; an act establishing pension funds for aged and needy persons; a law for the payment of fair wages and for the observance of other conditions; proportional representation in provincial elections; a double platoon system for firemen; changes in the law to bring municipal employees under the Arbitration Act; a law to control cold storage plants; amendments to the present provincial law for the fixing of minimum wages for women; amendments to the law providing for the inspection of scaffolding; educational and school commission legislation and changes as regards hygienic measures.

One of the most important bills of the session thus far is the new Montreal charter, as prepared by a special com-

mission appointed by the government. Some important changes are contained in the bill. It abolishes the ward system and makes the city a single electoral district. The council will be composed of nine members, who will be elected for four years by all the electors of the city, and the mayor would be chosen by the councillors from their own ranks. A general manager will be appointed to administer the city and will be responsible to the council only. The franchise will be extended to women and to all those who have paid at least \$10 in taxes. The election deposit for aldermanic candidates will be abolished, but each candidate will be obliged to have the signature of at least 200 electors on his nomination papers. No candidate will be allowed to hold more than one mandate at a time. The renewal or granting of franchises to public utility companies will not be permitted without a referendum and provision is made for the creation of a franchise bureau. Borrowing powers are limited to \$100,000 unless bigger loans are approved by the proprietors. The bill also provides for a triennial compulsory census for municipal and school purposes.

## Change in Road Policy

An important change in the good roads policy of the government was put through the legislature on February 18 by Hon. J. A. Tessier, Minister of Highways. The provincial or main highways are maintained by the government who collect half the cost from the municipalities affected, but the roads in municipalities have been maintained by the local authorities and they have been receiving a grant from the government up to \$400 per municipality, irrespective of the mileage they have to maintain. Under the new scheme the municipal roads will be classified as regional or district roads, and the work of maintenance will be undertaken by the provincial road department, the municipalities being compelled to pay to the government a contribution not exceeding fifty per cent. of the cost of the work done on such roads. The advantage of the new policy is not only that the municipalities will be saved a lot of money, but that the district roads, like the main highways, will be maintained under the direction and control of the provincial government, and thus uniformity be secured in improved highways.

## To Tax Under Bankruptcy Act

The provincial treasurer wants the province of Quebec to get some revenue as a result of the Bankruptcy Act of the last session of the Dominion parliament. In a bill and accompanying resolutions brought down on February 18 it is provided that every transfer, sale or conveyance of immoveable property, of a trustee or other authorized person, under the provisions of the Act of the Parliament of Canada, 9-10, George V., Chapter 36, the Bankruptcy Act, shall be subject to the payment by the acquirer of a duty of two and one-half per cent., for the benefit of His Majesty. Such duty of two and one-half per cent. shall be collected by the sheriff of the district and shall be calculated upon the amount stated in the deed of sale, transfer or conveyance, provided that such sum is greater than the amount of first hypothec upon the immoveable sold, transferred or conveyed, and upon one-half the value shown on the municipal valuation roll, if such sum is not greater than such amount, or if there is no hypothec. Nevertheless, if the amount mentioned in the deed as aforesaid, although less than the amount of the first hypothec, is greater than one-half of the municipal valuation, the commission shall be calculated upon the amount fixed by the said deed. Provision is made that those who neglect to pay the tax shall be liable to a penalty equal to

double the amount of the exigible duty, recoverable by summary action before the courts.

**Municipal Affairs**

The report of the Department of Municipal Affairs presented to the legislature on January 22 states, in reference to housing, that most of the municipalities hesitated to undertake the building of dwellings under the act, owing to the refusal of the federal authorities to accept the provisions of the provincial statute passed last sessions regarding two-storey buildings, one of which could be rented by the proprietor. Twelve municipalities had undertaken the building of dwellings, and it was believed others would follow their example in the near future. During the year 66 municipal loan by-laws, representing \$13,904,200 were sanctioned by the lieutenant-governor, and no less than 137 municipal by-laws were disallowed. Twenty-five new municipalities were created during the year, including two towns, 13 villages, and 10 rural municipalities. Nine annexations for municipal purposes and 12 for electoral purposes were decreed by proclamation, and the department organized the first elections of mayor and councillors in 16 municipalities.

The amount placed at the disposal of the municipalities by the federal government for workmen's dwellings through the province of Quebec was \$6,949,255. Advances made to municipalities totalled 35, but the city of Levis afterwards refused its loan. The total amount of the grants made was \$6,430,000.

The housing question came up also on February 8, when a delegation of the Montreal Civic Progress League asked that the government loan \$20,000,000 to municipalities for this purpose. Premier Taschereau expressed himself as not in favor of the suggestion.

"Municipal Statistics," presented to the legislature on February 8 by the provincial secretary, are for the year 1919. There are 74 counties in the province, comprising 913 parishes and 240 villages, and the cities and towns number 18 and 84 respectively. Population is estimated at 2,486,500, 1,185,898 being rural and 1,300,602 urban.

**To Control Liquor Business**

One of the contentious measures was that relating to the sale of liquor, which was read the third time on February 17. It provides for the taking over of the business by the government. Another important measure, introduced by Peter Bercovitch as a private measure, is that to control rentals; this is the result of a strong feeling on the part of tenants in Montreal.

The Anglo-American Trust Co. is applying for an act amending its charter to extend the time fixed for the commencement of business.

**BANK OF HAMILTON BUYS SITE**

The Bank of Hamilton has purchased from the executors of the late Dowager Countess of Albermarle, the principal portion of the southwest corner of King and James Streets, Hamilton. The deal involves the property on which the head office building of the Bank of Hamilton stands, and the land occupied by the Osborne Chambers. The site of the head office of the bank has until the present time been held under lease. Some time ago the Cumberland Land Co., closely identified with the Bank of Hamilton, bought the leases of the Osborne Chambers from the estate, and the present transaction gives the bank the freehold of this property. The sum of \$175,000 is involved in the deal, for which the bank secures property with 132 feet frontage, 24 feet on King Street and 108 feet on James Street.

Officials of the bank intimated that extensive building operations are not under consideration at the present time. Eventually the Osborne Chambers will be torn down and an addition to the present imposing office building occupied by the bank erected.

**SASKATCHEWAN MORTGAGE AND TRUST**

The shareholders' annual general meeting of the Saskatchewan Mortgage and Trust Corporation, Limited, was held in Regina on February 17. The company appears to have had the best year in its history, showing gross profits of over \$80,000. Of this amount, \$19,500 was used for management and expenses of operation, \$48,000 paid to the shareholders by way of dividends, provision was made for income tax for 1919 and 1920, and the balance in excess of \$10,000 was carried forward in profit and loss account.

The shareholders elected the following directors for the ensuing year: J. F. Bole, A. E. Whitmore, F. N. Darke, S. C. Burton, F. J. James, A. W. McGregor, R. M. Johnson, E. E. Poole, F. G. England and A. G. Rawlinson. At a subsequent meeting of the directors, J. F. Bole was re-elected president; A. E. Whitmore, vice-president; C. V. Smith, general manager, and R. A. Kirkwood, assistant manager and secretary.

**LONDON LIFE HAS CREDITABLE RECORD**

Consistent with the record of most of our other Canadian life companies is the report of the London Life Insurance Company, which was given in these columns last week. New insurance issued in 1920 amounted to \$31,826,696, being an increase of \$7,007,920 over the previous year. Income amounted to \$4,217,693, compared with \$3,452,293 in 1919. \$1,666,122 in 1915 and \$297,249 in 1900.

Having commenced business forty-six years ago, the company has made splendid progress, and more particularly in recent years. Since 1915 the insurance in force has increased \$61,779,747 to \$96,600,075, while the amount of insurance issued shows an increase of \$20,766,184 over the same period.

At the same time, the company's position has not been in any way impaired. In five years assets have increased \$7,029,760 to \$13,105,083, while the surplus has advanced to \$1,453,455 from \$753,625. The reserves are over \$850,000 in excess of the government standard.

**ALBERTA WORKMEN'S COMPENSATION RESULTS**

The Alberta Workmen's Compensation Board issues the following summary for the year ended December 31st, 1920:—

Number of employees within the scope of the act ..	2,698
Number of accidents reported .....	6,418
Number of claims disposed of by payment of compensation .....	3,089
Number of claims disposed of without payment of compensation .....	545
Number of accidents reported and disposed of, for which no applications for compensation were received .....	1,681
Number of accidents reported and disposed of by payment of medical aid only .....	187
Number of claims on which further payments have to be made .....	286
Number of accidents reported still under consideration, on which no payments have been made ..	1,826
Total amount of assessments levied, 1920 .....	\$443,126
Total amount of assessments collected, 1920 (includes payments made on account of outstanding as at 31st December, 1919) .....	\$445,310
Total expenditure re fatal accidents:	
Compensation paid .....	\$19,576
Funeral expenses only .....	2,157
	\$ 21,733
Total amount of expenditure in connection with non-fatal accidents .....	\$173,231

# The London Mutual Fire Insurance Company

## Directors' Report presented at the Annual General Meeting, February 19th, 1921

Your Directors submit herewith the Sixty-first Annual Statement of the Company's affairs, showing Assets and Liabilities as at December 31st last, and Income and Expenditure accounts for the year 1920.

The Company's business has, during the course of the past year, made wonderful progress, and the results of the year's trading have been very satisfactory.

The Gross Premium Income, less cancellations and rebates, was \$975,395.79, being an increase of \$270,386.25 over the previous year. The net premium income, after deducting reinsurance premiums, was \$625,091.76, an increase of \$99,817.71. The gross losses were \$407,666.63, being 41.8% of the gross premiums. The net losses were \$258,319.33, being 41.3% of the net premium income.

The Bonds and Debentures owned by the Company are shown in the Statement at their book value of \$480,438.02, an increase of \$109,964.39 over the figures shown at the end of 1919. The valuation of these securities on the basis of the values authorized by the Insurance Department at the 31st of December, 1920, is \$27,765.81 greater than the value shown in the Statement.

The Trading Profit for the year, after deducting losses paid and estimated, and expenses paid, from premiums written, interest and other income, amounted to \$135,943.57 and after adding \$86,853.11 to reinsurance reserve, and \$3,615.82 to Government Tax Reserve, and writing off the following items: Permanent improvements to Head Office building made during the year, amounting to \$9,041.14, Real Estate account \$2,736.97, Securities \$3,338.21, writing off the whole amount spent on office furniture, insurance plans and automobiles amounting to \$11,982.92, and providing \$2,756.00 for dividend, the sum of \$15,575.07 was added to the Cash Surplus, making a Cash Surplus to Policyholders of \$222,950.20, to which must be added the contingent portion of premium notes, amounting to \$138,827.77, making a total surplus to Policyholders of \$361,777.97.

Your Directors wish to place on record their appreciation of the loyalty to the Company shown by its Agents, and of the efficient service rendered by the field and office staffs, which have produced such excellent results.

All of which is respectfully submitted.

February 12th, 1921.

A. H. C. CARSON, President.

### BALANCE SHEET DECEMBER 31st, 1920

The valuation given by the Insurance Department on the above Bonds is \$27,765.81 more than the book value.

### CERTIFICATE

We have audited the books of the London Mutual Fire Insurance Company of Canada for the year ending December 31, 1920. We find the books to be in order and all the information asked for has been cheerfully given.

Our examination has included the Cash and Bank Books; Premium Registers, Agents and Branch Balances and the securities held by the Company.

We certify that the annexed Balance Sheet is in accord with the books and in our opinion is a full and fair statement of the position of the Company on that date.

February 4, 1921.

EDWARDS, MORGAN & CO. Chartered Accountants.

## RAILROADS LOST MONEY IN 1919

Figures for Year Ended June 30, 1919, Show a Net Corporate Loss—Revenue Increase was More than Offset by Increase in Expenses

THE annual report on railway statistics for the year ended June 30, 1919, the first to be compiled and published by the Dominion Bureau of Statistics, shows that the railroads carried 8.5 per cent. less freight than in 1918, or 116,699,572 tons, against 127,543,687, and 2.7 per cent. fewer passengers, or 43,754,194, against 44,948,638, but, due to the increased freight and passenger rates, which were raised in March, and again in August, 1918, there was an increase in operating earnings of \$52,756,751, or \$382,976,901, against \$330,220,150. This increase was more than offset by an increase in operating expenses of \$67,911,073, or \$341,866,09, against \$273,955,436, making the net operating revenue \$41,110,392, against \$56,264,714, a decrease of \$15,154,322. This net operating revenue was increased by miscellaneous earnings to \$61,582,832. Taxes amounted to \$5,316,714, and rents, lease of road, interest on funded debt, etc., amounted to \$57,530,798, leaving a net corporate loss of \$1,264,680, against a net corporate income of \$18,328,229 in 1918.

## Big Increase in Expenses

The operating ratio increased from 82.96 per cent. in 1918 to 89.27 per cent. in 1919. Maintenance of way and structures was \$69,034,242, against \$51,614,857, and maintenance of equipment was \$78,397,270, against \$57,304,234. Transportation expenses were \$170,382,034, against \$145,107,396. Wages included in the above were, for maintenance of road and equipment and construction, \$93,308,553, against \$64,432,548. Trainmen, yard, \$11,353,454, against \$8,665,250, and trainmen, road, \$37,556,658, against \$31,052,421. Total wages, all departments, were \$208,939,995, against \$152,274,953. There was a decrease in fuel consumption of 9,451,018 tons, costing \$52,214,897, against 10,173,344 tons, costing \$52,630,430 in 1918. The ties used for maintenance were 11,856,373, costing \$9,369,519, against 7,785,831, costing \$4,701,312.

## Volume of Business Decreased

Passengers carried one mile were 3,074,664,369, against 3,190,025,682. Tons handled one mile were 27,724,397,202, against 31,029,072,279. Average receipts per passenger per mile was 2.557 cents, against 2.122, and the average receipts, per ton per mile was \$.962, against \$.736. The average load increased from 23.09 tons per car in 1918 to 23.46 tons, but the average haul decreased from 243 miles to 238 miles.

## Capital and Assets

The capital was \$2,009,209,510, being made up of stocks \$878,101,113, debenture stock (C.P.R.) \$216,284,882, and funded debt \$914,823,515, an increase of \$500,500 in stocks and \$8,828,516 in funded debt.

The miles of single track was practically the same, 38,896, against 38,879, and the total miles of all track was 50,616, against 50,640. Freight car miles were: Loaded, 1,181,758,126; empty, 497,882,365; passenger train car miles, 297,275,014. Train miles were: Freight, 55,034,882; passenger, 41,048,124; mixed, 7,652,411; special, 97,418; non-revenue, 4,159,658. Total locomotive miles, 136,926,164. Number of locomotives increased from 5,756 to 5,879, passenger cars from 6,376 to 6,510, freight cars from 209,026 to 217,258.

## Results by Roads

From operation: The gross earnings of Canadian Pacific was \$162,846,470; expenses, \$130,416,994; net earnings, \$32,429,475.

Grand Trunk was—Gross earnings, \$66,429,147; expenses, \$57,005,328; net earnings, \$9,423,819.

Canadian Northern—Gross earnings, \$48,238,461; expenses, \$49,716,044; deficit, \$1,477,582.

Intercolonial—Gross earnings, \$26,977,807; expenses, \$31,489,685; deficit, \$4,511,878.

All other government operated lines—Gross earnings, \$11,706,790; expenses, \$13,809,870; deficit, \$2,103,080.

Grand Trunk Pacific and branch lines—Gross earnings, \$9,625,769; expenses, \$14,999,288; deficit, \$5,373,518.

The total deductions from gross corporate income, other than taxes, for these roads were:—

Canadian Pacific—Interest on funded debt, \$597,125; total, \$3,087,364; net corporate income, \$36,977,263.

Grand Trunk—Interest on funded debt, \$7,621,300; total deductions, \$11,986,476; corporate loss, \$1,020,986.

Canadian Northern—Interest on funded debt, \$11,445,813; total deductions, \$19,466,307; corporate loss, \$20,193,986.

Intercolonial—No interest; total deduction, \$67,810; corporate loss, \$2,292,102.

All other government operated lines—No interest; total deductions, \$842,238; corporate loss, \$4,610,118.

Grand Trunk Pacific and branch lines—Interest on funded debt, \$6,368,084; total deductions, \$10,629,427; corporate loss, \$11,079,612.

For all roads there was a total net corporate income of \$45,019,298 and a total corporate loss of \$43,809,574.

## TRANSPORTATION FACILITIES FOR RED DEER

The entrance of the Canadian National Railway to Red Deer, Alta., was one of the principal events in 1920 for the municipality. In his comprehensive survey of the local situation for last year, President Welliver, of the Board of Trade, makes special mention of the fact. For the past seven years the board has shown one continual progressive action to keep the C.N.R. officials apprised of their promises, and kept continually commending them to action whenever apathy on the project was evident. Wholesalers and coal dealers of the municipality will benefit greatly by the movement, through the additional shipping facilities and better freight classification, and the position of Red Deer will be considerably improved as an industrial centre. The road will not be operated until the spring, for ballast must first be procured.

## POLICY-HOLDERS MUTUAL LIFE

The general meeting of the Policy-Holders' Mutual Life Insurance Co. was held in Toronto on February 2nd. The largest amount of business heretofore written was that of the year 1919, but the volume of business of 1920 was two and one-third times that of 1919. The percentage of new business retained was 81.17. The increase in policyholders' reserve was 40 per cent.; increase in general assets of the company 30 per cent.

The officers elected were as follows: Colonel A. C. Pratt, who has been vice-president since the organization of the company, was elected president; J. M. Faircloth, vice-president; A. M. Featherston, managing director; A. W. Briggs, K.C., solicitor, and Dr. W. S. Verrall, medical director.

## NEW YORK LIFE INSURANCE CO.

The largest annual business in its history is reported by the New York Life Insurance Co. in its statement just issued. The year was a record one with respect to new insurance, amounts paid to policyholders, as per contracts, and amounts paid in dividends, which are returned in excess of the guarantees of the contracts. The amount paid to living policyholders was more than double the amount paid on death and disability claims. The total payments to policyholders exceeded \$114,000,000, and the total new insurance was nearly \$700,000,000. The company's balance-sheet shows five classes of securities, in each of which the investment exceeds \$100,000,000, namely, mortgage loans, policy loans, Liberty bonds and Victory notes, local government obligations and railroad bonds.

# Provincial Paper Mills Limited

## Report to Shareholders at the Annual Meeting Held on Wednesday, February 16th, 1921

**TO THE SHAREHOLDERS:**

Your Directors have pleasure in submitting herewith statement for the Fiscal Year ending December 31st, 1920.

Please remember when comparing this statement with that of December 31st, 1919, issued by the Provincial Paper Mills Co. Limited, that the present statement includes the pulp mill formerly operated by the Port Arthur Pulp and Paper Co. Ltd., and which was acquired as result of re-organization the first of the year.

During the year there was an abnormal demand for the product of your mills, enabling all plants to run to capacity, and this, with the high values, made our total sales reach the high record of \$7,653,176.66.

We have pursued the policy of making our product of a quality and at a price which compels Canadians to buy in Canada. It would be impossible at this time to say definitely what our business will be for the coming year, but intimations from Catalogue and Periodical Publishers would indicate an increased demand. Present commitments, while less than at the corresponding period of last year, are quite satisfactory.

When organizing the Company, provision was made for financing future extensions by authorizing \$3,000,000, twenty-year, 6% Bonds. \$200,000 of these Bonds have been exchanged for a like amount of Bonds that were outstanding against the Port Arthur Pulp and Paper Company, Limited, thus enabling us to discharge the prior mortgage on the Port Arthur mill. \$305,000 of the Bonds were sold for cash, the amount being invested in Canadian Government Victory Bonds for use when further building operations are commenced.

During the year we received from the Ontario Government the rights for 21 years to cut pulpwood on an area containing over 1,300 square miles of a Paper Mill.

Now that our supply of pulpwood is assured, we are in position to proceed with our plans for the extensions at Port Arthur, which include a Paper Mill.

Toronto, February 16, 1921.

Submitted on behalf of the Directors, by  
I. H. WELDON, President.

## SOURCE OF DOMINION REVENUE

An interesting analysis of Dominion revenue is published in the current issue of the Bank of Commerce "Commercial Letter." According to the preliminary statement of the Dominion government, the December revenues exceeded expen-

ditures by \$1,000,000. During the nine months ending December last, the excess of revenue over ordinary expenditures was \$91,000,000, and the capital expenditures were \$32,270,316, as compared with \$272,419,448 for the corresponding nine months of the previous fiscal year. The revenue from April 1 to December 31, 1920, exceeded the total of \$312,900,000 for the whole of the fiscal year ending March, 1919, and, if this level is maintained, the total for the current fiscal year will reach \$459,000,000. The accompanying graph reveals the extent to which war taxes (that is to say, income and business profits taxes and those on the sale of luxuries and other articles) have contributed to the growth of the revenue. These taxes brought in \$100,000 in 1915, and \$104,000,000 for the first nine months of the current fiscal year. During the same period, there have also been notable increases in customs and other sources of revenue.

REVENUE: DOMINION OF CANADA  
(Fiscal Years ending March)

## LONDON MUTUAL FIRE INSURANCE CO.

The company's statement for 1920, presented at the annual meeting on February 19, shows that gross premium income, less cancellations and rebates, was \$975,395, an increase of \$270,386 over the previous year. The net premium income, after deducting reinsurance premiums, was \$625,001, an increase of \$99,817. Gross losses were \$407,696, being 41.8 per cent. of the gross premiums. The net losses were \$258,319, or 41.3 per cent. of the net premium income. The bonds and debentures owned by the company are shown in the statement at their book value of \$480,438, an increase of \$109,964 over the figures shown at the end of 1919. The valuation of these securities on the basis of the values authorized by the insurance department at the 31st of December, 1920, is \$27,765 greater than the value shown in the statement.

The trading profit for the year, after deducting losses paid and estimated, and expenses paid, from premiums written, interest and other income, amounted to \$135,943, and after adding \$86,853 to reinsurance reserve, and \$3,615 to government tax reserve, and writing off the following items: Permanent improvements to head office building made during the year, amounting to \$9,041; real estate account \$2,736; securities \$3,338; writing off the whole amount spent on office furniture, insurance plans and automobiles amounting to \$11,982; and providing \$2,750 for dividend, the sum of \$15,575 was added to the cash surplus, making a cash surplus to policyholders of \$222,950 to which must be added the contingent portion of premium notes, amounting to \$138,827, making a total surplus to policyholders of \$361,777.

The Toronto General Trusts Corporation and Charles W. Kerr, barrister, have been granted probate of the will of Mrs. Elizabeth Morse, widow of George D. Morse, who died recently in Toronto, leaving an estate of \$40,918.

## THE PRUDENTIAL'S GREATEST YEAR

The 1920 statement of the Prudential Insurance Company of America shows that the total of new paid-for insurance for the year was over \$1,032,000,000, the largest amount of paid-for insurance written on the lives of the public by the company in any year in its history. Its net gain in insurance in force was over \$665,000,000, which is more than the total insurance in force that the company had at the end of its twenty-fifth year in business. This amount was almost equally divided between the industrial and the ordinary departments. The Prudential's net increase in assets in 1920 was over \$88,000,000, which is greater than the total assets accumulated when it had been in business twenty-eight years.

The Prudential is now second among the world's insurance companies in the important items of insurance in force and premium income. In 1920 it advanced from fifth to third place in admitted assets. Its lapse rate last year was less than in 1919.

The total assets on December 31, 1920, were over \$686,000,000. Its liabilities amounted to \$655,000,000, which include its reserves of \$623,000,000. Its surplus had increased to \$30,900,000. It bought \$8,500,000 worth of Liberty bonds during the year. It owns government bonds valued at \$106,500,000, which total equals 15 per cent. of its admitted assets. The average rate of return on government, municipal, railroad and miscellaneous bonds purchased during 1920 was 6.07 per cent., as compared with 5.28 per cent. in 1919.

The Oshawa, Ont., Board of Trade, dormant for many months, is to be reorganized. At a meeting of the executive on February 21 F. J. Baines was elected president in place of R. H. Mulch, resigned, and a meeting is to be held on March 4, to be addressed, probably by the Dominion Town Planning Expert, Thos. Adams.

# ANNUAL MEETING OF The Montreal City and District Savings Bank

MONTREAL, February 14th, 1921.

The Annual Meeting of the Montreal City & District Savings Bank was held at noon to-day.

The President, Honourable Raoul Dandurand, presided, and Mr. A. P. Lesperance, General Manager, acted as Secretary.

The Annual Report and Statements were read to the Meeting and duly adopted, and a vote of thanks was accorded the Directors, officers and employees of the Bank.

The old Board of Directors was unanimously re-elected, and at a subsequent meeting of the Board, Hon. Raoul Dandurand was elected President, and Richard Bolton, Vice-President of the Bank, for the ensuing year.

To the Shareholders:

MONTREAL, February 14th, 1921.

Gentlemen:

Your Directors have pleasure in presenting the Seventy-fourth Annual Report of the affairs of the Bank and the result of its operations for the year ending December 31st, 1920.

The net profits for the year were \$247,286.39, and the balance brought forward from last year's Profit and Loss Account was \$280,222.27, making a total of \$527,508.66. From this amount have been paid four quarterly dividends to our Shareholders and \$4,250.00 has been contributed to various charitable and philanthropic funds, leaving a balance at the credit of Profit and Loss Account of \$223,449.34 to be carried forward to next year.

A sum of \$25,000 was voted during the year to our Montreal Universities, to be paid in the course of the next five years.

As usual a frequent and thorough inspection of the books and assets of the Bank has been made during the year.

The report of the Auditors and the Balance Sheet are herewith submitted.

R. DANDURAND, *President.*

A. P. LESPERANCE, *General Manager.*

### AUDITORS' REPORT.

Having obtained all the information and explanations we have required, and having satisfied ourselves of the correctness of the Cash Balances, and examined the Securities held against the Money at Call and Short Notice, and those representing the investments of the Bank, and having examined the foregoing Balance Sheet and compared it with the Books at the Head Office, and with the Certified Returns from the Branches, we are of opinion that the transactions of the Bank have been within its powers, and that the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs as shown by the Books of the Bank.

MONTREAL, February 7th, 1921.

A. CINQ-MARS, C.A.     } *Auditors.*  
C. A. SHANNON, L.L.A.   }

## SECURITY LOAN AND SAVINGS

Profits of the Security Loan and Savings Co., St. Catharines, Ont., for 1920, amounted to \$43,591 compared with \$47,357 in 1919, and \$47,021 in 1918. Dividends took \$31,938, and after adding \$15,000 to reserve there was a balance of \$2,390, compared with \$5,737 brought forward.

A feature of the balance sheet was the increase in deposits from \$345,714 to \$421,326, while debentures decreased from \$101,264 to \$84,465.

## NEW TORONTO STOCK BROKERAGE COMPANY

Mara, McCarthy Co., Ltd., a new Toronto stock exchange house, has purchased a seat on the Toronto Stock Exchange, and W. Harold Mara, one of the members, will be proposed as a member of the exchange to represent the firm. The seat was purchased in December last, by Stuart B. Playfair from F. J. Stewart, and has been held since then for Mr. Mara. Mr. Mara is at present a member of the firm of Michie, Mara and Co., of Montreal. His partner, Leigh McCarthy, is a son of Judge McCarthy, of Orangeville, Ont., and was formerly assistant general manager of the Northern Crown Bank at Winnipeg. On his return from overseas, he joined the Royal Bank of Canada, and has lately been supervisor of Ontario branches.

## ELECTIONS TO STOCK EXCHANGE MEMBERSHIPS

Toronto Stock Exchange on February 15 elected to membership E. V. Wright, of Hamilton, of the new firm of Wright and Coleman. Mr. Wright was a member of the firm of Morris and Wright, which was dissolved by mutual consent at the middle of January. Robert S. Morris, the other partner of the firm, was for years a member of the Toronto Exchange, and the seat is now transferred to Mr. Wright. H. P. Coleman, the other partner of the new firm, was until recently with Tomenson, Forwood and Co. of Toronto.

Another change of the day was the election to membership in the Montreal exchange of Dixon E. How, of Duncanson, How and Co., who are also members of the Toronto exchange. Johnson and Ward, of Montreal, who co-operate closely with Duncanson, How and Co., were recently elected members of the Toronto exchange.

## NORTH OF SCOTLAND CANADIAN MORTGAGE

There has been a revival of demand for mortgage loans, and at satisfactory rates, according to the annual report of the North of Scotland Canadian Mortgage Co., Ltd., and the amount so lent by the company increased during the year by over £98,000 to £1,743,395.

The company has its head office in Aberdeen, Scotland, and receives all of its funds there, but its loans are made largely within the Dominion. Income in Canada last year amounted to £138,333, compared with £131,706 in 1919. In addition a profit of £15,436 was made on exchange, as compared with only £2,169 previously. Notwithstanding these favorable changes, however, the net income amounted to only £46,263, compared with £44,552 in 1919, the small increase being the result of the larger expenses, and of the provision of £14,589 for unassessed war taxes in Canada.

The company's reserve fund was increased £5,000 during the year to £380,000, while the capital was unchanged at £276,000. Osler, Hammond and Nanton, Winnipeg, are the general managers for the Dominion, while the Canadian advising board also consists of F. L. Patton, assistant general manager of the Dominion Bank, Winnipeg; Sir E. B. Osler, of Osler and Hammond, Toronto, and Hon. Wm. Hespeler, late speaker of the legislature of the Province of Manitoba.

## SOME SICKNESS AND ACCIDENT PAYMENTS

Regarding its payments to policyholders in 1920, the Dominion of Canada Guarantee and Accident Co. says:—

"Fifteen of these claims were for fatal accidents on which the company paid in cash the sum of \$45,000, with a further liability amounting to \$8,000 under gold bond coupons which remain to be redeemed. One of these claims was for \$15,000. The man was killed seven months after the issue of the policy and the company had received one premium! Another was for \$1,600. The man was killed eleven weeks after the issue of the policy, and in this case also the company had received one premium. A third was for \$1,850 under a sixty days' accident ticket, for which the company had received a premium of \$7.50.

"2,385 of the claims paid during the year were for sickness, and out of the total number of accident and sickness claims paid during the year, 1,776 were under policies which had been in force for the average period of one year, the indemnity paid on these amounting to \$102,335.96."

## CANADIAN GENERAL ACCOUNTANTS' ASSOCIATION

The proposition to admit women to the examinations for certificates of the Canadian General Accountants' Association was voted down at the annual meeting of that body held in Montreal on February 14. The vote was a close one, the nays winning by seventeen to fourteen. A large number of the members present, however, did not vote one way or the other.

The question of certifying women accountants was introduced by A. J. M. Petrie, retiring secretary-treasurer of the association, by the reading of a suggestion from a correspondent of Toronto, H. K. S. Hemming, championing the cause of women accountants. "Women have naturally competent accounting ability," said Mr. Hemming. "I venture to say that most business men will agree with me that women make most efficient and capable head bookkeepers. To-day, women have entered every field of endeavor, and in none are they making better success than as accountants and financial clerks."

## HIGHER RATES FOR SICKNESS INSURANCE

Action taken during the year 1920 by most of the companies in raising sickness insurance rates places this business upon a more satisfactory basis. Referring to this and other developments during the year, John A. Jessup, manager of the casualty department of the Royal Exchange Assurance, said to *The Monetary Times*:—

"In the early part of this year the companies, recognizing that the rates for this class of insurance during the past five years have been inadequate, agreed, with one or two exceptions, to increase the premium charge and adopt a standard form. This undoubtedly is a step in the right direction, and in the face of experience is perfectly justified, and the agreement reached to my mind reflects credit upon the Canadian managers of these companies, inasmuch as the same scheme failed to materialize in the United States, although brought forward by the United States Conference for acceptance by its members.

"The step now taken opens the door to the adoption of a standard form of accident policy, which I sincerely hope will be an accomplished fact in the not far distant future, coupled with an agreement regulating commissions to be paid for this class of business.

"A summary of the casualty business transacted in Canada would indicate that it is not a paying proposition for the companies, and it is clear that something must be done to effect a healthy condition, and one of the points which should be given serious consideration is the acquisition cost, which is undoubtedly too high at the present time."

**DEBENTURES FOR SALE**

**CITY OF TRAIL, B.C.**

Sealed tenders, marked "Tender on Debentures," will be received by the undersigned up to 8 p.m. on Monday, March 7th, 1921, for \$37,000 7% 20-years straight-term waterworks debentures. ## MUTUAL FIRE UNDERWRITERS OF ONTARIO

Convention Held This Week in Toronto—W. A. Galbraith, T. J. Harkness, T. R. Mayberry, E. P. Heaton, V. Evan Gray and G. L. Miller are Chief Speakers

THE annual meeting of the Mutual Fire Underwriters' Association of Ontario was held in Toronto, February 22 and 23. In an address entitled, "What is the Objective of the Association?" T. J. Harkness, Owen Sound, recommended that the association urge the provincial legislature to enact legislation compelling farmers to equip their barns with lightning rods. Col. T. R. Mayberry, Ingersoll, dealt at some length with regulations respecting gasoline engines and the insuring of automobiles. In his annual address, W. A. Galbraith, Iona, referred to the past year as one of the best in the history of the association.

## Fire Prevention Work

Provincial Fire Marshal E. P. Heaton stated that, while a province-wide fire prevention educational campaign had been the means of reducing the number of fires during the past two or three years, he predicted still greater results in the next two or three years. He stated that much of the fire waste held in check was attributable to care exercised by officials of fire insurance companies in underwriting risks. Referring to the numerous fires investigated by the department during the past year, Mr. Heaton asserted that the decisions rendered by the courts in a few instances had not been satisfactory to the department over which he presides. "I must confess that on two occasions last week," he added, "when we firmly believed we had adduced direct evidence of incendiarism, the presiding judges ruled against us and discharged the defendants. The decisions in each instance were painful to me."

Fire Marshal Heaton expressed the opinion that when it had become generally known that all fraudulent fires are to be investigated, this in itself will have the effect of reducing the number considerably. "Many insurance men generally regard the matter of spontaneous combustion as a mere bugaboo," remarked the fire marshal. "Investigations reveal the fact that seventy-five per cent. of the fires are due to spontaneous combustion. At present I am exchanging correspondence with the fire marshal of Switzerland, who has made some wonderful discoveries concerning spontaneous combustion. I am having the correspondence translated and printed in different languages for distribution in Ontario, and I am satisfied that when you have studied the question, that those of you who regard spontaneous combustion as a bugaboo will be amazed to learn that in reality it is a real fire menace."

Fire losses in barn fires last year amounted to over \$1,800,000. The fire marshal held that every farmer should equip his barns with lightning rods, a contrivance which had been instrumental in a large measure in the reduction of barn fires during the past couple of years.

On Wednesday the chief speakers were V. Evan Gray, provincial superintendent of insurance, and G. L. Miller, of Jarvis, Ont.

## MILK RIVER MUTUAL FIRE INSURANCE CO.

The annual meeting of the Milk River Mutual Fire Insurance Co. was held in Milk River, Alta., on February 23. The company enjoyed a prosperous year. Losses paid during the year amounted to \$6,771. The volume of business increased materially throughout the field covered by this company which, roughly speaking, comprises the whole of southern Alberta. The total insurance in force to date is \$2,930,055. The statement shows that the company has assets to the amount of nearly \$77,000, with liabilities of \$2,263. The cash on hand at the close of last year, according to the statement, was \$3,321. G. N. Giles is secretary-treasurer.

## PROPOSES HUGE GOVERNMENT HOUSING LOAN

At a provincial Town Planning and Housing Conference, held in Toronto, February 17 and 18, John W. Bruce, a prominent labor leader, gave the details of a comprehensive scheme which has been prepared by the National Joint Industrial Council of the Building Industry, of which he is a member. The scheme was one which the council felt should be fathered by the Federal Government, who would also be responsible for carrying it into effect. The scheme proposed that a loan should be floated by the Federal Government for \$250,000,000, to be known as "the housing loan," the proceeds to be used entirely for the purposes of housing, provision being made that anyone buying bonds should be able to apply them in part payment when they desired to build. The scheme also provided for the establishment of a Federal Housing Board, to be appointed by the government, the workers to have full representation on such board.

The board would also have the authority as acting for the government, and would be agents in making grants, etc. In the distribution of the money the organizers of the scheme felt the government would not need to create new machinery, as they had all that was necessary already in existence in the Dominion in the shape of a number of permanent loan companies. These, acting as agents for individuals, did their work on a creditable financial basis, and the council felt that they could be used in connection with the disbursement of money under the scheme. These companies had the machinery for making investigations and looking after the collections. The loan would be for thirty years, repayments to be made monthly or quarterly as desired. Advances would be made up to 85 per cent. of the value of the property desired; and the interest suggested was 3 per cent.

## CANADIAN FORESTRY ASSOCIATION

At the twenty-first annual meeting of the Canadian Forestry Association, held in Montreal on January 20, C. E. Usher, of the Canadian Pacific Railway, was returned president. Dan McLachlan, of Arnprior, was elected vice-president; secretary, Rob. Black, of Ottawa; treasurer, Miss M. Robertson, Ottawa. Directors elected included: Ontario—G. C. Edwards, Clyde Leavitt, R. H. Campbell, C. J. Booth, T. W. Dwight, J. W. Black, Ottawa; Prof. B. E. Fernow, E. J. Zavitz, Albert Grigg, W. E. Bigwood, C. T. Young, Toronto; Percy E. Wilson, Sault Ste. Marie; J. A. Gillies, Braside, Ont.; Dan McLachlan, Arnprior; Hon. J. Gordon, North Bay, Manitoba—J. W. Dafeo, Winnipeg; G. W. Allan and E. Fitzgerald, Saskatchewan—John Dixon, Maple Creek; Hon. A. Turgeon and Joseph Glenn, Alberta—William Pearce, G. R. Marnock and Norman Harvie, British Columbia—Hon. H. Bostock, Hon. A. C. Flumerfelt, R. D. Prettie, H. R. MacMillan, Charles McNab and P. J. Caverhill.

## UNION BANK DIRECTORS' MEETINGS

Consequent upon the increasing importance of the bank's business in eastern Canada, the directors of the Union Bank of Canada on Tuesday, February 23, inaugurated the first of a series of monthly meetings, to be held in the city of Montreal. The Union Bank's system has developed in the east until there are now 120 branches in Ontario, Quebec and the maritime provinces, and it was decided at the annual meeting in Winnipeg to institute the policy of holding regular meetings of the bank's eastern representatives at Montreal.

Tuesday's meeting was attended by the following directors and officials:—Sir William Price, Quebec, honorary president; G. H. Thompson, Quebec, and Stephen Haas, Toronto, vice-presidents; Sir John Carson, C.B., Montreal; Hume Blake, Toronto; B. B. Cronyn, Toronto; S. E. Elkin, M.P., St. John, N.B.; R. O. McCulloch, Galt; H. B. Shaw, General manager, Winnipeg; and Geo. Wilson, assistant general manager, Toronto.

EIGHTH ANNUAL REPORT

# The Waterloo County Loan and Savings Co.

The Directors of The Waterloo County Loan and Savings Company have pleasure in submitting herewith to the Shareholders their Eighth Annual Report, showing the result of the Company's operations for the past year, accompanied by the Balance Sheet to December 31st, 1920.

After providing for interest on deposits and debentures, and defraying the expenses of management, the balance available for distribution is as follows:

Balance brought forward from 1919 .....	\$2,256.04
Premium on stock .....	1,753.00
Net Profits for the year .....	56,994.83
	<u>\$61,003.87</u>

This amount has been disposed of as follows:

Two half-yearly Dividends, Nos. 13 and 14, at the rate of six per cent. per annum .....	\$37,507.35
Set aside to Special Contingent Account .....	6,000.00
Transferred to Reserve Account .....	15,000.00
Balance carried forward .....	2,496.52
	<u>\$61,003.87</u>

During the past year the Company's business increased very satisfactorily, and while conditions in general throughout the country have quieted down considerably in the last few months the change no doubt is a healthy one. We have confidence that the operations of our Company will continue to expand and increase the highly satisfactory business which has been built up within the last few years.

Your Directors feel that the record of the Company during its short career has been a creditable one. A six per cent. dividend has been maintained since its inception, and substantial amounts added to Reserve Accounts from the profits of the business. By reason of the fact that the Company operates two offices, Waterloo and Kitchener, the overhead expenses are larger than would be the case were a similar volume of business confined to the one office. It is the desire of your Directors to build up the Reserve Account of the Company so as to insure increased profits, in the future, by way of dividends to the Shareholders.

The investments of the Company have received careful attention, and the books and vouchers, both at the Head Office and at Kitchener Branch, have been audited monthly, the Auditors' Certificate being attached herewith.

Your Directors exceedingly regret having to record the death in November last, of Mr. P. H. Sims, who was a Director of the Company since its organization and an active worker in the building up of its business.

The two vacancies of the Board have been filled by the appointment of Mr. J. H. Gundy, of Toronto, and Mr. J. M. Scully, of Kitchener, Mr. Scully's term of office as Auditor having ended with the completion of the Company's report to December 31st, last.

All of which is respectfully submitted.

Waterloo, Ontario, January 25th, 1921.

THOS. HILLIARD, President.

## PROFIT AND LOSS ACCOUNT

Dr.		Cr.	
Interest on Deposits and Deposits Receipts .....	\$51,180.53	Balance brought forward .....	\$2,256.04

THOMAS HILLIARD, President.

P. V. WILSON, Manager.

To the Directors and Shareholders of The Waterloo County Loan and Savings Company:

GENTLEMEN:

We beg to report that we have audited the books of account of your corporation for the year ending 31st of December, 1920, and have verified the cash, bank balance and securities of the corporation.

That we have examined the annexed statement and that it agrees with the books of the corporation.

That after due consideration we have formed an independent opinion as to the position of the corporation.

That with our independent opinion so formed and according to the best of our information and the explanation given us, we certify that in our opinion the statement sets forth fairly and truly the state of the affairs of the corporation.

That all transactions of the corporation that have come within our notice have been within the powers of the corporation.

J. M. SCULLY, F.C.A., } Auditors.  
J. SCULLY, }

Respectfully submitted,

Waterloo, Ontario, January 25th, 1921.

Directors: Thos. Hilliard, President, Waterloo; E. F. Seagram, Vice-President, Waterloo; S. B. Bricker, Waterloo; F. S. Kumpf, Waterloo; J. H. Gundy, Toronto; H. J. Sims, Kitchener; Fred Halstead, Waterloo; W. L. Hilliard, M.D., Waterloo; Geo. D. Forbes, Hespeler; A. J. Kimmel, Cobourg; J. M. Scully, Kitchener.

Manager: P. V. WILSON.

Solicitors: McBRIDE & McKENZIE.

## HUDSON'S BAY LAND SALES

Since the Hudson's Bay Co. sold its first piece of land in Manitoba, more than forty years ago, the company has disposed of more than three and a half million acres of farming land in the prairie provinces of Manitoba, Saskatchewan and Alberta, according to H. F. Harman, land commissioner for the Hudson's Bay Co.

The first regular sale of farming land, after the western prairie had been surveyed by the Dominion government, and which is on the company's record as sale No. 1, was made to William McKechnie, of Emerson. This sale was made August 4, 1879, and was a section of 640 acres, which sold at \$6 per acre.

"Sales continue to be made at the rate of approximately 20,000 acres per month," declares Mr. Harman, "and practically all lands are sold for development and farming purposes. Sales are made under a regular contract, which matures in seven years, but in the event of unforeseen circumstances this time is extended, and there have been times when it has taken the purchaser twenty years to secure a title. This patient policy of the company has done a great deal towards keeping settlers in Canada who would, under less favorable conditions, have gone elsewhere. This policy has been found to be well worth following, and the sales of land of the future will be governed by it just as much as have those sales made during the past forty years."

## MORTGAGE CLAUSES IN FIRE INSURANCE POLICIES

G. D. Finlayson, superintendent of Insurance, Ottawa, has issued the following memorandum for the information of fire insurance companies:—

"The department has had recently drawn to its attention a mortgage clause in use by certain mortgagees which contains the following paragraph:—

"This policy, as between the company and the mortgagees, shall continue in force as long as any of the money secured by the mortgage is unpaid, notwithstanding that the time for payment of premium or renewal premium may have elapsed, until either the company or the mortgagees give ten days' notice in writing to the other of them of their desire that the policy should no longer continue in force, but the mortgagees shall pay to the company a proportionate part of the premium at the rate charged in the policy up to the expiration of such ten days."

Section 123 of the Insurance Act, 1917 is as follows:—

No fire policy shall be issued for or extend over a longer period than three years.

"There would appear to be conflict between the paragraph in question and the quoted section of the Act, inasmuch as under the former, the duration of the policy is indefinite in the event of the premium or renewal premium not being paid. The effect of the clause is practically to make the insurance in some cases terminable only on notice by either party.

"In so far as the paragraph is intended to secure due notice of cancellation of the policy, during the currency thereof, to the mortgagee, there can be no objection taken to it, but it should not operate to contravene the above section of the Act.

"The department would ask the company to have regard to the foregoing in issuing its policies subject to a mortgage clause, and to have the paragraph in question modified to comply with the Act."

John Henry Paterson, late of Toronto, and president of the Toronto Hardware Manufacturing Co., who died February 4, 1921, left an estate of \$557,950. By his will all the estate goes to his wife, Mrs. Florrie Paterson, who renounces probate in favor of the Toronto General Trusts Corporation. The company is now applying for administration.

## DIVIDENDS AND NOTICES

## UNION BANK OF CANADA

## DIVIDEND No. 136

Notice is hereby given that a dividend at the rate of 10% per annum upon the Paid-up Capital Stock of the Union Bank of Canada has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also at its branches, on and after Tuesday, the First day of March, 1921, to shareholders of record at the close of business on the 12th day of February next.

The Transfer Books will be closed from the 14th to the 28th day of February, both days inclusive.

By Order of the Board.

H. B. SHAW, General Manager.

Winnipeg, January 21st, 1921.

398

## BANK OF HAMILTON

## QUARTERLY DIVIDEND NOTICE

A Dividend of Three Per cent. (3%) for the Quarter, together with a Bonus of One-half of One Per cent. (½%) on the Paid-up Capital for the three months ending 28th February, 1921, has been declared, and will be payable on the 1st March, 1921. This makes a total distribution of Thirteen Per Cent. (13%) for the financial year. The dividend and bonus on New Stock will be computed at the same rates, but in accordance with the terms of issue, and both will be payable to shareholders of record at close of business, February 15th, 1921.

By Order of the Board.

J. P. BELL, General Manager.

Hamilton, 24th January, 1921.

397

INSTITUTE OF ACTUARIES  
STAPLE INN HALL, LONDON

## NOTICE IS HEREBY GIVEN:—

1. That the Examinations of the Institute of Actuaries will be held from Monday, 20 June, to Wednesday, 22 June, 1921, inclusive.
2. That Candidates presenting themselves for the first time for Part I of the Examinations must make application for admission as Students of the Institute on the form to be obtained from the Local Supervisor, and remit the Application Fee of £1 1 0, in addition to the Examination Fee.
3. That all applications of Candidates for Examination, and all remittances from them, should reach the Hon. Secretaries in London, not later than 20 April, 1921.

(By Order) H. M. TROUNCER, Hon. Secs.  
A. C. THORNE, Secs.

The  
**British Columbia  
 Permanent Loan  
 Company**

**Twenty-Third Annual Meeting of Shareholders**

The 23rd Annual Meeting of the Shareholders of The British Columbia Permanent Loan Company was held in the Head Office, 330 Pender Street, Vancouver, B.C., on Wednesday, February 9th, at 3 p.m.

Dr. D. H. Wilson, president, occupied the chair, and the secretary-treasurer, Mr. James Low, acted as secretary, and read the annual report, summarized as follows:—

The Net Profits, after providing for all interest charges and expenses, amount to \$126,877.78. To this amount has to be added \$104,709.44 brought forward from 1919, making in all \$231,177.23 available for distribution. Your directors have applied these funds as follows:—

Two Semi-annual Dividends on Permanent Stock at the rate of 6% per annum	\$ 55,538.42
2% bonus to Shareholders	18,334.28
Interest on Terminating Stocks	192.00
Transferred to Reserve Fund	105,595.69
Transferred to Contingent Fund (provision for Dominion Income Tax)	10,000.00
Balance carried forward to 1921	41,826.84
<b>Total</b>	<b>\$231,177.23</b>

The Reserve now amounts to \$725,000, or 78% of the Paid-up Capital. Government Bonds held by the Company total \$475,282.11, an increase of \$123,521.87.

The immediately available assets (Bonds and Cash), \$614,753.33, exceed 50% of the total public liability, and this strong liquid condition ensures prompt payment of all demands that might be made upon the Company.

Very marked improvement is shown in accrued interest receivable, the amount now standing at \$33,991.94, as against \$18,319.73 a year ago. This \$33,991.94 has not been taken into the Profit and Loss statement.

The Total Earnings for the year, \$254,849.41, have been exceeded on but two occasions in the Company's history, while the ratio of earnings to Assets is greater than in any previous year.

**AUDITORS' CERTIFICATE**

Vancouver, B.C., 17th January, 1921.

We have audited the accounts of The British Columbia Permanent Loan Company for the year ended 31st December, 1920, and beg to report that the transactions during the period have been accurately recorded in the books, the receipts as shown therein have been properly accounted for, vouchers produced for all payments, and all investments have been duly authorized. We have examined the mortgage loan accounts and have verified the cash at banks by certificates, the cash on hand by actual count, negotiable securities by inspection or certificates from the depositaries, and certificates of title have been inspected for all real estate.

The accrued interest receivable at 31st December, 1920, amounting to \$33,991.94, has not been included in the Profit and Loss Account for the period.

The Balance Sheet appended hereto is, in our opinion, properly drawn up so as to exhibit a true and correct view of the affairs of the Company as at 31st December, 1920, according to the information and explanations given to us, and as shown by the books of the Company.

**BUTTAR & CHENE, C. A. (Edin.)**

# Corporation Finance

**Shawinigan Power Company Had Very Satisfactory Year—F. N. Burt Profits Increased—Preliminary Plans of New British Empire Steel Corporation—Record Business and Profits for American Salesbook Company—New Brunswick Telephone Company Had to Draw from Depreciation Reserve—Dominion Power Net Earnings Were Lower Last Year**

**British Columbia Electric Railway.**—As a result of a decision of officials of municipalities in which the company operates to take immediate steps to pass such by-laws as will maintain existing conditions under which the railway operates, including the street railway fares, General Manager Kidd, of the railway company, has announced that the application to Ottawa to transfer the company to the Fraser Valley and Southern Railway Co., in order that the whole system might come under the jurisdiction of the Dominion Board of Railway Commissioners, would be withdrawn. Present conditions will continue until June 30, 1922.

**Shredded Wheat Co.**—The consolidated report of the Shredded Wheat Co., the Canadian Shredded Wheat Co., Ltd., and the Pacific Coast Shredded Wheat Co., shows net income for 1920 at \$871,684, as compared with \$1,378,449 in the previous year. The gross income, less operating expenses, was \$1,094,533, as against \$2,005,637 previously. The surplus carried forward amounted to \$1,450,763, while in 1919 the figure was \$1,370,174.

Total assets have increased from \$11,691,207 to \$13,757,775, the principal increases being in investments, accounts and inventories, and lands and property. Under liabilities sundry accounts are slightly higher, while a new item of \$1,335,000 appears under notes and acceptances payable.

**Shawinigan Water and Power Co.**—From every standpoint 1920 was a highly satisfactory year for the company. Gross earnings amounted to \$3,943,359, compared with \$3,727,045 in 1919 and \$3,621,074 in 1918. Expenses were somewhat higher, but the net earnings are shown as \$1,609,042, which figure compares with \$1,473,743 in the previous year. Dividends of \$1,400,000 were paid, being an increase of about \$160,000 over 1919, \$200,000 was transferred to reserves and a balance of \$39,593 was carried forward, as compared with \$30,550 in the preceding period.

The balance sheet shows many important changes, as the following comparisons will illustrate:—

	1920.	1919.
Property .....	\$14,288,102	\$13,701,213
Machinery .....	4,239,700	4,110,572
Lines .....	4,680,919	3,913,994
Investments .....	12,540,060	10,610,442
Call loans .....	770,000	.....
Total assets .....	39,566,569	34,975,174
Bonds .....	9,825,500	9,353,261
Notes .....	4,000,000	.....
Sinking fund, etc. ....	3,028,652	2,978,838
Depreciation, etc. ....	1,385,615	1,141,019
Accounts payable .....	403,208	739,024

**Dominion Power and Transmission Co.**—At the annual meeting of the company in Hamilton this week, Col. J. R. Moodie, the president, stated that the fares of the Hamilton street railway would have to be increased if the public was to have accommodation. It was not reasonable, he said, in view of the fact that companies in many other cities had secured increased fares, to expect the Hamilton company to continue with no reasonable return for its investment.

While the earnings showed an increase last year operating expenses were abnormal, and the profits were less. The net earnings of the company in 1920 were \$940,525, as compared with \$1,008,119 in 1919. Gross earnings for the year were \$3,803,723, an increase of \$326,336 over the previous year. Operating expenses during the year amounted to \$2,771,875. An item illustrating financial conditions is that of

exchange, which during the year cost the company \$68,378. The value of all properties is given at \$23,481,327. Income tax charges for the year amounted to \$30,305.

**New Brunswick Telephone Co.**—In his annual report to shareholders, the president, Col. F. B. Black, made the following statement: "In submitting the financial statement for the year ending December 31st, 1920, your directors call attention to the fact that in compliance with the change in our by-laws requiring the business year to terminate on the 31st of December, the financial statement herewith submitted covers only nine months from April 1st to December 31st, 1920. The material growth of the company has been satisfactory. One hundred and ten miles of farmer line circuit have been erected and the toll system has been increased by the erection of 750 miles of copper and phantom circuit. There has also been a satisfactory increase in the number of long distance calls.

"Coming to the financial side corresponding increases will be found both in earnings and expenses. Owing to delay in receiving our increased rates the net earnings of the company have been very much below the requisite amount. The statement attached herewith shows net earnings for the nine months of about \$4,000 more than sufficient to pay dividends on the capital stock, without, however, allowing anything to be placed to reserve for depreciation.

"During the year something over \$81,000 was drawn from depreciation reserve for replacement, and you will note that our reserve for depreciation is reduced by that amount. When this amount is considered in connection with the fact that the preceding financial year left us \$80,000 short and this year \$116,000 short in the amounts considered necessary for depreciation reserve making a total shortage in this account of approximately \$200,000, the necessity of increased rates is clearly demonstrated.

"The rates now in effect were granted the company in July, 1920, but the statement herewith submitted shows the full benefit of these rates for less than two months. Your directors anticipate that the net earnings for the coming year will show a substantial increase, and put the company in a position to maintain the necessary depreciation reserve. It will take several years, however, to bring this depreciation account to normal. It may be noted in passing that the putting into effect of the new rates caused immediate loss of about 1,000 telephones. This loss, however, is being rapidly replaced, the net loss to date being only 382, and the company is now experiencing its normal growth. For the coming year about \$300,000 will have to be expended on reconstruction, equipment and new lines and a very considerable amount on new buildings, making a total budget approximately \$500,000."

**Howard Smith Paper Mills, Ltd.**—For the twelve months ended December 31 last, earnings of the company were at a record level, net profits for the year being \$1,089,898. This compares with \$704,261 in the 1919 period, the latter figure representing the earnings of the Howard Smith Paper Co. and those of the Toronto Paper Manufacturing Co. for the full twelve months, so that the 1920 increase amounted to \$385,657. After deducting bond interest and preferred stock dividends, which totalled considerably higher than in 1919, owing to the capital reorganization of the company, and the acquisition of the Toronto Paper enterprise, there remained a balance of \$891,898 applicable to the increased common

## ACTION UNDER THE BANKRUPTCY ACT

### Assignment Made After Petition in Bankruptcy Entered Does Not Prevent Receiving Order of Court

ON a motion by the Canadian Credit Men's Association, Limited, as receivers under a receiving order for an order directing the London and Western Trusts Company to deliver possession of the estate of the Croteau and Clark Company, Limited, to the applicants, the Ontario Supreme Court in Bankruptcy, through Justice Orde, held that sub-sec. 6 of sec 4 of the Bankruptcy Act does not apply to a case where the debtor, with the palpable intention of choosing his own trustee, makes an assignment after he is served with the petition in bankruptcy and before the return of the notice of hearing, and a receiving order made on the return of the notice renders such assignment ineffective.

The facts as stated by Justice Orde and the decision thereon are as follows:—

"On November 1, 1920, Nisbet and Auld, Limited, filed a petition in bankruptcy against the Croteau and Clark Company, Limited, an incorporated company carrying on business as general merchants at Essex, Ontario. Upon the return of the notice of hearing, on November 11, no one appeared for the debtors, and a receiving order was made, adjudging the debtors bankrupt, and appointing the Canadian Credit Men's Association receivers of the estate.

### Debtors Appointed Own Trustees

"When the receivers proceeded to take possession of the assets of the debtors they found the London and Western Trusts Company in possession under what purported to be an authorized assignment under the Bankruptcy Act, 1920, which the debtors had made to them, as authorized trustees, on November 8, 1920. The London and Western Trusts Company had taken charge and called a meeting of creditors for the afternoon of November 17, 1920.

"The Canadian Credit Men's Association, as receivers under the receiving order, thereupon, upon leave given by me, moved before me on November 17, 1920, for an order directing the London and Western Trusts Company to deliver possession of the estate to the duly appointed receivers under the receiving order.

"It was urged before me, on behalf of the London and Western Trusts Company, that, as sec. 9 of the Bankruptcy Act provides that an insolvent debtor 'may, at any time prior to the making of a receiving order against him, make to an authorized trustee' an assignment of all his property for the general benefit of his creditors, the voluntary assignment which the debtors had made on November 8 had priority over the receiving order of November 11, and rendered the latter ineffective. That this cannot be its effect is, however, quite clear from the fact that an authorized assignment is itself an act of bankruptcy upon which the court may, if it see fit, upon the petition of a creditor, declare the debtor bankrupt and make a receiving order: sec. 3 (a) and sec. 4 (1); and that the court may upon such application, if satisfied that the estate can be best administered under the assignment, dismiss the petition: sec. 4. (6).

### Court's Power is Absolute

"Upon the presentation of the petition to the court, the court's power is absolute to determine whether or not a receiving order shall be made, notwithstanding any prior authorized assignment. Sections 3 (a) and 4 (6) doubtless were intended to apply to cases where the authorized assignment had been made before the filing of the bankruptcy petition; but, that being so, sub-sec. 6 of sec. 4 cannot, *a fortiori*, apply to a case where the debtor, with the palpable intention of choosing his own trustee, makes an assignment after he is served with the petition and before the return of the notice of hearing. If that were not so, then the whole scheme of the Act could be frustrated in every case by the debtor's making a voluntary assignment immediately after the service of the petition. The provision in sec. 9 that an assignment may be made before the making of a receiving

order cannot have been intended to authorize or justify any such practice. The words, 'at any time prior to the making of a receiving order against him,' in that section are perhaps unfortunate as lending color to the suggestion that it is open to a debtor to make an assignment after a petition has been served, and the strict language of the section apparently entitles him to do so; but, having done so, he stands, upon the return of the notice of hearing of the petition, in no better position than if he had made the assignment prior to the service of the petition upon him. In my judgment, the authorized trustee who claims under an assignment made to him under such circumstances does not stand in as good a position before the court as one to whom an assignment is made before the service of a petition, because such an assignment is clearly made with a view to thwarting the proceedings in bankruptcy. There may be exceptional cases where, for the purpose of preserving the property of a debtor, such an assignment after service of a petition might be justified, but the circumstances would have to be unusual. It ought to be clearly understood that insolvent debtors will not be permitted to make a practice of choosing their own trustees after a bankruptcy petition has been served.

"I, therefore, declared upon the motion that the receiving order of November 11 had rendered the assignment of November 8 ineffective, and that the London and Western Trusts Company should forthwith deliver the debtor's property to the receiver appointed by the receiving order."

## CASE ON WAYAGAMACK SALES

On February 4, the Quebec Superior Court decided a suit brought by John Mather against the Wayagamack Pulp and Paper Co., while the plaintiff proved that his engagement as sales manager for the Wayagamack Pulp and Paper Co. was made at a salary of \$10,000 a year "and commission," he was held to have failed to prove what rate of commission he was entitled to, and upon what sales it was to have been paid. For this reason his claim against the company to recover \$30,944 commission alleged to have been earned by him from November 1, 1917, to November 30, 1918, was dismissed with costs.

## TAXATION OF MINING PROPERTIES

Decision was given in Toronto on January 31 on the long-standing dispute between the township of Tisdale and a number of mines in the Porcupine camp on the question of assessment, and the outcome, after many appeals, is a judgment in favor of the mines, which are thus relieved of a proposed assessment on their mill properties amounting to in the neighborhood of \$2,000,000, in all. The mines concerned were McIntyre, Dome, Schumacher, Dome Lake, Porcupine Crown and Davidson.

The claim of the township was that the mills were all assessable for municipal taxes. The companies claimed that the mills came under the term "concentrator," which, under the Assessment Act, were exempt. The township of Tisdale's contention was that the use of cyanide, which has a chemical action, took the Porcupine mills out of the class known as concentrators. They claimed that concentrators included only covered mills, using mechanical processes. The Court of Revision for Tisdale township decided in favor of the mines. The District Court, on appeal, reversed the decision, the Ontario Railway and Municipal Board reversed the District Court judge's finding, and then the Appellate Division of the Supreme Court of Ontario heard arguments last fall, giving judgment recently in favor of the mines. The judgment is of considerable importance, from a financial standpoint, to the properties involved.

Bell, Gouinlock and Company, bond dealers, Toronto, have moved their offices from the Confederation Life Building to 1001 Bank of Hamilton Building.

# News of Industrial Development in Canada

**Latest Action of Dominion Government May Result in Opening of Pulp and Paper Trade in the West—Order-in-Council Has Been Passed Providing for Sale of Manitoba Timber Limits—Quebec Will Consider the Possibilities of Asbestos Production—Nova Scotia Steel and Coal Has Not Shipped from Plant Since November**

**A**N order-in-council has just been passed by the Dominion government which it is anticipated will result in the development in the near future of a large pulp and paper industry in Western Canada, and relieve western publishers from being dependent on eastern mills for their paper supply. The order provides for the sale by tender or public auction of a large pulpwood berth covering certain Dominion and school lands in the province of Manitoba, east of Lake Winnipeg. It consists of two blocks of a total available area of about 718 square miles, excluding lands previously disposed of by the government.

Those who acquire the lands in question will be required to enter into an agreement with the minister of the interior to erect a pulp and paper mill costing, with equipment, not less than one million dollars, with a daily output of not less than 100 tons of pulp, at least 50 per cent. of which must be made into paper at the plant. The balance may be exported if in the opinion of the minister it is not required to supply the local market in Manitoba, Saskatchewan and Alberta. The combined capacity of the mills must be such as to employ an average of 120 men for ten months in the year.

Further provisions are that the mill must be in active operation within three years from the date of the agreement, and on its construction the sums of \$200,000, \$350,000 and \$450,000 must be expended in the first, second and third years respectively, permission to cut pulpwood being withheld until the first year's expenditure is made. The purchaser of the berth must furnish a bond of \$75,000 that the conditions will be carried out. If the berth is sold at auction or by tender, the bidder must state the amount per cord he will pay as a bonus on spruce pulp wood in addition to the regular dues of 60 cents a cord, and the amount offered shall be the basis of competition. The purchaser must also pay 40 cents per cord on other than spruce pulpwood. In stipulating that the paper output must be not less than 50 tons daily, the government estimated that as the present daily consumption of newsprint in Manitoba, Saskatchewan and Alberta.

## Asbestos in Quebec

There is a possibility that the Quebec government will endeavor to develop the asbestos industry in the province so as to give employment there in the same manner as the great paper and pulp business has been developed. It is said that about 85 per cent. of the asbestos supply of the world is in Quebec, but the greater part of it is taken out of the province into the United States in a raw state, and the province benefits very little from these valuable deposits. The government is considering whether it should not impose some form of embargo, so that at least the asbestos will be worked to a certain state of manufacture, if not altogether. The situation is largely parallel with the wood position. Wood cut on Crown lands cannot be exported except as pulp or paper, and the asbestos comes from Crown property, the mines not being sold outright, but mineral rights given. The development of an industrial manufacturing business in asbestos would, it is calculated, create a great and new industry in the province. It is possible that there will shortly be an official announcement on the subject.

The province of Quebec does not get a great deal from its asbestos wealth, though this produces more than 50 per cent. of the whole of the mineral production of the province. For the year ending June 30, 1920, the production was 174,421 tons, with a value of \$11,758,234. The demand is greater than the supply, notes Theo. C. Denis, superintendent of mines, in his annual report, recently issued.

An official of the Nova Scotia Steel and Coal Co. in commenting upon the wage reduction announced recently, stated that about two hundred and seventy-five men are on the payrolls, and not a man can be classed a producer in the logical sense of the term. No iron and steel has left the yards since November last, and the men are simply doing odd jobs about the plant. He makes no prediction as to when the plant will resume operations, but states that in order to meet rivals on common ground the cost of production will have to be reduced, and the first way is to reduce wages. There is plenty demand for steel abroad, said the steel official, but like everything else orders are held back awaiting a slump in prices and which ever company can sell the cheapest will get the contracts.

An addition to the plant of the Chatham Malleable and Steel Manufacturing Co., Ltd., manufacturers of automotive and hardware specialties and sanitary stable equipment at Chatham, Ont., is now complete, and the necessary machinery is now being installed. The company report satisfactory conditions in their business. Their plant has been working on full time all winter and orders in hand and prospects seem to warrant the expectation that this will continue for the balance of the season.

Page-Hersey Iron and Tube Co., Ltd., Guelph, Ont., announce the commencement of a night shift of 100 men. At present the company is employing a day shift of 200 employees, but owing to large orders for pipes and fittings recently received it has been found necessary to work two shifts.

The National Steel Car Co., Ltd., Hamilton, Ont., has resumed operations with a staff of 700 men. Three weeks ago the plant was closed in order to make a slight wage reduction which it is understood has now been effected.

Another small iron working industry is to be located in Port Arthur, Ont., with a promise to develop into something big because one of the products to be manufactured is subsidiary to the grain industry which is of magnitude at the head of the lakes. Byron Hill, a resident of Port Arthur for twenty-eight years, is starting the industry, located at 211 Ambrose St. When the plant is fully equipped and running, fifteen men will be employed.

## Drop in Paper Price

The Canadian Export Paper Co., Ltd., Montreal, has announced that its newsprint paper export price for the second quarter of 1921 would be \$110 per ton, or equal to 5½ cents per pound. The new price becomes effective April 1, and is a reduction of one cent a pound over the old price. The Canadian Export Paper Co. markets the output of a number of the largest concerns in Quebec.

George F. Steele, general manager of the company, in announcing the cut, said the company had not been influenced by foreign competition, but because the cost of production allows of a reduction. The drop in price has not been unexpected. As Canada manufactures approximately 2,800 tons of newsprint per day, a decrease of one cent per pound will mean a reduction in gross receipts of \$56,000 per day.

Angus McLean, general manager of the Bathurst Lumber Co., Bathurst, N.B., announced this week that the big pulp mill of the corporation which has been shut down since December 24, would resume operations. The announcement is of importance to Bathurst and vicinity, as five hundred or six hundred men have been idle for nearly two months. Coupled with the notice of resumption was one announcing that it would be necessary to reduce wages twenty per cent. throughout the entire plant.

## INSURANCE LICENSES AND AGENCY NOTES

The Insurance Co. of North America, which already transacts several classes of insurance in Canada has been authorized by the Department of Insurance, Ottawa, to write hail and sprinkler leakage insurance.

License has been issued to the Etna Insurance Co. authorizing it to transact in Canada the business of hail insurance, in addition to the classes of business for which it is already licensed.

A. McBean and Co. have been appointed general agents at Montreal for the fire department of the Motor Union Insurance Co.

P. M. Steeper has entered the service of the London Mutual Fire Insurance Co. of Canada as manager of the casualty department. Mr. Steeper has had twelve years' experience in casualty insurance in the offices of the Ocean Accident and Norwich Union Fire Insurance Society. While at the present time the casualty business of the London Mutual is confined to automobile insurance, it is the intention of the company to add other lines as opportunity offers.

After being the subject of hours of debate since it was first proposed before the Moose Jaw, Sask., city council, the group insurance plan for city employees has been shelved.

The Union Insurance Society of Canton has appointed P. F. Ellwood to take charge of its automobile department for Montreal, which is represented by Joseph Rowat, the general agent for the province of Quebec.

J. R. Wright, for many years connected with the C.F.U.A., Montreal, in various capacities, has been appointed branch manager for the province of Quebec for the Northwestern Mutual Fire Association of Seattle, with headquarters, Beardmore Building, Montreal.

Reginald B. Gaudin has been appointed office manager for A. McBean and Co., insurance brokers, Montreal. Mr. Gaudin has been connected with fire insurance in Montreal for several years, during which period he was connected with several of the leading fire companies, and also filled the position of stamping officer with the C.F.U.A.

## Fifty-one Years of Steady Progress

One of the most brief yet impressive histories of Canadian financial institutions is contained in the annual record of The Mutual Life of Canada. The current issue will be ready in a few days. A copy will be sent to you on application. It contains fifty-one successive summaries, showing in the parallel columns the increase from year to year of the company's various receipts, expenditures, etc. No other document could better convey the idea of solid, uniform achievement, and the momentum of the advance is now greater than ever. The prospects are bright for a still more rapid expansion within the next few years. The assets of the company exceed \$10,000,000, and the assurances in force have reached \$208,000,000. There is a gross surplus of more than five million dollars over and above the amount necessary to guarantee all policies, so that the position of the company, in spite of the strain of recent years, is one of uncommon strength.

**The Mutual Life Assurance Co. of Canada**

# News of Municipal Finance

**Swift Current is in a Difficult Position—Expert Suggests Changes in Assessment and Taxation Methods as Well as a Number of Adjustments in the System of Administration—Winnipeg Sinking Fund Report Shows Healthy Condition—Spitzer, Rorick and Company Protest Against Withholding of Tax Arrears—City Would Lose Large Sum by Remitting**

**T**HAT the exact financial standing of the city of Swift Current, Sask., should be immediately displayed to the creditors rather than wait until the city is compelled by force of circumstances to repudiate its obligations, is the opinion of O. J. Godfrey, of Regina, municipal expert, who was called in by the Swift Current city council to make a comprehensive survey of the civic administration. Mr. Godfrey has completed his report and recommends a series of compromises between the city and its creditors, some important changes in assessment and taxation methods as well as a number of adjustments in the system of administration.

Swift Current has not defaulted in meeting debenture interest payments up to the present time, but the adjustments recommended are absolutely essential if the city is to be able to continue to meet its obligations and to handle its utilities with advantage to both citizens and bondholders, in Mr. Godfrey's opinion. With reference to outstanding debentures, it is proposed to call these in and replace them with five-year debenture stock, repayable in 45 years. The total amount involved is \$1,632,158. It is proposed to make the debenture stock bear interest at 4 per cent. for the first five years, 4½ for the second five years and 5 per cent. for the third five years. Provision is made for existing assets in the sinking fund to be turned into cash and held in trust for capital expenditure, subject to the approval of the Local Government Board and for an annual levy for a sinking fund of \$17,176 for the period of the debentures after the lapse of the first five years.

For the first five years the city will have to pay annually \$65,286 and in Mr. Godfrey's opinion that is about the limit which could be spent for that purpose. Thereafter, it is stated, proposed new installations for utilities will give them an increased revenue producing power and this, coupled with other increased revenues, would enable the city to pay the sinking fund charges. Mr. Godfrey declares the tax burden is unequally and unfairly distributed. Business assessment is too low and land assessment far too high, and he advocates a thorough reassessment. He found that there had been no check of the tax rolls for three years, and he did not see how the auditors could, as they did, certify to the financial statements during that period.

It was also found on examination of the debenture statement that the city and the school board have been in default since 1916. This would have been apparent to the bondholders five years ago if the debentures had been on the annuity or instalment plan. The city owes the Canadian Bank of Commerce and the Union Bank approximately \$151,000 on hypothecation of tax arrears. It is suggested that the unpaid taxes be treated as trust for the two banks in proportion to their claims and that the banks be asked to accept city stock to cover the deficit on tax hypothecations. Mr. Godfrey bases the city's troubles on "varying policies with regard to large expenditures in the past." He states that the city is not in the dry belt, the crop average of the district for the past six years being almost up the average of the whole province, and for this reason confidence should be re-established, provided the citizens keep faith with their creditors.

**Lethbridge, Alta.**—Civic utilities made a much better showing last year than they have done for many years past, according to figures given out. The operating surplus of the waterworks department was \$11,141, surplus of electrical department \$11,498, and city mine surplus \$107. The street railway had a deficit of \$2,166.

**Taber, Alta.**—The Taber irrigation district reports that it has no delinquent tax roll, which speaks well for the irri-

gation projects in western Canada. Taxes of the district are due and payable on December 15 of each year, and the total amount of taxes payable for 1920 was a little over \$25,000. By December 15, over \$19,000 had been paid and the remainder was in the hands of the secretary-treasurer by February 12 last. A surplus of \$8,000 is being carried over and the district is in excellent financial circumstances.

**Regina, Sask.**—The legality of the city's refusal to pay interest coupons at par of exchange on the city's sterling bonds payable in London and Canada will be tested in the courts. Through its solicitors, Malone, Malone and Long, the Toronto General Trusts Corporation, Ltd., has notified the city of its intention to take action. The city has agreed to the proposal of the corporation's solicitors for a stated case, but has rejected an additional proposal that both sides should waive their right of appeal from the verdict. The city is also stipulating that the proposed stated case shall be argued in Saskatchewan. The interest payments in respect of which action is being brought were due on March 1 and September 1, 1920.

**Calgary, Alta.**—Spitzer, Rorick and Co. are protesting against the action of the city treasurer in holding back the \$350,000 of collected tax arrears, which are to be applied against the \$1,500,000 treasury notes which were purchased and distributed by the Toledo bond house in 1919. Members of the finance committee are unable to understand the anxiety of Spitzer, Rorick and Co., for immediate transmission of the funds so collected. Under the terms of the by-law by which payments on the loan were to be held strictly in trust by Spitzer, Rorick and Co., until maturity of the five-year treasury notes in June, 1924, and then used to pay off the notes. The only difference between forwarding the funds as collected to Spitzer, Rorick and Co., and holding them in Canada, is that the city treasurer is acting temporarily as trustee of the collected arrears of taxes, instead of Spitzer, Rorick and Co., as the agreement calls for payment of 3 per cent. interest on the funds, and that is now being credited to Spitzer, Rorick and Co. by the city, while holding the funds in Canada awaiting a more favorable turn in the exchange rate. Further negotiations will be carried on with the financial firm to ascertain if the funds cannot be temporarily invested in Alberta provincial notes to pay a higher rate of interest, 5 per cent., pending better adjustment of the exchange rates.

**Winnipeg, Man.**—After reviewing the report of the sinking fund trustees, it is not hard to understand why Winnipeg always receives such good prices for its securities, when it has occasion to enter the market for funds. The business transacted by the trustees has been compared with that done by the directors of a fair-sized mortgage company, and by careful management the board has been able to show a large surplus over the needed returns, and these have been used to retire obligations for which no special provision has been made.

The report sets forth assets in the fund amounting to \$11,724,062, which, deducted from the gross debt on the same date, leaves the city with a net debt of \$31,790,866. The net debt of the city on April 30 last, amounted to \$29,300,428, showing at the end of the year an increase in the net debt of \$2,490,438. The total received by the trustees from all sources in the eight months amounted to \$5,704,822. This sum was applied: City debentures maturing, and redemption of stock purchased and cancelled and accumulation in respect of stock conversion, \$814,293; investments made during the period, including accrued interest to date

of purchase, \$4,157,416; salaries, etc., and general administration, \$15,590; cash in bank at December 31, \$717,521. The total assets at the credit of the sinking fund, including interest accrued on investments as at December 31, amount to \$11,724,062. This is an increase of nearly \$1,500,000 over that reported in the last statement. The average interest earned for the period was 6.2577 per cent.

The report points out that "in accordance with the adopted policy the investments purchased at a premium have been written down to par value, while investments purchased at a discount are included at cost. The par value of the bonds and debentures held by the trustees is \$937,265 in excess of the value at which they are taken in on the balance sheet, and this may be regarded as an additional reserve realizable at maturity of the respective debentures. Possible depreciation has been provided for." Under the head of income account, the report states that the gross income received or accrued, and profit accruing on maturity of securities paid off during the year, less loss on sale of investments, amounted to \$1,093,155. Of this, the amount to meet the requirements of the sinking fund as against outstanding city of Winnipeg

debentures was \$681,748. This leaves a balance of \$411,407, which represents excess earnings over and above these requirements. Against that surplus the trustees place the total administration and general expenses of \$15,590, and premiums on investments acquired during the period now written off, amounting to \$10,368. These deductions leave to be transferred to surplus income account \$385,448. But the trustees had a balance as at May 1 last, of \$44,516. So that the net surplus income amounted to \$429,964.

This surplus income has been appropriated: \$50,000 transferred to investment reserve account, which now stands at \$350,000, representing approximately three per cent. of the book value of the investments, \$195,921 has been appropriated and applied to the credit of the city in order to commute and do away with any further general levies upon the taxpayers for these by-laws: Industrial exhibition buildings, \$120,000; old Osborne bridge, \$26,000; school board claim, \$92,000; and general hospital, \$160,000. And \$100,000 has been set aside to reduce the liability of the city to the civic pension fund. Taking into account these appropriations, the surplus out of surplus income earnings, was \$84,042.

## Government and Municipal Bond Market

**Toronto and Guelph Received Good Prices for Their Securities—Bidding was Keen—Alberta Will Aid Irrigation Districts to Dispose of Bonds—Policy of Government Has Not Yet Been Definitely Announced, but is Pretty Well Understood—Several Municipal Issues Pending**

A GOOD illustration of the demand for high-grade municipal securities is seen in the sale of Toronto and Guelph bonds this week. At 6.12 per cent. the latter city made a good bargain, and there was very keen bidding, with no less than twenty-two offers submitted. Considering the size of the issue, Toronto closed a highly satisfactory deal, and it is understood that before the public offering was made a large part of the bonds was spoken for. Any municipality whose credit is of the best can get the best of prices on the market, as there is a good supply of funds for investment securities.

Chilliwack, B.C., had to pay 7.40 per cent. for its money. This is about the rate at which a number of municipalities in the province are borrowing at. While recent financial statements indicate an improvement in a number of cases, it is felt by bond dealers and observant investors that there is room for further betterment of conditions. The legislature is now in session and the government is being pressed to relieve the situation. The greatest need, according to the claims of the municipalities, is power for broader taxation.

In reply to the report current in New York that the Canadian government had started negotiations to refund the \$25,000,000 5 per cent. bonds, which mature in April next, it was stated that the government has bought up and retired already considerably more than a majority of the \$25,000,000 maturity, and has completed arrangements to care for the balance at maturity without refunding. That maturity is one-third of the \$75,000,000 Canadian government loan floated in the latter part of 1916 at a basis ranging from 5.10 per cent. for the five-year bonds to 5% per cent. for the ten-year bonds and 5½ per cent. for the fifteen-year bonds.

There was a fair degree of activity in Victory bonds during the past week, with slight fluctuations either way. The following figures illustrate the recent trend of prices:—

	Control price.	Last week.		This week.	
		High.	Low.	High.	Low.
1922	98	99	98¼	98%	98
1927	97	98½	97½	98%	97
1937	98	99%	99½	99%	98¾
1923	98	99	98	98½	97¾
1933	96½	98%	98	98%	98
1924	97	96%	96	96%	96
1934	93	95½	95¼	95½	95¼

The policy of the Alberta government in regard to the Lethbridge Northern Irrigation District bonds, although not definitely announced, is pretty well understood, and is being favorably received in the west. It is proposed, in effect, that funds up to the extent of 90 per cent. of the par value of such bonds shall be advanced from time to time to the district issuing the bonds to go ahead with the irrigation works. The plan is for the government to assume no other responsibility for these bonds other than holding them until such time as they can be placed upon the bond market and sold at a reasonable price. The cabinet members believe that the action of the government in advancing the money on the bonds and holding them for a good market, in itself will have a tendency to improve the marketing price of the bonds. It is obvious that, under such an arrangement, each case would have to be decided on its merits, and an irrigation district would have to go through the usual formula of organization of a board and issuance of the bonds before it could come before the government asking them to advance money on the securities. The only district in such a position at the present time is the Lethbridge Northern Irrigation district. It is the belief that the day when irrigation bonds will be sought by the investor is close at hand. In the past these securities have not been very favorably received, but events which have occurred of late are beginning to change the sentiment.

### Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

of \$100,000 6 per cent. 20-installment debentures, the proceeds of which will be used for roads and improvements. There is a total of \$300,000 authorized, and the issue will be made in three series.

**Sandwich, Ont.**—The town has between \$100,000 and \$200,000 of debentures for sale. No particulars are available, but it is understood that the treasurer will negotiate for the disposal of the securities.

**St. Andrews R.M., Man.**—Tenders will be received until March 5, 1921, for the purchase of \$100,000 5½ per cent. 30-year good roads debentures. The issue is part of an amount of \$187,642.49 legalized by the Manitoba legislature, and the securities are guaranteed by the province. Debentures are payable in yearly series. J. D. Foster, Clandeboye, Man.

**Debenture Notes**

**Brantford, Ont.**—A debenture issue for the extension of the municipal street railway is proposed by the Railway Commission.

**Stratford, Ont.**—Several by-laws for local improvements, totalling \$10,000, have been passed by the council.

**St. Thomas, Ont.**—The request of the municipality to issue debentures for various purposes has been approved by the private bills committee of the Ontario legislature, with a few minor amendments.

**Winnipeg, Man.**—A by-law has been passed by the council authorizing the issue of debentures to the extent of \$1,250,000 for the following purposes: Nurses' home, \$400,000; Maryland bridge, \$300,000; Winnipeg school district, \$550,000.

**Yorkton, Sask.**—At a recent meeting of the town council the town clerk reported that Malone, Malone and Long, barristers, of Toronto, whose favorable opinion was required for the bond dealers, desired another by-law passed in form drafted by them covering total issue of \$148,000 five-year debentures, and the by-law was read three times.

**Toronto, Ont.**—The city council has passed a by-law authorizing the issue of debentures for \$5,000,000 to provide funds on account of the acquiring and taking over of the Toronto Street Railway. It has also been decided to apply to the legislature for an amendment to the Sinking Fund Act to make it legal for the city not to pay off any principal sum or to raise any money for sinking fund for the first three years on account of debentures that shall be issued to provide funds to pay for the Toronto Railway system when taken over. In other words, the city desires to simply pay interest on the bonds for the first three years and then to proceed to retire a certain amount every year thereafter.

**Bond Sales**

**Walkerville, Ont.**—A block of \$85,000 6 per cent. 15-installment paving debentures have been sold to W. A. Mackenzie and Company at a price of 97.57, which is on about a 6.35 per cent. basis.

**Verdun, Que.**—Societe Generale du Canada, Ltée have purchased \$150,000 6½ per cent. 5-year debentures of the Riviere St. Pierre School Commission, Verdun, and are offering them at par and interest in denominations of \$500 each.

**Amherst, N.S.**—The Dominion Securities Corp. has purchased \$40,000 6 per cent. 30-year serial bonds at a price which costs the municipality about 6.15 per cent. A short time ago a bid of 96.23 was turned down, so that the municipality has gained by the delay.

**Chilliwack, B.C.**—Pemberton and Sons have been awarded \$46,000 6 per cent. 10-year debentures at a price of 90.22, which is on about a 7.40 per cent. basis.

**Burlington, Ont.**—An issue of \$34,488 6 per cent. 20 and 30-installment debentures has been awarded to A. E. Ames and Co. at 96.18, which is on about a 6.40 per cent. basis. Tenders were as follows:—

A. E. Ames and Co. ....	96.18
Wood, Gundy and Co. ....	96.08
R. C. Matthews and Co. ....	95.18
Brent, Noxon and Co. ....	91.248

**Fredericton, N.B.**—The following tenders were received on the \$120,000 5 per cent. serial bonds of the city, of which mention was made in this column last week:—

Royal Securities Corp. ....	90.676
National City Co., Ltd. ....	90.35
Dominion Securities Corp. ....	89.27
J. M. Robinson and Sons, Ltd., Wood, Gundy and Co., Ltd., and Eastern Securities Co., Ltd. ....	88.50

**Toronto, Ont.**—Paying about 6.11 per cent. for its money, the city has sold \$5,037,000 6 per cent. serial bonds, maturing in 30 instalments up to 1951, to a syndicate comprising Wood, Gundy and Co., A. E. Ames and Co., and A. Jarvis and Co., at a price of 98.94. Two other tenders were also received as follows:—

Dominion Securities Corp., Harris, Forbes and Co., Inc., National City Co., Ltd., R. A. Daly and Co., and W. A. Mackenzie and Co. ....	98.389
Osler and Hammond, R. C. Matthews and Co., and United Financial Corp. ....	98.111

**Whitby, Ont.**—Wood, Gundy and Co. have purchased the \$60,000 6½ per cent. 30-installment debentures of the municipality at a price of 101.193. Tenders were as follows: McLeod, Young Weir and Co., 101.175; Dominion Securities Corp., 101.138; R. C. Matthews and Co., 100.62; Turner, Sprague and Co., 100.33; C. H. Burgess and Co., 100.23; A. E. Ames and Co., 100.22; Harris, Forbes and Co., Inc., 100.127; Dymont, Anderson and Co., 99.97; Brent, Noxon and Co., 99.96; W. A. Mackenzie and Co., 99.08; Macneill, Graham and Co., 99.03; United Financial Corp., Ltd., 98.55; A. Jarvis and Co., 98.27.

**Guelph, Ont.**—A. E. Ames and Co. have been awarded an issue of \$175,000 6 per cent. 20-year debentures at a price of 98.659, which is on about a 6.12 per cent. basis. The following tenders were received: R. C. Matthews and Co., 98.55; Wood, Gundy and Co., 98.41 United Financial Corp., Ltd., 97.88; Harris, Forbes and Co., Inc., 97.827; Dominion Securities Corp., Ltd., 97.758; C. R. Clapp and Co., 97.664; C. H. Burgess and Co., 97.6217; National City Co., Ltd., 97.617; McLeod, Young, Weir and Co., 97.597; Amilius Jarvis and Co., 97.57; Brent, Noxon and Co., 97.53; Zimmerman and Malloch, 97.426; MacKay and MacKay, 97.379; W. L. McKinnon and Co., 97.367; Sterling Bank of Canada, 97.3105; Canadian Debentures Corp., 97.26; W. A. Mackenzie and Co., 97.21; Macneill, Graham and Co., 97.03; Stewart, McNair, Reid and Co., 96.927; Housser, Wood and Co., 96.53; Imperial Bank of Canada, 96.143.

**Milton, Ont.**—The town has disposed of \$34,000 6 per cent. 30-installment high school debentures to Harris, Forbes and Co., Inc., at 96.737. Following are the tenders received: A. E. Ames and Co., 96.43; W. A. Mackenzie and Co., Ltd.; Wood, Gundy and Co., 96.12; United Financial Corp., Ltd., 95.90; Housser, Wood and Co., 95.857; Matthews and Co., 95.73; W. L. McKinnon and Co., 95.692; C. H. Burgess and Co., 95.21; Dominion Securities Corp., 95.148; Brent, Noxon and Co., 95.147. The municipality pays about 6.32 per cent. for its money.

**COBALT ORE SHIPMENTS**

The following are the shipments of ore from Cobalt Station for the week ended February 11th:—  
O'Brien Mine, 64,000; Mining Corp. of Canada, 87,985; Coniagas Mine, 173,379; La Rose Mine, 153,098; Dominion Reduction, 137,000; total, 615,462.

The following are the shipments of ore from Cobalt Station for the week ended February 18:—  
Dominion Reduction, 50,000 pounds. The total since January 1 is 1,501,490 pounds, or 750.7 tons.

McCallum and Sherry, Ltd., announce the opening of a stock, bond, grain and insurance office at 702 Canada Building, Saskatoon. The firm are members of the Winnipeg Grain Exchange, and correspondents of Logan and Bryan.

## CORPORATION SECURITIES MARKET

Liquidation of Paper and Canada Steamship Stocks Depressed  
Canadian Exchanges—Howard Smith to Issue Bonds—  
Cosgrave Brewery Shares Offered at Par

**H**EAVY liquidation in papers and in Canada Steamships this week resulted in depression of most of the active issues traded in on the Canadian stock exchanges. For a short time past slight reaction had been in evidence and this was stimulated by a continuance of the adverse influences which have been at work upon the markets. There is nothing to indicate, however, that the situation is very serious; in fact, it is believed that events of the past week should be beneficial in that they have removed the feeling of uncertainty which was anything but healthy.

The announcement of the Canadian Export Paper Co. of a drop in price for the second quarter for 1921, while an influential factor, was not solely responsible for the depression in the pulp and paper stocks. A prominent broker points out that the new rate is higher than any company has had for any previous year, while it is the general opinion that manufacturers can easily comprise on future prices and suffer but little.

It is now definitely known that Canada Steamships is out of the British Empire Steel Corporation, but there is the possibility that the company will be called upon to enter into a working arrangement with the new enterprise, which should be favorable to the company. The passing of the quarterly dividend on common may have been in the best interests of shareholders, but the market has interpreted it as otherwise. Traction issues did not maintain their favorable position after their first show of buoyancy, and the past week saw easiness in the section as a whole.

The liquidation of stocks which took place is illustrated by the trading figures, which show that in Montreal the turnover of 1st shares amounted to 97,834, as against 55,855 in the previous week, while in Toronto the turnover was 20,956 shares, compared with 26,229. Bond trading in Montreal was more active, being \$1,964,350, compared with \$1,297,650 previously, while there was an increase in Toronto from \$1,375,500 to \$1,931,850.

## New Howard Smith Financing

In view of the additional working capital required for the increased tonnage which the plants of the Howard Smith Paper Mills, Ltd., at Crabtree and Beauharnois will shortly be producing, and the further extension of the plants themselves, a by-law has been drawn up by the directors creating an issue of \$7,000,000 7 per cent. 25 year first refunding mortgage sinking fund gold bonds, of which there is presently authorized to be issued \$3,500,000, of which amount \$1,000,000 will now be sold and for which a satisfactory offer has been received. Of the remaining \$2,500,000 and there will be in escrow to retire the total outstanding 6 per cent. first mortgage bonds, \$1,489,800; to be held in escrow against balance to become due on timber limits, \$500,000; to remain in treasury, \$510,200, leaving \$3,500,000 to be issued in accordance with the terms of the trust deed.

An offering is being made in Canada by the Dominion Foreign Exchange Co., Ltd., Montreal, of bonds of the Paris-

Orleans Railroad Co., to the amount of 50,000,000 francs. The securities bear 6 per cent., interest and are redeemable at par, by drawings, not later than 1956. Principal and interest are payable in New York, without deduction for any French taxes, present or future, of held by non-residents of France, and are guaranteed by the French government. Coupons may be held for improvement in exchange for a period of 5 years, when they become outlawed; drawn bonds become outlawed after thirty years. The price is \$78.20 (Canadian currency) per 1,000 francs bond.

## Stock Offerings

The Hudson Investment Co., Toronto, is offering preferred and common shares of the Tiger Tire and Rubber Co., Ltd. The head office of the company is in Toronto and the factory is at Belleville, Ont. The authorized capital consists of \$750,000 8 per cent., preferred stock (\$50 par value), of which \$400,000 is to be issued, and \$1,250,000 common stock (par value \$25), of which \$1,000,000 is to be issued. Preferred shares are preferred both as to assets and dividends and participate equally in dividends with the common stock up to 10 per cent. The company has installed all necessary machinery in its plant and expects to begin active operations immediately on the manufacture of puncture proof tires.

Geo. W. Hamilton and Co., members of the Montreal Stock Exchange, are offering publicly an issue of the Cosgrave Export Brewery Co., Ltd., head office, Montreal. The capitalization of the company consists of 100,000 shares of \$10 par value. The new stock will be offered at par. The company has no preferred issues, nor any bonded indebtedness. The company has been formed for the purpose of operating the Cosgrave Brewery, Toronto, as a manufacturing plant catering entirely to export trade. It is understood that arrangements will be made as regards the listing of the shares.

At a meeting of the directors of Canada Steamship Lines, Ltd., in Montreal this week, the usual quarterly dividend on the preferred shares was declared. No action was taken in respect to dividend on ordinary shares of the company, and, while the earnings of the year have been good, the directors pursuing a conservative policy have decided to conserve the resources of the company and to await developments on certain financial proposals now under consideration to capitalize the greatly increased assets of the company. This, when consummated, will, in the opinion of the directors, be greatly to the interest of the company. No details were made public as to the nature of the financial proposal referred to, but it has been common knowledge for some time past that the mission of J. W. Norcross, president, abroad was of a financial nature.

Dominion Foundries and Steel Co., Hamilton, Ont., instead of declaring the usual quarterly dividend of \$1 per share on its common stock, has declared a dividend to be paid in the common stock of its subsidiary, the Adirondack Steel Co., in the proportion of one share of Adirondack for every five shares of Dominion Foundries held. It is apparent that this course of action has been taken with a view to conserving the company's cash resources at a time when working capital is of importance, and inventories generally are being marked down.

## LONDON LOAN AND SAVINGS CO.

Slightly less business is reported by the London Loan and Savings Co. of Canada for 1920, mortgage loans amounting to \$1,936,245, compared with \$2,066,936 in the previous year. Interest on investments, rents, etc., amounted to \$81,125, and out of this the usual 7 per cent. dividend was paid, and \$20,000 was transferred to reserve.

The capital of the company was increased from \$888,321 to \$891,383, while the reserve now stands at \$400,000, as compared with \$380,000 in 1919. Outstanding debentures have been reduced from \$963,458 to \$668,911, but deposits have increased by more than \$142,000 to \$948,762. Total assets are now \$2,930,936, as against \$3,052,929 in 1919 and \$1,916,249 in 1908.

## MONTREAL LOAN AND MORTGAGE COMPANY

Total income of the Montreal Loan and Mortgage Co. for 1920, amounted to \$132,689, as compared with \$126,051 in 1919. Net profits last year amounted to \$92,149, being equivalent to 15.3 per cent. on the paid-up capital of \$600,000. In addition to the usual dividend a bonus of one per cent. was paid to shareholders, bringing the total dividend payments for the year up to \$78,000, compared with \$66,000 previously.

Total assets of the company are practically unchanged at \$1,774,889, which included mortgages on real estate amounting to \$1,616,808, cash amounting to \$20,168, and call loans amounting to \$79,334. Reserve fund stands at \$800,000, against \$700,000 in 1918.

## MORTGAGE CORPORATION OF NOVA SCOTIA

Mortgages held by the company, according to the annual report for 1920, amount to \$952,869, a decrease from last year of \$3,522. The real estate held amounts to \$4,821. All the mortgages are repayable by instalments; thus the securities of the company are constantly improving. The instalments have been well met. Amounts received from borrowers during the year on account of principal and interest on the mortgages held was \$318,534.

Profits for the year amounted to \$39,243, from which the dividend of 6 per cent. on the capital was paid, and \$9,000 was transferred to reserve. Outstanding debentures of the company amount to \$250,071, a falling off for the year of \$19,976. Deposits at \$34,678 show an increase of \$3,407. Total assets are now \$1,319,535, being more than four times the total amount of liabilities to the public. Reserve fund now stands at \$134,000.

## LAMBTON LOAN AND INVESTMENT CO.

An increase in business, but a slight decrease in profits is shown in the annual statement of the Lambton Loan and Investment Co., Sarnia, Ont. Mortgage loans at December 31, 1920, stood at \$3,473,283, compared with \$3,243,492 at the end of the previous year. Deposits show an increase of \$67,306 at \$1,237,729, while outstanding debentures now amount to \$665,406, compared with \$537,535 a year ago. Cash on hand and in bank now amounts to \$93,895. Profits last year were \$105,006, as against \$114,735 for 1919, but the usual dividends were paid, \$25,000 was carried to the reserve, and the other necessary provisions were made.

The Lambton Loan and Investment Co. is one of the oldest mortgage and loan companies operating in Canada, having commenced business in 1846. It has a paid-up capital of \$789,750, a reserve of \$825,000 and total assets of \$3,587,089. The directors report that the collection of interest in 1920 was very satisfactory, and there is no real estate on hand outside of the office premises.

FOUNDERS  
IN CANADA

ON Place d'Armes in the City of Montreal stands a monument to Sieur de Maisonneuve who, landing near this spot in the year 1642, founded the settlement which is now the City of Montreal.

Facing Place d'Armes stands the Bank of Montreal, which opened its doors for business a short distance from the same spot over one hundred and three years ago.

From the Settlement founded by Maisonneuve civilization has spread to the east and west until to-day the Dominion of Canada extends from Halifax to Vancouver.

Likewise the Bank of Montreal has grown, until after over a century of steady and conservative progress, it to-day has branches in all of the cities and larger towns in Canada, with offices in the principal financial centres of the world, and correspondents in every country.

## BANK of MONTREAL

Capital Paid Up \$22,000,000 Reserve \$22,000,000  
Total Assets \$560,150,812.85

## DIVIDEND NOTICE

IMPERIAL OIL, LIMITED

NOTICE OF DIVIDEND

Notice is hereby given that a Dividend of seventy-five cents (75c.) per share in Canadian funds has been declared by the Directors of Imperial Oil, Limited, and that the same will be payable in respect of shares specified in any Share Warrant of the Company within three days after the Coupon Serial Number Seven of such Share Warrant has been presented and delivered to: The Royal Bank of Canada, Toronto, Ontario, or at the office of Imperial Oil, Limited, 56 Church Street, Toronto, Ontario. Such presentation and delivery to be made on or after the first day of March, 1921.

Payment to Shareholders of record and fully-paid up at the close of business on the twenty-fourth day of February, 1921, (and whose shares are represented by Share Certificates), will be made on or after the first day of March, 1921.

The books of the Company for the transfer of shares will be closed from the close of business on the twenty-fourth day of February, 1921, to the close of business on the first day of March, 1921.

By Order of the Board.

T. C. McCOBB,

Secretary.

56 Church Street, Toronto, Ontario,  
February 24th, 1921.

452

\$136,000 of premium income was written by the Royal Indemnity Co., Toronto, in Ontario and Quebec from the time it commenced business about May 1, until the end of the year 1920.

## CORPORATION FINANCE

*(Continued from page 40)*

stock outstanding, or equivalent to 30 per cent. on the average of year.

In his report to shareholders, C. Howard Smith, the president, stated that sales in the year increased to a marked extent, and the company's product had a favorable reception in the export markets. Combined sales of the company and including those of the Toronto Paper Co., which has now been included in the Smith organization and is no longer operated as a separate company, amounted to \$7,456,401, as compared with \$3,744,859 in the previous nine months. Sales in 1916 were only \$694,966. The balance sheet shows the company's fiscal position with the Toronto Paper Co. included. Total assets amount to \$9,856,106, of which quick assets make up \$3,118,249. Quick liabilities amount to \$1,360,528. Cash is \$149,662, accounts receivable \$1,124,676, inventories \$951,349, accounts payable \$931,415, bank debt \$250,000. The accounts reveal net working capital amounting to \$1,757,720. The previous report for nine months showed total assets of \$5,775,780, quick assets of \$803,541 and quick liabilities of \$331,987, leaving net working capital of \$803,541.

**F. N. Burt Co., Ltd.**—Notwithstanding the fact that inventories have been written down to replacement value, the company is able to show profits for the year of \$842,712, as against \$795,714 in the previous year. A balance of \$984,857 has been carried forward, as compared with \$713,044 at the end of 1919.

The balance sheet shows few changes of significance. As a result of the conversion privilege given to preferred stockholders, in view of the increased dividends on common, the capital account shows a reduction in preferred stock and an increase in common. Preference shares amounting to \$420,200 were converted into common shares during the year. Merchandise is shown at \$1,186,587, as against \$991,609 at the end of the previous year, while plant, machinery, etc., are higher by about \$100,000.

President S. J. Moore, in his address to the shareholders at the annual meeting in Toronto last week, said that the sales for January this year were ahead of those in January a year ago, and the prospects were decidedly good. Mr. Moore pointed out that during the past five years the company had had profits of \$2,808,000, and had paid out \$960,000 in dividends, which resulted in keeping in the business \$1,500,000 for extensions of plant and increased working capital. In other words, the company had nearly doubled its productive capacity without calling upon the shareholders for any additional capital. The profits during the five-year period had increased each year over the preceding year. There was every prospect of continuing the present dividend of 10 per cent., which, being paid in New York funds, brings a return of about 11½ per cent to Canadian shareholders.

**British Empire Steel Corporation.**—The boards of the Dominion Steel Corporation and the Nova Scotia Steel and Coal Co. arrived at an agreement for the consolidation of these enterprises, together with the Halifax Shipyards, Ltd., under the name of the British Empire Steel Corporation, Ltd. The agreements are subject to the underwriting of certain securities, upon the completion of which the boards of the companies will again meet for the purpose of approving the underwriting and fixing the date when the agreements will be laid before the shareholders of the interested companies for their approval.

Col. Grant Morden, who has taken an active part in promoting the British Empire Steel Corporation, stated in London last week that the agreements constituting the corporation had been cancelled and new arrangements had been made, the terms of which would be announced by the presidents of the Dominion Steel Corporation and of the Nova Scotia Steel and Coal Co. "The larger objects of consolidation," he said, "will all be attained on somewhat different lines than those previously announced. The Canada Steam-

ship Lines, Ltd., if not included in the merger, will closely co-operate in transportation."

The directors of the Halifax Shipyards, Ltd., have approved of the terms on which the enterprise is to enter the merger, and, in common with the two larger enterprises, will, in the course of the next ten days or so, formally submit the proposals before the shareholders of the Halifax company.

**American Sales Book Co.**—A record year is reported by the company both in regard to business transacted and profits earned, which were much the largest in the company's history. Profits for the year were \$602,679, an increase of 40 per cent., the figures a year ago being \$427,237. With the balance brought forward from 1919 of \$270,851, and \$22,146, United States Federal taxes on 1919 earnings paid in 1920, there was available for distribution \$851,384. Payments of interest on bonds amounted to \$28,921, reserve for depreciation \$130,658, and reduction of patent account \$50,000, were practically unchanged from a year ago. Regular dividends at 7 per cent. on preferred were also unchanged, amounting to \$215,131, but, in addition, there was a payment on arrears of 3½ per cent., amounting to \$107,565. After these appropriations, the balance carried forward this year amounts to \$319,107.

President S. J. Moore reports that the inventories have been written down to correspond with present market prices, the shrinkage having been charged off on the year's operations. There remains the payment of United States Federal taxes for the year, which cannot yet be accurately determined. Mr. Moore states that it is hoped to make a similar payment on arrears of dividend on preferred during 1921, the percentage still unpaid being 8%. "Although a falling off in business was experienced during the last quarter, the prospects are encouraging for a gradual return to normal volume during 1921."

Even allowing for the writing down of inventories, the company still reports merchandise valued at \$654,208, as against \$444,664 a year ago. Accounts and bills receivable are slightly higher at \$582,367, compared with \$515,942. Bills payable are also higher at \$407,315, as against \$286,405. Total assets are \$5,630,536, increased from \$5,369,800 last year. The company's business is conducted entirely in the United States, but its head office is in Toronto, and there are a considerable number of Canadian shareholders. The company's shares were listed on the Toronto Stock Exchange last July.

**Hollinger Consolidated Gold Mines, Ltd.**—The profits of the company for 1920 amounted to \$3,792,341, as against \$2,321,290 in the year 1919, an increase of \$1,471,051. The company paid nine dividends of 1 per cent. each, amounting in all to \$2,214,000, which compares with total payments of \$1,722,000 in 1919.

The company wrote off \$1,117,066, distributed as follows: Plant depreciation, \$445,985; capital development, \$408,250; donations, \$1,959; investments in other companies and properties, \$260,872. Deducting these amounts from the net profits left the sum of \$461,274 to be added to the balance of \$2,670,577 carried forward from 1919, and made the surplus at the end of the year \$3,131,852. The gold and silver produced from the mine amounted to \$6,939,628, which, with \$222,982 interest on investments and other income, gave a gross income of \$7,162,611.

"The return of 9 per cent. to shareholders during the current year," said M. A. Timmins, president, "includes 4½ per cent. return of capital, because the gold taken from the ore is not replaced by anything, and the total value of the property is thereby reduced by that amount. Comparing mining with other forms of industry, the shareholder should always bear in mind that the amount of his raw material is limited and the capital value of his property is yearly being diminished. Therefore it is essential that a part of this dividend should be applied to the amortization of the capital represented by his shares."

# 1920 BIGGER THAN EVER

## The Northwestern Life Assurance Company

Head Office - Winnipeg, Man.

### ANNUAL REPORT FOR YEAR ENDING DECEMBER 31, 1920

**EXTRACTS FROM DIRECTORS' REPORT:**

**NEW BUSINESS**—Applications received amounted to \$1,860,350.00. The Policies actually issued totalled \$1,505,000.00.

**ASSETS**—The Cash Assets of the Company show an increase of \$171,747.35 and now amount to \$602,101.47. Assets of all kinds show an increase of \$64,004.57, and now amount to \$647,382.69.

**LIABILITIES**—Liabilities to the Public amount to \$485,857.25, an increase of only \$47,136.34, as against the large comparative increase shown above.

**INVESTMENTS**—Now amount to \$537,305.14, an increase of \$166,119.08.

**INCOME AND EXPENSES**—The Company's Income as per Revenue Account amounted to \$155,243.97, while total expenditure was only \$82,732.01, showing a surplus over all expenditure of \$72,511.96.

**MORTALITY**—Death Claims were again extremely light, amounting to only \$3,781.40—only 15 per cent. of the expected.

**RESERVES**—Our reserves for the protection of Policyholders are still on the highest basis of any Canadian Company. These now amount to \$230,756.75, being considerably greater than the reserves required by the Dominion Government.

**TOTAL RESOURCES**—Amount to \$1,522,382.69, an increase of \$64,004.57.

J. F. C. MENLOVE, Pres.                      H. R. S. McCABE, Man. Dir.                      F. O. MABER, Sec.

## RECENT FIRES

Car Sheds at Levis, Que., Suffered Loss of \$300,000—Cabill Block in Saskatoon Suffered a Loss of \$200,000—Machine Shop at Montreal was Damaged to Extent of \$100,000

**Biltown, N.S.**—February 15—The implement building on the farm of Grant Lamont was damaged by fire. The loss is estimated at \$4,000.

**Campbellton, N.B.**—February 21—The Maritime Lumber Company's rotary mill at Rocky Green was destroyed by fire with a loss of \$30,000, partly covered by insurance.

**Cowichan Lake, B.C.**—February 22—The Riverside Hotel was destroyed by fire. The loss has not been estimated, but will be heavy.

**Elgin, Ont.**—February 23—The bakery of Messrs. Ferguson and Ferguson was destroyed by fire. An oven is believed to have caused the fire.

**Port William, Ont.**—February 17—Fire which practically destroyed the Mona Block on Simpson Street caused damage estimated at \$15,000. The fire is believed to have started from the explosion of a gasoline torch used by an electrician who was repairing the wiring in a Greek confectionery kitchen.

**Fredericton, N.B.**—February 21—A fire, believed to have been of incendiary origin, broke out in the Donnelly Building at the corner of King and Northumberland Street, doing damage estimated at \$200.

**Guelph, Ont.**—February 17—The store at 156 Wyndham Street, occupied by the Guelph Tire Sales and Vulcanizing Co., was damaged by fire. The loss is covered by insurance.

**Hamilton, Ont.**—February 23—The Orchard House wing of the Ontario Hospital for the Insane was destroyed by fire. The loss is estimated at \$70,000.

**Levis, Que.**—February 21—Damage estimated at \$300,000 was caused by a fire which broke out in the Levis County Railway car sheds on Frazer Street.

**Montreal, Que.**—February 18—The building occupied by the Montreal Machine Shop, Ltd., 481 and 483 Ontario Street East, was destroyed with a loss of \$100,000.

**North Devon, N.B.**—February 17—The residence of Harry King was destroyed by fire. There was no insurance.

**Ottawa, Ont.**—February 15—The wholesale fruit warehouse of M. Raport, 62 George Street, was damaged by fire.

**Ottawa, Ont.**—February 17—The stable owned by A. J. Smith, 186 James Street, was damaged by fire. The loss is \$700. The residence of T. J. Doyle, 495 Somerset Street, was damaged by fire to the extent of \$500.

February 19—The Joynt Block, at the corner of Wellington and Sherbrooke Streets, was damaged by fire, with a loss of \$40,000 and insurance of \$18,500.

**Owen Sound, Ont.**—February 20—Fire in the general store of Mike Sheyck caused \$2,000 damage. The loss is partly covered by insurance.

**Pictou, N.S.**—February 16—The Atlantic Milling Company's mill was destroyed by fire. The loss is \$20,000, partially covered by insurance.

**Pittsburgh, Ont.**—February 22—The outbuildings on the farm of Mrs. W. McAdoo were destroyed by fire.

**Regina, Sask.**—February 21—The Hughes and Charbonneau Bakery, at the corner of Smith Street and Twelfth Avenue, was damaged by fire.

**St. John's, Nfld.**—February 19—The Palace, the residence of the Archbishop of St. John's, was gutted by fire. The damage is estimated at \$50,000.

**Saskatoon, Sask.**—Thirty families were rendered homeless and damage of over \$200,000 was effected by a fire which totally destroyed Cahill Block No. 3 on Avenue A, near the footbridge.

**Stony Creek, Ont.**—February 18—The residence of Carey Steeves was destroyed by fire. The loss is estimated at \$3,500, with no insurance.

**Toronto, Ont.**—February 18—Rothsteins rag warehouse, 145 Elizabeth Street, was the scene of a fire that damaged the place to the extent of about \$2,500.

February 19—The Globe Theatre, 75 Queen Street West, was damaged by fire. The loss is estimated at \$1,500.

February 21—A fire broke out in the Branston store at 353½ Yonge Street, doing \$1,000 damage.

February 22—Fire breaking out at the bottom of the dumb waiter shaft in the building at 210 Adelaide Street West did damage estimated at \$35,000. The place is occupied by the Dominion Waterproof Co. The junk factory of M. Granstein and Sons, 482 Wellington Street West, was damaged, with a loss of \$1,000.

**Travers, Alta.**—February 17—The Guy Paulson Building and contents were destroyed by fire. The loss is \$20,000, covered by insurance.

**Vancouver, B.C.**—February 15—Fire, due to an overheated flue in a kitchen range, did damage amounting to \$10,000 to the Lodge Cabaret, Seymour Street.

**Vancouver, B.C.**—February 16—A fire broke out in a store and icehouse in the C.P.R. yards, foot of Drake Street, with damage estimated at \$8,000.

**Waweg, N.B.**—February 20—The residence of Osiris Nixon was destroyed by fire. The loss is \$8,000, and the fire was of incendiary origin.

**Woodbridge, Ont.**—February 20—Christ Church was damaged by fire. The loss is estimated at \$10,000, with insurance of \$3,000.

**Woodstock, Ont.**—February 19—The barn and contents on the farm of the late Edwin Thornton was destroyed by fire. The loss is estimated at \$10,000, with insurance of \$7,500.

## ADDITIONAL INFORMATION CONCERNING FIRES

**Beauceville, Que.**—January 25—A store belonging to J. B. Pauleu was destroyed with a loss of \$20,000. There was insurance of \$15,000 in the Strathcona, Dominion, Mutual and National, of Paris, Insurance Companies.

**Cooksville, Ont.**—February 2—Cement garage belonging to W. J. Turner was destroyed by fire. The loss is \$1,700, with no insurance.

**Hull, Que.**—January 17—The mattress factory belonging to Mrs. J. B. Larose was damaged by fire. The fire was caused from sparks from an electric motor. The loss is \$12,000, with no insurance.

**Indian Lorette, Que.**—January 30—The factory owned by Armand Bastien was destroyed by fire to the extent of \$52,500. There was \$24,000 insurance in the Mount Royal, Canada Fire, National, of Paris, Instand and Sherbrooke, and Dominion Fire Insurance Companies.

**Oshawa, Ont.**—Fire Chief Alex. C. Camerons annual report shows that the total fire loss was only \$7,000, with eighteen fires. One fire alone in a business block might have cost several thousand dollars. The chief ascribes the small fire loss and few fires to educational propaganda and public co-operation.

**St. Mary's, Ont.**—January 31—The flour and feed mill belonging to the St. Mary's Milling Co., Ltd., was destroyed by fire with a loss of \$13,000.

**Tyron, P.E.I.**—January 12—A carriage, garage, blacksmith shop and paint shop belonging to Thos. McNeill and Son was destroyed by a fire which was caused by the electric wiring. The loss is \$10,500, with no insurance.

**Vancouver, B.C.**—The chief of the fire department shows that during the month of January there were 86 alarms turned in, with a total loss of \$6,876. The following were the causes of fires: Carelessness with cigarettes 1, chimney fires 41, electrical origin 5, defective fireplaces 2, sparks 2, spontaneous combustion 1.

**ENGLISHMAN**, 48, married, now office manager of branch of an Eastern Trust Company desires management of trust or other financial firm intending to establish in Vancouver. Has sound judgment and a thorough knowledge of accounting, finance, land values, investments, etc.; good mathematician; resident here since 1907. Position must offer satisfactory inducement as well as ample prospects. First-class references can be furnished. P.O. Box 854, Vancouver, B.C. 451

## Savings Deposits at New High Record

Increase of About Twenty Millions in January Establishes This Account at a Level Considerable Higher Than Current Loans—Circulation and Call Loans Were Much Lower—Demand Deposits Largely Reduced—Cash Position Improved, but Ratio of Liquid Assets to Liabilities Showed Falling Off

	January, 1920.	December, 1920.	January, 1921.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	\$ 621,408,021	\$ 657,496,742	\$ 584,025,710	— 6.4	—12.5
Deposits after notice	1,163,297,037	1,293,007,488	1,313,093,870	+12.9	+ 1.6
Current loans in Canada	1,226,962,963	1,301,804,342	1,264,490,463	+ 3.1	— 2.7
Current loans elsewhere	182,533,124	181,510,423	173,379,729	— 1.9	— 5.9
Loans to municipalities	46,147,388	55,973,926	59,637,682	+28.3	+ 7.3
Call loans in Canada	132,015,334	114,703,246	112,474,318	—15.1	— 1.8
Call loans elsewhere	170,206,805	211,442,652	191,854,003	+12.3	—10.5
Circulation	237,269,805	246,859,667	229,608,213	— 3.1	— 6.9

WITH a drop in current loans of about thirty-seven million dollars and an increase in savings deposits of about twenty millions, the first month of 1921 saw the return to a more normal state of affairs in the banking situation in Canada. It is many months since current loans have been below notice deposits, and while the banks have demonstrated their ability to take care of the requirements for funds far in excess of the public's savings, the change is regarded with a great deal of satisfaction.

The shrinkage in current loans was not quite so drastic in January as in the preceding two months, but this was hardly to be expected in that the recession of this account from the abnormal level of last year has been well proceeded with, and as general business conditions become more stable, even so will the current loans become steadier. There is also the possibility that banks are carrying manufacturers and farmers over their difficulties in order to prevent them from meeting with disaster.

Overdue debts showed an increase of about \$300,000 for the month. The change is not unusual for this time of the year, as the delinquency is attributed largely to the agrarian community. A large number of loans to farmers made last fall are falling due about this time, and in view of the present situation it is natural to expect some delays. The course of the current and call loans in Canada during the past thirteen months is given in the following figures:—

Loans.	Current in Canada.	Call in Canada.
1920—January	\$1,226,962,963	\$132,015,334
February	1,257,015,902	127,251,419
March	1,322,267,030	128,293,310
April	1,347,238,230	125,644,859
May	1,349,079,981	119,114,493
June	1,365,151,083	115,272,587
July	1,377,276,853	115,360,894
August	1,385,470,153	113,598,923
September	1,417,520,756	114,669,611
October	1,405,401,227	113,135,902
November	1,357,973,118	108,471,340
December	1,301,804,342	114,703,246
1921—January	1,264,490,463	112,474,318

Call loans in Canada were considerably lower in January, as illustrated by the above figures, the demand for funds for speculative purposes being reduced. The same situation was also evident in call loans elsewhere. The monthly movement of call loans abroad since January, 1918, is illustrated by the following figures:—

	1918.	1919.	1920.	1921.
	\$	\$	\$	\$
January	132,687,066	140,819,656	170,206,805	191,854,003
February	160,239,494	155,983,681	184,469,882	.....
March	167,296,701	160,116,443	205,202,133	.....
April	179,818,591	155,533,666	206,229,451	.....
May	172,259,879	157,176,325	213,964,182	.....
June	170,034,476	167,236,045	219,214,431	.....
July	167,112,836	178,098,434	203,045,209	.....
August	160,544,990	174,176,578	193,888,245	.....
September	159,680,810	169,532,489	186,962,960	.....
October	157,040,858	158,194,085	188,367,459	.....
November	171,055,732	169,626,880	218,183,194	.....
December	150,248,322	172,232,161	211,442,652	.....

The following figures show the course of the principal loans account in recent years:—

	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
Jan.	\$ 758,500,492	\$ 61,986,845	\$ 82,584,659	\$134,248,516
1916	806,479,147	85,989,511	79,737,064	155,747,476
1918	855,506,506	116,220,343	76,239,201	132,687,066
1919	1,080,340,861	126,513,338	87,598,427	140,819,656
1920	1,226,962,963	182,533,124	132,015,334	170,206,805
1921	1,264,490,463	173,379,729	112,474,318	191,854,003

The showing of savings deposits over a period of one year has resulted in the placing at the disposal of the banks a larger amount of funds than a year ago:—

January.	On demand.	After notice.	Total.
1916	\$387,002,926	\$ 714,264,486	\$1,001,267,412
1917	427,308,526	864,163,344	1,291,471,870
1918	559,777,237	900,314,256	1,460,091,493
1919	623,919,410	990,000,085	1,613,919,495
1920	621,408,024	1,163,297,037	1,784,705,061
1921	584,025,710	1,313,093,870	1,897,119,580

## Deposits Increase

The big drop in demand deposits, as a result of the further heavy withdrawals by commercial and industrial concerns, carried the total deposits very much below the figure for the previous month. This is illustrated in the following figures:—

	Deposits on demand	Deposits after notice.
1920—January	\$621,408,024	\$1,163,297,037
February	620,069,555	1,187,027,307
March	657,412,028	1,197,719,570
April	652,918,760	1,209,573,990
May	645,957,229	1,229,073,515
June	659,622,583	1,243,700,977
July	639,415,025	1,253,170,443
August	640,361,707	1,261,647,732
September	677,286,905	1,270,194,097
October	687,651,781	1,271,275,751
November	686,754,094	1,291,009,008
December	657,496,742	1,293,007,488
1921—January	584,025,710	1,313,093,870

## Cash Position Improved

Cash assets showed considerable appreciation in January, but as call loans and bank balances were very much lower, the ratio of liquid assets to liabilities to the public, notwithstanding the fact that demand deposits and circulation fell off largely, was reduced from 49.40 per cent. to 48.79 per cent. The ratio of quick assets to liabilities to the public was 23.58 per cent., compared with 24.87 per cent. in December.

The following figures show the changes in the cash position for the month:—

Gold and sub-coin in Canada	+ \$ 324,991
Gold and sub-coin elsewhere	+ 2,105,461
Total addition	+ \$2,430,452
Dominion notes in Canada	+ 9,101,809
Dominion notes elsewhere	— 1,559
Total addition	+ \$9,100,250

Of the deposit in Central Gold Reserves \$11,502,533 is in gold coin; the balance is in Dominion Notes. J. C. SAUNDERS, Deputy Minister of Finance.

Holdings of securities increased slightly, reflecting the falling off in the demand for credit for commercial purposes.

### Capital and Reserves

Substantial additions were made to capital and reserve, chiefly by the Standard Bank, the changes being the result of the recent stock issue. The following are the figures:—

	Capital subscribed	Capital paid up	Reserve.
Merchants.....	\$ 400	\$ 25,426	
Hamilton.....	600	18,090	\$ 9,040
Standard.....	302,207	249,508	260,630
Provinciale.....		49,550	
Royal.....		50,820	25,410
Totals.....	\$303,207	\$393,394	\$295,080

### IMMIGRATION INCREASING

Immigration to Canada, from April to December, 1920, compared with that of the corresponding months of 1919, was as follows:—

	British.	Other U.S.A. countries.	Totals.	Inc. over 1919-20.
April.....	6,229	6,324	734	13,287 18%
May.....	12,414	5,353	1,844	19,611 92%
June.....	9,844	4,720	1,780	16,344 109%
July.....	10,472	4,301	1,888	16,661 50%
August.....	7,404	5,838	2,510	15,752 4%
September.....	6,405	4,227	2,718	13,350
October.....	7,602	3,945	3,305	14,852 3%
November.....	4,695	3,262	2,890	10,847 34%
December.....	1,968	2,110	3,105	7,183 14%
Totals.....	67,033	40,080	20,774	127,887 31%

## PROPOSES CENTRAL FACTORIES BUILDING

Plan of Winnipeg Board of Trade Would Encourage Small Industries—Stock Exchange Offices Moved

(Staff Correspondence.)

Winnipeg, March 3, 1921.

WINNIPEG and the west have been enjoying what has practically been spring weather this week, and already reports have reached Winnipeg of one instance of seeding near Regina, and also of ploughing having commenced near Lethbridge on March 1.

Much has been heard in past years of the Hudson's Bay Railway, the tracks of which are now scarcely anything but streaks of rust; the road having to a large extent been allowed to deteriorate. A new proposal to parallel part of this line, known as the Flin Flon Railway, is now being urged to tap the large mineral areas north of The Pas. Prof. R. C. Wallace, commissioner for northern Manitoba of the provincial government, is strongly advocating such a railway, and, in his recent extensive report to the provincial legislature, it is estimated that the building of such a railway would permit a two-thousand ton a day extraction of valuable ore for 27 years, and enable a population of not less than 3,000 persons to make their living by working it. Prof. Wallace's report can be taken as dependable. In addition, he states that a large number of persons not connected with the Flin Flon line itself will be attracted to these regions just as soon as travel becomes easy. The cost of the proposed line is estimated at \$2,500,000, and it is pointed out that the Temiskaming and the Northern Ontario cost more than \$21,000,000, and yet has paid excellently because it opened a mineral district. Prof. Wallace and others who agree with him think that a railway from The Pas to Flin Flon, a distance of 80 to 90 miles, would produce equal results north of the Saskatchewan River.

### Advises Building Railway

The report of Prof. Wallace is now in the hands of the legislature, and concludes with the following recommendations: "I would respectfully recommend that the government of Manitoba undertake the building of a railway from The Pas to the Flin Flon property along the route followed by the preliminary survey recently completed, at an estimated cost of \$2,500,000; such undertaking being contingent on the guarantee of the Flin Flon syndicate that the purchase of the property will be proceeded with in March, 1921; that the mine and smelter will be operated on the completion of the railway on a basis of at least 2,000 tons of ore per day, and that security will be deposited adequate to protect the government in the undertaking until such time as the mine and smelter are in operation."

The property is at present under option to the Flin Flon syndicate, composed of New York and Toronto capitalists. After having spent large sums in proving the continuity of the ore-body, they must decide next month as to what they will do—either pay the first instalment of the purchase money or relinquish their option. These in turn declare that their decision hinges upon the action of the provincial government.

### A Central Factories Building

The Winnipeg Board of Trade are advocating a central factories building for this city, stating in the organ of the board, "The Community Builder," that no city in Canada is in greater need of a central factories building than Winnipeg, which stands to-day, it states, on the very threshold of a great industrial era, with wonderful power and transportation facilities at hand unequalled anywhere in the Dominion. They also point out the very valuable raw materials, abundance of pure soft water, and the cheapest hydro-electric power and electric light in America, also a rich and grow-

ing market for the goods manufactured in such a central factories building. The establishment of such a building would be the greatest magnet for the attraction of small manufacturers that could possibly be devised, and would be a great advertisement for the city. They point out that central factories buildings have received the warmest support from manufacturing concerns in American cities. In one American city the central factories building has been 100 per cent. occupied for several years, during which time a great number of infant industries have secured sufficient strength to walk alone, and have erected plants of their own, costing from \$50,000 to \$250,000.

The Winnipeg Stock Exchange headquarters have been transferred from the McArthur Building to much more commodious quarters in the Montreal Trust Building. W. B. Sterling is in charge of the exchange, being its hon. secretary. The McArthur Building, corner of Main St. and Portage Ave., Winnipeg, has been sold to the Chids Restaurant interests of New York, at a figure in the neighborhood of \$800,000. Messrs Allan Killam and McKay have been appointed managers of the building.

### NEW REGINA BOND HOUSE

Messrs. W. L. McKinnon and Co., Toronto, having closed their Regina office at the end of the year, Clifton C. Cross, who was their western manager, has now opened an office under the firm name of Clifton C. Cross and Co., at 12 Canada Life Building, Regina, Sask. Mr. Cross was for a number of years with the Toronto office of W. L. McKinnon and Co., prior to taking over the management of their Regina office. Clifton C. Cross and Co. will deal in government, municipal, school district and rural telephone debentures.

### OCCIDENTAL FIRE INSURANCE COMPANY

The 1920 report of the Occidental Fire Insurance Co., Winnipeg, shows that premiums, less rebates and cancellations, amounted to \$456,309, as compared with \$387,537 in 1919, an increase of \$68,771. The amount paid for reinsurance was \$191,685, as against \$156,450 in 1919, so that the net premium increase is \$33,536. This increase in business requires under Dominion Government standard the reserve of an additional sum of \$24,419, making the reserve for unearned premiums \$172,514, or 65 per cent. of net revenue for the year.

Losses paid and unadjusted, less reinsurance recoverable, amounted to \$113,086, being 42.7 per cent. of net premium income, or 47 per cent., after providing the necessary increase in reserve. The ratio of expense to net premium income is 37.2 per cent., which is the same as last year. Net underwriting profit is \$28,639, which, together with net interest returns from investments, \$29,051, and the amount transferred from investment reserve to write up bonds to government valuation \$1,785, enabled the company to transfer \$59,476 to the credit of profit and loss account.

Interest and principal repayments on mortgage loans are reported as being well met. All debentures are being taken into accounts at actual market value. The directors deemed it advisable to continue the policy of building up a reserve, and in consequence did not recommend the payment of a dividend. The entire profits of the company, \$59,476, were transferred from revenue account to the credit of profit and loss account. The net surplus to shareholders now amounts to \$308,516. The directors also deemed it advisable for the company to underwrite hail insurance, and the necessary by-law to permit this was submitted.

Lake marine insurance will go into effect April 15, which means that is the date officially set for the opening of navigation.

## CONSERVATION OF LIFE INSURANCE BUSINESS

TO what extent will life insurance policies be resorted to by policyholders who are faced with unexpected financial difficulty? This question has been arousing interest in life insurance circles for some months past. In the time of inflation and prosperity wage-earners may have committed themselves to pay more in premiums than they will be able to pay in more normal times. For instance, a man who earned \$1,000 a year and saved \$100 a year in pre-war days, may have been earning \$2,000 and saving \$200 recently; if he commits himself to pay all of this margin in premiums he would be in difficulty when pre-war conditions return. The result might easily be a lapse of the policy, although loans on policies to tide the assured over a period of unemployment are likely to be the first symptom.

Little or no increase in either policies or lapses took place in 1920, as depression set in only in the later months of the year. Several prominent life insurance men, however, made their annual meetings the occasion of a campaign for conservation. J. F. Weston, manager of the Imperial Life, said: "All companies have experienced large gains in business in force during 1920. Its true value will be determined by the percentage of the abnormal amounts of new business recently placed which will renew. Our two main sources of surplus have always been excess interest earnings and saving in mortality. Another source exists which can be made to contribute an amount equal to a considerable percentage of the other two. It rests in the reduction of lapses below what the average company has persistently experienced. There has been improvement in this direction in recent years, but not nearly what is possible. It is most important to companies and agents and greatly in public interest, that the great waste incident to lapse should be further corrected. We shall continue to gauge the success of a branch or of an agent by the amount of persistent business they secure and will never consider successful the one who gives a large production followed by disproportionate lapse."

## THE GERMAN INDEMNITY

THE Allies are seeking to impose upon Germany a war indemnity of £11,300,000,000, exclusive of a tax of 12 per cent. upon German exports. Germany offers £2,500,000,000, of which they assert £1,000,000,000 has already been paid in money and supplies. The Allies are therefore faced with the unpleasant task of forcing terms upon an unwilling people. The hope that reparation can be made for damage done is false, for war is a luxury for which all participants must pay. In war indemnities as in private life it is more blessed to give than to receive, as was demonstrated in the case of the huge indemnity imposed upon France after the war of 1870.

Canada, at least, has little financial interest in the present situation. We incurred no direct damage, and reparation is therefore not due us. As for the cost of the war to Canada, this is a bill which is being willingly met by the taxpayers, and there has never been any responsible opinion that it should be otherwise paid.

## THE GREAT WEST BANK OF CANADA

A PURELY western bank, which "promises to become the leading financial institution of the Prairie Provinces," is the project described in a preliminary announcement of the Great West Bank of Canada, appearing in western papers a few days ago. Originally mooted as a "Bank of Saskatchewan," the plan was enlarged and the charter secured last July in the name of the Great West Bank of Canada. A prospectus was issued shortly afterwards, but the actual offering of stock is just now made; details are given in *Corporation Securities Market* in this issue. The Imperial Financial Corporation, then the Mutual Bond and Securities Corporation which took it over, were mentioned in connection with the financing, but the offering is now

being made by the General Bond Corporation. The president of this corporation is W. A. Lamport, barrister, Toronto, the director, W. R. Phillips, Regina, and the secretary-treasurer, J. K. McLennan, Regina, formerly a grain exporter of Winnipeg.

While emphasis is laid on the western identity of the new bank, the high market values of the shares of leading banks are quoted as illustrating the profits which may be made in banking. The rapid growth and financial success of the banks which are national rather than western has been due in part to the fact that they have always been able to lend where funds were most needed, i.e., in the most profitable field, drawing at the same time these funds from deposits all over the country. Emphasis is laid in the announcement on the fact that with other banks western loans must pass the scrutiny of boards of directors in Toronto and Montreal, "men not conversant with western conditions and western needs." The writer of this announcement does not appear to be aware of the extensive powers possessed by western managers, and superintendents of Canadian banks. Moreover it is a well known fact, though actual figures are not available to prove it, that the loans of the banks in the west greatly exceed their deposits there. It is therefore difficult to see how the western bank can become sufficiently strong to bring about, as is alleged, "the advantageous pressure which the new bank will develop in stabilizing the attitude and methods of the present banks towards the public, which, to say the least, has been faulty and unsympathetic in many instances."

In spite of this obvious hostility to existing institutions, and the attempt to obtain subscriptions on the strength of it, the Great West Bank does not call for opposition or criticism. The Canadian field is large enough for the present banks and more. If the new concern is soundly managed, and the plan of capitalization at least is sound, it may as a purely western institution achieve prominence if not leadership. Though the announcement quotes in disfavor a statement from the *Toronto Mail and Empire* that "it would be an injustice to the productive work of the country as a whole to extend western loans beyond the season of seeding to marketing of harvest," it does not necessarily follow from this that the management will be lax in maintaining a liquid condition.

#### AFTER 5 P.M.

**T**HERE was a vast difference between the employer of the pre-efficiency days, who knew personally every one of his employees, where he lived and how he lived, and the heads of the great industries which were built up by the co-ordinating of effort. This difference was chiefly one of personal relations. The dominating industry of the 19th century was the one in which there were no personal relations between employer and employee, the contract being confined to the sale of labor for a weekly wage, terminable at the will of either party and bearing no contingent responsibility.

In the financial as well as in the industrial field the growth of business has severed the personal connection. But just as industry has reacted against this mutual ostracism by the establishment of welfare schemes, so also is finance attempting to unite its employees by ties other than those of daily employment. The pensions and sick benefits at first adopted were but a step in the direction of the more complete social program being proffered by large financial organizations. The rest-room, the lunch-at-cost, the summer outing and the annual dinner have become common in the United States, and Canadian firms are rapidly following their example.

Meritorious as this movement may be, representing an effort towards mutual advantage, there are limits to its practicability and advisability. The office must remain a part of the office worker's life which is distinct from the

rest; no enlargement of the scope of the organization can make it exhaustive. The new relation between employer and employee does not become personal by such measures, however expressive they may be of a desire to benefit.

#### ONE WAY TO LOSE MONEY

**L**OSSES caused by the dishonesty of employees are often greater than losses incurred by fire, and yet many employers do not yet carry insurance against such a possibility, said Nate Andre, manager of the insurance department of McCallum, Hill and Co., when addressing the members of the Regina Rotary Club recently. "Insurance," said Mr. Andre, "is a hazardous business. It can be conducted successfully only by qualified and experienced underwriters. In general, it may be described as a device for regaining a serious loss at a moderate cost. Fidelity and surety bonds were added to the insurance family in 1874. Like all insurance, except life insurance, it is intended to indemnify against losses upon the happening of unforeseen events.

"A surety company sells to those needing a guarantee the use of its name or credit. The theory of suretyship, therefore, is not entirely that of a distribution of losses. In fact, the theory of the surety business is that the company does not intentionally assume risks involving losses. Suretyship supposes that only those who are willing to fulfil their obligations and have the ability to do so, will be bonded, and consequently there will be no losses. Much of the safety of a fidelity risk consists in inducing those who are covered by bonds to believe that honesty is the best policy, and to live and act accordingly."

Shipbuilding and shipping were dull in 1920, and the outlook has not improved. Will a part of Canada's investment in this business be unprofitable, as in the case of the railroads?

\* \* \* \* \*

The January statement of government currency shows a gain of \$800,000 in gold held, and a reduction of \$18,000,000 in notes outstanding. Sound conditions cannot be brought about until inflation disappears; the January changes are a step in the right direction.

\* \* \* \* \*

Our imports from the United Kingdom for the year ended January were \$226,248,605, compared with \$97,396,449 the previous year. Our exports to the United Kingdom for the same years were \$332,063,720 and \$510,042,555 respectively. This is a striking reversal, illustrating the wonderful recovery of Britain.

\* \* \* \* \*

That a company holding a Dominion charter should have power to do business throughout Canada, and not merely be a useless corporation, subject to whatever restrictions the provinces cared to impose, was the intention of the fathers of Confederation. The recent decision of the Privy Council gives this intention effect.

\* \* \* \* \*

#### THE GREATEST SACRIFICE

The animals were imitating their masters by arguing as to their respective merits in the winning of the war. "I won the war," insisted the horse "for I carried the generals." "But I carried the ammunition and without it where would the generals have been: I won the war," said the army mule.

But another claimant ended the argument. "I won the war," said the jackass, "for I'm the fellow who bought Liberty Bonds at par."

## PERSONAL NOTES

CAPTAIN W. E. MACINTYRE has retired from the management of the Victoria branch of the Royal Financial Corporation to engage in the bond business on his own account, with offices in the British Columbia Permanent Loan Building.

W. L. ANDERSON has been appointed general manager of the National Shipbuilding Company, Limited, of Goderich, Ont. Mr. Anderson has been connected with the Sturtevant Company of Galt, and was for a number of years with Goldie and McCulloch.

COL. D. H. MACLAREN, of Barrie, Ont., has been elected to fill the vacancy on the board of directors of the Chartered Trust and Executor Company, Toronto, caused by the death of Sir William Gage. Sir William was one of the vice-presidents, but no successor to him in that office was named.

W. M. WEIR, who retired from the position of president of the Canada Foundries and Forgings, Limited last year,

has returned again to take the place of T. J. Dillon, who has resigned. Mr. Dillon was also managing director of the company, but Mr. Weir will just take over the duties of the president, while James Arnold, Brockville, who has been assistant general manager for some time, will be the general manager. There were also several other changes in the directorate and the board now stands as follows: Wm. M. Weir, president; Hon. George P. Graham, vice-president; Hon. W.

J. Shaughnessy, Montreal; Lt.-Col. C. M. Monserrat, Ottawa; W. T. Sampson, Gananoque; Lt.-Col. C. W. McLean, W. D. Robb and B. F. Conway, Montreal; James Arnold, general manager, Brockville, and J. H. Briggs, Brockville, the latter being also secretary-treasurer.

CHAS. A. CAMPBELL has been appointed assistant inspector of taxation at Brockville, Ont., succeeding E. G. Breakell, who has been transferred to Kingston.

### OBITUARIES

F. E. SHRIMPTON, general auditor of the Canadian Pacific Railway, died in Montreal this week from heart failure at the age of 53 years.

C. E. DUNCAN, general superintendent of the Algoma Steel Corporation, died at Sault Ste. Marie, Ont., last week, following an operation for appendicitis. Mr. Duncan was forty-eight years of age and was born in Chattanooga, Tenn.

G. W. HOBSON, president and founder, of the Vancouver insurance firm of Hobson and Company, Limited, died recently in his eighty-fifth year. The late Mr. Hobson was one of the insurance pioneers of Vancouver, was the first secretary of the Mainland Board of Fire Underwriters, which office he resigned in 1900, when he formed the present insurance agency.

### NORTH BRITISH AND MERCANTILE CHANGES

Randal Davidson, manager for Canada of the North British and Mercantile Insurance Co., Ltd., since 1902, and also president of its subsidiary, the Occidental Fire Insurance Co., will retire from both offices on the 30th June next. Mr. Davidson's desire has been for a less strenuous life after a service of forty years with the North British and Mercantile. Mr. Davidson was educated in England, and at Trinity College, Port Hope, and afterwards at the Royal Military College, Kingston, Ont. On leaving the latter in 1882, he became a clerk in the employ of the North British at the Canadian branch, Montreal. After serving some time as a junior, Mr. Davidson was given a clerkship in the United States branch of the company in New York. He served there later as special agent for upwards of three years, returning to Montreal in 1887 to assume the position of inspector. He succeeded to the management in 1902.

Mr. Davidson, who has been invited to a seat on the Canadian board, will be succeeded by C. A. Richardson. Mr. Richardson was born at Ingersoll, Ontario, 3rd July, 1879.

He commenced his business career in 1896 as junior clerk in the London Assurance Corporation at Montreal. He severed his connection with this institution in 1903 to become chief clerk in the Canadian head Office of the Caledonian Insurance Co. after serving three years with the Caledonian in the above capacity, and as inspector for Ontario west of Toronto, Mr. Richardson returned to the London Assurance Corporation as their inspector for western Canada with headquarters in Winnipeg. Mr. Richardson joined the staff of the North British and Mercantile in 1908 as inspector for the north-west, and when that company opened a branch office in Winnipeg in January, 1909, Mr. Richardson was appointed manager thereof.

In 1914 the North British and Mercantile purchased a controlling interest in the Occidental Fire Insurance Company, the head office of which was then in Wawanesa, Man., and its business almost entirely confined to western Canada. The head office of the Occidental was moved to Winnipeg, and Mr. Richardson was appointed its vice-president and secretary, in addition to his position as branch manager at Winnipeg of the North British and Mercantile. Other promotions are announced as follows: F. J. L. Harrison has been appointed to succeed Mr. Richardson as branch manager of the North British and Mercantile Insurance Company, Limited, and vice-president and secretary of the Occidental Fire Insurance Company in Winnipeg. W. S. Daviss becomes assistant manager of the fire department of the North British and Mercantile Insurance Company, Limited, and branch manager of the Occidental Insurance Company. Wm. Cooke succeeds J. D. Rowell (who has become an agent of the company in Toronto as inspector of the North British and Mercantile for Ontario. S. J. Bourne has been appointed inspector of the Occidental Fire Insurance Company for Ontario, resident in Toronto. A. E. Bibbs is appointed inspector for the province of Alberta, headquarters Calgary.

The agency of Colonial and Foreign Banks is undertaken, and the Acceptances of Customers residing in the Colonies domiciled in London, are retired on terms which will be furnished on application.

*A Newspaper Devoted to  
Municipal Bonds*

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

*Write for free specimen copies*

## FINANCIAL BILLS BEFORE PARLIAMENT

## Numerous Measures For Financial and Commercial Institutions—The Outlook for the Session

## THE WEEK IN PARLIAMENT

(Special to *The Monetary Times*.)

Ottawa, March 3, 1921.

Thursday, February 24

In Commons:—(a) Debate on Address; (b) First readings of the following bills: one to incorporate Canadian Bar Association, one amending Dominion Life Assurance Company Act, one to incorporate the Fidelity Company of Canada, one respecting the Montreal, Ottawa and Georgian Bay Canal Company's desire to have time for commencing and finishing work extended, one giving Jas. MacLaren Co., Ltd., further powers of financing in order to build paper mills, and one to amend the Trade Mark and Design Act; (c) Second reading Bill to amend Dominion Elections Act; (d) First reading Bill to amend Senate and House of Commons Act so that ministers must resign all directorships; and (e) R. C. Henders, M.P., asks commission of inquiry into grain trade from producer to consumer.

In Senate:—Second reading Gold and Silver Mark Bill.

Friday, February 25

In Commons:—(a) First reading Patents of Invention Act; (b) third reading act to amend Dominion Elections Act so that revision of lists for Ontario referendum can be proceeded with; (c) Petitions presented, one from Manitoba and North-Western Railway of Canada asking authority to construct certain lines of railway in Saskatchewan, and one from Dominion Express Company asking extension of powers to include carriage outside as well as within Canada, and to increase capital stock.

Monday, February 28

In Commons:—(a) Petitions presented, one from Quebec, Montreal and Southern Railway Company asking for extension of time in which to complete railway, and another from Credit Foncier Franco-Canadien, of Montreal, asking for repeal of Act of Incorporation; (b) First reading act to amend and consolidate law relating to copyright so as to make the Canadian laws conform to the Berne Convention; (c) amendment to amendment by Mr. J. A. Campbell, M.P., asking for adjournment of House after enacting necessary legislation until after census is completed far enough for basing Redistribution Bill upon it, the passing of such a bill followed by dissolution of parliament and a general election; (d) Introduction of resolution to approve Canada-West Indies Trade Agreement, 1920; and (e) Debate on Address.

Tuesday, March 1

In Commons:—(a) Debate on Address; (b) First reading bill defining Canadian nationals as being "British subjects domiciled or ordinarily resident in Canada"; (c) First reading bill to incorporate North American Trust Company of Canada.

In Senate:—First reading Lake of the Woods Control Board bill; and (b) Answer to questions concerning government railway loans in the United States.

Wednesday, March 2

In Commons:—Debate on Address.

In Senate:—(a) Concurrence amendments House of Commons to Dominion Elections Act, making bill ready for Royal assent Thursday; and (b) Second reading bill to amend Criminal Code for revision of sentences made too lenient or onerous by judge.

The debate on the address in reply to the Speech from the Throne was still proceeding on Thursday with every evidence of an intention on the government's part to press it to a division late Thursday night. On Monday J. A. Camp-

bell, member for Nelson, moved an amendment to the amendment asking that parliament should enact such legislation as was in the interests of the country, and then adjourn until sufficient census returns had been compiled on which to base a redistribution bill. According to this proposal parliament would then resume the interrupted session, pass a redistribution bill, dissolve, and have a general election. Such a plan is understood to have been already in the government's mind if its majority should have proved so small as to make defeat a probability. There is every confidence now, however, that they have enough of a working majority to make an attempt at a session following the present one a feasible undertaking. The events of the session may change this feeling of confidence, but just at present there seems little reason to doubt the government's ability to survive this session.

## Discussion on Industrial Relations

The conference of a group of industrial relations men associated with various Canadian industries, which took place on February 21 and 22, concluded with the adoption of a resolution on the subject of joint industrial councils, and of appreciation of the assistance of the minister and department of labor in the promotion of better relations in Canadian industry. On the subject of joint councils the consensus of the conference was "that the work thus far conducted in the field of industrial councils justifies a continuation of the conference of employee and employer." Those present also stated that they would welcome further conferences along similar lines, to be called at the discretion of the minister of labor, and the publication by the labor department of bulletins of information on industrial topics.

## Report of the Wheat Board

Fifty per cent. of the exportable surplus of the Canadian wheat crop was exported before December 31, 1919, that year in which the marketing of all Canadian wheat was placed in the hands of the Canadian Wheat Board, according to the report of the chairman of that body, James Stewart, tabled in the House on February 21 by Right Hon. Sir George Foster, minister of trade and commerce. In his report, Mr. Stewart states that the average price realized by farmers at the shipping point in Canada was \$2.50 a bushel, as against 25 cents a bushel less received by farmers in the United States, according to figures of the United States Bureau of Statistics. The price of bread in Canada, during the period when wheat flour prices were also controlled by the Wheat Board was 1½ cents a pound less than the average price paid by the consumer in the United States.

Mr. Stewart deals fully in his report with the work of the board, which was created by order-in-council on July 31, 1919, from its inception until the close of its work. The balance sheet from inception until December 31, 1920, showed total deposits in banks and elsewhere of approximately \$10,500,000, against which there was \$10,000,000 outstanding in participation certificates. There had been paid to date \$9,000,000 and claims were filed with the board for between \$500,000 and \$600,000 covering lost, stolen and destroyed certificates, leaving participation certificates aggregating over \$400,000 unaccounted for.

Including the disbursing of interim and final payments, which by themselves will have cost \$200,000,000, the cost of administering the board, including general expenses, auditing, registering certificates, etc., less than half cent per bushel on the volume of grain handled. The chairman points out that of over seven million bags of flour handled, not a single bag was lost through deterioration or not being accounted for.

At a largely attended public meeting, Whitby, Ont., Board of Trade was reorganized on February 10. Richard N. Bassett was elected president, Louis F. Richardson vice-president, C. C. Parsons secretary and A. H. Allin treasurer. A special committee was appointed to consider the proposition made by a new industry desirous of erecting a large plant in the town.

## AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

399 Branches in Canada, extending from the Atlantic to the Pacific  
 New York Agency: 63 and 65 Wall Street: W. M. Ramsay and C. J. Crookall, Agents  
 London, England, Office, 53 Cornhill: J. B. Donnelly, D.S.O., Manager  
 Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

## BANK BRANCH NOTES

The following is a list of branches of Canadian banks which have been opened recently:—

New Liskeard, Ont. ....	Bank of Nova Scotia
St. Andrew's East, Que. ....	Bank of Nova Scotia
St. Thomas, Ont., East End ..	Royal Bank of Canada
Couva, Trinidad .....	Royal Bank of Canada
Halifax, N.S. (Barrington St.)	Royal Bank of Canada
Winnipeg, Man., St. Vital (373 St. Mary's Rd.) .....	Imperial Bank of Canada

The branch of the Bank of Hamilton at Coderre, Sask., was closed on February 15.

C. S. Coll, who has been with the Bank of Commerce at Halifax, has been made assistant manager of the Provincial Bank at St. John.

O. N. Johnstone, formerly manager of the Bank of Hamilton at Taber, Alta., has been transferred to the Winnipeg office. He is succeeded by H. Lamont, who was formerly in charge at Lomond, Alta.

Eight thousand five hundred dollars in currency vanished on February 24 from a teller's cage in the main Toronto office of the Bank of Montreal, at Yonge and Front Streets. When its disappearance was noted, police headquarters were notified and the employees searched. Paying Teller Wright had been in an office back of his cage for 15 minutes, making up his returns for the clearing house. When he returned a package of \$8,500 in bills and \$12,500 in "bank legals," used only for exchange between banks, had gone.

E. M. Brown, teller in one of the adjoining cages, was later arrested, and confessed to taking the money, following defalcations in his own books.

H. P. Strong, accountant of the Moncton branch of the Royal Bank, has been transferred to Kingston, Jamaica, as chief accountant.

## CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended February 25, 1921, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	P. E. I.	Total.	1920.		
Feb. 25 .....	16	14	0	4	2	2	8	2	0	48	12
Feb. 18 .....	6	28	2	2	2	0	4	0	0	44	16
Feb. 11 .....	11	19	7	1	2	3	0	2	1	46	21
Feb. 4 .....	6	15	0	0	4	4	13	0	0	42	18

## SPRING INFLUENCES IN TRADE

Further indications of returning confidence and business recovery are in evidence, according to Dun's Bulletin of February 26. In Montreal, business recovery is in evidence. Boot and shoe jobbers and manufacturers, long in the dumps, are booking orders more freely, though not in any great volume as yet, and are discussing with much interest the possibility of large orders from abroad. It is reported that figuring is being done on a proposed order from Russia for a million pairs of shoes, half cash to accompany the placing of the order, while as before noted, there is a probability of a considerable order for army shoes from Italy. The Italian government has also been making enquiries for prices and samples of leather, and tanners claim that as stocks are comparatively low any development of actual business in the directions indicated would materially strengthen the market. Advice from American leather centres report improving prospects in the export trade.

## EXCHANGE QUOTATIONS

Quotations of exchange on the United States and European countries as at March 3, 1921, with comparisons, are given below. The Canadian figures are supplied by the Imperial Bank of Canada, while New York quotations are given by the National City Co., Ltd., Toronto:—

	Can., Feb. 24.	Can., Mar. 3.	N.Y., Mar. 3.
London, cheque .....	4.43	4.43	3.88½
France .....	8.25	8.17	7.22
Germany .....	1.92	1.82	1.62
Belgium .....	8.67	8.55	7.55
Italy .....	4.20	4.18	3.66
Switzerland .....	18.98	18.99	16.70
United States .....	14¼	14¼	....

## RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first three weeks in February:—

Canadian Pacific Railway.			
	1921.	1920.	Inc. or dec.
February 7 .....	\$3,370,000	\$3,288,000	+ \$ 82,000
February 14 .....	3,044,000	3,547,000	— 503,000
February 21 .....	2,913,000	2,901,000	+ 12,000

## The Opinion of a Judge

A CANADIAN JUDGE, as the result of his wide experience in dealing with Wills and Estates, recently said:—

“Every person over twenty-one years of age should make a Will devising his property according to his best judgment and appointing a suitable person, or, more wisely, a trust company as the Executor.”

“There are many reasons why a trust company should be appointed the executor. They do not die or move away, do not defalcate or tangle up accounts. The officers and board of directors, inspectors and accountants are skilled experts, and all unite in the wise administration of estates. A trust company is especially needed where there are infants.”

Take heed to the counsel of this experienced Judge.

Appoint as the Executor and Trustee of your will Canada's Oldest Trust Company:

## CO-OPERATIVE MARKETING OF GRAIN

### A Purely Voluntary Association Could Scarcely Succeed— Achievements of the California Fruit Growers' Association

BY A. B. BARKER

MUCH is being said these days about co-operation, and in the west an attempt is being made to organize the grain growers with a view to eliminating the dealers. So long, however, as the organization contemplates only a purely voluntary association of the growers, without adequate means of enforcing the agreements entered into by the members, the dealers will have little to fear. Voluntary associations of this class depend for their effectiveness on the good faith of all, and, unfortunately, in most pooling organizations, there will be found some who can only be depended on so long as things are going their way. This is not because they belong to any particular class, as even supposedly good churchmen do not always hang together, and stock pools in financial circles are not unacquainted with the double-cross.

#### Must be Two-Way Agreement

The proposed schemes have the backing of the provincial governments, and many dealers are nervous, but unless the organizations are so formed that once in, a member must stick whether he wants to or not, there will be only temporary inconvenience for the dealers until the inevitable disagreements come and with them the return to former methods on the part of the members. Few men will not go into an organization which promises profits, and fewer still will not try to dodge their share of responsibility if this promise does not materialize. Human nature sees to that.

Co-operation means the combination of men who are willing to forego the chance of an immediate profit for themselves, so that there will be a profit in the end in which all will share equally according to the amount of their venture, and the rock on which most of the schemes have been wrecked has been the difficulty of controlling the innately selfish members. The various stages of organizing into pools for the selling of their products and the subsequent breaking of these pools by some member trying to take advantage of a chance of personal profit, are well illustrated in the history of the California Fruit Growers. Some years ago these growers were unorganized, and while in good years some money was made, the bulk of the profit went to the railways and commission men. Attempts were made to organize, but the railway and commission men, by offering individual members a good price for their output, always managed to break up the organization. As soon as the pool was broken, of course prices slumped, although the consumer reaped no benefit. After several failures of this kind, and when many of the growers were facing bankruptcy, the plan now in operation was tried. In it there was no loophole through which a mean or shifty member could dodge. An association was formed and each member sold his crop outright to a branch organization. This organization graded the fruit, packed it and sold it at a fair price to the dealers, and after the expenses were paid each member participated in the profits according to the fruit he supplied. The results were wonderful. The railways were brought to time in the matter of rates and deliveries, the markets were furnished during the season with supplies as needed, the growers prospered and the consumer paid a fair price, and no more. It took outside pressure to force the kind of organization which was necessary to bring this about, and it was only because the growers were desperate that they were willing in the first place to agree to so comprehensive a plan.

#### Marketing of Grain

The marketing of grain and perishable fruit, however, are very different. In the California case the main market was in the same country and as the fruit would not keep, it had to be sold. With the western grain the main market

will be abroad, and the grain will keep at least for months. This is both an advantage and a weakness. An advantage, because the shipments can be arranged to go forward regularly and so maintain as far as possible steady prices. A weakness because of the ingrained desire of the average farmer to hold for a rise of another cent a bushel. With the provincial governments behind the scheme, there will be tremendous pressure from the constituents to hold the grain off the market if prices are low, and as many members will want advances, to arrange credit to enable this to be done. These will be the teething troubles of the organization, and as the system is built up, will, no doubt, be entirely overcome, but the executive during its first year will have a strenuous time explaining to disgruntled members if the plan does not strike a favorable market the first season.

## TO REFUND NEW YORK LOAN

The Canadian government has started negotiations to refund the \$25,000,000 of five per cent. bonds which mature on April 1 next. Investigation discloses that the Dominion government has bought up and retired already considerably more than a majority of the \$25,000,000 maturity and has completed arrangements to care for the balance at maturity without refunding. That maturity is one-third of the \$75,000,000 Canadian Government loan floated in the latter part of 1916 at a basis ranging from 5.10 per cent. for the five-year bonds to 5% per cent. for the ten-year bonds, and 5½ per cent. for the 15-year bonds.

The syndicate which placed the issue was composed of J. P. Morgan and Co., Brown Brothers and Co., Harris-Forbes and Co., the Bank of Montreal, the First National Bank, the National City Bank, and the Guaranty Trust Co.

## NEWFOUNDLAND FIRE LOSSES HEAVY

The annual meeting of the Newfoundland Board of Fire Underwriters was held in St. John's on February 4. In the absence of the chairman, C. MacKenzie Harvey, the agent of the Phoenix of London, F. E. Rendell, was appointed acting chairman. The accounts of the secretary-treasurer showed the board to be in a good financial condition. The election of officers resulted as follows:—Chairman, C. MacKenzie Harvey, agent Commercial Union and Palatine, re-elected; secretary-treasurer, R. G. Ash, re-elected; Committee on Rates and General Purposes, T. J. Power, representing the Royal and National of Hartford; J. B. Baird, representing the Norwich Union and Union; George R. Williams, agent for the Continental and Fidelity Phoenix, and Robert Dawe, agent of the New York Underwriters, with the chairman and secretary as members ex-officio.

The losses this year have been very heavy, especially during the last few months of the year, some of the companies losing far more than their premium income. Three companies joined the board during 1920, the Niagara of New York, represented by Avalon T. Goodridge; the Economic of London, represented by Rothwell and Bowring, Ltd.; and the World Auxiliary of London, represented by Messrs. Bowring Bros. Ltd., and one company was admitted since the new year, namely, the Car and General of London, represented by Messrs. Blackwood, Emerson and Winter. The premium returns were in excess of the previous year, and show an inclination on the part of the public generally to carry more fire insurance.

The Vancouver Real Estate Exchange, at its annual meeting, re-elected R. Kerr Houlgate president for the ensuing year. H. R. Budd was elected vice-president; F. Hoole, secretary-treasurer, with the following executive committee: A. E. Austin, J. W. Allan, D. W. Reeve, J. P. Nicolls, G. L. Edwards, A. McC. Creery and Lt.-Col. G. H. Dorrell.

## Is Your Property Still Unsold—Still To Let

We will sell or rent it for you.  
 We can do it for you, because we are doing it every day for others. Collection of Rents, Efficient Management of Apartment Houses, Stores, Offices and Factory Buildings—we do these things exceptionally well.  
 For the service we render our fees are small. By comparison with previous results, our services very often cost the owner nothing.  
 Call, write or phone for particulars. We will tell you exactly what we do, how we do it and what we charge.

## Every Man Intends to Make a Will

Not when one feels fit and eager for the day's work, can make the ninth hole in four, and help carry a canoe around a three-mile portage—it's hard to contemplate the idea of a WILL with any seriousness. That is why so many men die without making any will. That is why so many a comfortable little fortune is wasted in legal tangles. That is why so much property gets into hands for which it was never intended. Every man has rather decided views about the disposition of the wealth that he has created and saved. And he can enforce his wishes by a carefully drawn will and a wise choice of an executor. He can choose no executor who will administer his estate more prudently and faithfully than—

## YEAR OF CONTRACTION IN SHIPPING

Freight Business was Erratic, while Passenger Business was Good, with Falling Off at Close

At a meeting of the members of the Shipping Federation of Canada, held on February 9 in Montreal, the eighteenth annual report for the year 1920 was submitted by the president, R. W. Reford. Reviewing the shipping season of last year, the report showed that the total number of seagoing and coasting vessels was 663, of 2,031,729 tons, as compared with 786, of 2,179,280 tons, in 1919 a decrease of 123 ships and 147,451 tons. The season of 1920 on the whole was satisfactory, the passenger traffic being exceptionally good, although a slight falling off was noticed during the autumn months. The freight traffic, while good during the earlier part of the season, became erratic and uncertain towards the close, and at times cargo was scarce and difficult to procure. The failure of the British government to acquire our grain crop led to a decrease in the number of tramp steamers which usually come to the port during the closing months of navigation. The St. Lawrence coal traffic still remains dormant, and very little was done during the season. The demand for coal at the mines in Cape Breton and the decrease in production was principally the cause. Many of the colliers commandeered during the war period have now been released, and, with additional tonnage coming on the market, it is anticipated that within the next year or two this trade should regain the position it held prior to the war.

## Shipbuilding Dull

As regards shipbuilding, the tonnage turned out from Canadian yards during the past year is estimated at approximately 200,000 tons deadweight. Lloyds' register for the quarter ending September, 1920, placed Canada seventh among the nations, with 170,625 gross tons under construction. The lack of new orders caused shipbuilders to approach the government to secure assistance for the industry. Parliament enacted legislation authorizing the granting of credits to the extent of \$20,000,000 to enable shipbuilders to finance foreign orders. The erratic conditions of the foreign exchange market prevented foreign interests from placing orders in Canada, and, therefore, none of the credits was used.

## Deep Waterways

With regard to the International Joint Commission on a deep waterway from Montreal to the head of the Great Lakes, the executive of the Shipping Federation, after considering this project fully, went on record as being strongly opposed to it, as, in their opinion, the time will never come when ocean-going vessels will proceed further inland than Montreal, as the delays occasioned by travelling through locks, the high cost of operation, and the equally high cost of upkeep, would make it anything but a profitable undertaking.

Labor conditions on the docks were satisfactory, and agreements entered into last spring with the longshoremen, shipliners and checkers were carried out. It is thought that the wages paid to wharf labor at Canadian ports have now reached their maximum, and that with the low earnings of the steamship companies, wages and other operating costs must come down to a more moderate level, otherwise ship-owners will have no alternative than to lay their vessels up. The Labor Bureau on the docks was of great assistance to masters in tracing desertions from ships, providing substitutes and looking after crews generally. A total of 105 men were apprehended for various breaches of discipline, and a total of 621 substitutes were supplied.

The following officers were elected for 1921: R. W. Reford, president; J. R. Binning, treasurer; E. W. Foulds, assistant treasurer; manager and secretary, Thomas Robb. Executive council—A. E. Cook, J. R. Binning, D. W. Campbell, A. M. Irvine, W. R. Eakin, R. W. Reford, A. Mackenzie, Major P. A. Curry, R. B. Teakle. Sub-committees—Bill of Lading, Col. W. I. Gear; Major P. A. Curry, J. R. Binning; Harbor Equipment, Col. W. I. Gear and Major P. A. Curry.

## INSURANCE LICENSES AND AGENCY NOTES

The Merchants Casualty Company, which was writing sickness and accident insurance in the province of Quebec, has been authorized to include the business of automobile insurance.

Registration has been granted to the Merchants Marine Insurance Company, Ltd., to transact the business of fire and automobile insurance in the province of Quebec. John Jenkyns, 17 St John Street, Montreal, is chief agent for the province.

The Travelers Insurance Company and the Travelers Indemnity Company, Hartford, Conn., announce the removal of their Toronto office from the Standard Bank Building to the Temple Building, at the corner of Bay and Richmond Streets.

A Toronto office has been opened by the Ontario Equitable Life and Accident Insurance Company, of Waterloo, Ont., at 204 Brass Building, Yonge and Adelaide Streets. G. T. Baker, formerly one of the superintendents of the Metropolitan Life, has been given charge.

It was recently announced that the Scottish-Canadian Underwriters' Agency had withdrawn from Manitoba. This bare statement gives an erroneous impression, for, while the agency has ceased to exist, the business has been taken over by the Scottish-Canadian Assurance Corporation, which recently obtained a license from the Dominion, and has also been registered to transact business in Manitoba.

D. W. Mason, formerly superintendent of the Metropolitan Life Insurance Company at Brantford, Ont., has been appointed superintendent at Hamilton, Ont. A. G. Bradley, who was formerly Hamilton superintendent, has been appointed a supervisor for the Canadian field, with headquarters at the home office in New York.

Clarence A. J. Miller, who has been connected with the Employers' Liability Assurance Corporation, Limited (fire department), Montreal, serving in various capacities, and more recently as examiner and inspector, has been appointed by the Northwestern Mutual Fire Association as manager of their Eastern Ontario branch, with headquarters at Ottawa. Mr. Miller began his insurance career with the Liverpool and London and Globe Insurance Co.

The Hail Audit and Statistical Bureau, of Chicago, has opened a branch in Regina, Sask. This company will represent the hail departments of the Aetna Insurance Company, Springfield Fire and Marine Insurance Company, and the Insurance Company of North America. Operations commenced on February 15, and the company has leased premises at 815-17 McCallum Hill Building.

J. T. Hanna, of the New York Life Assurance Company, who was transferred to the company's Los Angeles office last fall, has returned to Winnipeg and will resume his former position with the Winnipeg office.

C. E. Morton has withdrawn from the Winnipeg partnership formerly doing business as Morton and Smith, and has opened up a general fire loss adjustment business at 322 Main Street, Winnipeg.

John W. Freeborn, formerly inspector of the Canadian Surety Company, Winnipeg, has been appointed to the newly-created office of supervisor of claims department.

Alfred Richard has been appointed superintendent to the Quebec provincial branch of the Northwestern Mutual Fire Association of Seattle, with headquarters at the Beardmore Building, Montreal. Mr. Richard has been connected with the insurance profession for a considerable number of years and has experience in all branches of fire insurance work, principally with the Liverpool and London and Globe, and as special agent for the Western Assurance Co. Mr. Richard will act as assistant to the provincial manager, James R. Wright, and commences his duties immediately.

M. P. Langstaff, formerly actuary of the Dominion Life Assurance Company, has associated himself as agency instructor with the Toronto branch of the Manufacturers Life Insurance Company, 10 Adelaide Street East. For a short time Mr. Langstaff was associated in an organizing capacity with the Ontario Equitable Life and Accident Company, recently formed.

## TRADE SITUATION HAS CHANGED BUT LITTLE

Changes in the Last Report Not Remarkable—Exports to Italy Have Trebled in a Year—Relations With West Indies Are Being Maintained on a Favorable Basis

CHANGES in the trade statement for the twelve months ended January, 1921, are largely of a repetitious nature. There is one point of significance, however, and that is that our imports from the United States are on the decline. This fact is not apparent from the figures given below, but the previous statement issued by the Dominion Bureau of Statistics shows purchases from our neighbours to the south of nearly \$922,000,000.

Another favorable factor which has not received a great deal of attention is the trade relations between Canada and Italy. It will be seen that exports to the country in question have more than trebled over a period of one year, and, according to authoritative reports, there is a chance for still further improvement. W. McL. Clarke, trade commissioner for the Dominion to the Mediterranean countries, has returned from his headquarters in Milan, Italy, to interview merchants interested in trade with any of the countries in his territory, including Italy, Greece, Switzerland, Spain, Portugal, Egypt and Northern Africa. With special reference to Italy, Mr. Clarke states that the country is fast recuperating, and that there is now established a government with a firm leader, and there does not seem to be any chance of an outbreak of Bolshevism. There is a good market for all sorts of agricultural products and other Canadian goods, including furs, coal, nickel, boots, shoes, asbestos, codfish, machinery and many others. The Canadian Pacific Ocean Services, Limited, will shortly open a new trade route to

Mediterranean ports, and this will further aid the situation.

Our exports to the British West Indies are being maintained on a favorable basis, but imports from there exceed our sales. There is a growing demand for our products, however, according to the Department of Trade and Commerce, and ultimately we should be able to sell more than our purchases. The demand for iron products is a noticeable feature of the growing trade. Iron pipes for water and gas supplies and hoops and puncheons, which were formerly imported from Great Britain, are now being purchased from Canada. Factories in Canada are supplying stills for the manufacture of rum. Canadian cement also figures largely among the articles imported.

## CITIZENS' RESEARCH INSTITUTE OF CANADA

At the annual meeting of the Citizens' Research Institute of Canada, held in Toronto on February 28, the director, Dr. H. L. Brittain, reported that twenty publications—fifteen general bulletins, two special bulletins and three pamphlets—had been issued. The mailing list numbers about 3,000, and they have had publicity in the press. Addresses have been given before many clubs. "This field," says the report, "should be cultivated, as many can be reached by word of mouth who cannot be reached otherwise."

The National Board of Trustees elected are, for one year (1921)—J. P. Hynes, Toronto; F. W. Rounsefell, Vancouver; Wm. Rutherford, Montreal; A. Whittemore, Calgary; Frank Wise, Toronto. Two years—G. H. Barr, Regina; T. H. Estabrooks, St. John; F. Barry Hayes, Toronto; Reg. V. Harris, Halifax; Oliver Hezzelwood, Toronto. Three years—J. P. Bell, Hamilton; Lieut.-Col. W. J. Brown, London; A. L. Crossin, Winnipeg; John Firstbrook, Toronto.

## MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

Further changes in the position of the Montreal City and District Savings Bank and La Caisse d'Economie de Quebec in the direction previously noted are shown in the January statement. Savings deposits substantially increased in both institutions. Holdings of cash and securities are considerably higher. The Montreal bank shows a reduction in loans, but the Quebec institution reports otherwise. The following are the principal comparisons:—

## Montreal City and District Savings Bank

### MONARCH FIRE INSURANCE COMPANY

Since 1918 the Monarch Fire Insurance Company, Toronto, has made good progress, according to the annual report for 1920, which has just been made public. The premium income last year was \$134,256, compared with \$52,906 in 1918. Losses amounted to \$55,698, while two years previous the figure was \$28,909. Expenses of management are shown as \$47,817, compared with \$21,206 in 1918.

The company has total assets of \$142,110, being an increase of \$44,845 over the two years. Bonds and debentures owned by the company amount to \$97,255. The company is operated on a cash mutual and stock basis. There is a surplus of \$55,636.

### CANADIAN FIRE INSURANCE COMPANY

The Canadian Fire Insurance Company, Winnipeg, has now established itself among the more important fire underwriting companies of the Dominion. Last year the premium income was \$698,373 gross, being an increase of \$153,512 over the previous year, while the net premium income showed an increase of \$44,900 over 1919. The ratio of losses incurred to premiums earned was 33.34 per cent., as compared with 33.23 per cent. previously, while the ratio of expense to premiums was 35.70 per cent.

As a result of its profitable experience the company was enabled to pay a bonus on its paid-up capital of \$1,000,000 of 2 per cent., making a total distribution to shareholders of 10 per cent. Interest on investments and bank balances amounted to \$76,426, as against \$70,600 in the previous year. There is a surplus of \$367,273, against \$294,823 at the end of 1919.

The company has now total assets of \$1,817,299, compared with \$1,681,115 in the previous year. The increase is largely the result of the enlargement of the holdings of first mortgages on real estate and bonds and debentures, which now total \$1,524,508.

The automobile insurance department, which was established in 1919, was further developed during last year with satisfactory results. In May last the company established a general agency for the province of Quebec in Montreal, and is now actively represented in all parts of the Dominion and in Newfoundland.

### BRITISH NORTHWESTERN FIRE INSURANCE CO.

The net premium income of the British Northwestern Fire Insurance Company, Toronto, for 1920, amounted to \$221,747, being an increase over the previous year of \$100,970. Losses for the year, paid and outstanding, amounted to \$76,045, and expenses \$76,781, show a loss ratio of 34.29 and expense ratio of 34.62. Investments of the company now stand at \$364,413. The net revenue received from these amounted to \$18,193. After setting aside \$55,281 for increased government reinsurance reserve and making provision for depreciation and all liabilities incurred, but not yet paid, including reserve for taxes, there was a net profit on the year's business of \$22,796, which was transferred to surplus, bringing that account up to \$106,344.

Explaining the non-payment of dividend to shareholders, Edward Brown, president, remarks: "Due to the large increase in the premium income, it is necessary to set aside a substantial amount on account of government reinsurance reserve, and, taking into account the present uncertainty of conditions in trade, your directors do not consider it advisable to pay any dividend at the present time, but rather that the reserve and surplus be maintained, thus ensuring the retention of the confidence of our policyholders."

It will be remembered that the British Northwestern Fire was taken over by the Eagle Star and British Dominions Insurance Company in the spring of 1920, and all the policies are guaranteed by the latter company. Assets now total \$512,457, as compared with \$368,872 in 1919.

## DIVIDEND NOTICES

### DOMINION TEXTILE COMPANY, LIMITED

#### NOTICE OF DIVIDEND

A dividend of two and one-half per cent. (2½%) on the Common Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 31st March, 1921, payable April 1st to shareholders of record March 15th, 1921.

By Order of the Board.

JAS. H. WEBB,

Secretary-Treasurer.

Montreal, 28th February, 1921.

461

### THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

*New Issue*

**\$1,000,000**

**HOWARD SMITH PAPER MILLS  
LIMITED**

*(Incorporated under Letters Patent of the Dominion of Canada)*

**7% First Refunding Mortgage Sinking Fund Gold Bonds**

*Dated January 2nd, 1921, Due January 2nd, 1941. Principal and interest payable at the Royal Bank of Canada, Montreal or Toronto, or at the office of Aldred & Company, Limited, New York. IN NEW YORK FUNDS AT THE OPTION OF THE HOLDER. Interest payable January 2nd and July 2nd.*

Trustee: The Montreal Trust Company, Montreal.

Of the total of \$7,000,000 there is authorized to be presently issued, \$3,500,000, of which there is now being sold .....	\$1,000,000
There will be held in escrow to retire the total outstanding 6% First Mortgage Bonds of Howard Smith Paper Mills, Limited, and Toronto Paper Mfg. Company, Limited .....	1,490,000
There will be held in escrow against balance to become due on timber limits .....	580,000
There is being held to be disposed of for the purposes of the Company as the Directors may from time to time determine .....	430,000
	<b>\$3,500,000</b>

Leaving \$3,500,000 for future capital requirements, issuable according to the terms of the Deed of Trust.

**SINKING FUND**—Beginning January 1st, 1923, there will be provided an annual Sinking Fund equivalent to 2% of the total amount of Bonds outstanding.

**RETIREMENT OF OUTSTANDING SECURITIES**—An offer of exchange is being made to the holders of the outstanding 6% Bonds of the Howard Smith Paper Mills, Limited, and the Toronto Paper Mfg. Company, Limited, providing for the deposit of their Bonds and the acceptance by them of 7% Bonds of this issue held by the Trustee in escrow.

Upon the retirement of all such bonds by exchange or otherwise, and upon payment of the balance due on timber limits, the presently authorized issue of bonds will be secured by a first mortgage and charge on the entire assets of the company.

**LOCATION AND BUSINESS**—Howard Smith Paper Mills, Limited, is the largest manufacturer of high-grade writing and book papers in Canada. It is now the owner of the properties and assets of the Toronto Paper Mfg. Company, Limited, which it has acquired and taken over as a going concern as and from January 1st, 1921. The Company operates three modern paper mills situated at Beauharnois and Crabtree Mills, Quebec, and Cornwall, Ontario. In addition, at the latter point a sulphite mill is operated together with a bleaching plant. The aggregate capacity of the three plants is:

- 100 tons per day of high-grade book, writing, bond and ledger papers.
- 70 tons per day of high-grade bleached sulphite.

The Company also owns about 500 square miles of timber limits.

It is proposed later to extend the operations of the Company in the production of soda pulp and book papers manufactured therefrom, as well as bristol board, filled blanks, etc., which products are now imported into Canada in large volume. It is advantageous and a matter of national importance to provide these facilities in Canada.

**ASSETS**

The fixed assets of the Company, excluding good-will, represent a book value of .....	\$6,472,000
The surplus of current assets over current liabilities, including the proceeds of this issue, will amount to .....	2,200,000
<b>Total Assets</b> .....	<b>\$8,672,000</b>

Or after deducting the amount of the present outstanding bonded debt, equal to over seven times the par value of the Bonds now to be issued.

The actual value of the Fixed Assets is estimated at .....

**EARNINGS**—The average annual net earnings for the past three years ending December 1st, 1920, after deducting Bond interest and depreciation, were \$477,288, or sufficient to pay about seven times the interest charges on Bonds now to be issued.

(The Toronto Paper Mfg. Company's earnings are included only for the past two years, during which time its entire issue of Capital Stock has been owned by the Howard Smith Paper Mills, Limited).

The net earnings after Bond interest and depreciation for year ended December 31st, 1920, amounted to \$815,683, or over eleven times the interest charges on Bonds now to be issued.

**PRICE: 91 and Accrued Interest, Yielding 7.90%.**

After a thorough investigation of the Company's properties and earning capacity and a careful study of its progress and standing in the trade, we strongly recommend these Bonds for investment.

**FULL DEPOSIT WITH DOMINION GOVERNMENT**

### DOMINION PERMANENT LOAN ACTION

A writ to recover amounts of dividends wrongfully accepted from the defunct Dominion Permanent Loan Company against 700 shareholders was issued in Toronto on February 26 by Liquidator G. T. Clarkson. The amounts of the sums which the liquidators claim are due the creditors and depositors are not totalled, but the dividends were paid out in several annual payments to the shareholders scattered all over the Dominion and in some parts of the United States. The amounts run from \$20 up into the thousands.

### C. M. A. EXECUTIVE MEETING

Sixty members of the Council of the Canadian Manufacturers' Association arrived in Quebec on February 25 to hold an executive meeting and have everything in readiness for the big convention to be held there in the month of June next. The executive delegates came from every section of Canada, and included President J. S. McKinnon, of Toronto; W. S. Fisher, first vice-president, St. John, N.B.; J. W. Shaw, second vice-president, Woodstock, Ont.; S. R. Parsons, past-president, Toronto; J. H. Fortier, first vice-president, province of Quebec section, Quebec; A. Dunbar, vice-chairman, Three Rivers, and others.

### THE CANADIAN SURETY COMPANY

In 1920 the Canadian Surety Co. wrote gross premiums of \$402,406 an increase of 60 per cent. over the previous year, while net premiums written aggregated \$289,711, an advance of 70 per cent. over 1919. At the year's end, the company had 19,750 bonds and policies in force, covering insurances of \$53,432,663. Total assets increased from \$478,278 in 1919 to \$527,911 in 1920. Reserves in 1919 were \$141,671 and in 1920 \$178,406. The paid-up capital stock and surplus as of December 31, 1920, amounted to \$329,553. The company has invested in Canadian bonds and debentures (government and municipal) the sum of \$419,968.

A. J. Brown, K.C., of Montreal, was recently elected to a seat on the board of directors.

### STERLING TRUSTS CORPORATION

Owing to the close relationship between the Sterling Trusts Corporation and the now defunct Standard Reliance Mortgage Corporation, the business of the former company has suffered greatly during the past two years. In his report to shareholders, W. H. Wardrope, president, says:—"As you are no doubt aware, the majority of the stock in your corporation is owned by the Standard Reliance Mortgage Corporation, now in liquidation, and, while your corporation is financially sound, the publicity attached to the liquidation of the Standard Reliance has had an effect on our operations during the past year. Your directors have been working towards the complete separation, and, while this has not yet been brought about, progress has been made."

Net earnings for the year 1920 were \$34,410, compared with \$62,196 in the previous year. This, with the balance of \$8,279 carried forward from 1919, made a total at the credit of profit, and loss of \$42,689. Continuing the adjustment process, the sum of \$21,368 was appropriated in respect of loss on operation of Great Northern Land, Ltd., for 1920, leaving a balance forward for 1921 of \$21,320. The assets show heavy reduction from the previous year, when the total stood at \$8,172,234. This year capital assets are slightly higher at \$530,881, guaranteed trust assets are \$588,651, a few hundred dollars above last year, while estates, trusts and agency assets are \$3,066,290, compared with \$7,070,068.

Owing to pending arrangements, the meeting of shareholders has been adjourned until March 31.

### ADDITIONS TO UNION TRUST DIRECTORATE

Important additions were made to the board of directors of the Union Trust Co., Toronto, at the annual meeting on February 10, through the election of John B. Lajdlaw, manager of the Norwich Union Fire Insurance Society, and S. R. Parsons, president of the British-American Oil Co. A large number of shareholders were present, the occasion being the more interesting as the first annual meeting in the new head office at Richmond and Victoria Streets.

### MUTUAL FIRE UNDERWRITERS OF ONTARIO

At the annual meeting last week the following officers were elected: President, G. B. Webster, St. Mary's; vice-presidents, George L. Miller, Jarvis, and T. J. Harkness, Owen Sound; secretary-treasurer, J. J. Stewart, Brampton. Executive—W. A. Galbraith, Iona; James Ross, Eaterford; J. C. Dance, Kingsmill, and A. P. McDougall, Melbourne.

V. Evan Gray, superintendent of insurance, advised the members to confine their underwriting to isolated farm risks, as, in the opinion of the association, village properties, schools and churches are extra hazardous risks.

### CHARTERED TRUST AND EXECUTOR COMPANY

A substantial increase in estates, trusts and agency accounts is reported by the Chartered Trust and Executor Company, Toronto, for 1920, but, in general with the experience of many of the Canadian trust companies, profits were lower, standing at \$38,644, as against \$48,368. Estates, trusts and agency accounts comprise \$4,611,354 of the assets, compared with \$4,365,904 a year ago. Dividends paid at 7 per cent. amounted to \$34,008, while \$1,000 was reserved for bad or doubtful accounts, leaving a balance carried forward of \$3,819, as against \$1,183 in the previous year. Capital stock paid up now stands at \$479,937, compared with \$446,862 a year earlier. The rest account is \$60,000, as against \$67,000. The amount of mortgages held on capital account is \$208,449, as against \$241,085, while bonds, debentures and stocks are \$180,130, compared with \$164,632. In estates, trusts and agency accounts, mortgages amount to \$1,478,924, compared with \$838,869, and bonds, debentures and stocks are \$1,140,460, and real estate \$1,751,111, these two items together last year amounting to \$3,376,533.

### EDMONTON FIRE UNDERWRITERS

At the annual meeting of the Edmonton committee of the Western Canada Fire Underwriters' Association, held on February 16, progress was reported in the matter of the formation of a provincial fire insurance agents' association, and the executive committee was requested to co-operate with the Calgary committee, with a view to completing the formation of the new insurance association as soon as possible.

The guest of the evening was James Taylor, of the E. A. Lilly Adjustment Agency, who gave an address on the difficulties experienced in making adjustments under prevailing conditions. The decline in prices of building materials and on various classes of stocks made the matter of adjustments of fire losses a difficult matter. R. J. Creighton, inspector of the Western Canada Underwriters' Association, also spoke.

The officers for the ensuing year were elected as follows: President, David McManus; vice-president, C. H. Chapman. Membership committee—P. Herring, H. Milton Martin, R. L. Green, H. L. McPherson and Chester Martin. It is the intention of the committee to invite visiting managers of companies and representatives of various fire underwriters' organizations to address the local association during the year.

## The President to the Shareholders

In his address to Shareholders at the Annual Meeting, February 24th, 1921, President L. B. McFarlane said:—

"Our orders for new telephone facilities, both local and long distance, have been greater than any previous year, and our outstanding difficulty has been to meet the enormous demand for service. We were not able to satisfy all requests, but had a net gain of 38,885 subscribers' stations, or 11½ per cent., being the greatest yearly gain in the history of the Company.

### Comparative Financial Result

"The gross receipts show an increase of \$2,809,635, but owing to the mounting costs the expenses for the year, including interest, exceeded the revenue, as will be seen from the financial report.

"The dividends declared during the year have been paid out of surplus of profits accumulated prior to 1st of January, 1917.

### Applications for Revised Rates

"The very lengthy delay in obtaining a rate decision—a period of over two years—and our consequent inability to properly finance in the meantime for needed expansion, have crippled our efforts to properly serve the public. Early in 1918 it was found that the greatly increased cost of operation made it essential that there should be a substantial and immediate increase in our rates. Application was therefore made to the Board of Railway Commissioners for Canada in October, 1918, for an increase of 20 per cent. In May, 1919, the Commissioners, after testimony, ordered temporary relief by allowing a 10 per cent. increase, being only one-half of the sum asked for, and it proved entirely inadequate to meet even the so-called emergency.

"The Board retained the conduct of the case, and requested us to furnish detailed monthly returns for the succeeding year.

After the expiration of that period, on August 5th, 1920, we renewed in more detail our application, and asked for a general readjustment of rates.

"This application is still before the Commissioners for decision. Our case was ably presented, and we are hopeful of receiving a favourable decision.

"Until a decision on the Rate Case is given by the Commission, it will only be possible to finance for future capital needs at prohibitive cost. Your Board has felt that this is not in the interest of subscribers or shareholders, and have therefore suspended expenditure under the 1921 Budget, hoping that rates may be authorized whereby we will earn a fair return, insure a profit which will compare favourably with the return from other investments of a similar character, and thereby attract capital at reasonable rates.

### Bonds Issued

"In the month of April \$5,500,000 of Bonds were offered and sold to the highest bidders at 93.75% in New York funds, which netted us 102.2% in Canadian funds. These Bonds bear interest at the rate of 7%, and fall due at the same date as our outstanding Bonds, namely, 1st April, 1925.

### Employees Buy Stock

"Another financial transaction of special interest was the Stock Purchase Plan for Employees, which was approved by your Board and became effective in August. By this Plan employees are given the right to purchase at par one share for each \$300 or fraction thereof of the annual rate of pay which they were receiving at 1st of May, but not exceeding twenty shares, they agreeing to pay for the same by deductions from wages. Interest on the unpaid balance is charged at the rate of 4% per annum, and the account is credited with an amount equal to dividends declared during the purchase period.

"The offer was taken advantage of by 2,271 employees for an amount of 8,548 shares, an average of 3.76 shares each.

### Progress in Telephone Art

"During the past year many important improvements were made to our plant, and we are now in a position to give universal Long Distance service to our subscribers. Even at our smaller offices subscribers have been connected to very distant points, both in Canada and the United States, and those at our larger offices demand long-haul connections daily. For example, Montreal, Toronto, Ottawa and Hamilton subscribers have had satisfactory commercial conversations with cities in Florida, California, Manitoba, British Columbia and the Maritime Provinces.

"Our engineers closely follow the development of the Art generally, but specially of the Multiplex System—or Wired Wireless as it is commonly called—by which a number of messages are sent simultaneously over one circuit, and this system will be used in our plant as soon as the necessity for extension arises. Its adoption is purely a question of first cost and annual charges. The Multiplex is as yet expensive, both in first cost and annual charges.

"Great advances have been made by Wireless Telephony, but in its present state it is not as reliable as the wire system; and if wires can be run and maintained between two given points, it is more efficient and economical to use the wire system.

"Wireless or Radio transmission is now used as complementary to the wired telephone systems, and as further improvements in the apparatus are effected its use will be extended as auxiliary to our present service."

## NORTHERN MORTGAGE CO. OF CANADA

Eleven years of experience in the mortgage and loan field of Western Canada has resulted in the building up of a substantial business by the Northern Mortgage Co. of Canada. In 1920 the net profits amounted to \$133,882, from which total a dividend of 5 per cent. was paid, and \$37,821 was added to the surplus account. There was a good increase in mortgage loans and that account together with other investments now stands at \$3,062,810. The average rate earned on mortgage investments was 7.80 per cent., and on Victory bonds and other securities, 5.57 per cent. Real estate acquired by foreclosure was substantially decreased during the year, and properties sold brought a profit of \$15,692 over their book value. The amount of real estate on hand is shown as \$143,152.

The company has a paid-up capital of \$1,925,599, and 5 per cent. debenture stock outstanding of \$1,000,000. There is a surplus of \$237,172, and in addition a reserve of \$40,000 to provide for any possible loss on investments. There is also an amount of \$29,000, representing actual profit made on the sale of properties, but which, until the deferred payments have been met, it is deemed advisable to carry to this reserve account.

## FARMERS' MUTUAL INSURANCE COMPANIES

The third annual meeting of the Farmers' Mutual Hail and of the Farmers' Mutual Fire insurance companies was held in Regina on February 1. R. H. Cook is manager of both. The report of the hail company, of which S. V. Linton is president showed that the total hail insurance in force in 1920 was \$2,629,400. The premium income was \$151,000, of which, after payment of losses totalling \$53,000, and setting aside approximately \$8,000 to take care of bad and doubtful premium notes, the sum of \$50,000 was added to reserve. The company's risks were hailed in 70 districts throughout the province during the season as compared with 77 districts hailed during 1919.

M. J. Olsen, of Arcola, is president of the fire company. He stated that 1920 had proven to be a record year in the history of the company. He was glad to observe from the auditors' statement that the business written in 1920 had exceeded that written in 1919 by 118 per cent. The auditors' report was then submitted, and the manager, R. H. Cook, submitted his report at the same time. It was of particular interest to the assured to notice that the losses for 1920 were almost exactly equal to those of 1919, yet the business in force had increased by a very large percentage. Greater care was being exercised in the selection of risks, and it was hoped by the new plans that were now being formed, and which would be discussed at this meeting, that larger progress could yet be made in this direction. It was pointed out that approximately 60 per cent. of the fires in Western Canada are preventable. It might be of interest to advise the members that the last loss the company had was caused by cats pulling the table cloth from the table and upsetting the lamp, which cost the company \$2,140. Other heavy losses this season had been caused by children playing with matches; defective chimneys also put in their yearly records of losses. Many large barns, however, had also been burned this year by combustion caused by storing damp feed in the lofts. Many fires had also been reported from oily or greasy rags.

The thirty-third annual meeting of the Kent and Essex Mutual Fire Insurance Co. stockholders was held in Tilbury, Ont., on February 16. The following directors were elected for a term of three years: Christian Johnson, Kingsville; Charles T. Sellers, Kingsville; D. H. Brown, Chatham; Franklin Stokes, Dover Centre; Pierre Oriet, Stoney Point; C. C. Chauvin, Windsor, was elected director for a two year term, and T. L. Renaud, McGregor, for one year term. Kingsville was chosen for the meeting place for next year.

# Federal Charter Over-Rides Provincial Laws

Decision Rendered Last Friday by Privy Council Reverses Judgment of Supreme Court of Canada—Now Unnecessary for Company With Dominion Charter to Register in Provinces—A Review of the Cases

A COMPANY holding a Dominion charter cannot be compelled to register under provincial laws in order to do business in a province, according to a decision of the Privy Council of Great Britain, announced on February 25. The provisions of the Companies' Acts of Ontario, Manitoba and Saskatchewan requiring this are held to be *ultra vires*.

Among the points made are the power of the provinces to legislate for incorporation of companies, which is limited to companies with provincial objects. No express power is conferred in the British North America Act to incorporate companies with powers to carry on business in every province, but such power as is covered by section 91 is conferred exclusively upon the Dominion, and enables the Canadian Parliament to incorporate companies and restrict the provinces from interfering with such companies conducting business where they choose.

If the condition of taking licenses had been introduced simply to obtain payment of a direct tax for provincial purposes, or for securing the observance of some restrictions concerning contracts, which had to be observed by the public generally, their Lordships would have been prepared to regard the condition as one within the power of the province to impose; but even then it would have been requisite to see that the provincial legislature was not under that guise really doing something else, such as imposing indirect taxation.

## Reverses Supreme Court Judgment

This decision of the Privy Council reverses the judgment of the Supreme Court of Canada, which was reported in *The Monetary Times* of May 16, 1919. Several companies were concerned in the appeal, but the cases were consolidated in that of *Great West Saddlery Co., vs. the King*. The plaintiff company along with two others were convicted by a police magistrate of Regina of violating the provisions of sections 23, 24 and 25 of the Companies Act of Saskatchewan and on a case stated to the Supreme Court of Saskatchewan the convictions were affirmed. Section 23 provides that all companies carrying on business in the province, whether provincial, Dominion or foreign, shall be registered; that a penalty of \$50 a day will be imposed if they are not registered; that "carrying on business" means the establishment of a permanent place of business. Section 24 provides that any company may be registered on paying the required fees (foreign companies may be refused registration at the discretion of the lieutenant-governor-in-council, but that does not include Dominion companies.) Section 25 provides that every company complying with the provisions of the Act, may receive a license to carry on business and the date of expiration of such license; that the fees shall be determinable by the lieutenant-governor-in-council; that a penalty shall be imposed on certain officers of the companies, not registered, and which are doing business in the province.

The Supreme Court of Saskatchewan held that the above provisions, which were in question, were within the powers of the provincial government to enact—the Supreme Court of Canada unanimously decided the appeal to that Court in the same way, holding the sections *intra vires*.

The reasons for this decision are explained by Chief Justice Davies, in the following parts of his judgment:—

"As a result I cannot conclude that the legislature in this instance has exceeded its powers in enacting legislation requiring all companies, local and foreign, including Dominion, to register and pay an annual fee. Nor do I think the section imposing a penalty upon a Dominion company for every day it carries on business in the province without having paid the annual fee is *ultra vires* or other than a reasonable sanction to the requirement of the payment of the annual tax or fee imposed.

"In the result, however, I have concluded that the Saskatchewan Companies Act as now before us, while in form to some extent objectionable as seeming to require a provincial license to enable a Dominion company to carry on its business in the province may nevertheless be so construed as to be held to be merely a taxing Act, levying an annual tax or fee, alike on local companies as on extra-provincial companies, including Dominion ones.

"The legislature has no power to require the acceptance of a license from it to enable a Dominion company to carry on its business in the province. It might require registration, it might impose an annual tax, it might possibly enact the penalty clause as a sanction for the recovery of the tax, but it could not compel the company to accept a license from it to enable it to carry on its business. The company derived its power to do that throughout the Dominion from the Dominion who gave it its charter, and while the legislature could not prohibit or control the exercise of these powers it nevertheless could, in my judgment, exact the payment of an annual tax from the Dominion company in common with other foreign companies and local companies, which itself created and chartered and could probably enforce the payment of such tax by the imposition of a penalty. I reach this latter conclusion, as I have said, with difficulty and doubt. It is to be regretted that the legislation should take the form it did, but looking at its essence and construing it as I do, I will not hold it to be *ultra vires*."

## Similar Case in Manitoba

In the case of the *Great West Saddlery Co., vs. Davidson*, the decision of the Court of Appeal for Manitoba, the appellant company was incorporated by authority of the Companies Act of Canada and had its head office in Winnipeg. By the provisions of the companies Act of Manitoba which deal with extra-provincial corporations, a license has to be applied for by all those corporations, to the provincial authorities, and furthermore the license will have to be obtained before these corporations can carry on business in the province. The appellant company did not apply for such a license, so the defendant, one of its shareholders, instituted an action to force the company to take such a license, and the attorney-general of Manitoba intervened to maintain the validity of those provisions which were attached by the appellant company.

In the Supreme Court of Canada, Justices Idington, Brodeur, Anglin, held the provisions in question to be *intra vires*, Justices Davies and Mignault, dissenting. As being the most recent decision of the Privy Council on provincial and Dominion authority regarding incorporation of companies, the decision of this case hinged on the explanation given by their lordships in the case of *John Deere Plow Co. vs. Wharton* [1915].

The decision of the dissenting justices and the reasons therefor, in this case were given in three paragraphs of Chief Justice Davies' judgment:—

"It seems to be clear from the decision of the Judicial Committee in the *Wharton* case, *supra*, that while to some extent a provincial legislature may regulate and tax the activities within the province of a Dominion company, it cannot for any purpose prohibit or restrict its entry into the province or its carrying on business there.

"The primary question then with respect to this Manitoba legislation is whether the provisions of Part IV. of its Companies Act, purporting to confer upon such companies when a provincial license has been obtained, and while it is in force, power to carry on business in Manitoba, exercise their powers, enforce their legal rights in the Courts on con-

tracts or otherwise and hold land necessary for their business and until the license has been granted or after it has ceased to be in force to prohibit them from doing any and all of these things, are *ultra vires* of the provincial legislature.

"In my opinion, such legislation, if upheld, would directly deprive the company of its status and powers conferred upon it by its Dominion charter and is clearly contrary to the principles laid down by the Judicial Committee in the *Wharton* case, *supra*, as those which should control and prohibit provincial legislation with regard to Dominion companies."

On the other hand, three judges of the Supreme Court decided that the legislation was *intra vires* of the provincial government. Justice Anglin in his judgment said:—

"The power to exact compliance with legislation of that character implies the right to enforce it by appending appropriate sanctions. So long as the Dominion company, by paying the tax imposed or by making the entry required, has the absolute right to obtain the provincial license its status as a company is unimpaired and the exercise of its powers and functions is not unduly fettered.

"Approaching the Manitoba statute with a view of upholding it, if by fair consideration of them the impeached provisions can be brought within the provincial legislative powers—I think they may be regarded as an exercise of the powers of direct taxation and in regard to the administration of justice and the control of civil rights conferred on the provincial legislatures by s. 92 of the B.N.A. Act and as not involving such an interference with status, capacity or powers of Dominion companies as would bring them within the condemnation of the Judicial Committee in the *Wharton* case."

This majority decision of the Supreme Court of Canada has now been reversed by the Privy Council.

#### NEWS OF INDUSTRIAL DEVELOPMENT

Government May Open the Way for Expansion of Pulp and Paper Trade in the West—British-American Nickel Smelter at Sudbury is Closed—Drop in Price of Woollens

**A**NNOUNCEMENT of the passing of the order-in-council by the Dominion government regarding the sale of pulp-wood limits in the province of Manitoba, which was given in detail in these columns last week, has created a good deal of interest, in that it revives a point which has been the subject of considerable controversy in the past two or three years, namely, the possibilities of the west as a producer of pulp and paper. The western press has been frequently heard from in the past regarding the matter, and the Canadian capitalist is still being urged to hasten the development of paper mills there, and to take advantage of the great home market that there is for paper products. Up to the present time all such efforts have not met with very much encouragement and nothing constructive has been accomplished, but it is the belief this latest action on the part of the government will open the way to a broad expansion of the industry.

A western editor some time ago in sizing up the situation gave the following brief but comprehensive opinion: "Western Canada has the wood and the water powers, it also has the rivers and the streams for driving the logs, and means of transportation by rail is getting more efficient and easy of access year by year. Pulp and paper can be produced as economically in the west as in any other part of the Dominion. It is an industry which will stand the fullest investigation. The market's demand is incessant and growing yearly by leaps. In western Canada there are over 550 daily and weekly newspapers and magazines published with a daily, weekly and monthly circulation of over 1,000,000 copies. The construction of new lines continues at the rate of 1,000 miles or more per annum (branch and main lines), and

new towns are opening up in large numbers each year. The larger proportion of these towns grow into a newspaper stage at a very early date. The demand for paper of all kinds within the next ten years will be enormous, and should be the means of supporting a large number of paper mills, as well as building up thriving communities."

Work on the \$2,000,000 pulp and paper mill at Kenora, Ont., will start within about the next month, according to E. W. Backus, president of the Backus Milling Co., Fort Francis. The ground-wood mill will be in operation before the end of this year, according to Mr. Backus, and will have a capacity of fifty tons, which will be increased to 200 tons per day, as soon as conditions permit. It is expected that between 2,500 and 3,000 men will be working in connection with the mill in a year's time.

It is announced that the Wayagamack Pulp and Paper Co., which closed down their mills a month ago for repairs, will resume operations in a few weeks, at the end of March at the latest. It is understood that the output of the company will be doubled as soon as the mills work full time. Large additions are being made to the present mills.

The Brown Pulp and Paper Co. has bought the Dansereau Island, in the mouth of the St. Lawrence River, where preparations will be made to receive and saw the wood floated down the river. The building of the mills of this company at Ste. Angele, across the St. Lawrence, will begin this spring.

Reports from East Angus, Que., indicate a further closing of a part of the Brompton Pulp and Paper plant. The newsprint mill, it is understood, will continue full time, as the demand for newsprint is still strong. Other departments, representing approximately half the employees, will experience a quiet period. The closing of a part of the plant is said to be for the purpose of making repairs, and should be of short duration. The company has made a good cut of logs and pulpwood, and there is every reason to believe that the big plant will have little idle time.

#### Drop in Woollens Price

Woollen serges and other goods sold by the yard, except fine worsteds, are now being offered by manufacturers at about half of the quotation made this time last year, according to T. Goltman, of B. Gardner and Co., clothing, manufacturers, Montreal, Que. Mr. Goltman said that prices of woollen goods made in Canada, prices of English lines, and of those from the United States, had all tumbled from the peak, which they reached twelve months ago, but that even yet they were still just slightly below the 1919 levels, and still at least double of what would have been considered a fair price in 1914. He stated also that prices of linen canvasses and linings had also been cut in half in Great Britain within the last three weeks, and while these drops in the market would lessen the cost of manufacturing clothing, he did not think next fall's suits and overcoats would be any less costly than those offered in the stores now, most of which were going for less than the prices of manufacture.

The smelter of the British-American Nickel Co. at Sudbury, Ont., has been closed. General Manager Carlyle explains the situation as follows:—"Owing to the extremely bad condition of the market for all metals the corporation finds it necessary to discontinue operations and close down until such time as the markets have become more normal. The directors sincerely regret that this circumstance, over which they have no control, compels them to stop the employment of so many employees, especially at this period of the year, but unfortunately no other course is possible."

#### Pulverized Coal

The Inter-Provincial Coal Co., Ltd., Winnipeg, after three years spent in the investigation of every method in vogue in Europe and America has reached the conclusion that by far the most perfect system of burning coal, is by burning it in pulverized form for both industrial and domestic use. A public demonstration will be made in Winnipeg shortly. It is expected that arrangements can be made to

demonstrate with powdered peat as well as with powdered coal.

Two plants in Owen Sound, Ont., namely, North American Furniture Co. and Owen Sound Bent Chair Co., have resumed operations and expect to get back to capacity production within a few weeks. The resumption of manufacturing has made a big difference in the employment situation of that municipality.

The plant of the Dyrob Steel Co., at Orillia, Ont., is now operating. The company was formed in October of last year, and temporary quarters were secured in the National Hardware factory, on the outskirts of Orillia. Its products include chisels, pliers, pincers, wrenches, springs, gears, cutlery for domestic use. A flexible skate is also manufactured. During the spring months it is proposed to build a new plant at the cost of \$50,000.

In view of the large orders on hand, totalling \$14,000,000, the National Steel Car Co., Hamilton, Ont., faces a pleasant outlook. The cost of raw material and labor now shows a considerable decrease, which adds favorably to the future of the company. In 1915 the company contracted with Paris, Lyons and Mediterranean Railway Co. for a large order of cars. Forfeited war conditions arising during the performance of this contract resulted in a loss to the company surpassing more than its capital stock, and left a deficit of \$1,603,184. The trouble with the French government is now drawing to a satisfactory conclusion.

A cut of five cents per hour, in employees' wages, which is a little less than ten per cent., has been announced by the Halifax Shipyards, Ltd. The reduction was necessary to lower costs sufficiently to enable the company to compete for business. The company is employing about 1,300 men at work on ship construction, and repairs and everything is going along smoothly at the plant.

#### NEW INCORPORATIONS

Total Capital for Week ended March 1 is \$17,851,000.  
Compared With \$16,482,500 Previous Week

**A**UTHORIZED capital of \$17,851,000 is represented by companies whose incorporation was reported to *The Monetary Times* during the week ended March 1, compared with \$16,482,500 the previous week. A comparative summary by provinces is as follows:—

	Week ended Feb. 22.	Week ended Mar. 1.
Dominion .....	\$ 3,892,500	\$ 3,848,000
Alberta .....	.....	1,766,000
British Columbia .....	775,000	184,000
Manitoba .....	266,000	245,000
New Brunswick .....	310,000	.....
Ontario .....	9,099,000	10,205,000
Prince Edward Island .....	.....	340,000
Quebec .....	1,839,000	1,263,000
Saskatchewan .....	301,000	.....
Total .....	\$16,482,500	\$17,851,000

The following is a list of companies incorporated under Dominion charter with head office and authorized capital:—

Electric Phonograph Co. of Canada, Ltd., Toronto, \$250,000; Carnol, Ltd., Montreal, \$200,000; Farmer-Milford, Ltd., Montreal, \$40,000; L. P. Manitoba.—Equitable Securities Co., Ltd., Winnipeg, \$100,000; Home Fuel and Supply Co., Ltd., Winnipeg, \$50,000; Canadian Rogers Sheet Metal and Roofing, Ltd., Winnipeg, \$20,000; Elias Reich and Co., Ltd., Winnipeg, \$40,000; Pure Food Products, Ltd., Winnipeg, \$5,000; Stephenson-Russell, Ltd., Winnipeg, \$30,000.

Ontario.—Orillia Lawn Bowling Assoc., Ltd., Orillia, \$40,000; R. C. Matthews and Co., Ltd., Toronto, \$500,000; West End Laundry and French Cleaners, Ltd., Toronto, \$100,000; Conklin Ginseng Nursery Plantations, Ltd., Toronto, \$40,000; Cotton Products, Ltd., Toronto, \$40,000; C. H. Burgess and Co., Ltd., Toronto, \$500,000; Atwood Coal, Wood and Cartage Co., Ltd., Atwood, \$5,000; W. A. Mackenzie and Co., Ltd., Toronto, \$500,000; Dominion Engineering Agency, Ltd., Toronto, \$40,000; Spitzdorf Electrical Co., Ltd., Toronto, \$15,000; Killakes, Ltd., Fort William, \$60,000; Chamberlain Coal and Oil Development Co., Ltd., Shelburne, \$2,000,000; Oxford Clothing Co., Ltd., Toronto, \$150,000; Allied Porcupine Gold Mines, Ltd., Toronto, \$5,000,000; F. L. Wilke Co., Ltd., Toronto, \$100,000; Royal-Flush Oil and Gas Co., Ltd., Toronto, \$500,000; Master Spark Plug Co., Ltd., Toronto, \$125,000; Soo Garage, Ltd., Sault Ste. Marie, \$40,000; Bright Light Electric, Ltd., Toronto, \$40,000; Orford Farmers Co-operative Co., Ltd., Muirkirk, \$40,000; Lace Goods Co., Ltd., Toronto, \$250,000; Wiesberg's, Ltd., Toronto, \$40,000; Richardsons, Ltd., Toronto, \$80,000.

Prince Edward Island.—Greenwood Foxes, Ltd., Charlottetown, \$200,000; Springton Lumber Co., Ltd., Charlottetown, \$40,000; J. Stanley Wedlock, Ltd., Charlottetown, \$100,000.

Quebec.—Ronalds Press and Advertising Agency, Ltd., Montreal, \$500,000; P. L. Baldwin and Sons, Ltd., Coaticook, \$99,000; Montreal Electrotype Co., Ltd., La Maison Albert, Lt., Montreal, \$20,000; Northwestern Oil Co., Ltd., Montreal, \$250,000; Adler, Ltd., Sorel, \$20,000; Quebec Cereal and Grain Co., Ltd., Quebec, \$5,000; City Sponging Works, Ltd., Montreal, \$20,000; Med Paquette, Ltd., Montreal, \$149,000; Arrow Clothing Co., Ltd., Montreal, \$20,000; International Athletic and Social Club, Montreal, \$5,000; D. E. S., Ltd., Quebec, \$75,000; Claridge Hotel Corp., Montreal, \$60,000; Armstrong and Cook Co., Ltd., Montreal, \$40,000.

Alberta's coal production for 1920 will be 30 per cent. in excess of last year's, it is estimated by the government mines branch. A total output of well over 6,500,000 tons is estimated, as compared with 5,022,412 tons in 1919. For the nine months of the year, to the end of September, a total of 4,750,964 tons has been mined, the output for September alone being 618,093 tons.

## Fifty-one Years of Steady Progress

One of the most brief yet impressive histories of Canadian financial institutions is contained in the annual record of The Mutual Life of Canada. The current issue will be ready in a few days. A copy will be sent to you on application. It contains fifty-one successive summaries, showing in the parallel columns the increase from year to year of the company's various receipts, expenditures, etc. No other document could better convey the idea of solid, uniform achievement, and the momentum of the advance is now greater than ever. The prospects are bright for a still more rapid expansion within the next few years. The assets of the company exceed \$40,000,000, and the assurances in force have reached \$206,000,000. There is a gross surplus of more than five million dollars over and above the amount necessary to guarantee all policies, so that the position of the company, in spite of the strain of recent years, is one of uncommon strength.

# News of Municipal Finance

**Red Deer Debenture Debt Has Been Substantially Reduced—Revenue Assets Show Good Surplus Over Liabilities—Ottawa Hydro System Had Favorable Year—Vancouver is Faced With Deficit According to Tentative Estimates—Calgary's Assessment Reduced, While Edmonton's Figure is Same as Last Year**

**New Toronto, Ont.**—The tax rate for 1921 will be 37.9 mills. The total amount to be raised by taxes this year is \$100,282.

**Glace Bay, N.S.**—According to the auditors' report for 1920, revenue from all sources amounted to \$258,293 and expenditures \$217,682, leaving a surplus for the year of \$40,610.

**Winnipeg, Man.**—The estimated budget of the public school board for 1921 is \$2,884,635, being an increase over the previous year of \$608,853. A balance of \$5,110 marks the efforts of the financial committee for 1920.

**Brantford, Ont.**—The municipal railway in 1920 had a surplus of \$2,163, according to the annual report submitted to the city council. The total receipts were \$191,733, and operating expenses \$148,581, leaving a gross operating profit of \$43,152, which, after meeting all capital calls, including interest, sinking fund, a debenture paid off and deferred maintaining charges, left the above balance.

**Regina, Sask.**—The city is indebted to the bank to the extent of \$553,500 for overdrafts on current account during the past four years, the aldermen have been notified by Commissioner Thornton. The matter was referred to the special committee with power to act. The proposal made by the commissioners is that the council provide for \$226,500 of this amount by an issue of treasury bills, and that last year's deficit of \$218,000 be provided for in the tax levy this year. This would still leave \$109,000 to be provided for in some other way. The commissioners recommended immediate action on the ground that the bank is pressing for a settlement.

**Edmonton, Alta.**—Approximately, the city's assessment for 1921 will be \$80,000,000. This amount is practically the same as in the previous year. Assessor Walker states that he is unable to give the actual amount of the land and building assessment at this time. He estimates that the land assessment would drop about \$500,000 on last year's total of \$61,997,000. In the case of buildings, the increase would be around \$500,000 on the 1920 assessment of \$17,194,000, so there would be no appreciable difference from last year in the general assessment of nearly \$80,000,000. On account of the ruling of the utilities commission, unsubdivided lands in the outlying subdivisions are rated as agricultural areas with valuations ranging from \$50 to \$150 an acre.

**Vancouver, B.C.**—The city is faced with a deficit of slightly over \$1,000,000, according to tentative estimates of the chairman of the finance committee. The total expenditure is anticipated to be somewhere around \$7,370,000. All present sources of taxation are now utilized practically to the limit. The mill rate is almost as high as allowed by the charter. There is the possibility of taxing improvements to the full amount of the assessed value, instead of only 50 per cent. as at present, but the burden already carried by the property owners makes it very improbable that the city council would entertain the idea of adding to their burden. The city is again demanding that the province turn over the revenue from the amusement tax and motor tax collected in this city, but even with this included the total revenue would be far short of what is needed.

**Ottawa, Ont.**—The report of the municipal Hydro-Electric Commission for 1920 shows that the revenue for that year was \$305,310. This is an increase over the previous year of a little over \$30,000. The operating expenses for 1920, including interest and sinking fund charges, are \$250,101. This is an increase over the previous year of about \$21,000. The gross surplus for 1920 is therefore \$55,209, and

against this \$42,800 has been charged for depreciation, leaving a net surplus of \$12,409.

A statement of assets and liabilities is also submitted by the commission. This shows that the value of the plant is \$1,122,142. There are also other assets, including sinking fund \$205,404, and victory loan bonds \$50,000, which make the value of the total assets \$1,464,762. The liabilities of the plant are debentures outstanding \$700,000, and other liabilities, making a total of \$784,678. There is thus a balance of assets over liabilities of \$680,084. The amount which is given as the value of the plant represents the amount of money actually put into it, and not its value at present day prices, which will undoubtedly be considerably in excess of this value. The plant has been owned by the city for sixteen years.

**Red Deer, Alta.**—In the annual financial statement of the municipality shows a reduction in the debenture debt during 1920 from \$313,561 to \$297,567. There is also a capital surplus of \$170,000, compared with \$165,000 in the previous year. Revenue assets are given as being \$67,686 in excess of liabilities of a similar category. In 1919 the surplus in this regard was \$52,105. Arrears of taxes total \$142,004, compared with \$124,917 previously. The increase, of course, is due to arrears for 1920, the total of arrears for previous years having been substantially reduced. The total of tax arrears up to the end of 1919 as shown in the 1919 report was \$124,917, while the total up to the end of 1919 as shown in the 1920 report is only \$99,733. After deducting water-works and local improvements the net debenture debt is \$147,129.

A. T. Stephenson, commissioner, in explaining some of the principal features of the 1920 report, remarks: "We have not issued any debentures for some years past, and the debenture debt has been reduced by \$72,261 since 1914. We have refused to issue debentures for any purpose whatever, and are striving to get this debt reduced as much as possible. For some years now we have made an extra levy to build up a revenue surplus account to take care of uncollectable taxes, most of which are school taxes only on subdivided lands outside the city limits. This account now stands at \$67,686.

"While the arrears of taxes are large, a considerable part of the arrears are covered by agreements whereby the current taxes and a proportion of the arrears are paid annually. Property owners who served in the great war were granted extension of time for payment of arrears in all cases where they wished it. Land tax only, with a tax on rental value of business premises, with no tax on improvements, has been in force in Red Deer for many years, and it is rather remarkable that, under this unsound, in my opinion, system of taxation, Red Deer has managed to maintain such a sound financial position up to the present time. The imposition of a direct tax by the provincial government, on all lands in the city, and the fact that this same government is taking many revenues rightfully belonging to the city, and not giving sufficient grants to hospitals and schools, added to the tremendous increase in the school demands on the city, make it necessary to find other sources of revenue.

"The council is now asking for legislation granting the city power to collect a service tax of not more than \$10 per year from all residents earning more than \$75 per month, and a householders tax of not more than 10 per cent. of the rental value of the premises, and is considering assessing improvements for 1922. We have cash in the bank at present, sufficient to pay all treasury bills and interest due in 1921, and expect this year, as usual, to pay all debentures when due and presented."

# Government and Municipal Bond Market

**New Edmonton Deal is Arranged—Trustees of Morris Brothers Take Thirty-Day Option—Victory Loan Issues are Mostly Stronger—Short Term Bonds Have Yielded Slightly—Stratford Sold Securities Locally on Six Per Cent. Basis—Prescott and Russell Loan on 6.18 Per Cent. Basis**

SEVERAL municipal issues were disposed of during the past week at prices consistent with recent tendencies in the market. The united counties of Prescott and Russell paid about 6.18 per cent. for their loan, which was considered a good rate. Last August the counties paid 6.70 per cent. The provincial government guarantee helped Morris R.M., Man., to get a reasonably good price for its securities.

The general bond market remains firm to stronger, with a good demand throughout. With demand for funds for commercial purposes becoming less urgent, our banks are again assuming the role of the investor, and by so doing are influencing the situation to a considerably extent. The January bank statement shows an increase in government and municipal security holdings of about \$4,500,000 over the previous month.

Victory bonds continue active, with prices fractionally stronger. The demand is mostly for the long-term issues, and, as a result, the short-term loans have suffered slightly. The following figures illustrate the recent trend of prices:—

	Control	Last week.		This week.	
	price.	High.	Low.	High.	Low.
1922 .....	98	98 $\frac{7}{8}$	98	98 $\frac{7}{8}$	98 $\frac{1}{4}$
1927 .....	97	98 $\frac{7}{8}$	97	98	97
1937 .....	98	99 $\frac{3}{4}$	98 $\frac{3}{4}$	99 $\frac{7}{8}$	99 $\frac{1}{2}$
1923 .....	98	98 $\frac{1}{2}$	97 $\frac{3}{4}$	98 $\frac{3}{4}$	97 $\frac{1}{2}$
1933 .....	96 $\frac{1}{2}$	98 $\frac{3}{4}$	98	98 $\frac{3}{4}$	98 $\frac{1}{4}$
1924 .....	97	96 $\frac{3}{4}$	96	96 $\frac{3}{4}$	96
1934 .....	93	95 $\frac{1}{2}$	95 $\frac{1}{4}$	95 $\frac{3}{4}$	95 $\frac{1}{4}$

## Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
New Toronto, Ont. . .	\$ 58,000	6 $\frac{1}{2}$	.....	Mar. 5
St. Andrews R.M., Man. . . . .	100,000	5 $\frac{1}{2}$	30-instal.	Mar. 5
Danville, Que. . . . .	33,000	6	Various	Mar. 7
Trail, B.C. . . . .	37,000	7	20-years	Mar. 7
St. John, N.B. . . . .	54,000	6	25-years	Mar. 7
St. Thomas, Ont. . . .	165,893	5 $\frac{1}{2}$ & 6	Various	Mar. 8
Burnaby, B.C. . . . .	131,700	6	Various	Mar. 14
Sherbrooke, Que. . . .	513,000	6	10-years	Mar. 14
Drumheller, Alta. . . .	28,000	7	20-instal.	Mar. 26
Pipestone R.M., Man. .	80,000	..	.....	Mar. 31

**Sherbrooke, Que.**—The city is offering for sale \$513,000 6 per cent. debentures. The securities mature March 31, 1931. Tenders close on March 14, 1921.

**New Toronto, Ont.**—Tenders will be received until March 5, 1921, for the purchase of \$58,000 6 $\frac{1}{2}$  per cent. school debentures. A. F. Ritchie, treasurer.

**Pipestone R.M., Man.**—Tenders will be received until March 31, 1921, for the purchase of \$80,000 good roads debentures. G. F. Birney, secretary-treasurer, Reston, Man.

**Burnaby, B.C.**—Tenders will be received up till March 14, 1921, for the purchase of \$131,700 6 per cent. debentures, maturing December 31, 1935 and 1940. (See advertisement elsewhere in this issue.)

**St. John, N.B.**—Tenders will be received by the Board of School Trustees of St. John, N.B. until March 7, 1921, for the purchase of \$54,000 6 per cent. 25-year debentures, in denominations of \$500 each and with interest payable half-yearly. A. G. Leavitt, secretary.

**St. Thomas, Ont.**—Tenders will be received until March 8, 1921, for the purchase of the following debentures, totalling \$165,893.65: \$3,387.42 5 $\frac{1}{2}$  per cent., due December 24, 1938-39; \$147,401.04 6 per cent., due February 1, 1937-51; \$15,105.19 6 per cent., due February 1, 1938-41.

**Wainwright, Alta.**—The town is offering \$10,000 6 $\frac{1}{2}$  per cent. ten-year bonds, of \$100 each, to local citizens. The bonds are being offered at 96, giving a yield of 7.08 per cent. to the investor in the town. The bonds are an obligation of the town of Wainwright, and in addition are a first claim against all uncollected taxes prior to 1919.

## Debenture Notes

**Dutton, Ont.**—A by-law to spend \$20,000 on a community hall has been carried by ratepayers.

**Silver Creek, Man.**—Voting on a \$25,500 hospital debenture by-law, will take place on March 8, 1921.

**Shellmouth, Man.**—Ratepayers will be asked to vote on a \$24,500 hospital debenture by-law on March 8, 1921.

**Chilliwack, B.C.**—\$24,500 6 per cent. 10-year debentures for road paving and \$21,500 6 per cent. 10-year debentures for the same purpose.

**Boulton, Man.**—A by-law authorizing the borrowing of \$10,700 to erect a municipal hospital will be submitted to the ratepayers on March 8, 1921.

**Russell, Man.**—On March 8, 1921, ratepayers will be asked to approve a by-law authorizing the borrowing of \$13,800 for a municipal hospital.

**Woodstock, Ont.**—The city council has decided to submit a by-law to ratepayers at an early date providing for the raising of \$65,000 for improvements and building of an addition to the Woodstock Hospital.

**British Columbia.**—The following certificates of authorization have been granted by the municipal department: Kent, for \$20,000 6 per cent. 20-year debentures and \$20,000 6 per cent. debentures, payable January, 1941, under Hammersley Prairie Dyking by-law.

**London, Ont.**—The legislature has approved of the following debenture issues: \$257,500 for the London and Port Stanley Railway improvements; \$125,000 for electric light extensions; \$135,000 for waterworks extensions; \$175,000 for storm sewer construction; \$50,000 each for the home for incurables and the Children's Memorial Hospital.

**Toronto, Ont.**—By-laws have been passed by the city council providing for the issue of debentures amounting to \$1,496,700 for the purpose of erecting and enlarging certain public schools and purchasing and enlarging school sites and \$500,000 for the purpose of purchasing new sites and making additions to collegiate institutes and high schools.

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board, from February 1 to 12, 1921:—

8 per cent. School Debentures—Meadow River, \$2,000, 10-years annuity; Peebles, \$1,200, 10-years annuity; Gibson Creek, \$2,000, 10-years instalment; Briardale, \$600, 10-years instalment; Tilney, \$800, 5-years annuity; Craik, \$35,000, 20-years annuity; Copeland, \$1,700, 10-years annuity; Penzance, \$17,400, 20-years annuity; Buccrough, \$800, 5-years annuity; Fairwell Creek, \$3,500, 15-years annuity.

8 per cent. 15-years Annuity Rural Telephone Debentures—Hillsborough, \$800; Bow Valley, \$2,500; Carruthers, \$34,000.

Village of Bladworth, \$4,000 8 per cent. 15-years annuity, for concrete sidewalks.

# Yours to Command

It was an old fashioned courtesy in correspondence to subscribe oneself "Yours to command."

We are not exactly old fashioned, but we are willing and particularly well equipped to serve buyers and sellers of Victory Bonds.

May we have the pleasure of handling your orders?

## Bond Sales

Stratford, Ont.—The city has sold the following 6 per cent. straight-term bonds locally at par: \$20,000, 30-years; \$22,000, 10-years; \$8,000, 15-years.

Paris, Ont.—C. H. Burgess and Co. have purchased an issue of \$40,000 6 per cent. 20-year debentures of the G. W. McFarland Co., which are guaranteed by the municipality, at a price of 92.583, which is on about a 6.67 per cent. basis.

Vegreville, Alta.—W. Ross Alger and Co. have purchased and are offering \$5,000 7 per cent. debentures of the town, dated August, 1920, and maturing August, 1940, at a price of 92.44, yielding 7½ per cent.

North Vancouver, B.C.—In our issue of February 11 last we stated, in error, that \$41,000 6 per cent. debentures had been disposed of to the Royal Financial Corporation. The issue was purchased by the Canadian Financiers Trust Company, Vancouver, B.C.

Mossbank, Sask.—One tender at par was received for the \$2,000 8 per cent. 10-instalment fire protection debentures of the village. The matter has been delayed on the suggestion of the officials of the Canadian National Railways, to await the decision of the railway as to making Mossbank a divisional point. This will affect the value of the securities.

Pointe Claire, Que.—An issue of \$130,000 6 per cent. serial bonds maturing in 1945, has been purchased by Nesbitt, Thompson and Co., at a price of 97.529, which is on about a 6.30 per cent. basis. The other bids were as follows: Versailles, Vidricaire and Boulais, 97.32; A. E. Ames and Co., 96.13; Hanson Brothers, 96.01; Dominion Securities Corp., Ltd., 95.86; Credit Canadien Inc. 95.77; Provincial Securities Co., 96.76; Foster, Barrett, Riepert and Low, Ltd., 95.61; Rene T. Leclerc, 95.125.

Morris R.M., Man.—As a result of the guarantee of the provincial government, the municipality was able to dispose of its \$50,000 6 per cent. 20-instalment debentures to Strang and Snowden at a shade under 6.50 per cent. basis, the price being 96.11. Other tenders received were: C. Cross and Co.,

of Regina, 95.91; Harris, Read and Co., Regina, 95.83; J. A. Thompson, Winnipeg, 95.58; Bond and Debenture Corporation, Winnipeg, 95.53; Wood, Gundy and Co., 95.42; Bell, Gouinlock and Co., Toronto, 95.28; Canadian General Securities Corp., Winnipeg, 95.03; R. C. Matthews and Co., Toronto, 94.18.

Prescott and Russell Counties, Ont.—R. C. Matthews and Co. have been awarded an issue of \$100,000 6 per cent. 20-instalment debentures at a price of 98.55, which is on about a 6.18 per cent. basis. The following tenders were received:—

R. C. Matthews and Co. ....	98.55
A. E. Ames and Co. ....	97.93
Dymont, Anderson and Co. ....	97.687
Wood, Gundy and Co. ....	97.66
Harris, Forbes and Co., Inc. ....	97.579
McLeod, Young and Weir and Co. ....	97.09
Dominion Securities Corp. ....	96.81
W. A. Mackenzie and Co. ....	96.21

Glace Bay, N.S.—Last fall the municipality offered for sale \$175,000 6 per cent. 30-year school debentures and \$15,000 6 per cent. 15-instalment paving debentures. These securities were not sold, but W. F. Mahon and Co. took an option on the school issue. At a meeting of the finance committee last week, W. F. Mahon stated that his company had only been able to dispose of \$85,000 up to the present and that the company would take that amount immediately, with an option on the remainder for 15 days. The finance committee agreed to this and the \$85,000 was sold at a price of 83, which is on about a 7.43 per cent. basis.

Saskatchewan.—The following is a list of sales reported by the Local Government Board, from February 1 to February 12, 1921:—

Schools.—Shellbrook, \$1,200 8 per cent.; Mr. McDonald, Prince Albert. Zealandia, \$1,500 15-years 8 per cent.; H. L. Morrison, Zealandia. Wauka, \$1,200 10-years 8 per cent., Slawa, \$1,200 15-years 8 per cent., Church Hill, \$1,800 10-years 8 per cent.; Waterman-Waterbury, Regina. Weyburn, \$5,000 30-years 6½ per cent.; Weyburn Sinking Fund, Weyburn. Paynton, \$31,000 20-years 8 per cent.; Harris, Read and Co., Regina. Bitter Lake, \$4,200 10-years 8 per cent.; H. J. Birkett, Toronto, Ont.

Rural Telephones, 8 per cent.—Verdun, \$1,000 15-years; Pert and Pert, Regina. Langbank, \$850 15-years, Moosbank, \$1,000 15-years, Meyronne Southern, \$1,000 15-years; C. C. Cross and Co., Regina. Southminster, \$1,000 15-years, Sunderland, \$2,100 15-years, North Redvers, \$1,900 15-years, Noremac, \$1,500 15-years; W. L. McKinnon and Co., Regina. Middleton, \$2,950 15-years; R. McLeod, Regina. Surbiton, \$200 10-years; local purchaser, Surbiton. South Church-bridge, \$2,500 15-years; Regina Public School Sinking Fund.

Towns.—Melfort, \$1,500 20-years 6½ per cent., Melfort, \$6,900 10-years 6½ per cent.; local purchaser.

## Edmonton Bond Deal Arranged

A new bond deal, involving the release of the major portion of the Edmonton, Alta., securities held under court orders in Portland for nearly two months, was accepted by the city council last week. Without further delay, all but \$150,000 of \$1,600,000 now in the Oregon city are to be transferred to the Imperial Bank of Canada at Vancouver, British Columbia. Under the new arrangement the bonds are to be removed to Vancouver, with the exception of \$150,000 worth to be left in Portland. The trustees will have an option of thirty days on the sale of the whole issue, the plan being to replace the bonds in Portland with drawings from Vancouver as those left on the American side are taken up. At the expiration of thirty days the option expires and all unsold bonds are to be returned to Edmonton.

Mayor Duggan explained to council that the trustees wished to have a portion of the bonds on hand so that when sales were made there would be immediate delivery instead of having to wait some time to get them from Vancouver. It was felt that the sales would be helped if there was no delay whatever in delivery.

**IDLE MONEY**

**I**n these prosperous days the earning power of money is great. Industrial and Municipal expansion is calling for huge appropriations, offering investors high returns on fully secured capital.

Those whose savings are lying by, stagnating at merely nominal interest, have now an opportunity to place their funds—"Idle Money"—to great advantage, assured of considerable profits practically without risk.

We have listed a number of these sound investments in which we strongly advise the placing of "Idle Money." A letter marked "Service to Investors" will put you in possession of facts concerning these certain sources of income.

CORPORATION SECURITIES MARKET

**Bearish Tone Again in Evidence on Stock Exchanges—  
Great West Bank Shares Offered—Abitibi Sells Bonds  
in United States—Brompton and Howard Smith  
to Issue Securities**

**A** BEARISH tone was again in evidence on the Canadian stock exchanges during the past week, the chief influence being from the pulp and paper section. At times there were signs of release of the pressure, but price enhancements were of moderate proportions. There has been no change in fundamental business conditions to cause any modification in the sentiment, and the speculative public is still inclined to take a short-distance view of the general situation.

Trading figures indicate that liquidation of stocks was not quite so severe as last week. In Montreal the turnover of listed stocks was 73,456 shares, as against 97,834 previously, while in Toronto the turnover was 15,761, compared with 29,956. Bond trading in Montreal amounted to 1,737,050, compared with \$1,964,350 a week ago, while in Toronto there was an increase from \$1,964,350 to \$2,840,350.

The Canadian Pacific Railway Company is petitioning for an act giving it authority to issue bonds, debentures or other securities as collateral to or in lieu of any consolidated debenture stock which it has now the authority to issue or will have the authority to issue later. The proposal is that this should be secured by pledge of the consolidated debenture stock or secured upon the company's income for payment of interest on the outstanding consolidated debenture stocks issued.

**Great West Bank Shares**

The shares of the Great West Bank of Canada, which was incorporated in July, 1920, are now being offered for sale in the west. The authorized capital is \$5,000,000, divided into shares of \$100 each, of which \$2,000,000 is offered now at \$125. The preliminary announcement makes "a special offer to subscribers, good until March 15 next, of a five dollar brokerage on each share subscribed." This brokerage is evidently to be repaid when the bank commences business. The cost of promotion is estimated at \$7.50 per share, leaving \$12.50 as reserve on each share issued. The payments are to be made as follows: 35 per cent. on application, 15 per cent. on May 1, 25 per cent. on September 1, 25 per cent. on November 1, and 25 per cent. on December 1. The shares are being sold by the General Bond Corporation, Ltd., McCallum-Hill Building, Regina.

**New Pulp and Paper Financing**

Notwithstanding the large amount of new financing accomplished by Canadian pulp and paper companies in 1920, the requirements of the industry in this regard have not yet been satisfied. Already three bond issues have been made this year and several more are in prospect. This week the board of directors of the Abitibi Power and Paper Company met in Montreal and approved of the sale to Peabody, Houghteling and Company, of Chicago and New York, of \$4,000,000 par value of 8 per cent. ten-year consolidated mortgage sinking fund bonds. These bonds are being issued for the purpose

of reimbursing the treasury of the company for construction expenditures made on its new plant. The bonds are a part of a total authorized issue of \$14,000,000, the balance being reserved for the refunding of prior lien bonds and for additions to its working capital, under strict provision of issue. Work on the company's new plants is being pushed with all diligence, and it is expected that they will be ready for operation on May 1 next. Although officials of the Abitibi Company have declined to discuss the possibility of the new bonds, or a portion of them, being offered in Canada, it is generally understood that the issue will be confined entirely to the United States.

At the special meeting of the shareholders of the Howard Smith Pulp and Paper Mills, Limited, in Montreal, this week, the plan for the company's new financing was unanimously ratified. Of the new securities authorized of \$7,000,000, \$1,000,000 will immediately be sold, while \$2,500,000 will be held in escrow. The balance of \$3,500,000 will be retained in the treasury. The issue is of 7 per cent. 25-year refunding sinking fund gold bonds.

A meeting of shareholders of the Brompton Pulp and Paper Company will be called immediately, to approve of the proposal of the directors to issue \$3,000,000 par value bonds of the company. The total funded debt of the enterprise at the present, including its two United States subsidiaries, is \$3,843,000.

**Other Capital Changes**

Shares of the Twin City Arena Company, Ltd., which has just been incorporated with an Ontario charter and capital of \$250,000, are being offered locally in Kitchener, Ont. The par value is \$50.

Application has been made by the Bathurst Electric Light and Water Power Company, Bathurst, N.B., to the provincial Public Utilities Commission to increase its capital from \$145,000 to \$2,000,000, and to issue bonds to the amount of \$1,500,000. The power company desires to take over all the power rights from the Bathurst Lumber Company, thus necessitating the above capital changes.

The Liberty Tire and Rubber Company of Canada, Ltd., Montreal, is offering shares. The company is incorporated under the laws of the Dominion, with an authorized capital of \$500,000, of which \$250,000 is 8 per cent. preferred cumulative participating, and \$250,000 common stock. The preferred is being offered at \$10 per share, and a bonus of 25 per cent. common is being offered. Jos. O. Gourre, of Jos. O. Gourre and Co., Montreal, is president of the company, while the board also includes two directors of the Liberty Tire and Rubber Co., of Philadelphia.

Preferred shares in London Motors, Ltd., of London, Ont., are now being offered direct to the public at par. The company received an Ontario charter early in February, and is capitalized at \$1,000,000, half preferred and half common, par value in each case being \$10. It is planned to manufacture a car to be known as the "London Six," and to deal in cars generally. W. R. Stansell, formerly an automobile dealer, of Amherstburg, Ont., is president, and receives \$40,000 of preferred stock and \$460,000 of common in return for a site and building on King Street, London, valued at \$120,000, a factory site and certain plans.

# King Edward Hotel of Toronto Reports Best Year in History

**Net Earnings Amounted to \$138,897, Equivalent to 14 Per Cent. on Common Stock. New Building Will be in Operation This Year.**

The fourth Annual Meeting of the Shareholders of the King Edward Hotel Company, Limited, was held at Toronto on Tuesday, March 1st. The chair was occupied by the President, Mr. Frank A. Dudley, and the report submitted by him to the Shareholders was eminently satisfactory.

Some of the outstanding features of the report submitted by President F. A. Dudley are:—

1. Gross earnings equivalent to 28% on the outstanding common stock.
2. Net earnings equivalent to 14% on the common stock after payment of all operating expenses, salaries, taxes, interest, maintenance and depreciation.

After paying for all repairs and maintenance the Company set aside as additional reserve for depreciation no less a sum than \$56,892.75. The Depreciation Reserve now stands at \$152,007.90. After payment of dividends at the rate of 10% the Company increased its surplus by \$38,897.85. It now amounts to over \$100,000.00.

During the year all outstanding bills payable have been retired. During the year the fixed inventory on hand increased from \$288,200.88 to \$334,733.01, and after providing for all liabilities the surplus carried forward has reached the sum of over \$100,000.00.

The new building, which will contain five hundred guest rooms, as well as stores, offices and public space, is rapidly nearing completion, and it is estimated by the management that when the new building is in full operation the net profits to the King Edward Hotel Company will be over \$400,000 per annum. On the completion of the building, Toronto will have one of the finest hotels on the American continent, the largest hotel in Canada and the highest hotel in the British Empire. Retail business in Toronto will receive considerable impetus from the completion of the new building, as the city will then be able to accommodate large conventions and large numbers of tourists, who invariably are good contributors to the general prosperity of the city.

The following Board of Directors were elected:—F. A. Dudley, President; F. W. Rockwell, Vice-President; W. J. Cluff, W. A. Mackenzie, Geo. H. O'Neil, J. H. Spence, D. M. Johnson.

The Profit and Loss Account, submitted by President Dudley, was as follows:—

## Profit and Loss Account for Year Ending December 31, 1920

Balance brought forward from December 31st, 1919	\$ 61,595.65
Operating Profit for year ending December 31st, 1920, after payment of Taxes, Salaries, etc.	\$284,700.00
<b>Less</b>	
Interest on 1st and 2nd Mortgages	\$80,000.00
Carried to Depreciation Reserve after payment of Maintenance Charges	56,892.75
	145,892.75
Amount applicable to Dividends	145,892.75
Dividends paid during year	138,897.85
Carried forward to Surplus Account	100,000.00
	38,897.85
Net Surplus December 31st, 1920	\$100,493.53

At the meeting of the Board of Directors held subsequent to the Annual Meeting Mr. F. A. Dudley was re-elected President, and Mr. Frederick W. Rockwell, Vice-President. At this meeting also the regular half-yearly dividend on the common stock of 5% was declared, payable April 15th next.

# Corporation Finance

**Montreal Cottons Had Satisfactory Year—British Columbia Fishing and Packing Statement Contains No Unusual Changes—King Edward Hotel Profits Increased Last Year—Asbestos Corporation Reports Record Operations—Canadian Pacific Railway Net Earnings Show a Slight Improvement in January**

**Canadian Pacific Railway.**—Gross earnings of the road for January amounted to \$14,465,430, operating expenses to \$13,824,005, leaving net at \$641,424. In other words for every dollar the company received in revenue, it paid out approximately 95 cents in operating expenses. Comparison of the January earnings follows:—

	Jan., 1921.	Jan., 1920.	Increase.
Gross .....	\$14,465,430	\$13,914,569	\$550,860
Expenditure ..	13,824,005	13,328,628	495,377
Net .....	\$ 641,424	\$ 585,941	\$ 55,483

**Asbestos Corporation of Canada.**—Profits of the company from operations during the past twelve months of 1920, after provision was made for government taxes, amounted to \$1,661,672, a gain of \$187,020 over 1919, when the total reached the then unprecedented level of \$1,473,752 and an increase of \$484,493 over the 1918 exhibit. The corporation's net revenue for the twelve months ended with 1920 reached \$1,786,938 against the 1919 total of \$1,573,317, and that of \$1,253,823 in the preceding period. After all deductions there remained a balance available for distribution among the holders of the company's participating preferred and common stock of \$1,058,940, representing approximately 15 per cent. on the combined issues. This compares with 14.4 per cent. in 1919, 11.4 in 1918, and 3.6 per cent. in 1917. After all deductions, and with the addition of the balance carried forward at the end of the preceding fiscal period of the enterprise, total surplus, as at December 31 last, reached the substantial total of \$2,052,831, the sum of \$466,440 being added as a result of the year's successful operations.

The strong working capital position disclosed in former statements underwent material augmentation during the year, net working capital at the end of 1920 amounting to \$3,398,494, compared with \$2,921,728 in the 1919 report, and \$2,353,355 in that of 1918. The increase was due mainly to the growth in the company's investments, which stood at \$2,038,746 at the end of last year, an increase of upwards of \$400,000. Cash in hand is shown in the statement under review at \$614,808, or less by almost \$160,000 from the total of a year ago. Accounts and bills receivable on the other hand, are up by almost \$200,000 in the year, while inventories of asbestos, materials and supplies are down by some \$470,000.

**King Edward Hotel Co., Ltd.**—Operations of the company for 1920 produced a profit of \$284,790, after providing for cost of operation, taxes, salaries, maintenance, etc. After payment of interest and setting aside depreciation reserve there remained a sum applicable to the dividends of \$138,897, as compared with \$126,111 in 1919. During the year two dividends of 5 per cent. each were paid on common stock aggregating \$100,000, and the balance was carried to surplus, which now amounts to \$100,493. The changes reflected in the balance sheet are not very significant. Depreciation reserve was increased from \$95,115 to \$152,007, and bills payable have been entirely wiped out. Fixed inventories are shown at \$334,733, compared with \$288,200 previously.

In his report to shareholders, Frank A. Dudley, president, says:—

"Referring to the addition which is being constructed by the King Edward Construction Co., Ltd., the foundation and steel erection have been completed. The floors and important partitions are practically complete, and the brick-work is three-quarters completed. The plumbing and installation of the mechanical plant is proceeding with proper progress, and it is to be hoped, with the continuation of

favorable conditions, that the building will be available for actual use in September of this year. While the past year has not been one especially favorable to the financing of projects of such magnitude, I am able to state that the first mortgage amounting to \$1,300,000 has been fully settled and placed with the Metropolitan Life Insurance Co., and advances to the extent of \$250,000 have been made thereon, and there is still available to be received for the completion of construction and equipment, \$1,050,000. I am also able to state that as a result of recent negotiations, the remainder of the preferred stock of the King Edward Construction Co., Ltd., has been sold on terms favorable to the company, which should be of satisfaction to the shareholders. While the year 1920 was recognized as a year of business activity which afforded to hotels a very large volume of business, and in the year 1921, so far, business has been greatly curtailed in many lines, and increased transportation rates have materially lessened travel, notwithstanding these facts the King Edward Hotel did a volume of business in January, 1921, of \$155,884, as against a volume of \$135,338 in January, 1920, with a net profit for January, 1921, of \$20,546, as against \$15,382 in the corresponding month in the previous year, which shows convincingly the continued increase in both gross and net resulting from operation."

**British Columbia Fishing and Packing Co.**—The annual statement of the company, while not quite as clear as it might have been in the presentation of facts, is sufficient to show that the changes which took place in operations last year were not of a significant character. The profit and loss statement is not included, so that it is impossible to tell the precise amount of the profits for the year, but Wm. H. Barker, president, refers to them as being "usual." It is said in behalf of the management that confusion in the past has arisen through the fact that there were two companies affected by the report, the British Columbia Fishing and Packing, which was a holding organization, and the British Columbia Packers' Association, which has control of the actual operations. The dual method has now been abolished, for, at an extraordinary meeting held in November last, it was decided to make the British Columbia Fishing and Packing Co. the operating company.

Some of the principal changes in the balance sheet are as follows:—

	1920.	1919.
Plant, less depreciation....	\$2,384,497	\$2,462,648
Inventories .....	588,352	628,330
Fish on hand .....	681,286	386,050
Cash .....	116,990	223,962
Total assets .....	4,640,027	4,548,025
Reserves .....	804,650	751,614
Surplus .....	1,495,878	1,465,802

The company only operated fourteen canning factories last year as compared with twenty-four the previous year, ten in Northern British Columbia and four on the Fraser River. In addition there were operated in 1920, as in 1919, a cold storage plant and a saw mill. J. M. Whitehead, the general manager, does not intend to expand operations during the ensuing year, but will operate the same canneries the coming season, and is preparing for about the same pack.

**Montreal Cottons, Ltd.**—The annual statement of the company which was presented to shareholders at the annual meeting in Montreal last week, while disclosing net earnings at a slightly lower level than in 1919, is to be considered very satisfactory. The report shows net earnings applicable on the outstanding stock of the company of \$617,252, as compared with \$662,538 in the preceding year, and \$681,220

in 1918. This is after deduction of all operating charges, bond interest, bad debts, war taxes, etc. The showing indicated that 20.57 per cent. was earned on the outstanding capital stock of \$3,000,000 as against 22.08 per cent. in 1919 and 22.70 per cent. in 1918. During the year the dividend on the stock was increased from 4 to 6 per cent., so that distributions in 1920 amounted to \$390,000 as compared with \$345,000 in 1919 and \$330,000 in 1918. This deduction leaves addition to surplus amount of \$227,252 as compared with \$317,538 in 1919 and \$351,220 in 1918.

There was a large increase in operating expenses, these totalling \$8,039,130 in 1920, as against \$6,616,715 in 1919 and \$5,096,246 in 1918. In the year total cloth sales amounted to \$8,804,459 as against \$7,678,506 in 1919 and \$5,917,520 in 1918. With the addition of cloth in process, total cloth amounted to \$9,409,064 as against \$8,319,135 and \$6,624,900 in the two preceding years. After deducting the balance of cloth in hand and in process carried forward from the previous year, the net cloth sales and in process amounted to \$8,768,434 against \$7,611,755 and \$5,799,342 in the two preceding years.

The balance sheet reveals a very comfortable position, net working capital being \$3,557,232, as against \$3,003,949 in the previous year. Some of the principal comparisons are as follows:

	1920.	1919.
Properties .....	\$4,132,422	\$4,141,521
Current assets .....	4,438,918	4,190,242
Capital stock .....	3,000,000	3,000,000
Funded debt .....	613,200	654,451
Surplus .....	4,284,371	3,089,142
Current liabilities .....	881,686	1,186,298

In his remarks to shareholders, S. H. Ewing, president, remarked:—"This year was one of great commercial upheaval—labor was clamoring for higher wages; raw cotton, coal and supplies soared to prices unknown, with the trade demanding more goods, this continued for seven months, and then, without warning, business suffered an immediate collapse. Supplies, especially raw cotton, had a phenomenal decline. Your company having to retain the good-will of the trade had to accept cancels and meet the prices of goods being dumped into Canada; having the raw cotton on hand, bought at high prices to meet these contracts, you will recognize that the profit for the year suffered heavily, nevertheless, we are pleased to place before you a statement to-day which we consider satisfactory. Reserves have been provided for cotton bought which has declined in value since its purchase. The works have been fully maintained and are in a high state of efficiency."

**Black Lake Asbestos and Chrome Co., Ltd.**—By the election of a board of directors, nominated by J. A. Jacobs, of Montreal, who owns 29,000 out of the 40,000 shares of the company, the differences which have existed over the management of the company are now in a fair way of settlement. At the annual meeting of the company in Toronto this week, bondholders named an alternative slate, but were outvoted. Mr. Jacobs was not present at the meeting, on account of illness, but W. E. Neuman, of New York, who spoke for Mr. Jacobs, said the bondholders had no reason to fear the future, as, if the company succeeded, their position would be improved. J. C. Chalmers, of Copper Cliff, Ont., who led the bondholders in their participation in the meeting, said the owners of the bonds had pooled their holdings to protect their interests, and would meet later with a view to renewing the pool.

The annual report for the year ended December 31 last showed an increase in profit from operations of \$161,097, against \$155,129. Bond interest for both half-yearly terms were paid, amounting to \$71,280, against \$35,745 in the previous year for one term. Total income was \$195,668, compared with \$179,835. After paying all expenses, interest on bonds, and allowing for depreciation, there was a surplus of \$1,510, compared with a loss of \$4,975 in the previous year. Total assets are now \$5,245,100, against \$5,324,877. Current assets are \$365,550, against \$377,345, and current liabilities

\$53,848, compared with \$115,876, so that the company's working capital has increased by \$50,000 in the year. President Massie reported that the cash value of the company's output was much in excess of previous years, though short in tons, advantages having been accrued from changes in process of extraction and enhanced value of the fibre recovered. New methods of extraction, he believed, would add materially to earnings this year. A substantial portion of the estimated output for 1921 has been sold.

**Bell Telephone Co., Ltd.**—While telephone revenue for 1920 increased \$2,364,264 over 1919, the enormous increase in operating expenses brought the net telephone earnings down to \$218,043, or \$1,717,171 below the previous year. There was a considerable increase in net sundry revenue, but total net earnings were only \$881,552, compared with \$2,153,324 in 1919. After deducting interest and before allowing for dividends, there was a deficit of \$31,961. The 1920 dividends, which amounted to \$1,800,010, were charged to surplus previous to 1917. The following are some of the principal comparisons of earnings and expenses:—

	1920.	1919.	1918.
Telephone revenue .....	\$16,513,384	\$14,149,119	\$12,227,545
Telephone expenses .....	16,295,341	12,213,904	10,550,459
Net telephone earnings ..	218,043	1,935,215	1,677,085
Total net earnings .....	881,522	2,153,324	2,104,688
Interest to be deducted ...	913,483	670,208	562,053
Dividend at 8 per cent. ...	1,800,010	1,440,000	1,440,000

Last year was the worst year that the company has ever experienced in regard to net earnings. In 1900, when the total assets were \$7,498,762 (excluding cash and receivables), the percentage of earnings to assets was 5.8. In 1905 the figure was 7.1, in 1910 it was 7.6, in 1915 5.6, in 1919 3.9 and for 1920 it was still further reduced to 1.4 per cent.

In their report, L. B. McFarlane, president, and C. F. Sise, vice-president and general manager, remark: "The very lengthy delay in obtaining a rate decision—a period of over two years—and our consequent inability to properly finance in the meantime for needed expansion, have crippled our efforts to properly serve the public. Early in 1918 it was found that the greatly increased cost of operations made it essential that there should be a substantial and immediate increase in rates. Application was therefore made before the Dominion Board of Railway Commissioners in October, 1918, for an increase of 20 per cent. In May, 1919, the commissioners, after testimony, ordered temporary relief by allowing a 10 per cent. increase, being only one-half of the sum asked for, and it proved entirely inadequate to meet the even so-called emergency. The board retained the conduct of the case, and requested us to furnish detailed monthly returns for the succeeding year. After the expiration of that time, on August 5, 1920, we renewed in more detail our application, and asked for a general readjustment of rates. This application is still before the commissioners for decision. Our case was ably presented, and we are hopeful of receiving a favorable decision."

The balance sheet reflects the growth and the many changes which have taken place in the organization during the past year. The following are the principal comparisons:—

	1920.	1919.
Real estate .....	\$ 5,165,860	\$ 4,607,535
Telephone plant, etc. ....	51,729,192	45,033,651
Investments .....	2,843,327	3,794,627
Capital stock .....	22,657,000	22,336,300
Bonds .....	16,649,000	11,149,000
Surplus and reserve .....	21,614,999	20,580,632

In the Toronto courts on February 28 the National Trust Company, as executors of the Rodden Estate, urged that the city be required to make a deposit in advance of arbitration proceedings in connection with a property being acquired by the city from the estate. A payment of \$12,000 was made on account

# American Sales Book Company

## LIMITED

### REPORT OF THE DIRECTORS to the Shareholders for the year ended Dec. 31st, 1920

The Directors present herewith their Report showing the results of the Company's operations for the year ended December 31st, 1920, with the accompanying Statement of Assets and Liabilities, as follows:

Balance brought forward from 1919 .....	\$270,851.83
United States Federal Taxes on 1919 Earnings paid in 1920 .....	22,146.72
	\$248,705.11
Profits for the year .....	602,679.08
	\$851,384.19
The Appropriations were as follows	
Interest on Bonds .....	\$ 28,921.50
Transferred to Reserve for Depreciation .....	130,658.73
In Reduction of Patents Account .....	50,000.00
Dividends paid on Preference Stock:	
Four quarterly Dividends at rate of 7% per annum .....	\$215,131.00
On Account of arrears of dividends 3 1/2% .....	107,365.50
	322,696.50
	\$32,276.73
Balance carried forward .....	\$319,107.16

The profits for the year are the best in the Company's history and exceed by \$175,411.27 those of 1919.

The inventories have been written down to correspond with present market prices, the shrinkage having been charged off in the year's operations.

The Profit and Loss balance is subject to deduction of United States Federal taxes, the amount of which cannot be accurately determined at this time.

The regular quarterly dividends at the rate of 7% per annum, and in addition, two quarters of arrears of dividends, were paid on the Preference shares during the year. It is hoped that it will be possible to make a similar distribution during 1921. The arrears of dividends are now 8 1/2%.

Although a falling off in business was experienced during the last quarter, the prospects are encouraging for a gradual return to normal volume during 1921.

By order of the Board,

S. J. MOORE, President.

### Balance Sheet, December 31st, 1920

ASSETS	LIABILITIES
Real Estate and Buildings .....	CAPITAL STOCK .....
Plant, Machinery and Equipment .....	Preference Stock .....

	Profit and Loss Account Balance (subject to U. S. Federal Taxes on 1920 Profits) .....
\$5,630,336.00	\$5,630,336.00

#### AUDITORS' CERTIFICATE

We have audited the accounts of the American Sales Book Company, Limited, for the year ending 31st December, 1920, and we certify that in our opinion the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the Company's affairs according to the best of our information and the explanations given us and as shown by the books of the Company.

We have received all the information and the explanations we have required.

CLARKSON, GORDON & DILWORTH,  
Chartered Accountants.

At the Eighth Annual General Meeting of the Company, held in Toronto on March 1st, 1921, the following Board of Directors and Officers were elected for the ensuing year: S. J. Moore, President; W. D. Van Horn, Vice-President; A. M. Bovier, Treasurer and General Manager; A. E. Ames, Charles G. Brand, Charles W. Colby, Ph.D., Frank A. Deans, Hon. Holland S. Duell, Hon. W. Caryl Ely, Wm. O'Connor, George Weston, and Chauncey W. Crofoot was appointed Secretary.

## RECENT FIRES

Nova Scotia Steel and Coal Company's Plant at Trenton, N.S., Damaged to Extent of \$60,000—Catholic School at Loiselleville, Ont., Suffered Loss of \$40,000

**Brandon, Man.**—February 23—Smoke and water did damage to the Hub Clothing Store to the amount of \$16,000, according to the valuation of the proprietor, Peter Crisall. Part of the loss is covered by insurance.

**Creighton Mine, Ont.**—February 25—Creighton Mine schoolhouse, a six-roomed frame building, was reduced to an ash-pile. The cause is believed due to the furnace. The replacement cost will exceed \$20,000.

**Hamilton, Ont.**—February 24—A fire of unknown origin did \$1,000 damage to a brick dwelling at 231 Mary Street, owned by S. Howard. The loss is covered by insurance.

**Lambton, Ont.**—February 27—The Barnacre Building was destroyed by fire. The building was owned by J. J. Quirk, of Toronto. The loss is estimated at \$25,000.

**Loiselleville, Ont.**—February 26—Fire starting from an overheated furnace practically destroyed the Loiselleville Catholic School and threatened destruction of the village. The loss is estimated at \$40,000.

**London, Ont.**—February 22—A fire totally destroyed the barn of Samuel Gowdridge, on the Governor's Road, three miles east of the city, together with a quantity of hay, straw and grain. The loss will be several thousand dollars, partly covered by insurance.

February 23—The billiard parlors and shoe shining stand, owned by John Carr, 376 Richmond Street, was damaged by fire. The loss is estimated at \$10,500, with insurance of \$7,500.

March 1—Loss exceeding \$15,000 was caused by a fire in the Cook Block, at the corner of Dundas and Talbot Streets.

**Montreal, Que.**—February 17—The home of O. Beaudoin, 140 Chapleau Street, was damaged to the extent of \$500 by a fire which was caused by a coal oil stove.

February 18—A fire, which started in the kitchen grate, did damage estimated at \$3,500 to the home of Ferdinand LaRocque, 39 Maria Street.

February 23—Residence of Leopold Leclair, 388 Rivard Street, was damaged by fire. The fire was caused by incendiarism. The home of E. Sequin and J. Denis, 507 Workman Street, was damaged by fire. A warehouse and tailor shop, owned by John Kion, 262 Amherst Street, was damaged by fire. Damage estimated at \$500 was caused by a fire which broke out in the premises of James M. Aird, Ltd., 165 St. Urbain Street.

**North Cobalt, Ont.**—February 28—A fire, which is thought to have started from paper ignited by stove sparks, destroyed the home of Norman Bailey and spread to the one occupied by F. Racicot.

**Ottawa, Ont.**—February 28—The rooming-house, tenanted by Mrs. M. M. Hallady, was damaged by fire. The loss is estimated at \$1,500, fully covered by insurance.

**Tompkins, Sask.**—February 23—A hotel, two restaurants, one general store and one hardware store were destroyed by fire.

## TENDERS FOR DEBENTURES

## BURNABY, B.C.

Firm offer will be received up to noon, Monday, March 14th, for \$71,700.00 Burnaby, B.C., school debentures, six per cent., maturing December 31st, 1935, and \$60,000.00 water-works debentures, maturing December 31st, 1940; payable New Westminster and Montreal. Interest payable June 30th and December 31st. Debentures certified to by inspector of municipalities. Denominations, \$100 and \$500. Cheque for one per cent. of total bid must accompany tender.

ARTHUR G. MOORE, Clerk,  
Edmonds, B.C.

**Toronto, Ont.**—February 27—The home of Mrs. J. Oliver, 372 Howland Avenue, was damaged by fire to the extent of \$800.

March 2—A lighted candle overturned caused a fire in a house at 152 Teraulay Street, occupied by S. Cohen, which did \$100 damage.

**Trenton, N.S.**—February 25—The Nova Scotia Steel and Coal Company's shipbuilding plant was damaged by fire. The loss is estimated at \$60,000, partially covered by insurance.

**Welland, Ont.**—February 28—Lambert's planing mill, with machinery and other contents, was destroyed by fire. The loss is estimated at \$25,000.

**Yarmouth South, N.S.**—February 27—Providence Methodist Church was destroyed by fire. The loss is estimated at \$30,000, with \$12,000 insurance on the building and \$3,000 on the organ.

## ADDITIONAL INFORMATION

**Winnipeg, Man.**—By the fire which occurred in the D. R. Dingwall Block on the 2nd inst. the following companies are interested: On Dingwall stock—Alliance of England, \$9,000; American Central, \$5,000; Atlas, \$2,000; British Crown, \$3,000; British America, \$7,000; Commercial Union, \$8,000; Canada Accident, \$2,000; Canadian Fire, \$5,000; Canada National, \$3,000; Caledonian, \$2,000; Continental, \$5,000; Employers, \$4,000; Firemen's of Newark, \$3,000; Fidelity-Phenix, \$8,000; General Accident, \$8,500; General of Paris, \$30,000; Guardian Assurance, \$2,000; Globe Indemnity, \$6,000; Imperial Underwriters, \$1,500; Insurance Companies of Pennsylvania, \$25,000; Eagle Star, \$5,000; London Assurance, \$7,000; London and Lancashire, \$3,000; Mount Royal, \$2,000; Mercantile, \$1,500; Northwest Fire, \$2,000; New Hampshire, \$2,000; Niagara, \$10,000; North British and Mercantile, \$6,000; Norwich Union, \$2,000; Northern, \$5,000; Ocean, \$8,000; Occidental, \$2,000; Phoenix of Paris, \$5,000; Pacific Coast, \$3,000; Protector Underwriters, \$3,000; Palatine, \$3,000; Providence-Washington, \$1,000; Quebec, \$5,000; Queen, \$5,000; Queensland, \$10,000; Rochester, \$6,000; Royal, \$3,000; Royal Exchange, \$6,500; St. Paul, \$3,000; Springfield, \$7,000; Union of England, \$5,000; Union of Paris, \$2,000. Total, \$262,000.

On Dingwall building—American Central, \$2,000; Caledonian, \$3,000; Liverpool-Manitoba, \$51,350; Niagara, \$2,000; Northern, \$2,000; Ocean, \$2,000; Royal, \$2,000; State of Pennsylvania, \$2,000. Total, \$66,350.

**Bedford, Que.**—January 27—The post office owned by E. J. Ferland was damaged by fire. The fire was caused by gas ignited by coal stove. The loss is \$7,000, with insurance of \$2,300 in the Northern British and Scottish Insurance Companies.

**Montreal, Que.**—February 16—A fire broke out in the premises of the New Idea White Wear Co., on the third floor of the building, 34-36 Notre Dame St. Insurance as follows: Northern, \$8,000; Union of London, \$5,000; National Union, \$2,500; Guardian, \$2,000; Alliance of London, \$3,000; National Ben Franklin, \$1,500; Niagara, \$750; Springfield, \$750; British-Colonial, \$500; total, \$24,000. Loss about total. Other insurance carried by various tenants in building included Librairie L. J. A. Derome, Ltd. Insurance: North America, \$3,200; Norwich Union, \$3,000; British Crown, \$1,600; Union of Canton, \$1,600.

**Trenton, Ont.**—January 17—A store occupied by T. P. Michaud was destroyed by a fire which was caused by the stove pipe. The loss is \$4,700, with insurance of \$1,600 in the British Empire Underwriters Insurance Co.

**Windsor, Ont.**—February 1—The roof of the fermenting-room of the British American Brewing Co., Ltd., was damaged by fire. The loss is \$12,000, with insurance in the following companies: St. Lawrence Underwriters, Lloyds', Reciprocal Exchange, Wellington, County Fire, London Guarantee, Occidental, Old Colony.

## British Columbia Legislature Now in Session.

Trust Company Laws to be Consolidated—Action on Irrigation Question Expected—Assistance Rendered by Department of Industries—More Encouragement for Land Settlement and Agriculture

THE 1921 session of the British Columbia legislature opened at Victoria on February 8. The lieutenant-governor's speech did not presage any legislation of a far-reaching character. It referred to the results of the recent referendum, in which a large majority voted in favor of government sale and control of liquor in sealed packages, in place of the present prohibition law; this, the government said, would be put into effect. Lieutenant-governor W. C. Nichol continued:—

"In pursuance of its policy to increase agricultural production, my government, through its Land Settlement Board, has let a contract for the construction of dykes to protect a large area of land at Sumas, in the Fraser Valley. In several of the settlement areas constituted under the provisions of the Land Settlement and Development Act creameries have been established to encourage the dairying industry. This policy will be continued, wherever such assistance appears warranted. You will be asked to provide a sum of money for subsidizing the use of explosives in the clearing of land for agricultural purposes and to assist bona-fide mineral prospectors. Legislation passed in previous sessions dealing with the matter of irrigation is proving efficacious and the solution of the problem is now assured. The irrigation project, undertaken by my government in South Okanagan district, has been advanced expeditiously. Part of the lands and a portion of the townsite property will be placed on the market at an early date. While the timber industry suffered a decline during the latter half of the year, the aggregate production exceeded that of the previous year, and the outlook for 1921 is improving. Legislation will be submitted extending the time for payment of timber license fees in arrears."

Reference was also made to mining developments and health measures, and to the trans-provincial highway, on which progress was made during the year.

### Interest on Provincial Loans

Three bills have been presented by the minister of finance to authorize this increase in the rate of interest payable on government loans. They provided for amendments to that effect to the B.C. Loan Acts of 1921, 1917 and 1916. On February 10 the second reading was moved by Premier Oliver to a bill providing for increasing the maximum interest rate to be paid for loans under the Department of Industries Act. It was in this connection that the premier explained the reasons for the amendments. W. J. Bowser inquired if any money has as yet been borrowed under that act and the premier stated that none had been so far.

### Nine Months' Finances

Taxes came into the provincial treasury so fast during the last nine months of 1920 that the revenue for that period nearly equalled the estimated revenue for the whole fiscal year, which ends on March 31, 1921. At the same time ex-

penditure was kept down so that while the estimated expenditures for the fiscal year were \$17,413,823, the actual for the nine months was only \$15,327,897. Actual revenue for the first nine months exceeds expenditures by \$59,790. These facts are shown in the report of the comptroller-general, presented to the legislature on February 18 by the Hon. John Hart.

The finance department estimated that its revenue for the whole year would be \$7,689,715, the report points out. Actual receipts for the first nine months, however, amounted to \$7,564,761, which, it is emphasized, is nearly the amount of the estimate for the whole year. The report shows that during the first nine months of the financial year there was borrowed \$7,882,775 for the following capital expenditures: Pacific Great Eastern, \$1,244,668; Land Settlement Board, \$850,000; better housing scheme, \$756,250; industrial development, \$755,000; Soldiers' Land Act, \$368,138; conservation fund for irrigation, \$275,000; trunk roads and bridges, \$633,719. Capital expenditure under loans on public works in the nine districts of the province are: District No. 1, embracing Vancouver Island and Comox, \$139,889; District No. 2, embracing Vancouver and the Lower Mainland, \$527,640; District No. 3, Kamloops.

### A "Blue Sky" Law

Something approaching a "blue sky" law is incorporated in the new Consolidated Companies Act which is before the legislature. In response to signs that more effective provisions should have been made to force companies doing business in British Columbia to live up to the terms of their prospectuses, the Attorney-General said that in respect to some incorporated companies it is proposed that prospectuses set forth in detail facts concerning the company, full particulars of the plan of operations and other details.

In the case of extra-provincial companies no one may offer for sale shares thereof unless such companies have been registered to carry on business in British Columbia and unless, where "blue sky" laws are in operation in the territory in which such extra-provincial concerns are incorporated, a copy of the license incorporating the companies is filed with the registrar of joint stock companies.

### Trust Company Laws

On February 15, Attorney-General Farris introduced a bill relating to trust companies. It provided for the revision and consolidation of the existing laws covering trust companies, and contains few, if any, new principles. The bill was given its first reading. Second reading was given to the three bills providing for the increase in the maximum rate of interest to be paid on loans made under authority of the B.C. Loan Acts of 1916, 1917 and 1918, from 5½ to 6 per cent. The bill to provide for a similar increase in interest

rate on borrowings under the Department of Industries Act, was put through the committee stage, and read a third time.

The new liquor control bill was introduced on February 23. All spirituous and malt liquors will be sold by the government. There is no provision made for the licensed sale of any intoxicating beverage by private parties. However, it is understood that the act is subject to the most revolutionary revision and amendment while in the committee stage, which provides the probability of the addition of sections to the act allowing the sale of beer and light wines by agencies other than the government liquor stores. The municipalities aim at securing a share of the profits from the business, though an alternative form of aid would be acceptable to them.

#### Land Settlement Board

The Land Settlement Board's report for 1920 was presented on February 21. A total of 42 loans aggregating \$71,440, were granted to 42 soldier settlers, bringing the total up to date of 319, aggregating \$655,640. Seventeen loans, aggregating \$36,750, were cancelled or withdrawn, and 18 for \$22,050, were paid off by soldier settlers during 1920, and 35 others for \$58,800 were disposed of. There are at present a total of 284 loans in force for an aggregate of \$596,840.

Pointing to the regulations which require owners of unimproved lands to inaugurate improvements within a specified time or render themselves liable to the penalty tax of 5 per cent. of the appraised value in addition to other taxation, the report sets forth that work has proceeded on ten areas during the past year. The total acreage taken over by the government was 121,141 acres, of which 46,647 acres have been surrendered to the board at a cost of about \$200,000. There were 19,156 acres resold to bona fide settlers, including 53 returned soldiers, each of whom secured the statutory rebate of \$500 on the purchase price of the lands taken.

The expenditure of the Land Settlement Board for the year was \$152,880. Revenue came \$96,736 short of meeting this.

#### Agricultural Credits Commission

The Agricultural Credits Commission during 1920 granted 42 loans, totalling \$44,100. These with those previously in force bring the total up to 383, amounting to \$737,350. Twenty-six loans of a value of \$37,550 were paid off during the year. The balance of the loans and interest at the end of 1920 was \$620,766. During the year the commission spent \$62,744, including \$45,000 interest on debentures to carry on its work. Its revenue was \$9,915 short of the total and this amount has been set down as the deficit for the year. This deficit has been reduced in this way during the last five years; 1916, deficit, \$19,015; 1917, \$22,200; 1918, \$6,045; 1919, \$7,744; 1920, \$9,915.

The assets of the commission at present are placed at \$1,040,808 and the liabilities at the same amount including \$1,000,000 debentures due May, 1941.

#### Bonus for Steel Production

To encourage the establishment of iron and steel industry in British Columbia, the provincial government has entered into an agreement with the Coast Range Steel, Ltd., whereby the government promises to pay bounties not exceeding \$3 per long ton on pig iron manufactured from ore mined in the province. The agreement sets forth that British capitalists are prepared to invest the necessary capital, "not exceeding ten million pounds," in the establishment of the industry. Engineers are now investigating the resources to ascertain if conditions are suitable for the establishment of the industry.

#### Assistance to Industry

During 1920 an aggregate of \$630,658.48 was loaned by the department of industries to industrial enterprises out of a total of \$3,044,050 applied for. From the inception of the department up to December 31 last a total of 362 applications

have been received, of which sixty were approved. This is shown in the second annual report of the department filed in the legislature by Premier Oliver on February 15. The loans ranged from \$1,000 to \$50,000, the Schaake Co., of Vancouver, securing the largest amount. The activities of the various companies aided cover a very wide range, from sawmills to neckwear.

The findings of the committee which last year went east and south to study market conditions in the steel industry and ascertain the marketing possibilities for a British Columbia iron and steel industry is included in the report. The findings are those arrived at by Nichol Thompson and J. A. McVety, members of the advisory board of the Department of Industry, and Major Martyn, industrial commissioner. This statement asserts there is a market on the Pacific Coast for 2,000,000 tons per annum of iron and steel, including tank, ship and boiler plate, merchant bar, tool and mining steel, structural steel, shapes and angles, and light rails. Mr. Thompson says there is a local or domestic market on the coast from British Columbia to Los Angeles for 1,000 tons per day of foundry pigiron alone, or 2,000 tons per day if produced anywhere near the cost of steel scrap—\$27 to \$30 per ton.

With regard to the growing export market, it is stated that at present Canada exports little or nothing, while the United States exported through Pacific ports approximately \$100,000,000 worth of iron and steel products. A steel plant in British Columbia is a necessity, not only from the local viewpoint, but also in the opinion of many of the prominent steel men along the Pacific Coast of the United States.

#### WINNIPEG ELECTRIC STILL IN ROUGH WATER

City Fights Recent Fare Award—Slight Improvement in Western Business—Provincial and City Financing

(Staff Correspondence.)

Winnipeg, March 10, 1921.

**T**HE western outlook this week continues quite favorable. Collections are reported slow, but in many lines of business marked improvement has been noted in the last few weeks. Country orders are heavy and from present appearances it would look as if the west would have an early opening up of spring. Agricultural conditions throughout the three western provinces are in excellent shape, as a great deal of fall ploughing was done before the freeze-up came.

The annual convention of the Saskatchewan Hail Insurance Association was held in Regina this week, when representatives of over one hundred rural municipalities of that province were in attendance. The board of directors report a surplus as at the close of 1920 of over a half million dollars on the last two years operations. A. E. Wilson, of Indian Head, presided at the gathering, and matters of considerable interest in the municipal hail insurance field were discussed.

#### City Finances

On April 5th Winnipeg ratepayers will be asked to vote on a money by-law for the raising of two million dollars for the erection of more school accommodation. The chairman of the school board states that all the accommodation is taken up and many of the class rooms are over crowded. Considerable discussion has been taking place in civic circles regarding the tax rate for this year. Mayor Parnell is scrutinizing the expenditure of all departments very carefully, but it looks as if the mill rate would be higher this year than usual, and will probably run as high as thirty mills.

The discussion in connection with the rates case of the Winnipeg Electric Railway is proceeding in the courts, city legal authorities trying to set aside the award of the Public

Utilities Commissioner for higher fares which relief was granted some time ago. These are strenuous days for public utilities, no matter whether they are privately or publicly owned. The Winnipeg electric is one of the many public service corporations which has been having an uphill fight for several years, and it would only seem right that they should be granted relief as well as any other transportation system. The Winnipeg electric is one of the most efficient systems of the American continent, and much credit is due A. W. McLimont, the present general manager, for bringing the service the company is now rendering, up to its present state of efficiency. Mr. McLimont last week tried to arrange an amicable adjustment with the city, but his proposition was not agreed to, so that litigation is still in progress. It is hoped that during this year the street railway question will be permanently settled, as litigation is very expensive to both parties.

C. J. Mills, superintendent, Toronto and western branches American Bank Note Co., was a visitor in Winnipeg this week.

Hon. Edward Brown provincial treasurer, sold this week \$500,000 of the bonds of the province. The securities were five year five per cent. bonds and were prepared for distribution in the United States. The price realized was a good one, the figure being \$100.566. This offer was made by the National City Co. of New York. The second bid was \$100.29 made by the Dominion Securities Corporation of Toronto. There were nine bids in all; the lowest being \$96.726. Bids were opened at noon in the presence of a number of interested bond dealers.

The belief of the government is that within five years the money situation will be greatly improved and the rate of exchange between the United States and Canada much nearer to normal.

## The Week in Parliament

Estimates for 1921-22 Show Slight Decrease—Large Reductions Offset by Increase in Railway Costs—Several Financial Bills Receive Second Readings—Strength of Government Tested in Division

(Special to *The Monetary Times*.)

Ottawa, March 10, 1921.

Thursday, March 3

In House of Commons:—Hon. W. L. Mackenzie King's "No Confidence" amendment to Address in reply to Speech from Throne defeated by vote of 91 to 116.

In Senate:—(a) Revision of Punishments bill, third reading; (b) Lake of the Woods Control Board bill, second reading; and (c) Royal Assent to Act to amend Dominion Elections Act for revision of Ontario lists for coming referendum.

Friday, March 4

In House of Commons:—(a) Resolution introduced to approve Canada-West Indies agreement; (b) Resolution introduced by Minister of Agriculture to permit sale and manufacture of oleomargarine in Canada; (c) Debate on Griesbach motion asking that surface owners of oil lands get one-sixteenth of oil obtained in development; and (d) McCoig motion asking for bill to provide for standardization of parts of agricultural machinery agreed to.

Monday, March 7

In House of Commons:—(a) Sir Henry Drayton denied report of New York bank that thirty per cent. increase in customs tariff was being considered; (b) First readings of following bills: to incorporate Mayo Valley Railway, Ltd., respecting Oshawa Railway Co., respecting Thousand Islands Railway Co.; and (c) Second readings of following bills:—To extend time for beginning and finishing work of Montreal, Ottawa and Georgian Bay Canal Co., respecting Dominion Life Assurance Co., to incorporate Fidelity Co. of Canada, to incorporate North American Trust Co. of Canada, to incorporate Canadian Bar Association, respecting Gilmour and Hughson, Ltd., and an Act to amend and consolidate acts respecting inspection of gas and gas meters.

Tuesday, March 8

In House of Commons:—(a) Estimates tabled; (b) Master amendment to House of Commons and Senate Act that ministers could not hold directorships defeated by vote of 54 to 105; (c) Second readings of following bills: to incorporate Mayo Valley Railway, Ltd., respecting Oshawa Railway Co., respecting Thousand Islands Ry. Co., and respecting James McLaren Co., Ltd.; and (d) General Griesbach withdraws motion asking certain rights for owners of oil lands.

Wednesday, March 9

In House of Commons:—Debate on motion against asking Great Britain for repeal of cattle embargo.

In Senate:—Third reading Lake of the Woods Control board.

The past week in the Dominion parliament has been chiefly notable for two things, one the vote on the "No Confidence" motion of the Hon. W. L. Mackenzie King, and another the tabling of the estimates. The majority of 25 received in the first vote established the government's confidence in its ability to carry on through the session though the practice of pairing enabled its majority to be greater than it might otherwise have been, and greater than it may be on the budget debate, or the debate on the railway estimates. The estimates tabled consumed little time in parliament, but the fact that the great reductions expected in expenditure on account of the dwindling in war and post-war expenditures due to war were counter-balanced by the great increases in proposed railway expenditures has caused considerable discussion on both sides of the House outside the Chamber. The minister claims that some of it represents only bookkeeping, and that \$140,000,000 is what the government will have to provide, although thirty-eight million dollars more are shown in the estimates. Eighty-nine million dollars is asked on account of the Grand Trunk Railway Co., and fifty-seven millions of this is for deficits, interest, fixed charges, betterments, and matured or maturing obligations. The deficit on the Canadian National and other railways is about the same as last year, and about three million dollars more is required for them, the deficit being in excess of fifty million dollars.

Estimates for the Year

The main estimates aggregate \$582,062,698, a decrease of \$31,162,712 compared with last year. The amount chargeable to revenue is \$384,386,715, and capital \$27,459,127. The additional amount of \$7,777,380 for demobilization produces the total above stated. The railway estimates are large. Those of the Grand Trunk are greater than those of any other systems. The analysis of the Grand Trunk situation indicates that some \$57,000,000 will be required.

This is not, however, merely attributable to operating deficits, as the Grand Trunk is faced with current and overdue liabilities amounting to \$20,000,000, as well as substantial payments which will have to be made for sinking fund and for refunding purposes. In addition to this the Grand Trunk operating officers estimate that a new capital expenditure of \$12,000,000 should be made.

The estimates provide \$26,000,000 for the Grand Trunk Pacific, of which \$11,250,000 is for operating deficit, and some \$8,000,000 for interest requirements and fixed charges. Some \$6,000,000 is provided for betterment. The Canadian National requirements are made up of operating deficit of \$7,000,000 on the Intercolonial and Transcontinental Railway, and \$23,000,000 for operating deficit and fixed charges on Canadian Northern. The operating deficit in this case amounting to between \$4,000,000 and \$5,000,000, and interest and fixed charges constituting the balance. The vote is swollen by betterment, new construction on western line, and stock requirements. It is explained, therefore, that the net result is that the total railway obligations requiring cash are some \$140,000,000, as against the \$178,000,000 for which an appropriation is asked.

The canal estimates include a vote of \$5,000,000 for the Welland, \$100,000 for the Hudson Bay Railway, and \$339,000 for the Trent Canal.

#### Public Works

Under the head of public works, the votes include for harbor improvements \$1,300,000 at Esquimalt (drydock), \$170,000 at Fort William, \$136,000 at Quebec, \$1,250,000 at St. John, \$1,000,000 at Toronto, and an additional \$175,000 for protection for the Toronto breakwater. For public buildings the estimates are cut to the bone and are mainly for repairs. The same policy is followed with regard to piers, wharves and breakwaters. The site for the naval service is placed at \$3,726,980, an increase of \$391,480. Under the head of public works chargeable to capital the estimates include \$528,000 for the St. Lawrence Channel, \$8,330,000 for government shipbuilding and \$2,000,000 for a new ice-breaker. For soldiers' re-establishment the vote is \$19,310,000, for pensions \$31,816,923, and for militia \$11,890,000. Public works charged to income are \$13,373,755, a decrease of two and a quarter millions. The Air Board gets \$1,625,000, and Soldiers' Land Settlement \$35,000,000.

Miscellaneous votes apart from the usual ones include: \$60,000 for Canadian representation at Washington; \$58,000 for the Canadian Press, Ltd.; \$2,000,000 for administration of the Business Profits and Income Tax Act. Ten millions for housing, \$905,000 for Soldiers' Graves Commission, \$200,000 for League of Nations Secretariat; pensions are decreased five millions, and the re-establishment vote by 24 millions. The main feature of the estimates is the hole eaten in the revenue by the railways, causing everything else to be cut down to the limit.

#### The Roumanian Credit

Negotiations are, it is understood, in progress with a view to a settlement of Canada's interest claim against Roumania. When the first interest payment on the Roumanian loan fell due on October 1, Roumania was unable to pay and asked for an extension of time till April 1. This was granted. There is now considerable doubt if Roumania will be able to meet the payment in cash when it falls due on the first of next month; and it is likely that some new basis of payment will be arranged. The amount advanced to Roumania in export credits was \$20,571,222 out of a nominal loan of \$25,000,000. Interest due on April 1 amounts to \$1,475,234.

#### Workmen's Compensation Report

Great industrial activity for the first nine months of 1920 in British Columbia is shown, although there is a falling off in the last three months, by the fourth annual report of the Workmen's Compensation Board, presented to the legislature on March 1. The reserve fund is now \$1,715,854. During the year it is estimated \$116,000 would be covered by the act, with the payrolls amounting to \$162,000,000. Accidents reported during the year numbered 20,902, of which 216 were fatal. There are now 1,326 persons receiving monthly pensions. Claims amounting to \$2,111,660 were paid during the year.

#### WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended March 10, 1921, compared with the corresponding week last year:—

	Week ended Mar. 10, '21.	Week ended Mar. 11, '20.	Changes.
Montreal	\$102,291,531	\$118,967,117	—\$16,675,586
Toronto	97,608,955	90,770,871	+ 6,838,084
Winnipeg	40,547,506	40,362,045	+ 185,461
Vancouver	13,364,094	15,804,836	— 2,440,742
Ottawa	7,617,152	10,771,590	— 3,154,438

## THE CROP OF MUNICIPAL DEFAULTS

WHILE bondholders have agreed to postponement in part of the interest burden of several western municipalities, the number which are behind in their payments has been increased through new additions to the list. At the end of February there were five municipalities in Saskatchewan, five in Alberta, and two in Ontario, which were having difficulty in meeting their payments. These were Battleford, Humboldt, Melville, Scott and Canora, in Saskatchewan; Beverley S.D., Taber, Blairmore, Bassano and Redcliff in Alberta; and Haileybury and Latchford in Ontario. Scott has just paid its 1919 coupons, but funds are not available for 1920 interest. Taber has paid up its 1920 debts and Blairmore is in a fairly good condition. Regarding Latchford, Ont., it is understood that the Ontario government will guarantee some of the debentures.

Two other municipalities in Saskatchewan, although not defaulters, are striving hard to make both ends meet. These are Swift Current and Estevan. The first concrete steps towards financial readjustment of the former are well under way, and within the past two weeks representatives of the bondholders, the banks and the city council have been frequently in conference. The Godfrey report, which has already been outlined in these columns, is taken as the basis, for discussion, and efforts are being made to try and arrive at a mutually satisfactory conclusion as to just what weight of the burden the ratepayers are capable of sustaining to general advantage.

Estevan is experiencing its struggles in finance, following a period of civic expansion, and later, the stringency caused by the war. The rate of taxation has been between 42 and 48 mills during the last three years. In 1920 and 1919 it was 44, and 1918 was the record for high taxation. The normal rate was between 20 and 25 mills. The increased rate was enforced because it was necessary if the town was to pay its indebtedness, and even with the increased taxation there is still very careful management required. But so far there has been no default in payments on bonded in-

debtedness and all current liabilities are being met in a satisfactory manner. It was hoped to have allowed a reduction this year, but under the prevailing conditions there is a likelihood of it again jumping towards the previous high record in assessment. The public utilities have been maintained in a satisfactory manner, the only serious breakdown in over eight years' operation occurring last October, when the power plant was shut down for three days. In order to render service the public must either pay more for the service or submit to an increase in the taxes. The rate for 1921 has not yet been decided on.

Bondholders of the town of Melville, Sask., will meet in Toronto, Ont., on March 31, together with the mayor and treasurer of the town, to consider some form of settlement or adjustment for the town's financial position. The committee of the Humboldt bond dealers are reported to be much dissatisfied with the interim report of the Local Government Board of Saskatchewan, who propose to make use of debenture trust funds for capital expenditure in the town of Humboldt. They are now considering calling the Humboldt bondholders together to lay the matter before them and decide on a future course of action. A meeting of the committee of the Battleford bondholders was held on March 8, at which it was decided to appoint a representative to attend the inquiry of the Saskatchewan Local Government Board into the position of Battleford. This inquiry will open at Battleford on March 21.

It has become apparent from these conditions that there are too many municipalities which desire to discount their future growth to relieve their present difficulties, just as a too liberal discounting of this future led them into their difficulties. The bondholders do not intend to lose anything, and do not look with favor on the capitalization of interest charges; they have, however, united with the municipalities in a campaign to place the final responsibility upon the province, against which the latter have taken a commendably firm stand. A municipal debt must be met by the municipality or not at all; while foreclosure is not practicable, the whole value of the property and income is available to meet the obligations.

## DEFLATION IN THE UNITED STATES

**T**HAT business in the United States is rapidly contracting is shown by the fact that even bank deposits are decreasing. This is something which may be expected in Canada also, now that deflation is under way. The New York Federal Reserve District's *Review of Credit and Business Conditions* for February points out that commodity prices, bank loans, and bank deposits continued to decline, maintaining the process of readjustment which has been going on for several months. But the degrees of decline which prices, loans, and deposits have registered from their highest points are very unequal. These differences have a direct bearing upon credit conditions in this district at this time.

The changes which took place are as follows:—

	Per cent.
<i>Prices</i> —Department of Labor index of wholesale prices for the month of January showed a decline from the high point reached in May, 1920, of .....	35
The bank's index of wholesale prices of twelve basic commodities showed a decline on February 19 from the high point reached on May 17, 1920, of .....	48

## MORTGAGE DISCOUNT AND FINANCE, LIMITED

**A**NOTHER "opportunity" to become interested in financial business is being offered by the R. T. Scott Co., Toronto, in Mortgage Discount and Finance, Ltd., recently incorporated under the Ontario Companies Act. That the business will be neither that of the ordinary loan company, nor again merely the underwriting of security issues, is evident from the emphasis laid upon loans secured by motor vehicles. Several concerns are now operating in this field, which unquestionably offers a real opportunity through the practice of buying on the instalment plan; the finance company assumes the agreement of sale, secured by the automobiles and by insurance upon them, while the manufacturer or dealer gets his money at once. An insurance agency is sometimes operated as well, the volume of business being substantial. Of these concerns, however, only a small portion are a success. Some will, it is anticipated, be driven from the field.

The prospectus of Mortgage Discount and Finance, Ltd., while not clear as to the class of business to be conducted, lays emphasis on the high profits in the financial field. "The extent of profits," it is stated, "is limited only by the amount of business the company will do. It is not necessary to dwell on this point, as the profits of financial institutions are a matter of record, such companies earning from twenty to fifty per cent. and higher." The company is capitalized at \$2,000,000, half preference and half common, both of \$10

par value. Its field of business may be promising, but at the same time the investor may well bear in mind that the financial as well as the industrial field is strewn with the wreckage of concerns which have failed, with loss to the shareholders.

## FACILITATING AGENCY BUSINESS

**A** NEW system of securing inspection reports is being tried out by the Great-West Life Insurance Co., the object being greater promptness in the issuing of policies. The *Bulletin* of the company describes the experiment as follows:—

"The new system is, that the agents themselves, when they have an applicant examined, requisition the report from the inspection agency. The old system was, that the branch office requisitioned a report when they received the application. It will be seen that the time between the date of the examination and the date the application is received at branch office will be saved. In analyzing a few hundred cases we found this time to vary from two days to three weeks.

"This time, however, does not account for all of the delay. In many, and in fact in most, delayed cases, we find that the agent did not give sufficient information on the application to allow the branch office to fully complete the requisition slip. So this condition will also be overcome by the agent having the slip to fill out. He can then see exactly what information is needed and can from his own knowledge, completely fill it out or can immediately get the information from the applicant. Certain agents have been asked to make this trial. Should it prove successful, all agents writing a sufficient volume of business to make it worth while, will be given the privilege."

After the drop from the abnormal year 1918, fire losses have shown an increase rather than a decline. Until property values decrease there is not much prospect of a reduction.

\* \* \* \* \*

Germany has no money for indemnity, but has plenty for horse races, says a newspaper, commenting on the fact that 5,000,000 marks were wagered on the Berlin races on March 7. But even in Canada we have municipalities which boast theatres, motor cars and horse races as well, but which do not meet their obligations.

\* \* \* \* \*

Municipal bond sales in February were \$9,660,503, compared with \$5,754,035 in January and with \$3,718,405 in February, 1920. The number of issues being offered in the hope of higher prices, and the issues made through local pressure for the relief of unemployment, will be a bearish factor in the bond market for some time to come.

\* \* \* \* \*

A deficit of \$453,495 for the fiscal year 1919-1920 is shown in the annual report of the University of Toronto. According to the figures submitted, a total of \$1,509,311 was spent on salaries and maintenance. The university's assets are shown to be \$7,526,055, of which nearly \$6,000,000 is represented by land and buildings and contents. The total revenue of the university was \$1,068,519, comprising statutory grants from the province amounting to \$527,400, tuition fees \$382,559 and smaller items. Fees paid by students increased by \$146,657.

## PERSONAL NOTES

FRANK L. CRAIG, formerly associated with the United Financial Corporation, Limited, has joined the bond department of MacKay and MacKay, of Toronto.

COL. J. A. COOPER, director of the Canadian government office at New York, is to retire from the government service in the near future to become a partner in the firm of Smith, Denne and Moore, advertising agents, Toronto.

O. B. SHORTLY, president of the Life Underwriters association of Canada, has left Canada in company with J. E. Kavanagh, third vice-president of the Metropolitan Life insurance Company, for a trip to Southern Europe. He will be away about three months.

ALBERT E. GILLESPIE has been appointed superintendent of agents for Canada of the Preferred Accident Insurance Company of New York, with head quarters in Toronto. Mr. Gillespie was formerly connected with the Travellers Insurance Company of Hartford, in the capacity of inspector of agents.

W. H. MARA has been elected a member of the Toronto Stock Exchange. Mr. Mara is organizing a new firm, to be called Mara, McCarthy, Limited, his partner being Leigh McCarthy, for some time connected with the Royal Bank of Canada in Toronto. Recently, Mr. Mara's business connections have been with the firm of Michie, Mara and Company, Montreal.

H. A. RICHARDSON, general manager of the Bank of Nova Scotia, and vice-president of the Canadian Bankers' Association, has just returned from a trip to Jamaica and Cuba. Mr. Richardson's impression was that, while Jamaica, in common with Canada and the United States, is finding trade rather quiet and long stocks slow of realization, conditions there are fundamentally sound, and more active business will shortly emerge.

ALEX. JOHNSTON, former deputy minister of marine for Canada, who left the department to take a position in the British Empire Steel Corporation, has decided to return to his old position. Mr. Johnston left the department a couple of months ago. Since he resigned, the work of deputy minister has been carried on by H. E. A. Hawken as acting deputy minister. When Mr. Johnston resumes the deputy minister's duties Mr. Hawken will return to his former position of assistant deputy minister.

HON. W. E. KNOWLES has resigned as provincial secretary and minister of telephones for Saskatchewan to resume his law practice. The reason advanced by Mr. Knowles for relinquishing his portfolios is that over two years' experience has convinced him that he cannot do justice to both the government and his law practise in Moose Jaw, and that he owes first consideration to his practise, "which must not be neglected but maintained as my permanent means of support after the emoluments of precarious public life have ceased." Mr. Knowles is senior member of the legal firm of Knowles, Hare and Benson, Moose Jaw. He was elected to the House of Commons for West Assiniboia in 1905 and re-elected for Moose Jaw in 1908 and 1911. He joined Premier Martin's government on May 16, 1918, as provincial secretary, and on February 15, 1919, was given the additional portfolio of telephones.

The township of Coleman has lost its appeal in the case of the concentrators owned by the Bailey Silver Mines and the Dominion Reduction Co., which the municipality sought to assess for business tax. On the ground that the plants were treating customers' ore, and not the product of their own properties, the township tried to collect business tax on assessments of \$45,000 and \$60,000.

## KINGSTON, ONT., HAS CLEARING HOUSE

A clearing house for the seven banks of Kingston, Ont., opened on March 1. Two rooms in the basement of the City Building, in the southern section, with entrance from Ontario Street, have been fitted up for this purpose. The new organization, which will be known as the "Kingston Bankers' Clearing House," has elected the following bankers as its officers: Chairman, H. A. Tofield; vice-chairman, R. T. Brymner; secretary-treasurer, George Brownlee; manager, W. B. Browne. Executive—Philip Dumoulin, J. F. Rowland and A. N. Lyster.

BANK OF NOVA SCOTIA'S NEW PREMISES AT 263 ST. JAMES STREET, MONTREAL

## AETNA LIFE INSURANCE CO.

A year of marked expansion is reflected in the annual statement of the Aetna Life Insurance Co., Hartford, Conn., for 1920. The premium income amounted to \$54,757,852, being an increase of \$9,769,496 over the previous year. New life insurance issued in 1920 amounted to \$531,675,514, and the insurance in force now amounts to \$1,155,589,341, being an increase of \$262,913,031 over 1919.

The assets of the company at the end of last year totalled \$177,502,366, an increase of \$14,404,653, while the surplus to policyholders increased \$1,572,144 to \$19,027,416. Since the organization of the company in 1850, \$395,347,390 has been paid to policyholders.

The Aetna is well-known in Canada in view of the substantial business which it transacts here. The 1920 statement of Canadian business has not yet been issued, but there is reason to believe that the usual progress has been made. The chief agent for Canada is E. J. Christmas, and the head office is at Montreal.

T. S. G. Pepler and Co., Toronto, announce that L. Soliague has retired from the firm. The business will be carried on as usual in government, municipal and corporation bonds.

# The Unemployment Situation in Canada

Problem is a Seasonable One, as Industries Absorb All Available Help in Summer—Winter Homesteading as a Solution—City Congestion is One of Greatest Difficulties

By E. L. CHICANOT

ONE of the most serious problems Canada has to face in her economic development, and one which in a new and expanding country is fraught with the most tremendous and significant import is that of periodically recurring unemployment. Each winter, as the country achieves greater expansion industrially and commercially, the flood of unemployed in cities and industrial centres seems to increase in volume and the situation become more acute and aggravated. In the past two years the state of affairs has been more persistently thrust upon the attention of the public by reason of the substantial proportion of ex-service men in the ranks of the unemployed, men who due to the unsettled state of affairs existing since their demobilization have not achieved complete re-establishment by securing regular employment, or being the latest hands taken on are the first let out. Particularly serious have been conditions during the present winter where numbers running into the thousands in the larger centres were forced out of employment by the industrial slump which overtook the country. Help in practically every part of the Dominion had to be extended by government and civic bodies, a great many becoming absolutely destitute and wholly dependent.

Unemployment was anticipated by the Canadian government as an inevitable aftermath of the great war due to the disturbance of economic conditions and the settling back in civil life of a huge army approximating a quarter of a million men. It took some steps accordingly to meet this state. It created the Government Employment Bureau, one of the most admirable and harmoniously working systems devised to meet labor conditions, and which in the first fifteen months of its existence placed more than six hundred thousand persons in employment. More than thirty thousand of these were men transported from one part of the Dominion to another, who could not be placed in employment in their own locality of residence. The government also created a certain amount of work to relieve the situation, the amount expended aggregating several million dollars. In this it had the co-operation of provincial and municipal authorities working in the same direction, municipalities being repaid one-third of the money so disbursed.

That government and municipal assistance has in some wise relieved the situation or alleviated a threatened condition seems to be evident in the fact that in spite of the disturbed state of economic affairs in Canada since the termination of the war, and the problem of rehabilitating a huge army, unemployment in the Dominion in December, 1920, was stated by the Minister of Labor to be less than at the same date in 1914. Furthermore every man desiring work during the summer of 1920 was accommodated on the same authority.

## Difficulty is Seasonal

This question of unemployment, which will be found to be purely seasonal, occurring solely in the winter months, is one of most serious economic import, fundamentally touching the national life of the Dominion. On the one hand Canada is putting forth every effort to attract to her shores new blood to develop her wealth of barely tapped resources, whilst on the other there is an apparent failure to find adequate employment for those within her borders. It is a problem which calls for the utmost thought and investigation on the part of Dominion leaders as its bearing on immigration and colonization and the effect it is liable to have in the tide to our shores is difficult to estimate. Already there have been demands from labor organizations to shut the doors at the ports of entry, and steps have been taken in

view of the existing situation this winter to ensure that every newcomer of the artisan or laborer class is possessed of \$250 to guarantee his subsistence over the winter months.

There can be no gainsaying the fact that unemployment in Canada becomes a problem only in the winter. Whereas in 1920 the percentage of unemployed among trades unions in August was but something over two per cent., in December it was ten. This of course only covers the men who follow trades covered by unions. Of that great army of casuals and transients no records can be kept. But it is safe to say that in the month of August no able-bodied man willing to work need have been out of a job. The situation in December might be judged by the bread line in some of our cities.

There is no need of an able-bodied man being out of employment in Canada during the summer months when every province of the Dominion offers such a variety of out-of-door occupations. Every summer brings cries of men wanted for haying or harvest, of men wanted for railway construction, and other jobs of the open which appeal to that vast aggregation of casuals who have for profession but the strength and muscle of body. Judged by professions and skilled trades, wages for this kind of work are often high, a very fair recompense for the amount of labor expended. Expenses in this kind of life are reduced to a minimum, leaving opportunity for extensive savings. As a contrast we find our cities and industrial centres in the winter time overcrowded with a list of unemployed, many of whom become destitute before the season is over and public charges.

The eminently desirable condition in Canada, and the only one which would apparently solve the situation, would be a just balance of summer and winter seasonal occupations. On the face of it it seems very difficult to arrive at Canada being so largely an agricultural country and one where the exploitation of natural wealth occupies so large a portion of the casual labor class. The severity of the winter months precludes these to a great extent, and there is a consequent seasonal decline with little in the labor line to correspond. There are however a few purely winter occupations which can accommodate a part of the men laid aside after other work is ended. The question is how extensively are these taken advantage of, and whether a more equitable balance is possible of achievement, thus bringing about a greater equality of employment between winter and summer and keeping more casual hands occupied the year round.

## Plenty of Work in Summer

The amount of work the various phases of summer activity entail can absorb apparently any amount of men. The demand increases yearly and there is always a dearth in some of the occupations which do not call for skill or training. The quick assimilation of the greater part of the Canadian army after demobilization was partly due to its being accomplished in the months when work in the open air was possible. Not only men who had followed this kind of work took it up again readily but many skilled and professional workers who saw no immediate openings in their respective lines were temporarily absorbed by this class of work, preferring to be absorbing their energies whilst waiting. In the western provinces especially numerous industrial and professional workers clerks, bookkeepers, accountants and others engaged in agricultural work, went to the woods, or followed railroad construction for the summer months. The scope of this work is ever increasing as summers come round, and could the country be assured that the total volume of

immigration, or the major portion of it, would go on the land there would be no need of taking measures to stem the tide, except of course, to bar undesirables.

Just how far is winter unemployment justified by circumstances? In the western provinces especially, but in the newer expanding areas of the older provinces also, there is a substantial aggregation of men, mostly single and unattached, casuals and transients who work through the open season, and with the advent of the frost and snow and the cessation of their work, rest on their oars for the winter months. They may be broncho-busters, hay or harvest help, railroad construction workers, or followers of a dozen other pursuits which keep a man out in God's open air. They are purely open air workers and have no intentions of working through the winter, regarding that season as one of legitimate holiday. It of course goes without saying that they have made enough money during the working season to have put by a substantial amount, enough to see them over the frost-bound months. Many of them kill two birds with one stone and put in their time on homesteads they have filed on fulfilling their occupational duties. They live at a minimum of expense free of house rent and the other exactions of a city. Others put in their time as hired help upon farms doing the few odd jobs which accompany farm work in winter for a comfortable lodging and their food. They are successfully and economically tided over the winter and with the recurrence of spring are able to make a fresh commencement with a little harbored capital to be further increased by the next winter.

#### Unemployed Crowd in Cities

To these men the winter presents no great problem. But the winter months must be spent in the country. To flock into the cities spells disaster all round. Expenses are higher, temptations to spend greater and more numerous, and before a man knows where he is, his little store is gone, he is an applicant for employment in which respect the city has sufficient to do to accommodate its own industrial workers, and he becomes one of the unemployed dependent upon the city which in reality owes him nothing.

An analysis of unemployment in Canadian cities will show that a goodly percentage comes from outlying districts, sometimes widespread and distant. Work has ceased and too many men are inclined to come to the cities to spend what they have accumulated during the summer, or finding outdoor working conditions distasteful with the coming of winter and monotonous after the long summer's toil come in to the greater comfort and companionship of the more populated centres. In the lists of unemployed this winter cases came to light of men leaving remunerative labor in the bush for the city in the hope of finding easier work, to eventually add to the ranks of the dependent unemployed when disappointed. And at times during the winter months, when city unemployment was acutest, demands for labors in the unattractive out-of-doors went unheeded, and employers were unsatisfied.

Winter unemployment in Canada then resolves itself into caring for the industrial out-of-works belonging to the cities, a condition which is more or less inevitable, depending on industrial conditions, and only to be partially guarded against by the workers themselves who, for the main part find it impossible to save; and keeping those casuals and transients, who have been engaged at work in the country, away from the larger centres to which the tide invariably tends as the winter closes in. In solving the problem city authorities might go farther in an attempt to distribute their own unemployed in outlying districts where they might be at least given the opportunity to earn their board. The unemployment bureau is at all times cognizant of opportunities away from the cities and might assist in seeing that a portion of the unemployed are sent out to these places and relieve the city of that much of its burden.

The land is Canada's eternal salvation and more might be done in this direction in the winter time. Most farmers are glad of an extra inexpensive hand about their places in

the winter time to do odd jobs, and do not miss the food that an extra mouth consumes. Some system of co-operation might be arranged with the farming municipalities to bring about such a beneficial distribution.

#### Cannot be Fastidious

An indispensable factor in all solutions is necessarily the earnest and accommodating attitude of the out-of-work. He cannot be fastidious or independent but realize that he is for the time being the victim of circumstances and in no position to choose, but should be ready to take temporarily what offers. He must of himself be anxious to relieve the public of the burden of his dependence or else be compelled to do so.

It is a terrible reflection upon Canada which boasts of her tremendous wealth and vastness of resources, that she should have a pressing employment problem. It reacts upon the nation in the worst way and other countries are not slow to point out the fact as an unmistakable sign of economic instability. Immigrants are apt to be deflected when they see that Canada is unable to employ those citizens she already has. Canada is unfortunate in not possessing sufficient winter occupation to balance that of the summer, but sufficient is not being made of her winter pursuits nor to encourage winter labor away from the industrial centres which are most apt to experience a seasonal decline at that time. It is the duty of the government and the public in general to do all in their power to relieve and solve the situation and banish this reflection from our great Dominion which not only possesses such vast potential wealth, but is producing yearly in ever increasing proportion a wealth which makes her citizens, per capita, among the richest in the world.

#### BUYERS ARE STILL CAREFUL

"The week has developed little variation in business conditions as last outlined," say R. G. Dun and Co. in their March 5 review of business in the Montreal district. "The markedly mild spell has caused some break up of country roads, but no falling off is noted in district collections, and the failure list is comparatively light. There has been a very fair attendance at the wholesale millinery openings this week, and general satisfaction is expressed with the volume of sales. Dry goods men report that the mild weather has occasioned many calls for the quick shipments of prints and other spring lines. Orders are still marked by careful buying, but a very fair aggregate of business is being booked. The cotton mills are making rather freer deliveries, but some shortage still exists of sundry staple lines of cottons. Boot and shoe manufacturers are rather disappointed at the announcement that further negotiations for the placing of an order for Italian army shoes have been dropped, the Italian government having decided to award the business to home manufacturers. Tanners are not pressed with orders, but prices are fairly steady. In the grocery line no new features are presented. As in other lines, there is some disposition to look for lower values, but the volume of business is about normal."

Regarding the Toronto district, the following is said: "The feature of the week was the presence of western buyers in the wholesale district, where they are credited with having made some very fair-sized purchases. Complaint regarding the inability of Canadian mills to supply the demands of jobbers for pillow cottons and ginghams is frequently heard. Demand for these goods is well maintained. Some houses experienced for a short time an increased call for woollens, but this apparently was only a temporary rally. Rugs and draperies are slow-moving lines. Ladies' dresses, skirts, etc., sell well, and many plants are working at high pressure to meet a welcome rush. A more careful scrutiny of credits than ordinary is in vogue amongst shippers in this line, but a fair risk gets all the goods required. Millinery firms are busy, and out-of-town visitors patronize the showrooms in ever-increasing numbers.

# Manitoba May Build Railway to the North

Plan Suggested in Annual Report of Railway Commissioner—Position of Telephone System Set Forth—Present Session of Legislature Discusses Important Measures—Sixteen Applications Under Sale of Shares Act Were Refused

**F**OLLOWING the election last fall, in which the Norris government obtained only 21 out of the 55 seats, but was still the strongest of the four groups in the legislature, the 1921 session in Manitoba opened on February 10 with the outlook very uncertain. The speech from the Throne referred to the bountiful harvest last year, and to the steps being taken to encourage farming. A Manitoba Joint Council of Industry was established in May, under legislation of the 1920 session, and the opinion was expressed that the plan was successful. A beginning has been made under the Electric Power Transmission Act, in the construction of the transmission line to Portage la Prairie. Mining progress in the north had also been notable, and brought up the question of transportation, while the first open hearth steel furnace in the province had been started in 1920. Reference was also made to the effort to prevent the increase in freight rates.

Lieutenant-Governor Sir James Aikins also said:—

"During the recess representations through a deputation were submitted by my government to the government of Canada for securing the transfer of the natural resources of the province to the provincial jurisdiction. The memorial presented on that occasion, setting forth the considerations in support of the justice of the claim of the province to the ownership and control of the public lands, timber, minerals and all the other natural resources within the boundaries of the province, together with the correspondence between the government of this province and the government of Canada in regard to this demand made for the correction of what my government considers to have been an injustice done to Manitoba for half a century, will be laid before you.

"During the past year my government has been able to meet to a large degree the demands of the municipalities for funds to carry out the plans formulated to relieve the shortage of dwelling houses. It is apparent that there is still need for further loans, as there is comparatively little money available from other sources.

"The Manitoba Farms Loans Association has continued to render very valuable service to the farmers of the province during a trying time. The Rural Credits System has also had another successful and useful year and has been of much advantage to the agricultural community. Funds for the carrying on of the work of the rural credits societies were provided directly by the province for the first time since the system was inaugurated. The system of provincial savings offices, authorized at the last session of this legislature, for the purpose of financing the rural credits societies and other purposes, has met with satisfactory success."

## Projected Measures

An exceptionally large number of building restriction proposals are being brought before the legislature this year for consideration. Legislation authorizing the guarantee by the province of bank advances to municipalities which are temporarily financially embarrassed will be put before the House at this session of the legislature, it was announced on February 17. The enactment will go through as an amendment to the Treasury Act, and was requested by several municipalities.

A bill providing for a Bulk Sales Act will be placed before the legislature this session in accordance with the recommendations made by the commissioners on Uniformity of Laws for Canada, Hon. Thomas H. Johnson, attorney-general, stated. The act gives protection to creditors in order to prevent them from being defrauded by debtors disposing of their stocks. All provinces of the Dominion have laws along this line, but the purpose is to make them uniform.

Abolition of the Public Utilities Commission, broadening of the Workmen's Compensation Act, limiting of work to eight hours per day and other legislative enactments aimed to better the status of the worker, are among the more important matters urged in the annual labor legislative program placed before the provincial cabinet on January 29 by the Winnipeg Trades and Labor Council.

A statement showing special warrants issued during 1920 was tabled by Hon. Edward Brown, provincial treasurer, showing that the sum of \$276,900 had been appropriated for special warrants. Four items made up the bulk of the amount. Mr. Brown said, \$125,000 was spent to prevent the grasshopper plague from spreading; \$20,000 added appropriation to the Mother's Allowance board; \$25,000 for relief in fire swept districts and \$54,000 to the administration of justice. The remainder was made up from various government departments.

## Insurance and Fire Prevention

The report on insurance and fire protection was presented. It stated that the premiums collected during the year amounted to \$11,656,309. Losses paid were \$3,501,506. There are 31 licensed insurance companies doing business in the province, and 135 registered companies are doing business under the Manitoba Insurance Act. The very heavy increase in the premium income, it was stated, would offset much of the increase in the amount of the losses which had been paid. The opinion that some sort of qualification should be required from insurance agents before a certificate of authority is issued to them is gaining ground, and it is anticipated that it will not be long before strong representations will be made to the legislature that the grounds for the cancellation or refusal of an agent's certificate of authority be considerably increased.

There were 1,739 fires. The total loss is estimated at \$2,276,261. The increase in number is 136, and the increase in loss \$641,399. In Winnipeg there were 893 fires, and in Brandon 130. The loss ratio per capita of the province, based on an estimated population of 613,000, amounts to \$3,713, against \$2,667 for the previous year. There were 24 deaths from fires. The report stated that 75 per cent. of the fires were due to "sheer carelessness or ignorance." Plans are under consideration for the creation of a greater interest in fire prevention.

Manitoba has in its provincial treasury, in cash and securities, 23 per cent. of her gross debt, the provincial treasurer told the legislature on February 22. He said this was unequalled by any other province or city in the Dominion. He read to the House a list of the securities as follows: Dominion bonds, \$781,000; Manitoba bonds, \$1,776,000; municipal, \$3,143,000; school, \$840,000; farm loans, bonds and shares, \$3,650,000; rural credit societies' bonds, \$14,000; and in actual cash, the total of unexpended capital balances, \$2,119,000—a total of \$12,300,000. The gross capital debt of Manitoba is, he said, \$51,000,000. When the present government came into power the gross debt was \$27,000,000.

## Public Utilities Report

The past year witnessed the largest number of applications under the Sale of Shares Act since this act was put into force, according to the ninth annual report of the Public Utilities commission presented to the legislature by Hon. Thos. H. Johnson. P. A. Macdonald, commissioner, states that the administration of this act has become an important feature in the activities of the commission. Last year was

### Make Your Money Work to Earn More Money for You

notable for a complete absence of complaints against the workings of the act.

The amendment to the Sale of Shares Act, governing mining companies, resulted in the administration of the act becoming smoother. The amendment establishes the status of promotion shares and provides that before this class of shares can be offered, the company must file proof with the commissioner that development work so far carried out has demonstrated that there is a reasonable prospect of a return to the investor. Upon this being established, a special certificate will be granted for such class of shares. The commissioner exercised stringent measures to prevent the offering of foreign schemes, particularly oil speculations, reaching the public, and commends the spirit shown by the local press in co-operating in this desirable object. For the year ending 30th November, 1920, 73 formal applications were received under the Sale of Shares Act; 16 applications were refused.

The Greater Winnipeg Water District board of equalization was appointed by the commission and the assessment for the district made by the board for 1920 was \$173,734,838. The commission also suggested to the water board the importance of prompt action to prevent damage to the aqueduct through the action of alkali in the soil.

The number of public utilities under the commission's jurisdiction may be grouped as follows: Four electric railways, 13 water, 36 electric light and power, 2 gas, 17 telephones, 38 telephones, privately owned lines operated for mutual accommodation; 9 acetylene gas, 125 government grain elevators.

#### The Railway Situation

The government has in view the development of the mineral belt of the northern portion of the province already explored, it is stated in the report of the railway commissioner, Premier Norris, which was submitted on February 18. It has under consideration certain proposals regarding the construction of a railway to serve the district referred to. A survey of the road is now in progress, starting at Mile 7 from The Pas on the Hudson Bay line and then on west to Lake Athapapaskow, 53 miles, and from that point along the north side of the lake to the Flin Flon mining area, a total of 85 miles. A four-mile spur line from the Hudson Bay line has already been built along the proposed route.

With reference to the Hudson Bay Railway, the commissioner states that assurances received from the Dominion would indicate the early completion of this line. When this stage is arrived at the line will doubtless be operated by the federal government as a portion of the Canadian National system. The total expenditure in connection with the railway, including that for 1920, approximately \$220,000, is \$21,016,445.

#### Report on Telephones

Although there was a surplus of revenue of \$240,964 over expenditures on the Manitoba government telephones for the year ending November 30, 1920, interest charges for the year amounting to \$633,653 caused a loss of \$392,688 on the system for the year, according to the thirteenth annual report of the Manitoba government telephones tabled in the legislature on February 21. Total revenue amounted to \$2,586,966, while total expenditures amounted to \$2,345,184. Exchange tolls collected during the year totalled \$1,948,824, while operating expenses amounted to \$1,191,441. According to the report, the loss was provided by surplus moneys which accrued prior to 1913, amounting to \$184,312, and which were advanced by the provincial treasurer. Of this amount, \$101,570 has been retained for interest which has accrued, but which is not yet due.

The assets, estimated at \$18,503,623, include the plant, which is valued at \$13,217,288, investment securities to the value of \$2,128,000 and intangible capital to the value of \$1,138,568. Included in the liabilities are the government's investment of \$15,844,003 and replacement reserves amounting to \$2,373,975. Included in the tabulated statement of

the year's expenditures are the sums of \$62,833 for total general expenses, \$229,226 for total commercial expenses, \$875,616 for total traffic expenses and \$849,077 for total maintenance expenses. The expenditures on exchange lines amounting to \$398,244 included the cost of 28 miles of exchange pole lines, 3,440 miles of wire in aerial cable lines, 285 miles of aerial wire, 22 miles of underground conduits, and 11,768 miles of wire in underground cables.

#### SYDNEY FIRE RATES ADVANCED

At a meeting of the Nova Scotia Board of Fire Underwriters, held at Halifax on February 9, the following resolution was adopted: "Resolved, that the rates on all buildings and their contents in Sydney (other than dwellings) be changed by removing any surcharge now in force, and increasing the rates as set forth in the tariff book of Sydney by a surcharge of 50 per cent. This increase to apply to new business and readjustments from this date (February 8) and to renewals on and after March 1, 1921."

#### TO RUN STEAMERS FAR NORTH

The formation of a new company to operate steamers on the Mackenzie River to below Fort Norman has been announced, and a Toronto man, Charles Miller, is president. A. Hutchison, also of Toronto, is named as vice-president. Four steamers have been taken over by the new company. Another one is being built and will be ready for the opening of navigation in the spring. It is announced that the new company will be strictly a transportation company and will not engage in either the oil or fur business. Advance notices say that in the spring steamers will be operated on the Peace, Athabaska and Mackenzie Rivers, the steamers on the last-named river travelling right down to the Arctic during the summer months. The oil discoverers are credited with promising a big transportation business on these rivers.

#### MONTREAL BANKS ARE SWINDLED

Three Montreal banks were early last month swindled out of \$10,000, \$5,000 and \$2,000 respectively. About February 1 a man entered each of the three banks at their headquarters offices and opened small accounts. The three accounts were opened on the same day. Everything was done in a regular way. Later, however, the man presented himself at one of the banks and made out a cheque for \$2 and he asked that this be certified. After properly identifying himself, the man had little trouble in having a cheque for so small an amount accepted. At the two other banks the same thing was done for amounts varying from \$2 to \$10. Later in the week the cheques were presented, endorsed with another name. In each case the amounts were raised, the \$2 cheque being made for \$2,000, the \$10 cheque for \$10,000, and the \$5 cheque for \$5,000. Being certified cheques, they were cashed without question.

Later investigation showed that there was not enough money in the account on which the cheque was made out to meet the amounts which had been paid out. It was only after investigating the acceptance of the cheques that it was found out that they had been raised in some way. The cheques were submitted to experts, who declared that the cheques had been written for the most part in invisible ink. The additional figures or words did not show when the cheques were presented for acceptance, but a simple chemical process brought out the ink later. Microscopic examination of the cheques showed that they had not been scratched or discolored in any way, and that a soft, rounded pen had been used. It was discovered that the man who had opened the account did not reside at the address he had given, and there seem to be no clues on which the detectives can work.

## FEBRUARY BOND SALES AGAIN HIGH

WHILE there were no provincial or railroad issues in February, the total bond sales for that month amounted to \$17,660,503, as compared with \$38,054,035 in January and \$6,786,405 in February a year ago. The feature last month was the large amount of municipal borrowings, in which every province, with the exception of Prince Edward Island, participated.

With the exception of one corporation issue, and perhaps a few odd blocks of others, last month's financing was arranged in Canada. The municipal bonds, particularly those

of the better class, found a ready market here. Interest yields were also lower, notwithstanding the generous offerings.

The following figures show the amount of February bond sales, with comparisons, while details are given below:—

	Feb., 1921.	Jan., 1921.	Feb., 1920.
Provincial . . . . .		\$18,250,000	\$2,998,000
Municipal . . . . .	\$ 9,660,503	5,754,035	3,718,405
Corporation . . . . .	8,000,000	12,000,000	.....
Railroad . . . . .		2,050,000	160,000
<b>Totals . . . . .</b>	<b>\$17,660,503</b>	<b>\$38,054,035</b>	<b>\$6,876,405</b>

# Fraser Companies, Limited

## 8% General Mortgage Gold Bonds Series "A"

Dated March 1st, 1921. Maturing March 1st, 1941. Principal and semi-annual interest payable at The Royal Bank of Canada, Montreal, Toronto, St. John, N.B., and Halifax, N.S. Interest payable March 1st and September 1st. Coupon Bonds of \$1,000 and \$500 denominations, with privilege of registration as to principal only. Trustee—The Montreal Trust Company, Montreal.

Common Shares .....	Authorized \$10,000,000	Outstanding \$10,000,000
6% First Mortgage Serial Bonds .....	Closed 2,250,000	
8% General Mortgage Bonds Series "A" (this issue) .....	10,000,000	2,000,000

\$250,000 First Mortgage Bonds mature 1st April of each year 1921-1929 inclusive. These annual reductions in funded debt, together with annual cumulative Sinking Fund of 3% on General Mortgage Bonds, rapidly increase the equity behind this issue.

Complete prospectus, copies of which will be mailed on request, contains a letter from the President of the Company, from which he summarizes as follows:—

Fraser Companies, Limited, is one of the largest manufacturers in Canada of easy bleaching and bleached sulphite pulp, spruce lumber and cedar shingles. The business has been in successful operation for over forty years.

Bonds will be secured by direct mortgage and charge on all fixed assets and properties of the Company, now owned and hereafter acquired by it, and by a floating charge on all other assets of the Company, subject only to \$2,250,000 par value of First Mortgage Serial Bonds, the mortgage securing which is closed at the amount now outstanding.

Annual cumulative sinking fund of 3% will commence in 1923—sufficient to retire the entire issue of Series "A" Bonds before maturity.

Timber areas—1,822 square miles leasehold and 210 square miles freehold timber limits, estimated to contain 1,760,000,000 ft. h.m. saw logs and 1,650,000 cords pulpwood. Company in addition has leasehold cutting rights on 900 square miles of privately owned lands.

Company owns and operates two pulp mills, at Edmundston and Chatham, N.B., and twelve saw mills in New Brunswick and the eastern portion of Quebec. Each of the Company's mills is located in convenient proximity to the area from which its logs are obtained.

Annual output:—

Edmundston Mill—Bleached Sulphite Pulp.....	54,000
Dominion Mill—Easy Bleaching Sulphite Pulp.....	18,000
<b>Total Pulp Production .....</b>	<b>72,000 tons</b>

Lumber—130,000,000 ft. h.m., annually. Shingles—168,000,000 pcs. annually.

Plant and Property Valuation—\$14,000,000 against \$1,250,000 of Bonds outstanding, including this issue.

Net Liquid Assets (Working Capital), after deducting all current liabilities and including the proceeds of this issue, will be in excess of \$1,000,000.

Average Annual Net Earnings, after depreciation, available for interest charges on these Bonds, for the five years ended December 31st, 1920, were \$741,450, over four times interest charges on General Mortgage Bonds now to be issued.

Net Earnings, after depreciation, for year ended December 31st, 1920, available for interest charges on General Mortgage Bonds, amounted to \$1,276,301, nearly eight times interest charges on General Mortgage Bonds now to be issued.

We offer the unsold balance, if, as and when issued and received by us, at the price of:

## FEBRUARY FIRE LOSSES ABNORMAL

Two Months' Total Higher than Last Year—Winnipeg, Levis,  
Toronto and Saskatoon had Largest Fires

Fire losses in Canada in February are estimated by *The Monetary Times* at \$2,735,500, made up as follows:—

Fires exceeding \$10,000 .....	\$2,164,000
Small fires reported .....	71,500
Estimate of unreported fires .....	500,000
	\$2,735,500

This is larger than the loss in February, 1920, and makes a total of \$4,973,400 for the first two months of 1921, compared with \$4,533,425 for January and February, 1920.

## List of Large Fires

The following are the February fires causing damage of \$10,000 and over:—

Cooksville, Ont., Feb. 2, garage, \$10,000.
Halifax, N.S., Feb. 3, billiard parlors, \$100,000.
Toronto, Ont., Feb. 3, residence, \$58,500.
Toronto, Ont., Feb. 6, building, \$150,000.
Windsor, Ont., Feb. 1, brewery, \$25,000.
Winnipeg, Man., Feb. 3, business block, \$300,000.
Winnipeg, Man., Feb. 6, business block, \$75,000.
Essex, Ont., Feb. 15, school, \$60,000.
Guelph, Ont., Feb. 10, factory, \$50,000.
Hamilton, Ont., Feb. 13, Osborne Chambers, \$70,000.
London, Ont., Feb. 10, store, \$42,000.
Ottawa, Ont., Feb. 13, storeroom, \$12,000.
Port Arthur, Ont., Feb. 13, building, \$20,000.
Rothsay, N.B., Feb. 8, residence, \$15,000.
Ste. Helene, Kamouraska, P.Q., Feb. 2, store, \$10,000.
Shawinigan Falls, Que., Feb. 8, two houses, \$20,000.
Campbellton, N.B., Feb. 21, lumber mill, \$30,000.
Fort William, Ont., Feb. 17, business block, \$15,000.
Hamilton, Ont., Feb. 23, hospital, \$70,000.
Levis, Que., Feb. 21, car sheds, \$300,000.
Montreal, Que., Feb. 18, building, \$100,000.
Ottawa, Ont., Feb. 19, business block, \$40,000.
Pictou, N.S., Feb. 16, mill, \$20,000.
St. John's, Nfld., Feb. 19, residence, \$50,000.
Saskatoon, Sask., block, \$200,000.
Toronto, Ont., Feb. 22, building, \$35,000.
Travers, Alta., Feb. 17, building, \$20,000.
Vancouver, B.C., Feb. 15, cabaret, \$10,000.
Woodbridge, Ont., Feb. 20, church, \$20,000.
Woodstock, Ont., Feb. 19, barn, \$10,000.
Brandon, Man., Feb. 23, store, \$16,000.
Creighton Mines, Ont., Feb. 25, schoolhouse, \$20,000.
Lambton, Ont., Feb. 27, building, \$25,000.
Loiselleville, Ont., Feb. 26, school, \$40,000.
London, Ont., Feb. 23, billiard parlor, \$10,500.
Trenton, N.S., Feb. 25, plant, \$60,000.
Wellsand, Ont., Feb. 28, mill, \$25,000.
Yarmouth South, N.S., Feb. 27, church, \$30,000.

## Analysis of Causes

Among the causes reported were: Furnaces 5, explosions 4, ovens 3, incendiary origin 3, sparks 2, lighted candle 1, spontaneous combustion 1, electrical origin 1, cigarette stub 1.

The following structures were destroyed or damaged: Residences 34, stores 11, buildings 15, business blocks 6, barns 6, warehouses 4, poolrooms 3, schools 3, mills 3, factories 2, plants 2, hotels 2, bakeries 2, churches 2, restaurants 2, garage 1, picture gallery 1, brewery 1, hospital 1, car sheds 1, theatre 1, cabaret 1, icehouse 1, roomin-house 1.

The following is a list of deaths from fires during February:—

Woodstock, Ont., Feb. 18, clothing caught fire.....	1
Melfort, Sask., Feb. 18, burnt in building .....	2

Montreal, Que., Feb. 26, clothing caught fire .....	1
Pine Hill, Que., Feb. 7, burnt in building .....	4
Vernon, B.C., Feb. 4, bedding caught fire .....	2
Erampton, Ont., Feb. 11, burnt in building .....	1
Marbleton, Que., Feb. 10, burnt in building .....	1
Moncton, N.B., Feb. 14, burnt in building .....	6
	18

The *Monetary Times'* record for the past four years shows the following monthly losses:—

Month.	1918.	1919.	1920.	1921.
January ...	\$ 2,688,556	\$ 3,915,290	\$ 2,637,850	\$ 2,237,900
February ...	2,243,762	1,091,834	1,895,575	2,735,500
March ....	1,682,286	2,154,095	1,793,200	.....
April ....	3,240,187	1,080,070	3,229,500	.....
May .....	3,570,014	1,785,130	2,001,819	.....
June .....	3,080,982	3,337,530	1,424,319	.....
July .....	3,369,684	1,118,377	1,426,850	.....

## STANSTEAD AND SHERBROOKE FIRE

The annual report of the Stanstead and Sherbrooke Mutual Fire Insurance Co., submitted at the meeting in Sherbrooke, Que., on February 9, showed net income of \$153,585 and expenditure of \$132,203, leaving a surplus of \$21,382. Assets are \$354,735, and the surplus over liabilities is \$323,861. The usual assessment of 20 per cent. on all deposit notes in force was levied, and a resolution passed to issue new stock to the amount of \$200,000. George Armitage is the manager of the company.

## CENTRAL RAILWAY APPEAL DECIDED

The appeal has been dismissed in the Exchequer Court of Canada of C. N. Armstrong, of Montreal, against the report of the referee in the Central Railway case. Mr. Armstrong asked prior consideration for his claims against the railway, amounting to \$109,941 and asked that the court set aside in his behalf the report of the referee, Dr. Charles Morse, registrar of the Exchequer Court. Mr. Justice Audette ruled that Mr. Armstrong had failed to establish his claim and dismissed the appeal with costs. The report of the referee is upheld.

Mr. Armstrong was appointed manager of the Central Railway when the company was in process of formation. The railway, which was projected to run from Montreal to Midland, Ont., was never constructed. Mr. Armstrong's salary was fixed at \$10,000 a year for ten years "to be paid from time to time as the board of directors shall instruct." The judge rules that a company is not justified in paying a manager of a railway which does not operate and therefore has no revenue. Although the salary was agreed upon, the judge notes that no definite time was fixed for its payment. Mr. Armstrong's claim includes an amount of \$45,000, a balance of \$50,000 which was voted to him in first mortgage bonds, which he stated were given him as collateral. The judgment finds that the claimant failed to prove that these bonds had been given him.

Some smaller items representing expense money claimed, were also disallowed, it being shown that vouchers had not been submitted for moneys received, and any sums due on expenses were probably offset by balances due to the company. The entire claim was dismissed.

# Protecting the Nation's Vaults

Banks and other Financial Institutions, Manufacturers, etc., are assured of absolute safety and protection against robbery.

A Vault Door equipped with the Dillon Re-Locking Burglar Proof Vault Lock will defy every method of attack of the most experienced cracksmen.

This device has now been installed in over 2200 Banks, and every case where it has been put to the test it has foiled the would-be robbers.

The Dillon Burglar Proof Vault

Lock consists of a secret lock, which "springs" re-locking all the bolts on the door when the regular combination is tampered with. It operates only when the combination is punched in, shot off, burned out or otherwise destroyed, and is not subject to false lock-outs.

If you have a vault, for the storage of money, notes, bonds or other valuable papers it should be equipped with a

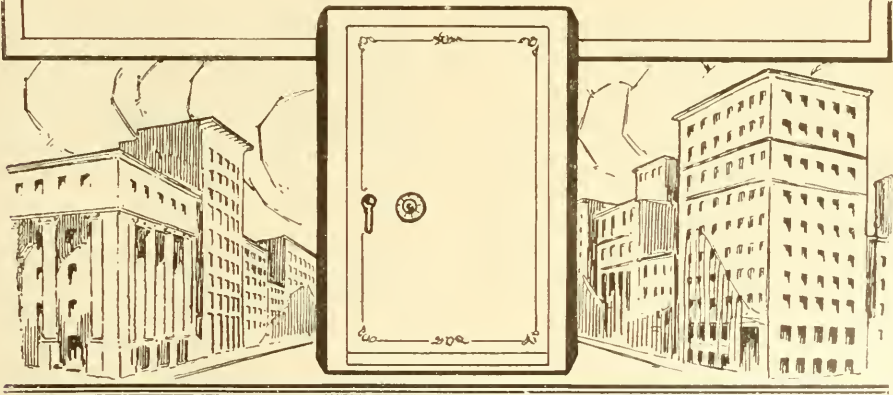

## Dillon Burglar Proof VAULT LOCK

Dillon Burglar Proof equipment includes complete Electrical Protection covering daylight and night robberies, as well as burglar proof locks for vault doors.

By Order of the Board.

H. A. BURSON,

Secretary.

St. Catharines, Ont., March 5th, 1921. 476

ACTION ON I.O.F. POLICY

The Toronto courts have found for the plaintiff in the suit of Clarence Richardson against the I.O.F. for \$831, one-half of the amount due on the life of his father, C. W. Richardson, who died in Chicago, January 6, 1918. The plaintiff and his grandmother were named as beneficiaries, but later the insured had his sons name replaced by that of Mrs. Gussie Richardson, whom he represented as his wife, and to whom one-half of the money was paid. The deceased had a wife, Mrs. Nellie Richardson, mother of the plaintiff, living in Toronto at the time he went through the form of marriage in Chicago, so his Honor finds that, substituting the name of Mrs. Gussie Richardson, who was not the insured's wife, for that of his son, was contrary to the Insurance Act. At the time the alteration was made the plaintiff was overseas on active service, and knew nothing of his father's death until his return on May 30, 1919.

## WOULD HAVE NATIONAL HEALTH INSURANCE

British Columbia Movement May Reach Ottawa—Insurance Developments in B.C.

(Special to *The Monetary Times*.)

Vancouver, March 4, 1921.

WHILE no official word has been received regarding the government's intention, a persistent rumor is in circulation in Victoria circles that the Federal government has been approached with a request that the State Health Insurance Bill, proposed here last year, be passed by them; members of the legislature opposed to state health insurance state that if it were passed in British Columbia this province would be a mecca for hundreds of broken down professional beggars, and that class of men who would rather be sick than work, any day.

### The Rule of the Road

The announcement of the Hon. Dr. King that the rule of the road in British Columbia will be changed from left to right in December next has again aroused a great deal of interest. In all sections in British Columbia outside where the street railway company operates, the rule of the road has been changed from left to right, resulting in many automobile accidents. Where the street railway operates, however, the B.C. Electric Co. state they have made no provision for accommodating their tracks to comply with the new order. They have stated to the press that no matter how willing they are to fall into line with the desire of the people for the change, they had not the necessary one million dollars to spend upon the work. The company do not believe that the public realized the amount of money necessary. Thirty new cars would be required alone to take the place of those taken off to be altered.

The insurance companies, as well as the general public, are quite aware that auto accidents are on the increase in British Columbia, as well as auto thefts.

About a year ago Vancouver Island boasted that not in the history of automobiles had a single car been stolen which had not been recovered, and Vancouver proudly referred to their record of only two stolen cars which had not been recovered. For the past year, however, this record was not maintained, for statistics show that eight or ten cars stolen have not been recovered, and the number of stolen cars which have been recovered in damaged condition is greatly increased over the previous year.

So far as accidents are concerned, it has been reported to the Ratepayers' Association that last year there was an accident once in every 17 days in Vancouver, but for the first part of this year there was an accident occurring for every ten days. It is only some of the reckless drivers who are responsible for these accidents; most of them are from breaking the rules by driving past street cars when the latter have stopped or are coming to a stop, and not taking proper notice of street intersections.

A delegation of life underwriters waited on Attorney-General Farris this week, asking that legislation be passed whereby the life agents may be licensed and the insurance act amended in such a way as to improve conditions for the public as well as the agents. They were promised consideration of their request.

It is understood that insurance agents in other lines will probably make the same request, so that if insurance agents are to be licensed, it will apply to all agents of all insurance companies. It is understood that an inspector of insurance is to be appointed. There is a feeling among insurance agents that the legislature of British Columbia are too busy with the prohibition bill and other bills of a contentious nature to take up the question of any amendment to the Insurance Act at this session, and they feel it is better to take a little more time in preparing their wishes and place them in such a form as to assist the government in carrying out their desires in this matter.

## AUTOMOBILE INSURANCE POINTS

Desirability of Separating Personal Accident and Property Damage Claims in Third Party Contract

(Contributed.)

WITH the approach of the automobile season special attention may be directed to points of interest in insurance contracts. One matter which concerns both automobile owners and insurance agents is the practice which has ruled in the past of separating the risk of accidents into two distinct sections, viz: (1) personal injury claims and (2) property damage claims. It has been quite common for automobile owners to insure the personal injury risk and not to cover the property damage risk; or, on the other hand, to insure the property damage risk and to neglect to insure against the much more serious risk of personal injury claims. There have even been numerous cases where the "personal injury" risk has been insured in one company and the "property damage" insurance covered in another company. This condition of affairs has lasted so long that it has come to be regarded as a matter of course; but it is necessary to point out that this procedure is unnecessary and it is undesirable.

### The Third Party Accident

If an automobile owner is unfortunate enough to be involved in what is legally termed a Third Party accident, he is pretty certain in the majority of cases to be met with a claim for both "personal injury" and "property damage." For example, take the simple case of a pedestrian who is knocked over. His bodily hurt comes under the "personal injury" heading; but his clothes come under the category of "property damage." Obviously, the commonsense course is to handle the claim in its entirety.

Or take the case of a cyclist who is mixed up with a car accident. The damaged machine forms the basis of a "property damage" claim; so do the rider's clothes, while the "personal injuries" would also form the subject of a claim.

Then again, should the automobile collide with a horse drawn rig. Here we have first the damage to the occupants, which would be termed a "personal injury" claim; while their clothes and the horse and rig itself would come under the heading of the "property damage."

It requires very little thought to appreciate that there is considerable danger, not to mention added expense and inconvenience, in treating such combination claims as separate sections, with the insurance company looking after one part and the automobile owner left to look after the other part; and if the risk has been separated and insured with two different companies there is still the same objection on the score of overlapping, unnecessary expense and possible confusion owing to conflicting ideas as to liability and procedure in settlement.

### A Change in this Direction

It is much the best course to insure the risk of "Claims by the Public" (persons and property) as an inclusive whole. Special rates have been promulgated by the Canadian Automobile Underwriters' Association providing for an inclusive indemnity of \$20,000 against the combined risk of personal injury and property damage, this inclusive limit being considerably in excess of the standard limits which had previously been regarded as sufficient, but which the experience of recent years has shown beyond any question to provide inadequate protection against the risks of the road.

An additional point worthy of special attention is that automobile owners quite often misunderstand the "property damage" cover as giving them indemnity in respect of their own property, including the automobile itself. Of course, the cover is limited to legal liability for claims by the public for damage to their property; but it does not please an assured to find out his mistake when it is too late. The insurance companies would do well to discard such a misleading and unsatisfactory title for this particular risk.

## SALE OF GOODS TO JOINT PURCHASERS

## Discharge of One, Liability of the Other—Decision of Saskatchewan Court of Appeal

IN a recent case before the Saskatchewan Court of Appeal relating to a sale of goods to joint debtors, the Court held, regarding the liability of one, after the other had been discharged, that where one of two joint purchasers of a chattel has given a mortgage on real estate owned by him to secure the purchase money and the vendor has discharged the mortgage and taken a transfer of the land in complete release of such joint debtor, it must before it can proceed against the other joint debtor, bring the land into account and allow such other joint purchaser, as a credit, the value of the land.

The facts of the case were that the defendant Bain and W. J. Merriam purchased certain farm machinery from the Rumely Products Co. under written agreements. As collateral security for the moneys due under these agreements, Bain and Merriam each executed a mortgage in favor of the vendor on land respectively owned by them. The mortgages and agreements were duly assigned to the plaintiff company. This action was brought to recover the balance alleged to be due under the agreements and to enforce the mortgage given by the defendant. It is admitted that the company discharged the mortgage given by Merriam and took a transfer of the land from him.

## Judgment of the Court

In his decision Mr. Justice Newlands says:—

"The evidence in this case shows that the plaintiff took from Merriam, who was jointly indebted with defendant for the debt for which this action is brought, a transfer of a quarter section of land in satisfaction of Merriam's liability on this joint debt. If Merriam had discharged his liability by a cash payment, plaintiff would have had to give defendant credit for it. For the same reason it must give him credit for the value of this land. Mr. Bastedo's statement that the plaintiff is willing to transfer this land to defendant on his paying the whole debt, can have no effect upon the legal rights of the parties. The quarter section transferred by Merriam to plaintiff is its property. Defendant has and can have no legal claim to it. If plaintiff were to transfer it to him it would be a gift.

"I am therefore of the opinion that plaintiff, having taken a quarter section of land from Merriam in satisfaction of his indebtedness on the joint debt of himself and defendant, must give defendant credit for its value. There should be a reference to ascertain the value of this land. The defendant should therefore be credited with the value of this land as of the date of the transfer, with interest at the rate charged in the statement of claim, and the appeal should be allowed to that extent, with costs."

## OFFICE SPACE IN GOOD DEMAND

That the demand for houses is still greater than the supply was brought out at the third annual meeting of the Building Owners' and Managers' Association of Ontario, held on March 1 in the Trusts and Guarantee Building, Toronto. It was reported that all buildings represented by those present were 100 per cent. rented and the demand was very keen. The president's address indicated favorable progress of the association, the membership being increased by thirteen during the past year, bringing the aggregate up to forty-one, representing a total value of property assessed at over \$25,000,000. The president congratulated the members on the almost universal adoption of "Standard Method of Floor Measurement," which resulted in practical elimination of disputes between landlords and tenants on this question.

The following officers were elected: President, D. N. Soper; first vice-president, W. C. Dawson; second vice-president, A. H. Kirby; third vice-president, G. N. Cottrille; secretary, G. A. Hodgson; treasurer, Murray Wilson.

## DEBENTURE COMPANY OF CANADA

The annual statement of the Debenture Company of Canada, with head office in Regina, for the year ending November 30 last, shows interest earned, after deducting the charges of management, amounting to \$6,133. Including the balance to the company's credit at the end of the previous year, there is available for distribution the sum of \$6,133. Of this amount, \$5,805 is applied on dividends at the rate of 10 per cent. After provision for sundry items there is a balance of \$190. Assets now total \$88,474, paid-up capital \$77,243, and reserves, \$5,410. This company invests all its funds in tax sale certificates on farm lands. Although operating under a Dominion charter, the company has not as yet done any business outside of Saskatchewan.

## SHIPPING CONCERN IN DIFFICULTY

According to an announcement from New York, Hannevig and Co., a banking, foreign exchange and shipping concern, which was interested in the Dominion Shipbuilding and Repairs Co., has gone into the hands of a receiver. The appointment of a receiver followed the action of Mr. Osler Wade, assignee of the Dominion Shipbuilding and Repairs Co., in seeking to collect \$887,105 which Christopher Hannevig is said to owe the defunct concern.

It was claimed that Hannevig has large assets and liabilities in Norway and a receivership is necessary to prevent the dissipation of the assets of Hannevig and Co. The receiver issued a statement to the effect that the trouble which Hannevig and Co. found themselves in was due to the delay of the United States Shipping Board in adjusting its obligation with Hannevig and Co.

## CONDITIONS IN REAL ESTATE

At the annual meeting of the Winnipeg Real Estate Exchange, held on February 11, it was reported that during 1920, 4,130 parcels of land had been valued, to a total amount of \$13,600,000. The membership is now 82. The following officers were elected for 1921: President, A. T. Liddle; first vice-president, J. A. Flanders; second vice-president, A. M. Simpson; secretary-treasurer, W. H. Gardner; directors, R. H. Young, W. P. Rodgers, R. W. Rutherford, G. W. Downey, James Scott, J. Macgregor, C. D. Shepard, T. J. Langford, H. A. Argue, Brig.-Gen. R. W. Paterson and W. J. Long.

Need of a different basis of taxation for Winnipeg was strongly urged by John Macgregor, retiring president, in an address at the meeting. He pointed out that the budget for the city of Winnipeg was now more than equal to that on the whole province, and that the entire requirements of the city, educational and municipal, save a very small percentage, were levied on real estate, while other forms of wealth and incomes were exempt. "The position of his worship the mayor on the question is a very sound one," he said, "and it would be well if every member of the exchange would take an interest in this question and stand behind the city authorities when they present their cases to the legislature. I should like to suggest in this connection that the amount realized from an income tax be specially allocated for some particular purpose, say for education, rather than that it be included in the general revenues of the city." The proposed provincial income tax should also receive the interest of the real estate exchange members, Mr. Macgregor stated. He suggested a central collecting agency for the Dominion, provincial and municipal income tax.

Mention was made of the question of stimulating immigration to Manitoba, and the speaker declared the real estate exchange had given every assistance in the matter. Mr. Macgregor preferred to make no prophecy on the outlook in the real estate business for 1921, but expressed hope for an improvement. Building materials will be considerably cheaper, he said.

## NEWS OF INDUSTRIAL DEVELOPMENT

**Ontario Government Advertising Timber Limits—Will Mean Another Pulp Mill—Port Arthur Iron Properties Have Been Transferred—Flour Mills Operating on Partial Time**

A PULP and paper mill in the district of Algoma, north of the transcontinental railroad near the Thunder Bay border line on the James' Bay height of land is almost certain to be established before the duration of very many months. The Ontario government is now asking tenders, which will be received up to June 15, for the right to cut pulpwood and pine timber in a large area situated near the Nagagami River, which would likely be the place for the erection of a mill. One of the conditions of tendering is that the successful tenderer must build a pulp and paper mill near or on the territory referred to, and no tenders are being accepted unless accompanied by a marked cheque for \$50,000, which will remain on deposit until such a mill is built.

The Naswaak Pulp and Paper Co. has closed its plant at Fairville, N.B., for an indefinite period. Two hundred and seventy-five men were employed by the company. The reason given for the proposed shut down is that the company wants to make necessary repairs on machinery and give the plant a thorough overhauling.

An added impetus to the clearing of land by settlers is contained in the announcement that a stump using industry is to be established in the province of British Columbia. Small portable mills are being sent to various districts which cut up the stumps, securing on an average 200 slabs an inch thick from each root. The wood takes a good polish and will be used for chairs and other furniture. As much as \$1,800 has been obtained for a sliced stump.

### Flour Mills on Part Time

Owing to the lack of export orders, there is little improvement as yet noticeable in the western milling trade. None of the mills are running more than partial time. So far as the British market is concerned millers state there is no indication as to when the old country will be open to buy, and doubtless much will depend upon what use the large shipments of Chinese flour can be put to. Information on this side is to the effect that this has run into hundreds of thousands of barrels. It is significant, however, that one of the prominent London millers has refused positively to use it, and it is expected that his example may be followed by many others. If this flour is used for such purposes as hog feed it may mean that the United Kingdom buyers may be coming into the market at an earlier date than was anticipated some little time ago.

The Harris Milling Co., Taber, Alta., which has not been operating for some time past, has begun grinding again, and will continue its milling facilities as before.

Plans for the establishment of potato flour mills are being formulated by the Potato Growers' Association of the Edmonton district.

Representatives of the Rideau Milling Co. appeared before the Smith's Falls, Ont., town council last week, seeking municipal assistance toward the conversion of the flour mill there into a cold storage plant. It is claimed that the milling business can no longer be carried on at a profit.

### Iron Properties Transferred

The Port Arthur, Ont., council has ratified a deal whereby the National Trust Co., trustees for the bond holders who loaned money on bonds to the Mackenzie-Mann interests, sells to Chester K. Quinn, of Duluth, the Atikokan mine for \$1,500,000. The mine is situated 130 miles west of Port Arthur, and is one of the biggest iron properties on the continent. It was announced that all the other bondholders had agreed to terms of the sale and that approval by Port Arthur meant completion of the deal, which will be followed by development and shipment of ore by the new owner. Port Arthur had invested \$200,000 in the mine and blast furnace

in order to assist in the establishment of the industry here some years ago. The city gets its \$150,000 invested in the mine, but still retains its interest in the blast furnace.

Announcement is made that the Borden Co., Ltd., will re-open its milk factory in Truro, N.S., on March 15. The factory has been closed since the first of the year. All Borden factories in Canada and the United States are now in operation, except the one mentioned. When the Truro factory re-opens it will run full capacity.

The Manitoba Bridge and Iron Works has released 150 employees owing to lack of orders.

Absorbing most of the men who are out of work in the city, the plant of the Dominion Sugar Co. at Chatham, Ont., has re-opened, manufacturing sugar from the cane. The staff now employed is not quite so large as heretofore.

The Ford Motor Co. of Canada has reached its full production capacity of 225 cars a day, and is operating with its entire force of employees four days a week.

## EMPLOYMENT CONDITIONS IN CANADA

Dominion headquarters of the Employment Service of Canada, Department of Labor, reports that during the week ended February 5, there was a further decline in employment as reported by the 5,276 firms who made returns showing reductions in their payrolls totalling 2,786 persons or nearly one-half of one per cent. In seventeen industrial groups there were additions to staffs totalling 2,570 persons, but in sixteen groups there were contractions aggregating 5,356 employees. These figures do not include loss of time due to strikes or lockouts.

Slightly increased activity was reported in New Brunswick, Quebec, and British Columbia, while there were shrinkages in employment in the remaining provinces, the decline of 1,242 persons in Ontario being the largest. For the following week however, that province anticipated having some recovery, while in the other districts it was expected that employment would remain practically stationary or else show further reductions. Firms in every district registered declines from the level of the employment they afforded during the base week (January 17, 1920) the decrease of 39,599 employees or over 13 per cent. in Ontario being the most pronounced.

During the week under review there were important expansions registered by firms in sawmills, furniture, confectionery, pickle, boot, shoes, pulp, paper, garment, hat, cap, thread, yarn, cloth, hosiery and knit goods factories. These additions to staffs were reported largely in Ontario and Quebec, but there was also increased activity in the British Columbia shingle and sawmills. The most decided contractions in payroll occurred in railway transportation, and in the vehicle, crude, rolled and forged and foundry divisions of iron and steel. In addition there were substantial losses in logging camps, glass factories, coal and metallic ores, mining, local transportation, highway and railroad construction. In the last named, the decreases are partly attributable to seasonal causes, while those in logging reflected the commencement of the period of inactivity between cutting and river driving operations. The losses in the above groups were widespread in application, but those in Ontario, Quebec and Manitoba were especially substantial.

## BEAVER FIRE INSURANCE COMPANY

In the annual report of the Beaver Fire Insurance Company, with head office in Winnipeg, emphasis is given to the fact that this company invests all its funds in Canadian securities or in first mortgages on Canadian properties. At the close of the year investments totalled \$339,369, made up of bonds and debentures, \$252,963, and mortgages, \$86,406. Assets now total \$397,892. The surplus available for policyholders amounts to \$316,794, and includes paid-up capital, \$216,360, and net surplus of \$100,434.

**Thousands Will Benefit**

**T**HREE Years ago the Northwestern Life Assurance Company, in keeping with its progressive policy, inaugurated, for the first time in Canada, Life Assurance Without Medical Examination.

Three years has justified this courageous innovation, and today other companies are following our lead—selling policies Without Medical Examination.

The wonderful benefits of Life Assurance are universally acknowledged. The Northwestern Life is justly proud of having been first in Canada to place these benefits within reach of thousands who would otherwise have gone through life without provision for the future.

Other offices take only \$1,000—we take up to \$2,500 Without Medical Examination.

The Northwestern is a good company to insure in, and a good company to represent.

## INSURANCE LICENSES AND AGENCY NOTES

Having already secured a Dominion license, the Merchants Casualty has been registered to transact the business of insurance of automobiles against fire in the province of British Columbia. The head office for the province is at Vancouver, and J. B. Love is attorney for the company.

A branch office of the Motor Union Insurance Co., Ltd., has been opened at 17 St. John St., Montreal, as from March 1, under the control of Gerald Ballard as resident manager. Mr. Ballard was previously inspector attached to the chief office, Toronto. Harold Hall has also been promoted resident manager for the company at Winnipeg. Mr. Hall is at present attached to the chief office staff at Toronto, and will shortly proceed to Winnipeg to open and organize the Manitoba branch.

The Motor Union will shortly further extend its operations to embrace personal accident and miscellaneous public liability lines.

T. B. Parkinson has resigned his position as manager of the Aetna Life for Western Ontario and has become manager of the home office agency of the Northern Life. Mr. Parkinson has had considerable head office experience, having been superintendent of agencies for the London Life and later for the Continental Life.

Benjamin A. Cornell has been appointed district agent of the Continental Life at Goderich, Ont. Mr. Cornell has been connected with the Gerhærd Heintzman Piano Co. for 15 years.

William G. Smith, at present branch manager at Hamilton for the Scottish Metropolitan, is leaving that position on March 15 to join the organization of Carl J. Jennings, insurance brokers at Hamilton, Ont. Mr. Smith was formerly with the C.F.U.A. at Toronto.

The Toronto office of the Travellers' Life of Canada has been moved to Dominion Bank Building, corner of Bay and Queen Streets. The newly appointed inspector for Ontario, W. A. Hines, has his headquarters at this address, and for the present is devoting his time to Toronto business along with B. Siegler, who is the Toronto representative of the company.

R. G. Grieve, formerly of McClory and Grieve, provincial managers at Edmonton, Alta., has removed from Vancouver, B.C., to Saskatoon, Sask., and entered upon his duties as district manager of the Continental Life for Northern Saskatchewan.

## Fifty-one Years of Steady Progress

One of the most brief yet impressive histories of Canadian financial institutions is contained in the annual record of The Mutual Life of Canada. The current issue will be ready in a few days. A copy will be sent to you on application. It contains fifty-one successive summaries, showing in the parallel columns the increase from year to year of the company's various receipts, expenditures, etc. No other document could better convey the idea of solid, uniform achievement and the momentum of the advance is now greater than ever. The prospects are bright for a still more rapid expansion within the next few years. The assets of the company exceed \$40,000,000, and the assurances in force have reached \$206,000,000. There is a gross surplus of more than five million dollars over and above the amount necessary to guarantee all policies, so that the position of the company, in spite of the strain of recent years, is one of uncommon strength.

## "HARD TIMES"

Some men make the plea of hard times an excuse for not insuring their lives.

They forget that if hard times affect them so much, how much more keenly would wife and family feel the pinch were the bread-winner to be removed. Then times would be hard indeed.

In times of prosperity and in times of comparative stress, Life Insurance is the one certain way of making provision for an uncertain future. Whatever happens the investment is a good one and can never be influenced by financial storms.

The Great-West Life Assurance Company issues Policies to meet every insurance need. The rates are low, and the profit returns to Policyholders exceptionally high. For full details address, stating age next birthday.

Several Cities Fix 1921 Tax Rates Well in Advance of Last Year—Windsor Hydro Had Surplus—  
Calgary to Reimburse Sinking Fund by Issue of Securities—Halifax Exemptions Reach High Figure

**Sydney Mines, N.S.**—A 3½ per cent. tax rate has been fixed by the council for 1921.

**Peterboro, Ont.**—A tax rate of 36.3 mills, as compared with 35 mills last year, has been adopted by the council.

**Port Arthur, Ont.**—The tax rate for 1921 is 41 mills, as compared with 37 mills last year.

**Niagara Falls, Ont.**—The city council, despite close trimming of estimates, has been compelled to increase the tax rate 6.1 mills to 38.6 mills.

**Gananoque, Ont.**—Forty-seven mills on the dollar is the tax rate fixed by the town council for 1921, being an increase of five mills over last year.

**Brantford, Ont.**—A tax rate of 39 mills based on assessment of \$25,000,000 and with receipts placed at \$94,120, has been recommended by the estimate committee. The assessment in 1914 was \$11,000,000 and receipts \$284,404.

**Brockville, Ont.**—Thirty-seven and one-half mills is the tax rate approved by the town council, this being an increase of half a mill over last year's rate. Increased school expenditure of \$11,800, estimated expenditure of \$5,000 for mothers' allowances, and increase in payments on debentures, caused the rate to rise.

**Calgary, Alta.**—In 1913, the city's assessment on lands totalled \$120,801,588, whereas the 1921 figures will be approximately \$47,319,024, which is a reduction of 10 per cent. when compared with 1920. Assessment of buildings, which is on a basis of 50 per cent. of their value, will total about \$21,000,000 for 1921.

**London, Ont.**—At a recent meeting of the finance committee, Mayor Little, Aldermen Watkinson, Wenige, J. Cameron Wilson, Treasurer Bell, and Harvey F. Skey, of the Bank of Montreal, and F. G. Jewel, accountant, were named a committee to report on establishing a depreciation fund for civic financing. By this method, proposed by Dr. Wilson, each public work undertaken by the city will not only be paid for in a term of years, but it will have an accumulation to replace it at the end of that time.

**Windsor, Ont.**—A net surplus of \$81,520 is shown by the hydro-electric commission of the municipality. Earnings amounted to \$443,474 and expenses \$346,183, while \$15,771 was charged against depreciation of plant. Plans are being prepared for the erection of an addition to the present substation at a cost of \$175,000, which will have an ultimate capacity of 20,000 h.p.

The assets of the system at the end of 1920 were \$945,608, while a year previous the figures were \$578,413, an increase of \$367,195. Of this amount \$190,000 was due to the acquiring of the S. W. and A. Lighting and Power System.

**Point Grey, B.C.**—The municipality had a surplus of \$200,000 over its current liabilities at the end of 1920, according to the report of the municipal auditors just issued. This is an improvement of \$7,635 over the previous year. A total surplus of assets of \$935,249 over all liabilities is also shown. The general assets are given as \$7,519,013 and the liabilities as \$6,583,764.

Chiefly due to realization of tax arrears and subsequent expenditure on capital account, the auditors state a reduction of \$38,808 was affected during the year in the debt due from revenue to capital account. A cheque for \$60,000 received from the provincial government, as part payment of the arrears of taxes due on property reverted to the Crown, was also received and a part of it used to wipe off a demand loan of \$30,000 outstanding at December, 1919.

**Calgary, Alta.**—With but two dissenting votes, the city council has adopted the recommendation of the city treasurer and the city auditor that the sinking fund be reimbursed for \$165,000 due to it for loans made on five city blocks taken over in the recent tax sales, by having the city take over this burden from the sinking fund and issue bonds

of 5 per cent. interest, payable ten years from January 21, 1921. The dissenters wanted to know if the sinking fund's reimbursement would not still be on paper—in the form of bonds—to which Treasurer Mercer replied in the affirmative, but explained that the treasury notes, which were being put in the sinking fund would have the whole city behind them. The treasury notes would in turn have the property behind them, and the earnings of the property would off-set the 5 per cent. interest, so that there would be no extra charges in the mill rate. All the property was revenue-producing, explained the treasurer, but none of it was paying for itself at the present time. The first thing it would have to do would be to pay \$10,000 in taxes, and he could not see why the sinking fund should have to stand for this. Bondholders consider the city securities good, but they do not have any faith in the property, he said.

**Halifax, N.S.**—According to a report prepared by P. J. MacManus, chief city assessor, there is in Halifax a total of \$30,659,000 worth of land and improvements exempt from civic taxation. This includes the city's own property, amounting to \$1,552,000, and city schools, amounting to \$2,216,500. If these were taxed, of course, it would only mean the city's taking money out of one pocket and putting it into another, but outside of these Mr. MacManus estimates that the city would be three-quarters of a million dollars a year richer if there were no exemptions.

By far the largest owner of exempted property is the Dominion government, and, as a large part of this is railway property which may be taxed some day, there is some hope of converting that part of the exempted property into a civic revenue producer. One of the largest items in the assessor's report is "miscellaneous," which is largely made up of private concerns and institutions which pay taxes on part of their valuation, but are exempted as to other parts by various legislation passed from time to time.

## EASTERN TRUST COMPANY

Coming from the report of one of the most important and progressive trust companies of this country, the growth recorded by the Eastern Trust Company is not surprising. Assets during 1920 increased from \$23,271,221 to \$26,316,713 (this does not include properties held under deeds of trust to secure bondholders), and during that time estates and funds to the amount of \$835,204 were, owing to the closing of estates and expiry of the trusts under which they were held, distributed to the beneficiaries and written off.

In spite of the fact that charges of the services of trust companies have not increased in recent years, while cost of operation has shown a large advance, the company is able to show profits of \$140,137, as compared with \$131,766 in 1919. The dividend of 9 per cent. was maintained, and, according to an announcement made at the annual meeting in Halifax this week, the rate will be increased to 10 per cent.

The company's operations are carried on largely in the Maritimes, and it is the policy of the company to use its funds for investment purposes in the province in which they originate, so that a double service is being performed in the territory in which it carries on business. The following comparative figures are illuminating:—

	Capital paid up	Reserve.	Net profits.	Estates in trust.
1893 . . . . .	\$ 26,400	.....	\$ 979	\$ 41,860
1903 . . . . .	125,000	\$ 12,000	11,425	1,938,942
1913 . . . . .	904,000	210,000	86,248	12,978,780
1920 . . . . .	1,000,000	350,000	140,137	26,316,713

# Government and Municipal Bond Market

Victory Bonds Less Active and Slightly Reactionary—Dominion Government Will Pay Off New York Loan Which Matures in April—Gold Will Have to be Shipped—Manitoba Sells Farm Loan Securities for Disposal in the United States

**T**EMPORARILY, the government and municipal bond market is suffering from a slight attack of indigestion. This is not surprising in view of the large volume of securities which have been issued of late. In February alone, bond sales amounted to approximately \$9,500,000, while already in March numerous issues have been made with prospects of plenty more ahead. There is still a large part of the recent Toronto loan, which has not yet been placed, and bond dealers seem rather anxious to get this off their hands. The situation has also been influenced by the large amount of new industrial financing which has been done of late.

Notwithstanding this fact, however, prices have not been impaired to the degree which one would have supposed, although if the situation does not improve more conservative bids will be made by the bond houses. During the past week, two Manitoba municipalities, with the guarantee of the provincial government, disposed of securities at prices considerably above previous figures. St. Thomas, Ont., also made a loan on about a 6.10 per cent. basis. Several Quebec municipal issues, aggregating more than \$3,000,000, are pending, but the probability is that they will be absorbed locally.

Victory bonds were not quite so active, with prices in some cases fractionally lower. The following figures illustrate the recent trend of prices:—

	Control price.	Last week.		This week.	
		High.	Low.	High.	Low.
1922 .....	98	98 $\frac{7}{8}$	98 $\frac{1}{4}$	98 $\frac{3}{4}$	98 $\frac{1}{8}$
1927 .....	97	98	97	97 $\frac{3}{4}$	97
1937 .....	98	99 $\frac{7}{8}$	99 $\frac{1}{2}$	99 $\frac{3}{4}$	99 $\frac{1}{2}$
1923 .....	98	98 $\frac{3}{8}$	97 $\frac{1}{2}$	98 $\frac{1}{2}$	96 $\frac{5}{8}$
1933 .....	96 $\frac{1}{2}$	98 $\frac{3}{4}$	98 $\frac{1}{4}$	98 $\frac{5}{8}$	98
1924 .....	97	96 $\frac{3}{4}$	96	96 $\frac{3}{4}$	96
1934 .....	93	95 $\frac{5}{8}$	95 $\frac{1}{4}$	95 $\frac{5}{8}$	95 $\frac{1}{4}$

An official report from New York indicates that the Canadian government will pay off the \$25,000,000 bonds that mature there on April 1 next. Canada has rather large balances in New York at the present time, but paying off of this maturity will involve shipment of a certain amount of Canadian gold to New York. It is estimated that about \$10,000,000 in gold will be sent.

Manitoba sold \$500,000 5 per cent. 5-year bonds farm loan to the National City Co., Ltd., this week, at a price of 100.566. This is the first provincial issue in more than a month. The bonds are payable in New York and were disposed of there at 90.25, to yield the investor 7 $\frac{1}{2}$  per cent.

## Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Burnaby, B.C. ....	\$ 131,700	6	Various	Mar. 14
Sherbrooke, Que. ....	513,000	6	10-years	Mar. 14

Belleville, Ont. ....	90,000	6	20-years	.....
Caledonia Twp., Ont. ....	50,192	6	20-instal.	.....

St. Lambert, Que.—Offers are being asked until March 20, 1921, for \$500,000 6 per cent. 30-year debentures.

Belleville, Ont.—It is understood that the city has \$90,000 6 per cent. 20-year paving debentures for sale.

Three Rivers, Que.—Tenders will be received until March 15, 1921, for the purchase of \$250,000 6 per cent. Roman Catholic school debentures.

Verdun, Que.—Tenders will be received until March 15, 1921, for purchase of \$175,000 6 per cent. 10-year Roman Catholic school debentures.

Caledonia Township, Ont.—According to reports the township is asking for bids on \$50,182 6 per cent. 20-instalment debentures. No date is mentioned. C. F. Proudfoot, Fenaghvale, is treasurer.

Ellice R.M., Man.—Tenders are invited until 2 p.m., March 19, 1921, for \$49,000 6 per cent. 30-year good roads debentures, guaranteed by the province of Manitoba. J. E. Selby, St. Lazare, Man.

Quebec, Que.—Tenders will be received by the Roman Catholic School Board up till noon, March 21, 1921, for the purchase of \$700,000 bonds. Alternative bids are asked on 30-year 5 $\frac{1}{2}$  per cent., and 10-year 6 per cent. securities.

Montreal, Que.—Tenders will be received until 5 p.m., March 16, 1921, for the purchase of \$1,500,000 6 per cent. serial bonds of the Protestant Board of School Commissioners. Full particulars upon application. C. J. Binmore, treasurer, 36 Belmont St., Montreal.

Montreal West, Que.—The town is offering for sale until 5 p.m., March 21, 1921, \$282,000 5 $\frac{1}{2}$  per cent. debentures as follows:—\$117,000 30-years, for electric light; \$14,000 10-years, for fire apparatus and equipment; \$85,000 20-years, for pavements and sidewalks; \$20,000 10-years, for streets and public park; \$20,000 40-years, for sewers and water system; \$26,000 20-years, for improvement of town hall, etc. Securities are in denominations of \$100 and multiples thereof. C. I. Fraser, secretary-treasurer.

## Debenture Notes

Kent, B.C.—The district is preparing a \$40,000 6 per cent. 20-year bond issue, which will be placed on the market shortly.

Kent County, Ont.—More than \$500,000 will be spent on the county roads in 1921.

Woodstock, Ont.—The city council has decided to submit a \$65,000 hospital by-law.

Winnipeg, Man.—On April 5, 1921, ratepayers will be asked to vote on a \$2,000,000 school by-law.

Essex Border Utilities Commission, Ont.—It is understood that the commission has \$44,000 worth of debentures to place on the market.

Whittemouth, Man.—On March 16 next, electors will be asked to vote on a \$25,000 6 per cent. 30-instalment debenture issue for bridge purposes.

East Angus, Que.—The town council has passed a by-law authorizing the borrowing of \$12,000 for fire equipment, and on March 17, ratepayers will be asked to approve.

Montreal, Que.—Power to borrow any sum needed for the development of the city water works system is sought in an amendment made by the Administrative Commission for insertion in the special bill the commissioners have submitted to the provincial legislature. This action has been taken because in the original bill references to the raising of more funds for the completion of the aqueduct improvements was not made, while the need for more money has arisen with the presentation of a report by the Water Board showing that an additional outlay of \$14,522,000 is required.

Alberta.—The government is preparing to place another domestic bond issue on the market, the amount suggested be-

## Flexibility in Service

There is a freedom and a flexibility to our Victory Bond Service Department that commends itself to those who have had experience with it.

You, too, will find this so if you favour us with your orders to buy or sell Victory Bonds. Telephone enquiries especially solicited.

ing \$2,000,000. Of the first million offered last June \$900,000 has now been sold, and it is expected that the amount will be disposed of within the month. The government is well satisfied with the results of its experiment in selling bonds to home buyers, and its decision to put on another sale has been made partly in view of the fact that the ground has now been prepared by advertising.

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board from February 12 to 26, 1921:—

**Schools.**—10-years annuity, 8 per cent.: Westwood, \$2,000; Rockwood, \$3,200; Old Trail, \$2,000; Clarkville, \$3,000; Newton, \$5,500; Flowerlydale, \$1,215; Edenview, \$500; Vernon, \$1,500; Frolich, \$2,280; Boyer Lake, \$5,000; Kipling, \$5,000; Johnston Lake, \$3,800; Pleasant Ridge, \$1,000. Belleplaine, 20-years annuity, 8 per cent., \$15,000; Rotnum, \$4,400, 15-years annuity, 8 per cent.; Grand Coulee, \$7,000, 15-years annuity, 8 per cent.; Mayronne, \$1,000, 5-years annuity, 8 per cent.; Vickers, \$4,900, 10-years instalment, 8 per cent.; Mount Hope, \$1,300, 10-years instalment, 8 per cent.; Wilmot, \$5,500, 15-years annuity, 8 per cent.; Sweet Grass, \$800, 8-years instalment, 8 per cent.

**Rural Telephones.** 15-years annuity, 8 per cent.—Northwood, \$12,000; Dilke, \$2,000; Carruthers, \$34,000; Wolverine, \$5,800; Flett Springs, \$3,500; Fort Pelly, \$300 14-years annuity, 8 per cent.

**Villages.**—Kandahar, \$1,500 8 per cent., 7-years instalment, for sidewalks and digging well; Pontix, \$7,000 8 per cent., 10-years instalment, for fire protection.

**Rural Municipality of Kingsley,** \$1,200 8 per cent. 10-years instalment, for road construction.

#### Bond Sales

**North Sydney, N.S.**—The finance committee has accepted the offer of the W. F. Mahon Co. of Halifax, for the purchase of \$10,000 worth of town bonds, with a 30-day option on the remainder of \$41,000. The company agreed to purchase at 96.

**Trail, B.C.**—The city has accepted the bid of Gillespie, Hart and Todd for \$37,000 7 per cent. 20-year debentures at 96, which is a little less than a 7.40 per cent. basis.

**Stratford, Ont.**—The municipality has been selling its debentures locally and has succeeded in disposing of \$50,000 of bonds as follows:—\$20,000 6 per cent. 30-years; \$22,000 6 per cent. 10-years, and \$8,000 15-years.

**Point Grey, B.C.**—The municipality has sold \$156,000 debentures to the Canada Bond Corporation and Harris, Read and Co. For \$73,000 5 per cent. debentures, due 1st August, 1953, a price of 78.40 was received, and for \$83,000 5½ per cent. debentures, due 1st August, 1959, a price of 84.49 was received, or an average bid of 81.64. At these prices the money will be costing the municipality 6.61 per cent.

**Woodlands R.M., Man.**—The Mutual Life Assurance Co. of Canada has purchased \$20,000 6 per cent. 30-instalment debentures, which are guaranteed by the province, at a price of 96.13, which is on about a 6.35 per cent. basis.

**St. John, N.B.**—An issue of \$54,000 6 per cent. 25-year debentures has been disposed of by the school board trustees to the Eastern Securities Co., Ltd., at 99.55, which is on about a 6.50 per cent. basis. Bids were as follows:—

Eastern Securities Co., Ltd.	99.55
Dominion Securities Corp.	98.145
Wood, Gundy and Co.	97.89

**St. Andrews R.M., Man.**—Wood, Gundy and Co. have purchased \$100,000 5½ per cent. 30-instalment debentures at a price of 91.81, which is on a basis of about 6.30 per cent. The bonds are guaranteed by the province. Other bids received were:—

R. C. Matthews and Co.	90.70
Dominion Securities Corp.	90.60
W. A. Mackenzie and Co.	90.11

**Manitoba.**—The province has disposed of \$500,000 5 per cent. 5-year debentures, payable in New York, to the National City Co., Ltd., at a price of 100.566. The money is being raised for farm loan purposes. The list of bids includes the

following, the figures being in Canadian funds: National City Co., Ltd., 100.57; Dominion Securities Corporation, 100.29; A. Jarvis and Co., Morrow and Jellett, Canadian and General Securities Corporation, 100.08; Wells, Dickie Co., and Minnesota Loan and Trust Co., 99.96; Wood, Gundy and Co., 99.34; R. C. Matthews and Co., and First National Co., Detroit, 99.05; R. A. Daly and Co., and W. A. Mackenzie and Co., 98.87; McLeod, Young, Weir and Co., Hannah, Ballin and Lee (New York), and Rutter and Co. (New York), 97.89; A. E. Ames and Co., 97.723.

**New Toronto, Ont.**—Debentures totalling \$58,000 bearing interest at 6½ per cent., and maturing in 20 years, have been awarded to the Dominion Securities Corp., at 99.641, which is on about a 6.58 per cent. basis. Other bids were:—

Turner, Spragge and Co.	98.17
R. C. Matthews and Co.	97.08
C. H. Burgess and Co.	97.00
United Financial Corp.	96.03

**Alberta.**—Municipal hospital and school district debentures to the value of \$87,900 have been bought and sold by the W. Ross Alger Co. The several bond issues represented in the recent sales comprise the following: Drumheller municipal hospital district, \$28,000, 20-year 7 per cent. for extension and equipment of present hospital; Islay municipal hospital district, \$6,000, 10-year 7 per cent., for additional equipment to hospital; Prairie River consolidated school district, \$13,000, 15-year 8 per cent., for new school building; Alliance school district, \$20,000, 20-year 7½ per cent., for new school building and equipment; Zawale school district, \$550, 10-year 8 per cent. for new building; and the following 15-year 8 per cent.: Shelton school district, \$4,000; Sangudo school district, \$4,000; Paraskeria school district, \$7,400.

**St. Thomas, Ont.**—McLeod, Young, Weir and Co. have been awarded \$159,006.73 5½ and 6 per cent. bonds, maturing from 18 to 30 years, at a price of 98.64, which is on about a 6.10 per cent. basis. The particulars of this issue were given in these columns last week, but the original amount of \$165,893.65 was reduced. Bids received were as follows:—

McLeod, Young, Weir and Co.	98.64
Harris, Forbes and Co., Inc.	98.29
Dyment, Anderson and Co.	98.236
Housser, Wood and Co.	98.12
Bell, Gouinlock and Co.	98.12

CORPORATION SECURITIES MARKET

More Pulp and Paper Financing—Winnipeg Electric Stock Offered to Public—Shawinigan Bonds Sold in New York

IF there was any turn in sentiment during the past week, the action of the Canadian stock lists indicated that it was but a very moderate one. The urgent selling of the two weeks previous was not so much in evidence, while for the most part brokers reported a slight predomination of demand over liquidation. There was no general movement in the various groups, although the paper section showed slight recovery, but some issues were singled out as the result of events which had no particular bearing upon the entire market. There was a disposition on the part of Wall Street to observe the European situation, which interest also extended to Canada, but the stock markets both here and in New York were affected only slightly, due in part to the general belief that the dispute between Germany and the Allies would soon be adjusted. The state of conditions in this regard was largely reflected in the foreign exchange market.

On the Canadian exchanges Canadian General Electric gave a display of strength, but apart from the good position of the company and a surmise that shareholders would participate in some sort of a bonus, nothing definite was announced to indicate the justification of the movement. It is evident, however, that something is pending, which is considered to be favorable to stockholders. City Dairy was another issue which found favor with the traders, as a result of the return by the company to the dividend paying list. During the past few years the company has been providing for capital expenditures out of earnings, but from the promises and recent action of the officials, profits will be more largely available for distribution to shareholders in the future.

There were a few issues which were subjected to considerable pressure. The slump in Dominion Cannery was the direct outcome of the facts revealed in the annual report, which is reviewed elsewhere in this issue. National Breweries yielded several points in the face of rather uncertain rumours regarding certain events which are interpreted as being to the detriment of the company's position. Windsor Hotel took a spectacular drop. This was the belated reflection of the failure of a certain party to exercise their option on the company's shares at 175. Several theories were offered as to the reason for the heavy selling and weakness of Dominion Steel, but none of the conclusions were certain.

The week's trading in listed stocks in Montreal showed a turnover of 62,786 shares, as compared with 73,456 previously, while in Toronto the figure was 15,941, as against 15,761. Bonds changed hands on the Montreal exchange to the extent of \$1,388,750, compared with \$1,737,050 a week ago, while the figure in Toronto was \$1,215,250, compared with \$2,840,350 previously.

Announcement at the end of last week of the offering of \$2,000,000 8 per cent., general mortgage bonds of the Fraser Companies, Limited, practically concludes, for the

time being at least, financing of this kind, of pulp and paper companies. The \$2,500,000 8 per cent., 20-year general mortgage bonds of the Brompton Pulp and Paper Co. are still to be placed on the market, however. A shareholders meeting is called for March 24, to approve of the issue. As anticipated, the securities will bear a conversion privilege.

The public is given the opportunity to subscribe to the Fraser issue until March 28, 1921, the price being 99, to yield 8.10 per cent. Details will be found in a prospectus advertised elsewhere in this issue.

The \$1,000,000 7 per cent., first refunding mortgage 20-year bonds of the Howard Smith Paper Mills, Ltd., the issue of which was announced in these columns last week, are being retailed to the public by Aldred and Co., R., A. Daly and Co., and Hanson Bros., at a price of 91 and accrued interest, to yield 7.90 per cent. A large number of the holders of the old 6 per cent. bonds of the Howard Smith Co., as well as of 6 per cent. bonds of the Toronto Paper Co., are being turned in for exchange into the 7 per cent. issue now being made. A portion of the issue was set aside to provide for this exchange and that as soon as the exchange of the old bonds for the new bonds has been completed the new will become first mortgage bonds.

Shawinigan Power Bonds Sold

The Shawinigan Water and Power Co., it was announced recently, has disposed of an issue of \$2,500,000 of Series "C" 30-year, 6 per cent., first refunding mortgage gold bonds, due July 1, 1950. The securities were sold in New York, the entire issue being taken by a syndicate comprising: Lee, Higginson and Co., Brown Bros. and Co., Alexander Brown and Sons and Jackson and Curtis. The offering was made at 90½ in New York funds to yield the investor 6¾ per cent.

Following the issue last year of the company's 7½ per cent. six-year convertible gold notes to the extent of \$4,000,000, which are secured by 6 per cent. Series "B" bonds, the Shawinigan executive announced that it was the intention to do further financing this year in order to provide funds for the work on the new transmission tower line to Montreal, which will be completed during the coming summer. Part of the proceeds will also be used on the extension of the company's plant at Shawinigan Falls, where work on the 40,000 h.p. installation is now being proceeded with. It is anticipated that the latter work will be completed by the end of the current year.

The Winnipeg Electric Railway Co. is offering 7 per cent., preferred stock locally at 90, to yield 7¾ per cent., together with a bonus of 30 per cent., common. Subscribers are to make payments at the rate of \$10 per month. This is part of the recent \$3,000,000 issue, and is in accordance with the pledge of the underwriters to offer a certain amount to patrons.

The Mining Corporation of Canada, Ltd., has passed its regular quarterly dividend. Three dividends were paid during 1920, the last quarterly one for that year also having been passed. While the news of the passing of the dividend caused a small reaction in this stock on the Standard Mining Exchange, it did not generally affect the market.

**BANK BRANCH NOTES**

The Canadian Bank of Commerce has opened a branch at Port of Spain, Trinidad.

The sub-agency of the Canadian Bank of Commerce at Pasewigin, Sask., has been closed.

The Bank of Toronto has purchased the Fairfield Block the corner of Granville and Pender Sts., Vancouver, for the sum of \$200,000, and will build a quarter-million dollar bank thereon.

The property at the corner of Main and Timothy St., Newmarket, Ont., has been purchased by the Bank of Montreal, where a new branch is to be erected.

The Merchants Bank of Canada are to open a branch at Winnipeg Beach, Man.

During the month of February there were 18 branches opened. The following have not yet been mentioned in *The Monetary Times*:—Bedford, Que., Nationale; Johnville, Que., Merchants; Matauzas, Cuba, Royal; Mont Rolland, Que., Provinciale; North Standbridge, Que., Nationale; Point a Calumet, Que., Provinciale; St. Louis Champlain, Que., Nationale; St. Maurice, Chaplain, Que., Nationale; Val Jalbert, Que., Nationale.

There were ten branches closed during the month, eight of which have not been mentioned in *The Monetary Times*:—Berwick, N.S., Union; Carmel, Sask., Union; Ducks, B.C., Union; Harrisburg, Ont., Merchants; Insigger, Sask., Royal; Lowe Farm, Man., Union; Meeting Creek, Alta., Royal; Pinkham, Sask., Union.

The branches opened were distributed among the banks as follows:—Nationale, 5; Royal, 5; Provinciale, 2; Nova Scotia, 2; Toronto, 1; Merchants, 1; Home, 1; Imperial, 1.

**MOUNT ROYAL ASSURANCE COMPANY**

Another favorable year was experienced by the Mount Royal Assurance Co. in 1920, the premium revenue amounting to \$741,679, being an increase of \$95,692 over the previous year. Interest from investments amounted to \$84,832, making the total income \$826,512, as compared with \$714,200 in 1919.

Losses showed an increase, the ratio to premiums being 46.29 per cent., as compared with 43 per cent., previously. Commissions and expenses naturally increased with the advance in business, and amounted to \$264,142, as against \$244,909. Net earnings, however, were \$219,013, as against \$190,902 in 1919.

Apart from the regular dividends, the directors, in view of the last amendments to the income tax law, thought it judicious to make, out of the surplus that had accumulated prior to December 31, 1916, a distribution equivalent to \$172,177, which together with the general shrinkage of all securities, accounts for the slight decrease in surplus.

The Mount Royal has been in business for eighteen years and its operations under a Dominion license extend back to 1912, since which date the company has shown marked expansion, as evidenced by the figures below. The insurance written is chiefly fire, although a small plate glass business is carried on. The insurance in force is now well on the way to the hundred million mark:—

	Gross income.	Investments.	Reserves.	Surplus.
1903	\$ 40,068	\$ 33,063	\$ 12,500	\$ 3,624
1912	325,249	531,261	143,667	168,829
1919	1,100,284	1,396,174	396,777	675,566
1920	1,262,219	1,325,727	451,179	648,000

**COBALT ORE SHIPMENTS**

The following are the shipments of ore from Cobalt Station for the week ended March 4:—

O'Brien Mine, 64,310 pounds. The total since January 1st is 1,565,800 pounds, or 784.9 tons.

**RAILROAD EARNINGS**

The following are the approximate gross earnings of Canada's transcontinental railways for the month of February:—

		Canadian Pacific Railway.		
		1921.	1920.	Inc. or dec.
February 7	.....	\$3,370,000	\$3,288,000	+ \$ 82,000
February 14	.....	3,044,000	3,547,000	— 503,000
February 21	.....	2,913,000	2,901,000	+ 12,000
February 28	.....	3,067,000	3,472,000	— 405,000
Total	.....	\$12,394,000	\$13,208,000	— \$ 814,000

		Canadian National Railway.		
February 7	.....	\$2,174,009	\$1,545,473	+ \$ 628,536
February 14	.....	2,121,780	1,673,047	+ 448,733
February 21	.....	1,958,846	1,552,908	+ 405,938
February 28	.....	1,895,616	1,744,631	+ 150,985
Total	.....	\$8,160,251	\$6,516,059	+ \$1,634,192

February 28	.....	1,807,819	1,862,511	— 54,692
Total	.....	\$7,589,650	\$6,570,479	+ \$1,019,171

**OTTAWA LIGHT, HEAT & POWER CO., LIMITED**

The combined report of the Ottawa Electric Company, the Ottawa Gas Company, and the Ottawa Light, Heat & Power Company, Limited, shows a substantial gain in gross revenue, which was \$1,459,308.51. The gross expenditure, including management, operation and maintenance was \$1,068,888.90. After paying interest on bonds and current liabilities, the net revenue was \$228,699.72, out of which four quarterly dividends at the rate of six per cent. per annum were paid, a substantial amount set aside for bad and doubtful debts, and the balance was carried to Profit and Loss Account, which now shows a credit of \$128,090.20.

The balance at credit of Reserve Account is \$770,000.00. The main features of the balance sheet for the past two years are as follows:

	ASSETS	
	1920	1919
Property, Plant and Equipment..	\$8,263,164.04	\$6,165,314.22
Merchandise and Stores .....	198,537.60	128,314.67
Coal and other supplies.....	142,092.26	131,003.20
Accounts and Bills Receivable..	431,583.53	348,083.65
Montreal Trust Co. "Deposit Account" .....	57,500.00	.....
Victory Bonds .....	.....	41,137.81
	\$9,092,877.43	\$6,813,853.55

	LIABILITIES	
	1920	1919
Stock (Ottawa Light, Heat & Power Co.) .....	\$3,500,000.00	\$3,500,000.00
Stock (O. E. Co., held by O.L.H. & P. Co.) .....	1,500,000.00	.....
Bonds .....	2,825,000.00	2,125,000.00
Accounts Payable "Banks" .....	156,670.02	57,920.55
Accounts Payable "Trade" .....	213,117.21	236,949.44
Reserve Account .....	770,000.00	770,000.00
Profit and Loss .....	128,090.20	123,983.56
	\$9,092,877.43	\$6,813,853.55

Bank loans shown in the Statement at \$156,670.02 have since been reduced to \$82,916.78. Accounts Payable have also been materially reduced.

The outlook for the Company's Electric and Gas business for the current year is most favorable. (Adv.).

# Corporation Finance

**Sharp Drop in Profits of Dominion Cannery—Penmans' Sales Increased, but Net Earnings Were Lower—City Dairy Had Satisfactory Year—Levis County Railway May Go Out of Business—Hillcrest Collieries Reports Favorable Operations**

**Oakcol Co., Ltd.**—The directors of the company, which was organized and financed in Toronto last year, decided on March 7 to go into voluntary liquidation for the purpose of reorganization. A statement issued says the company was not in a state of bankruptcy, but owing to the present financial depression, was finding it difficult to make collections on stock subscribed for, which approximates the amount the company owes. E. R. C. Clarkson and Sons have been appointed receivers.

The statement adds that "the company has for the past three months been making anthracite briquettes and will continue to do so. The idea of going into voluntary liquidation is simply to give ample time for reorganization, collection of outstanding subscriptions, and meeting all obligations." Some of the directors have been laid aside by sickness and the managing director, J. R. Long, has resigned. Therefore, their places are to be filled from among the shareholders.

**Steel and Radiation, Ltd.**—Following the announcement that G. T. Clarkson had been appointed receiver of the company, which has its head office and plant at Toronto, with a plant also at St. Catharines, Ont., the following statement was given out:—"The receivership is for the purpose of reorganization, and it is contemplated that the business will be carried on without any interruption whatever. No statement will be available for some time."

Steel and Radiation's chief products are heating apparatus—radiators and boilers. During the war a large business was done in munitions work, and it is thought that adjustments to normal lines of business since the close of the war have been difficult.

Paid-up capital stock of the company, according to the last annual report was \$1,861,700 common and \$664,700 preferred. An issue of bonds of \$1,000,000 is also outstanding, mostly in England. Dividends at the rate of 7 per cent. were paid on preferred for some years, but were in arrears since and including 1918. Net profits from all operations were as follows in the years mentioned:—1920 and 1911 (fifteen months), \$49,291; 1912, \$83,565; 1913, \$108,131; 1914, \$13,797; 1915, \$123,086; 1916, \$303,601; 1917, \$213,516; 1918, \$481,464; 1919, \$26,349.

**Intercolonial Coal Mining Co., Ltd.**—The annual report of the company shows a considerable falling off in earnings in 1920 from those of the previous year. This was due to the loss of output following the falling off of the then heaviest producing section of the Number 2 Mine, owing to fire indications, at the end of February, and the heavy expenditure entailed on this account. Apart from this, a satisfactory year's operating was experienced. Owing to the above cause, production shows a falling off from the previous year's figures of 24,142 tons, the output being 161,275 tons, compared with 185,417 tons in 1919. The demand was brisk practically throughout the whole year, and, during the greater portion of it, was in excess of the supply. Towards the end of the year, however, it was beginning to slacken off considerably, with indications of duller markets, owing to general business conditions.

Profits on operating year ending December 31, 1920, amounted to \$112,408, compared with \$152,499 in 1919. In the company's balance sheet, property account has been increased \$143,000 to \$1,545,247, and bonds outstanding have been reduced \$18,500 to \$101,000. Accounts receivable are up \$16,000 and total assets up \$168,000. Reserves have been increased \$164,000.

**Hillcrest Collieries, Ltd.**—Operating profits of the company for 1920 amounted to \$168,704, as compared with \$112,614 in 1919, and \$110,295 in 1918. These figures were arrived

at after provision for all expenses and special replacements. Miscellaneous revenue for the year totalled \$22,969, bringing the total net earnings up to \$191,674, as compared with \$138,230 in the year previous. After deduction for bond interest and dividends on preferred, a balance of \$121,025 remained applicable to the common shares, being equivalent to 12.5 per cent. on the \$1,000,000 common stock outstanding, as compared with 7.25 per cent. in 1919. Common stock disbursements totalled \$70,000, as against \$45,000 in 1919, and \$20,000 in 1918.

The changes in the balance sheet are not of a very significant nature. Some of the principal comparisons are as follows:—

	1920.	1919.
Properties .....	\$1,886,444	\$1,922,829
Cash .....	82,089	24,103
Accounts receivable .....	181,428	146,223
Investments .....	345,749	340,869
Total assets .....	2,754,690	2,691,796
Contingent reserve .....	275,000	260,000
Profit and loss surplus .....	260,077	219,051

**Levis County Railway.**—Following the recent disastrous fire which destroyed almost all the cars and equipment as well as the shops, the company may decide to liquidate its assets including the insurance payable and go out of business. H. E. Weyman, general manager of the company, says:—"As the people of the south shore are as much, if not more, affected as the tramways company by the recent disastrous fire, it is only fair that they should be fully informed of the company's affairs. There are only six passenger cars left to perform the service, which has, of course, to be curtailed. Having no spare cars to replace any which may or will need running repairs, the service will be further reduced at times on this account."

"An insurance adjustment has been made and settled in record time and is considered a fair and satisfactory settlement, to all parties. The value of the property destroyed allowing for depreciation is figured at \$240,000, of which \$37,000 is deducted as the value of salvage by the insurance adjusters, leaving the company \$203,000. The property destroyed was acquired in the past and as a going concern was worth its replacement value. This is, of course, much higher than the insurance value, in consequence the money received from the insurance will not replace the property loss by 50 per cent., necessitating a new investment of about \$100,000."

**City Dairy Co., Ltd.**—Net earnings of \$117,770, compared with \$115,389 for the previous year, an increase of \$2,381, is shown in the annual report of the company for the year ending December 31, 1920. According to the statement the balance forward from the previous year was \$225,897, and when this is added to the net earnings as above, the total amount available for distribution is \$343,668 as against a total for the same purpose last year of \$274,897. Of this sum deferred dividends on preference stock, being the full amount of all deferred dividends thereon, were paid, amounting to \$73,500, while in addition the regular dividends on the preference stock were paid, amounting to \$49,000, leaving a balance to be carried forward to 1921 of \$221,168.

Total assets of the company at the end of the year were \$2,066,317, against \$1,901,253 at the end of 1919. Among the items under this head are accounts receivable at \$162,556, which is a considerable increase over those of a year ago at \$95,364. Mortgage sinking fund and prepaid charges are \$39,187, compared with \$37,255 a year ago. Among the liabilities are bankers' advances of \$118,948, against \$19,358 last year.

In his statement the president, Mr. C. B. McNaught, says:—"While fortunately many of the operating difficulties

have now disappeared, the year just closed was probably the most trying in the company's experience, and your directors feel that the consistent and gratifying results shown should be viewed with considerable satisfaction. The company's properties, plants and equipments have been maintained at the highest standard of efficiency. The ice cream plant has been thoroughly modernized, and its facilities, including its cold storages, greatly increased. A receiving station was erected during the year at Simcoe, Ontario, rendered necessary by the increasing demand for City Dairy products. The Drimilk Co., Ltd., of Courtland, Ontario, organized during the year, is filling an important place in the success of the operations of your company."

**Penmans, Ltd.**—Despite the substantial increase of \$960,332 in the total sales for the twelve months ended December 31 last, during which the business done amounted to \$9,499,180, net profits are shown in the statement at \$460,305, a decline of nearly \$1,000,000 from the level of 1919, when these reached the record total of \$1,437,291, which in turn, compared with \$1,358,331, in 1918. The net results of the year are the lowest reported by the enterprise since 1914, when the total fell off to \$386,873. Deductions and allowances in the statement under review were also on a much less generous scale than in recent years, no provision being made out of earnings for depreciation, while war taxation requirements took but \$45,000, against a provision in the 1919 exhibit of \$425,000, and \$355,169 in 1918. After the year's fixed charges and preferred dividend disbursements were deducted from profits, there remained a balance available for application to the common stock of the company amounting to \$250,805, representing earnings equivalent to approximately 11.7 per cent, on the junior securities outstanding. This compares with 37.4 per cent. in 1919, 33.4 per cent. in 1918, and 35.3 per cent. in 1917.

The president, Sir Charles Gordon, in his report to the shareholders, states that the less satisfactory results of the year's operations was the result of a heavy shrinkage which took place during the latter half of the year in the value of the company's raw and manufactured stocks. The trading profits of the period, he states, have been arrived at after writing down inventories to present market prices. Such inventories, however, are shown at a materially higher figure than that of the preceding statement, the 1920 statements showing the value of raw and manufactured stocks, at replacement cost, at \$3,158,232, compared with \$2,913,620.

The position as to working capital shown in the 1920 statement has undergone some impairment, but the company still is in comfortable circumstances in this respect, current assets exceeding current liabilities by \$3,385,363, against \$3,636,132 in the previous year, and \$3,154,235 in 1918. The increase in current liabilities, as shown above, is due almost entirely to the item of \$1,300,000, representing bank advances, shown in the balance-sheet section of the report. Cash on hand is shown at \$324,123, compared with \$104,621 in 1919, while the company's investments in war bonds was increased from \$65,125 at the end of 1919 to \$206,565 as at December 31 last.

**Dominion Cannery, Ltd.**—A sharp drop in profits is shown in the annual report which was presented at the annual meeting of shareholders in Hamilton last week. The following are the comparisons:—

	1920.	1919.
Profits, after tax provision, etc. ....	\$ 293,699	\$ 819,823
Bond interest .....	109,424	99,797
Preferred dividends .....	160,342	160,342
Surplus .....	\$ 23,933	\$ 559,684
Previous surplus .....	2,031,905	1,472,221
Total at profit and loss	2,055,838	2,031,905

The president, J. J. Nairn, commenting on the reduction of profits last year pointed out that the cost of production was even greater than in any year since the war, while selling prices as a whole were lower and there was a narrow

margin of profit between cost and selling prices. Orders booked were as large as those of 1919, but cancellations and protracted deliveries amounting to approximately \$2,000,000 alone prevented profits equal to those of past years, notwithstanding the narrow margin between cost and selling prices.

"The costs of labor, produce and all materials necessary for the manufacture of canned goods," he said, "are still 100 per cent. higher than before the war, and in addition this year the sum paid in exchange for those materials which had to be purchased in the United States amounted to \$200,000. We therefore do not see how prices of present stocks of canned goods can be reduced. Owing to British and foreign trade conditions and exchange rates, export business which had developed so favorably, declined to a small figure, but we confidently look forward to a return to better conditions this fall, and for the resumption of this business on a large scale. Since the first of the year liabilities to the bank have been reduced and there will be a further reduction when payments from customers to whom we have granted extension of time fall due."

The balance sheet shows a slightly less favorable position in working capital, as follows:—

	1920.	1919.
Current assets .....	\$4,864,622	\$3,186,441
Current liabilities .....	3,984,356	2,268,856

Net working capital ... \$ 880,266 \$ 917,285

Other changes are as follows:—

	1920.	1919.
Fixed assets .....	\$6,413,930	\$6,162,150
Investments .....	1,401,238	1,671,176
Accounts receivable .....	1,469,277	1,421,576
Goods made up .....	1,900,940	801,437
Raw materials .....	1,494,404	963,127
Bonded debt .....	1,339,800	1,455,987

**Nova Scotia Steel and Coal Co.**—While business handled by the company almost trebled in 1920, profits did not increase proportionately, due, of course, to the high operating costs. The volume of business done amounted to \$19,558,479, as compared with \$6,889,941 in 1919 and \$11,523,779 in 1918. Combined profits from operations and income from investments amounted to \$2,376,086, compared with \$2,193,304 in 1919. After deductions for interest, depreciation, government taxes, etc., net profits amounted to \$1,209,407, compared with \$1,029,876. Dividends on preferred and on the preference stock of Eastern Car Co., a subsidiary, amounted to \$170,000, which left \$1,039,407 available out of earnings for common dividend, or 6.9 per cent. on the \$15,000,000 outstanding, compared with 6.03 per cent. in the previous year. The surplus carried forward amounts to \$3,015,868, a goodly increase from \$2,726,461 in the previous year.

Reviewing the different departments of the company's business, the president, D. H. McDougall, states that the improved demand for coal which commenced in the autumn of 1919 continued during the greater part of 1920, but perceptible slackening was noticeable early in November, and since that time it has decreased rapidly. Attractive contracts secured early in the year were only partly carried out, when an embargo by the Dominion government on the export of coal resulted in their cancellation, and made it necessary to secure other employment for the steamers engaged for that business which entailed a serious loss to the company.

Increased inventories and an item of bank loans exceeding \$2,000,000, are the principal points in the balance sheet. Current assets are higher, but liabilities of the same category have also increased, reducing the amount of working capital by about \$1,200,000. Some of the principal comparisons are as follows:—

	1920.	1919.
Total current assets .....	\$10,913,218	\$ 9,063,081
Inventories .....	5,415,079	3,547,924
Total current liabilities .....	4,467,362	1,391,544
Bank loans .....	2,162,755	.....
Total assets .....	38,391,399	35,714,907

## RECENT FIRES

Alexandria, Ont., Suffered Loss of \$60,000—Hotel at Odessa, Sask., Destroyed, loss \$15,000—Mill at Upsalquitch, N.B., Suffered Loss of \$20,000

Alexandria, Ont.—March 3—Fire destroyed the hardware store of R. H. Coywane, and also the Postoffice and Customs building, and damaged an adjoining store owned by J. Boyle. The loss is estimated at \$60,000, partly covered by insurance.

Fort William, Ont.—March 3—One of the old landmarks of the Scott highway, known as the "Tin House," was destroyed by fire. It was occupied by Asselin Brothers, and the fire started from an overheated stove.

Kitchener, Ont.—March 9—Damage estimated at \$10,000 was caused by a fire which broke out in the Janzen Block. The cause of the fire is unknown.

Lindsay, Ont.—March 5—The house of W. Raymond, corner Water and Melbourne Sts., was destroyed by a fire which started from an overheated stove. The loss is at least \$1,500, partly covered by insurance. Harry Raymond, Mary St., has also lost his home and contents by a fire which originated from a spark from the chimney.

Medicine Hat, Alta.—March 2—A garage, two cars and a tractor, the property of the Canada Land and Irrigation Co., were destroyed by fire. Insurance of \$9,000 was carried.

Montreal, Que.—March 3—Six automobiles were destroyed by a fire which did considerable damage to the Bisanti and Distasio garage, 163 St. Dominique St.

Niagara Falls, Ont.—March 7—A fire broke out in the N.S. and T. station, doing considerable damage to railway tickets. The loss is estimated at \$1,000.

Odessa, Sask.—March 7—Fire thought to have been caused by someone throwing a lighted cigarette on a bed totally destroyed the Odessa Hotel. The loss is estimated at \$15,000.

Sydney, N.S.—March 2—The Palace theatre building was damaged by fire, with a loss of \$5,000. The loss is covered by insurance.

Toronto, Ont.—March 2—A fire broke out on the premises at 323, 325, and 325½ Yonge St. The first is occupied by the Imperial Trunk and Leather Co. The damage is estimated at \$3,000.

Upsalquitch, N.B.—February 27—The mill, owned and operated by Reid, Smith and Milton, was destroyed by fire. The loss is estimated at \$20,000, partly covered by insurance.

Windsor, Ont.—March 3—The home of Paul Fuse, 1408 Marentette Ave., was damaged by fire. The fire which was caused from spontaneous combustion, did \$1,500 damage.

## ADDITIONAL INFORMATION CONCERNING FIRES

Chatham, Ont.—A bonfire started the conflagration which recently destroyed the barns of Edward McKerral, up the River Harwich, in which the loss was \$20,000.

Danville, Que.—February 4—The residence of Chester Brock was damaged by fire. The loss on building was \$100, with insurance of \$1,800 in the Missisquoi and Rouville Insurance Companies.

Edmonton, Alta.—Fire losses in Edmonton for the past year show a decrease when compared with 1919, according to the annual report of Fire Chief Davies. The report shows that the total insurance carried or involved was \$3,213,879 last year, as compared with \$5,481,705 the year previous. The amount of the losses as adjusted last year was \$142,490, while in 1919 the total was \$165,527. Most of the blazes occurred in frame buildings, which accounted for 219 outbreaks. There were forty-nine calls for fires in brick buildings; in brick veneer buildings there were five fires. Outbreaks in automobiles, street cars, etc., amounted to 193.

Guelph, Ont.—February 17—The store situated at 156 Wyndham Street, and occupied by the Guelph Tire Sales and Vulcanizing Co., suffered a loss of \$6,000, with insurance of \$11,000. The cause of the fire is thought to be a light thrown down.

Levis, Que.—February 21—The car barns, shops and cars belonging to the Levis County Railway were destroyed by fire. The total loss on contents is \$230,000 and \$52,000 on buildings. The insurance is as follows:—

Buildings and equipment—Alliance Insurance, \$15,000; United States, \$15,000; National Benefit, \$10,000; Home Insurance Co., \$3,075; British and Canadian, \$20,650; Globe and Rutgers, \$21,825; Occidental Fire, \$10,000; Queensland Insurance, \$7,500; State of Pennsylvania, \$7,500; Phoenix Assurance, \$6,547; Royal Insurance Co., \$6,547; Eastern Underwriters, \$5,555.

Equipment—Globe Indemnity, \$6,200; British Underwriters, \$5,000; Fidelity-Phenix, \$10,000; Eastern Underwriters, \$15,000; Century Insurance, \$10,000; North British and Mercantile, \$13,100; Nationale Fire, \$17,500; British Empire, \$6,000; North America, \$6,000; Providence-Washington, \$4,000; Protector Underwriters, \$11,000; North America, \$8,000.

Manitoba.—The fire commissioner's statement for the year ended December 31, 1921, shows that during the year there were 1,739 fires, with an estimated loss of \$2,276,261. There were 24 fatalities during the year. The following is the class of structures destroyed: Dwellings 574, farm buildings 338, stores 105, automobiles 63; apartment buildings 35, outbuildings 36, stables 32, garages 35, warehouses 28, factories 20, hotels 18, schools 12, machine shops 11, restaurants 8, churches 5, theatres 3. The following is a list of the causes: Stoves and furnaces 212, matches 155, lightning 124, smoking 120, chimneys 114, electricity 103, ashes 78, sparks 51, explosions 43, spontaneous combustion 31, bush fires 27, hot grease 21, incendiarism 16.

Regina, Sask.—Fire Chief White's report for 1920 gives the following information: Total loss on buildings and goods, \$88,589; loss on goods, \$55,893; on buildings, \$32,695; on goods and buildings, not covered by insurance, \$41,660; on wooden buildings and contents, \$65,210; on brick buildings and contents, \$22,301.

Shawinigan Falls, Que.—February 8—Two residences, owned by Hormidas Bourassa, were destroyed by fire. The loss is \$42,000, with insurance of \$10,000 in the La Nationale of Paris and Norwich Union Fire Insurance Companies.

Smithfield, Ont.—January 30—The frame house on the farm of Fred McQuoid was damaged by fire to the extent of \$4,000. There was insurance of \$1,250 in the Perth Mutual Fire Insurance Co.

Toronto, Ont.—During the month of February there were 186 alarms, with an estimated loss of \$53,025. Stoves and furnaces were responsible for 19 fires, children and matches caused nine, and there was one incendiary fire.

Yarmouth, N.S.—January 26—A two-story frame house, barn and wood house belonging to C. N. Adams were damaged by a fire which was caused by a defective flue. The loss is \$400, with insurance of \$950 in the Home Underwriters Insurance Co.

## CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended March 4, 1921, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1920.
Mar. 4 . . . .	5	12	0	2	1	2	9	0	0	31	16
Feb. 25 . . . .	16	14	0	4	2	2	8	2	0	48	12
Feb. 18 . . . .	6	28	2	2	2	0	4	0	0	44	16

# Possibilities of Unemployment Insurance in Canada

Through Lack of Information Regarding Extent of Unemployment, Any Present Scheme  
Could not be on Sound Actuarial Basis—Might be Based on Assessments—Experience  
in Great Britain—Seasonal Occupations Make Unemployment Pronounced in Canada

By GILBERT E. JACKSON

Assistant Professor of Political Economy, University of Toronto.

THE Speech from the Throne, with which Parliament opened on February 14th contained a reference to insurance against unemployment, which has caused a good deal of discussion. The statement that "an investigation is being conducted by the Department of Labor into systems of Unemployment Insurance and Old Age Pensions," does not of course commit the present government on either question. But it reminds us that in other countries there are methods of assuring social welfare, not yet tried in Canada; and that public opinion in this country may some day call for their adoption here.

It is on the former of these two references, that discussion has centred in the last few weeks. If insurance is indeed the wisest provision against unemployment, we must admit that the workers of Canada need its benefits, even more than the British workers, to whom insurance has been applied successfully. For on Canada, trade depression bears with unusual severity.

More and more it is coming to be recognized that there is a periodic economic movement. Well known systems of business forecasting have been based on it. For something like a generation, years of business activity have succeeded one another at fairly regular intervals, and years of depression have been not less regular.

## Unemployment Pronounced in Canada

We are at the present moment in the trough of one of these world-wide depressions; and in spite of certain press despatches, there can be not doubt that the proportion of workers, who have been out of employment this winter, has been very much higher in Canada, than in the British Isles.

Thus, in December, 1920, British trade unions reported that 6.1 per cent. of their members were out of work. The reports of Canadian trade unions showed that of their members, 13.4 per cent. were unemployed. Reports from British employers showed a contraction in the number of workers on their payroll, between November 20th and December 18th of 2.7 per cent. Reports from Canadian employers, for the same period, showed a shrinkage in the volume of employment in this country, of 7.5 per cent. Of 11,900,000 British workers enrolled under the Unemployment Insurance Act of 1920, only 5.8 per cent were unemployed.

So direct a comparison between the two countries, in the period 1913-1914 is not possible. But the evidence collected by the Ontario Commission on Unemployment points to the conclusion that then also the burden of unemployment pressed with unusual severity on the Canadian worker.

The reasons for this difference between an old and a new country may be stated very shortly. Winter in almost every country produces a seasonal slackness in certain oc-

cupations. The harder climatic conditions of Canada thus make the problem of seasonal unemployment among us one of special urgency. But apart from this, a country like our own, with vast undeveloped resources, is always engaged, in times of activity, in constructive enterprises largely based on borrowed capital. Among the earliest symptoms of trade depression is a temporary halt on work of this kind. There is thus a connection between the normally rapid growth of Canada, and the very widespread unemployment which occurs in the lean years. Again, England trades with all the world, and manufactures goods for all its markets. Her trade is apt to fluctuate with the mean of the world's fluctuations. But our market is far more restricted. We depend very largely on the farming population to buy the product of our factories. The harvest of Canada may vary greatly from one season to the next; for every three bushels of wheat that we harvested in 1913, only two were harvested in 1914. Harvest failures in Canada react on industry very heavily; harvest failures in England have little influence on industrial conditions.

Under these circumstances it is not to be wondered that in times of depression there is a demand for insurance against unemployment. And it is only prudence on the part of government, to determine without delay whether such insurance is practically possible.

## The British Insurance Acts

Outside the British Isles, there is yet no system of unemployment insurance which is at the same time national in scope and old enough to have been tested fairly. It is therefore to the British Insurance Acts that enquirers naturally turn. The National Insurance Act of 1911 consisted of two distinct parts. Part I. applied the principle of insurance against sickness and invalidity to nearly 15,000,000 people, and had nothing to do with unemployment. Part II. was experimental, and provided unemployment insurance for about 2,500,000 workers. Successive amendments have extended its scope from time to time; and under the Act of 1920, as has been mentioned above nearly 12,000,000 workers are insured.

Four main principles in the British system deserve consideration, for without them it is doubtful if the scheme could have survived.

(1) The worker contributes, as well as his employer and the state, to the fund which insures him; only by insisting that the worker shall himself have paid a minimum number of weekly contributions, is it possible to eliminate "bad risks"—the work-shy and the unemployable.

(2) Claims to receive unemployment benefit are admitted, and unemployment benefit is paid, only to workers who are registered with an employment exchange, and so

long as it is unable to find employment for them at the current rate of wages.

(3) In any case, unemployment benefit is paid only for a limited period, after which the worker can again become eligible for benefit, only by remaining at work until he has qualified once more under section (1) above.

(4) Workers who are already insured against unemployment, e.g., in certain great trade unions, may contract out of the scheme, and their unions may be credited by the state with the sums due on account of all members insured by them; industries may also contract out of the scheme, and administer their own insurance.

These provisions are designed to safeguard the system and maintain its solvency, without interfering with workers or employers who may prefer to make their own arrangements. Contributions are fixed on a different basis for men and women, boys under eighteen and girls under eighteen. They are made in about the following proportions: three-eighths each from employer and workman, and two-eighths from the state. Benefits are paid at the rate of fifteen shillings weekly for men and twelve for women.\* Boys and girls under eighteen years of age draw half the full rate.

The worker whose claim to benefit has for any cause been disallowed has the right of appeal to a Court of Referees. Representation both of workman and employers is provided for in the Court, and government nominates an impartial chairman.

#### Possibilities in Canada

Can a system like this be developed in Canada? or (if we are to have unemployment insurance) must we find a different method of approach?

Six years ago such a system would have been quite out of the question; for it would have been impossible, in the absence of a network of employment exchanges, to make certain that the workman who was claiming unemployment benefit was really entitled to this benefit, because no work could be found for him. The development of a Dominion-wide Employment Service has provided us with the necessary machinery.

In the matter of information we are not so fortunate. One advantage at least was enjoyed by the pioneers of the British system, over all advocates of unemployment insurance elsewhere. Their scheme from the outset rested on a strong actuarial basis. Just as much as life insurance, it was founded on calculable risks. Data had been collected by the great trade unions, over a period of sixty years. Their records were at the disposal of the government. With these, the determination of rates of contribution and of benefit was possible; and it was reasonably certain from the beginning, that the system was sound financially.

In this country we have no such records. If organized labor in Canada had paid the same attention as organized labor in England to the problem of unemployment, it would be possible to calculate from trade union experience a scale of benefits and payments. But our trade unions have not as a rule provided unemployment benefit. Indeed their lack of initiative in this respect weakens considerably the claim of the spokesmen of labor, that government should adopt insurance against unemployment. Their position would be very much stronger, if the trade unionist had already been protected in this way, and if they were calling on government merely to develop a system, which labor itself had shown to be perfectly feasible.

#### Information is Lacking

Almost all of the material that can be turned to good account exists already in the files of the Department of Labor at Ottawa. But it is not extensive. For the last five years this department has collected from trade unions the

\*A bill now before the British House of Commons increases the benefit to 18 shillings for men and 15 shillings for women.

needed statistics of unemployment. For two years it has been gathering similar detailed statements from employers also. This information is published monthly by the Labor Gazette, and may some day prove invaluable for the calculation of risks of unemployment. To-day, however, we have not nearly sufficient for our purpose. We have not completely reviewed even a single trade cycle of boom and depression. A system of unemployment insurance organized on the same scale as in the British Isles would collect and disburse many millions of dollars in a year. If its financial arrangements were based on the very limited knowledge that we now possess, it would invite disaster.

It seems that there are two constructive possibilities to choose between. Either we must wait for several years, for the completion of our data or we must make plans on a non-actuarial basis. In other words, if we are to have "unemployment insurance" here and now, we must be prepared for something that, in the strict sense of the word, is not insurance at all. It might, nevertheless, be perfectly sound financially, and at the same time avoid much of the waste and expense involved in our present method of dealing with unemployment. In this case, as in that of the provincial Workmen's Compensation Act, a definite scale of payments might be contrived with a varying assessment; or conceivably, the state might make a fixed assessment both on workers and employers, paying into the funds as its own contribution a varying sum sufficient to meet current charges. The same result would be secured, whatever the method adopted, and few practical men would waste time in argument about a name.

It was perhaps with these considerations in mind that the Social Service Council of Canada considered the question of unemployment insurance in February. Its lengthy recommendation on the subject concludes as follows:—

"That the data for calculating actuarially the risks of unemployment in Canada are at present insufficient for the formation of a detailed plan of Unemployment Insurance on the British model.

"That in view of the importance and the difficulties of the subject, it would be advisable for the Dominion government to appoint forthwith a commission, to devise, if possible, a plan for establishing, as soon as industry requires, an Unemployment Insurance System; the commission to be appointed with sufficient scope and adequate funds, and to report within a limited time."

#### INSTITUTE OF MINING AND METALLURGY

The 1921 annual meeting of the Canadian Institute of Mining and Metallurgy was held in Montreal, March 2 to 4. O. E. S. Whiteside, the retiring president, referred to the status of the Institute as representing the whole mining industry, to co-operation with other organizations, and to the de-centralization of effort on the part of government departments. John McLeish, chief of the Division of Mineral Resources, Ottawa, gave some figures on production in 1920. C. V. Corless is president for the coming year.

#### FIRE AGENTS OF BRITISH COLUMBIA

The fire agents of British Columbia, some nine hundred strong, are represented for conference work by the following committee:—Geo. L. Schetky, H. B. Leuty, J. J. Banfield, C. H. Macaulay, and A. McC. Creery. The committee have many questions under consideration. Among them are: Legislation—the licensing of agents, etc.; commissions; uniform constitution and by-laws for all fire agents' associations throughout the province; the organization of associations in the different districts of the province. As soon as the province is organized sufficiently, another conference will be held. This second annual convention will probably be held in October, and at some point in the interior of the province.

# The Week in Parliament

Private Members' Resolutions Cause Much Discussion, but are Withdrawn—Voting of Supply Commenced on Tuesday—North American Trust Company Bill Favourably Reported

(Special to *The Monetary Times*.)

Ottawa, March 17, 1921.

Thursday, March 10

In the House of Commons:—(a) Special committee appointed to consider questions relating to pensions, insurance and re-establishment of returned soldiers; (b) Resolution of Mr. F. H. Keefer, member for Fort William, in favor of a Great Lakes-St. Lawrence River deep waterway, withdrawn after debate; (c) After debate on Smith motion asking maintenance of cattle embargo by Great Britain in interest of Canada, House of Commons adopted amendment by Michael Steele, protesting against implication of disease in Canadian cattle by said embargo.

Friday, March 11

In House of Commons:—(a) First readings of following bills, one forming Lake of the Woods Control Board, one respecting the Kettle Valley Railway Company, one respecting the Manitoba and North-Western Railway Co. of Canada, one respecting the Quebec Central Railway Company, and one to incorporate the Slave River Railway Co.; (b) Motion of Sir Sam Hughes asking for a return to the system of political patronage for appointments and promotions in the political service debated, and withdrawn.

Monday, March 14

In the House of Commons:—(a) First readings of following bills, one respecting the Essex Terminal Railway Co., and one respecting the Ottawa Northern and Western Railway Co.; (b) Second readings of following bills, one respecting the Kettle Valley Railway Co., one respecting the Manitoba and North-Western Railway Co. of Canada, one respecting the Quebec Central Railway Co., and one to incorporate the Slave River Railway Co.; (c) Resolution of Dr. R. J. Manion, member for Fort William, asking government to bring forward policy for development of the natural resources of Canada, debated and defeated; and (d) Resolution of H. A. Mackie, member for East Edmonton, condemning regulations governing oil and gas permits and leases debated, and withdrawn.

Tuesday, March 15

In the House of Commons:—(a) House went into Committee of Supply for first time, passing Agricultural Department estimates for salaries, contingencies and experimental farms, nearly \$1,900,000; (b) Second readings of following bills, one respecting the Essex Terminal Railways Co., and one respecting the Ottawa, Northern and Western Co.

Wednesday, March 16

In House of Commons:—(a) Debate on motion of J. A. Campbell, member for Nelson, asking for completion of Hudson Bay Railway project.

A Week of Debates

The last parliamentary week has been devoted mainly to debates on resolutions introduced by private members. The members have been given the opportunity to express themselves on such topics as the Great Lakes-St. Lawrence deep waterway project, the British cattle embargo, political patronage in the civil service, a policy for the development of Canadian natural resources, the resolutions governing oil and gas permits and leases, and the Hudson Bay Railway project. After discussions mainly intended for the edification of the members and the public, and the exerting of influence on the government, the resolutions were withdrawn, ac-

cepted or defeated. Tuesday of this week made a noteworthy departure in that the House began the voting of supply, agreeing to give a couple of million dollars to agriculture. It is expected that this session will show a departure from the custom of former sessions, in that important estimates will come before the House early in the session, as Premier Meighen will desire to get these and the budget debate well out of the way before he leaves to attend the Conference of Premiers in London next June.

Sir George Foster's statement that it was the intention of the government to appoint twenty-four thousand enumerators to take the census next June 1st is thought by many to presage a fall session and an election this year. Usually less than ten thousand enumerators are employed, and the Bureau of Statistics had intended to use eleven thousand enumerators. It looks as though the government intends to get the census figures with regard to population at as early a date as possible. On these it can base a redistribution bill, call a fall session, if necessary, and lay the ground for a general election shortly afterwards.

A number of minor changes are expected in the tariff. The budget address is not expected until May. No fundamental changes are expected. Aside from that the debate on the railway estimates is still expected to be the most important.

A bill to incorporate the North American Trust Co. was favorably reported by the Banking and Commerce Committee of the Commons on Wednesday. The company, which is being incorporated under the provisions of the Trust Companies Act, is to have a capital of \$1,000,000. The provisional directors are: George Herbert Wood and James Henry Gundy, financiers; Edward W. Wright, Edward G. McMillan and Geoffrey S. O'Brien, barristers, all of Toronto.

## WESTERN MUNICIPALITIES MAY HAVE UNION

A decision to form a council representative of the urban and rural municipal associations in the four western provinces, was reached at a conference of delegates from the various municipal organizations in Manitoba, Saskatchewan, Alberta and British Columbia in Regina on March 10. The intention is to form an organization for the west to take the place of the Union of Canadian Municipalities, so far as the west is concerned, it being generally felt that the Canadian organization has been of little value to the associations in western Canada in the past.

A provisional constitution was drafted, and this will be submitted to the executives of the several associations in the four provinces for approval, after which a general meeting will again be called as soon as convenient. Mr. Freeman, of Lethbridge, chairman of the Urban Union of Alberta, was appointed provisional chairman, and Mr. Jackman, secretary of the Rural Union in Alberta was appointed provisional secretary. They will send out the draft constitutions to the various executives, receive their replies and call the next meeting, when, in all probability, a permanent organization will be created.

The Montreal Stock Exchange announces that Arthur Bruneau, sole member of the brokerage firm of Bruneau and Dupuis, gives notice of the dissolving of the firm, and that he will now conduct business under the firm name and style of Bruneau and Cie., with offices at Montreal, Quebec and Sorel, of which firm he will be sole member.

## MANITOBA MAY TAX INCORPORATED COMPANIES

One Per Cent. on Gross Profits Suggested by Provincial Treasurer—Income Tax Might Then be Unnecessary

(Staff Correspondence.)

Winnipeg, March 16, 1921.

WINNIPEG and throughout Manitoba have experienced a cold spell for the last ten days. The weather, however, is seasonable and business is reported fairly good with collections improved. Money is somewhat easier and good investment opportunities are readily taken up.

The province of Manitoba faces a deficit of approximately \$500,000 on current expenditures for 1921. In this connection a tax of one per cent. of gross profits of all incorporated companies operating in Manitoba is the effect of a measure to be brought before the House this session by the provincial treasurer in the form of an amendment to the Corporation Taxation Act. This new form of taxation is expected to give the province a revenue of \$375,000.

#### Province Needs More Revenue

The first announcement of the new tax which is proposed by the government was made at a meeting of representative business men of Winnipeg in the office of the Canadian Manufacturers' Association this week. Hon. Edward Brown told the gathering that it was essential that the government have additional revenue for 1921. He pointed to the fact that an additional \$175,000 is required for mothers' allowance administration and other legislation which it is necessary to continue in operation. Increased school grants this year will amount to almost \$200,000.

The proposed tax on incorporated companies will not apply to land mortgage loan trust companies and banks, which already pay taxes under the Corporations Taxation Act. It is expected the tax which the government proposes will meet opposition from many companies. Those affected will be concerns which have not been taxed to any great extent in the past it was pointed out.

At the meeting held on March 15th, Mayor Edward Parnell demanded that the city receive a portion of the income tax levied in Manitoba. The city income tax now before the legislature will be opposed by the Canadian Manufacturers' Association it is stated. The association favors the provincial income tax if any is to be made effective. Whether or not the provincial government will push for an income tax is problematical. If the government is successful in having the tax on incorporated companies passed, it is not likely any strenuous effort will be put forth for the income tax bill, as there is considerable opposition to it among the members of the House.

The tenor of the meeting at the very outset was antagonistic to anything in the shape of increased taxation. The organizations represented included the Manitoba Employers' Association, retail Marchants' Association, Canadian Credit Men's Trust Association, Canadian Manufacturers' Association, the Building Owners' Association, the Real Estate Exchange, the Builders' Exchange, the Board of Trade, the Bankers' Association, the Lumbermen's Association and the Wholesalers' Association.

#### Life Insurance Men to Meet

An important institute of life insurance salesmen is to be held in Winnipeg from the fifth to seventh of April, this institute is being held under the auspices of the University of Manitoba. The attendance last year was 140 and already 250 are expected this year. One of the principal figures on the program this year will be Courtenay Barber, who is the general agent of the Equitable Life of New York, in Chicago. Another well known Chicago life insurance man who will take part will be Darby A. Day, the general agent in Chicago of the Mutual Life of New York. J. H. Castle-Graham, who is the general secretary of the Life Underwriters' Association for Canada, will come to Winnipeg for the event, and will take part in the discussions and deliver an address.

## DEFAULTING MUNICIPALITIES

Editor, *The Monetary Times.*

Sir,—Under the head of "The Crop of Municipal Defaults" in your issue of March 11, some statements are made which are not in accord with information in our hands.

As to Swift Current, you say: "The first concrete steps towards financial readjustment of the former are well under way, and within the past two weeks representatives of the bondholders, the banks and the city council have been frequently in conference." Representing several of the larger holders of Swift Current bonds, I am authorized to state that as yet they have not been informed, nor do they know of any conference which has taken place with regard to Swift Current affairs.

In the first line of the second paragraph you say: "Two other municipalities in Saskatchewan, although not defaulters, are striving hard to make both ends meet. These are Swift Current and Estevan." I am advised by bondholders of each of these municipalities that they are both in default.

In the last paragraph of the same article you state: "It has become apparent from these conditions that there are too many municipalities which desire to discount their future growth to relieve their present difficulties, just as a too liberal discounting of this future led them into their difficulties. The bondholders . . . have, however, united with the municipalities in a campaign to place the final responsibility upon the province, against which the latter have taken a commendably firm stand. A municipal debt must be met by the municipality or not at all." Recently I have been asked to represent groups of bondholders interested in particular municipalities in Saskatchewan, but so far I have not found that they are acting jointly with the municipalities in a campaign to place the responsibility finally upon the province. The bondholders, I may point out, have on various occasions represented to the government that it, in some cases, is responsible.

Your readers, particularly those who own western municipal bonds, will appreciate that their security is endangered when the legislature increases the borrowing powers of municipalities. They may have bought bonds, knowing that the town which issued them could not borrow beyond a certain limit. When, however, the legislature steps in and gives that municipality additional borrowing powers which lead to disaster, it is quite obvious that the original bondholders of the town, relying upon the original limit as to borrowing powers, are being dealt with inequitably. In such cases the government is certainly responsible. In bringing to the attention of the government such cases the bondholders have not united with the municipalities. On the contrary, authoritative bodies created by the government of Saskatchewan have shown a disposition to ally themselves with representatives of municipalities in bringing pressure upon the bondholders to make extraordinary concessions.

Your reference to Humboldt is a case in point. Quite recently the Local Government Board of Saskatchewan ordered the town to pay out of moneys levied, collected and held to redeem debenture coupons a sum to cover the cost of making repairs to a water and electric light system being operated at an annual loss of \$32,000 or thereabouts. That you regard the attitude of the Saskatchewan government in respect of such treatment to debenture holders as being "commendably firm" is not thinkable. The holders of debentures of Saskatchewan municipalities look to the government to assist in their protection, which rests largely upon the general credit of the province. As you state, foreclosure is impracticable. To what, then, can the debenture holder have recourse but to the good offices of the government in its capacity as guardian of its provincial as well as its municipal credit?

JOHN APPLETON,

*Secretary, Dominion Mortgage and Investments Association.*

Toronto, March 16, 1921.

## INSURANCE AGAINST UNEMPLOYMENT

THAT the Dominion government has seriously considered a system of unemployment insurance for Canada is shown by the reference to it in the Speech from the Throne, and by several "feelers" emanating from Ottawa through the press. The Department of Labor has been making an investigation of the subject, but no definite announcement has been made; in fact, the government's desire to avoid controversial measures and to hasten through its essential business may result in the entire matter being indefinitely postponed.

Unemployment is a contingency which cannot be definitely anticipated, but which occurs more or less regularly in every country. It is, therefore, an insurable contingency, the degree of actuarial soundness being dependent upon the thoroughness of the experience records. Such records are not accurate at present, as is shown in the article by Gilbert E. Jackson in this issue, and unemployment insurance on an actuarial basis is not immediately practicable. The article on unemployment in last week's issue of *The Monetary Times* pointed out the magnitude of the problem of unemployment in this country, and sooner or later the responsibility for failure to provide work must be assumed by the state. Apart from seasonal unemployment, which will always be considerable so long as outdoor occupations engage a large part of the population, Canada is in the fortunate position of having such resources and room for further growth, as makes it impossible for unemployment due to changing conditions to be indefinitely prolonged, as is the case in countries of more mature development.

With a view to the ultimate establishment of a system of unemployment insurance the subject should, in the meantime, be given careful consideration. Should it be optional or compulsory? Should it be administered by companies or by the state? are fundamental questions. The possibility of company administration seems to have received scant con-

sideration and in a country of some socialistic tendency like Canada, it would scarcely be feasible. A plan of limited or perhaps optional scope would undoubtedly be the safest as a beginning. The question of ways and means is another one of difficulty, for one in which the entire funds were raised by assessments on workers would not be popular, while to make employers bear the cost would still further widen the margin between the cost of materials and the price of products. The ultimate assumption of the entire cost by the government would be the soundest plan for Canada, but here again the difficulties of preventing the unemployment pay from too closely approximating the wages of actual work, and the raising of sufficient revenue to provide for claims and reserve, would require careful consideration.

## WHAT THE TRAFFIC WILL BEAR

SINCE the Canadian minister of railways "presented" Parliament with a \$50,000,000 deficit there has been a feeling of gloom in the ranks of the public ownership enthusiasts, while even the private ownership supporters, keeping in view the doubtful showing of the Canadian Pacific, are not disposed to urge the return of such a white elephant as the Canadian National to private hands. The fact is that only a drastic reduction in operating costs can rescue the Canadian roads from their difficulties. Several lines in the United States have already taken this step, and since the Canadian roads have followed those across the line closely as regards both rates and wages, similar action here can be delayed only with serious results.

On March 11 railroad heads in Chicago stated that all classes of employees would be affected by the readjustment. At the same time they admitted that excessive freight and passenger rates are a potential influence in holding back industry, and that rates cannot be lowered until wages are reduced and payrolls freed of the thousands of employees loaded upon them during the war. However, for the present there would be no reductions in the pay of skilled employees

—the operating forces—but they, too, in time, must meet the readjustment plan. It was pointed out that the roads would have to put their houses in order or go into bankruptcy. Freight was not moving, passenger business was slumping, and when the railroads suffered the entire country suffered.

Frank admission was made by executives that rates were too high to permit traffic. Merchants who have to pay the high rates simply pass the cost along to the ultimate consumer, and the ultimate consumer in recent months has shown a decided aversion to paying. He has quit buying, and thus stagnation has set in along the entire line.

From the labor side there was little comment upon the proposed action by the executives. B. M. Jewell, representing the unions, said the men had known for some time that the propositions were coming, but he would have to wait for more detailed statements before making formal announcement of the attitude of labor. Other labor officials questioned the right of the roads to confer with their employees by individual crafts. They held that the roads would have to hold one conference with representatives of all employees and could not deal individually with different unions.

The Chicago and Great Western Railway announced that conferences would be held this month on a proposed cut of 20 per cent. in salaries of all employees, from the president down. The Santa Fe is laying off large numbers of men to reduce its payrolls. The Alton, Burlington, Rock Island, Monon, Michigan Central and other lines have called conferences with their men on the proposition to cut wages from 8 to 20 per cent.

#### FINANCE AND CRIME

ANY kind of property is legitimate prey for the criminal. He has always been a person of discrimination, however, preferring goods of small bulk but large value, though of late years there has been a leaning towards the motor car, which not only assists in its own theft but also helps the thief to escape. Banks and financial institutions, dealing in money or negotiable securities have had a full share of the crime wave which is now passing over the continent.

Spurious bank bills have been appearing in Montreal during the past few weeks. Two of the banks lost heavily, and a Bank of Commerce note raised from five to twenty dollars was even foisted upon the city in payment of taxes. Raised notes have also been circulating to some extent in Winnipeg. But the banks have suffered not only from the crimes of outsiders, but also from those of their own employees. E. M. Brown, teller of the Bank of Montreal at Front and Yonge Streets, Toronto, has admitted the theft of \$21,710 from that institution, and the manager of the St. Maurice Caisse de l'Economie at Three Rivers, Que., has been charged with the theft of a large amount from that institution. In the brokerage field Gerald H. Bruce, formerly a partner in the firm of Oswald Bros., Montreal, is charged with falsification and theft involving a sum of \$300,000 and resulting in the assignment of the firm a few weeks ago. The Cahan case, in which C. H. Cahan, Jr., through Corporation Securities, Ltd., made use of a power of attorney to draw funds belonging to C. H. Cahan, Sr., and practically wiped out the estate of the latter, is also well known.

What is probably the most peculiar case of the kind in recent years, however, has just come to light in Winnipeg. Some small north Winnipeg bankers have been accused of failing to transmit to Europe moneys entrusted to them by foreigners. Seventy-five of the latter have organized to take action against the bankers, and a meeting was held in this connection on March 13. Although one of the bankers has made restitution in full, a few of the others are willing to return the money only at the prevailing rates of exchange, which are stated to be considerably lower than several years ago, when the money was handed to them. Thus one man

who deposited \$100 in 1918, equal at that time to 10,000 marks, is offered \$13 now in full payment. On the other hand, one of the bankers declared that he stands to lose something like 500,000 rubles, which at one time equalled \$250,000. Now, however, one dollar is the equivalent of 350 rubles. Not all of the persons who allege they were mistreated have joined the organization, and the 75 members entrusted a sum approximately \$25,000 to the bankers.

#### THE GRAY TERROR

THIS is not a moving picture, but the title of a very striking pamphlet just issued, by A. L. Dawe, secretary of the Canadian Pulp and Paper Association. "Just as if there wasn't plenty of paper in the world," the motto of wastefulness, and "It wouldn't worry me if all the paper in the world was destroyed," a remark of thoughtlessness, are taken as texts. The author shows in fiction form how business would come to a standstill if there were no paper.

Most of the wealth of a civilized country, at least the title to it, is now represented in paper form. Our currency is paper, and there would be no banking if notes, securities, ledgers and pass-books were destroyed. The conduct of ordinary business depends on paper records. Even our street cars would probably stop if there were no paper, which is used not only for fares and transfers, but also for insulation in the actual physical equipment. The commodities dealt in on our stock exchanges and other investment markets are paper commodities. The whole machinery of present-day commerce and finance depends in fact upon paper.

That Alberta has real mineral resources is shown by John A. Allan in an article in this issue. The Alberta mineral fields, however, are for development, not for the manufacture of mere paper securities.

\* \* \* \* \*

Parliament, the Board of Commerce, the Dominion and provincial governments and numerous cities in Canada failed to reduce the cost of living. There may, therefore, be reason in Toronto appointing its Medical Health Officer to do so.

\* \* \* \* \*

A substantial falling off of building permits issued in January is evidence that construction costs are far too high in relation to the value of property. This is a fact which experts who urge public housing schemes overlook entirely.

\* \* \* \* \*

Municipal accounting has been too often left to the ingenuity of an unskilled municipal treasurer. The standing of municipal credit would be enhanced by the application of skilled accountancy. Some suggestions made by R. J. R. Paterson before the last convention of the Union of Alberta Municipalities, and printed on pages 18 and 20 of this issue, are in point.

\* \* \* \* \*

The Dominion government's financial statement for February is exceptionally good, showing revenue of \$35,080,612, ordinary expenditure of \$19,788,255, capital expenditure of \$3,218,464, and a reduction of \$4,290,143 in the public debt. There is a surplus of \$85,000,000 for the first eleven months of the fiscal year. On the other hand, the falling off in customs and excise returns is a warning that revenues will come down in the process of deflation.

\* \* \* \* \*

**PERSONAL NOTES**

GEORGE R. GRIFFIN has been appointed general manager of the Mortgage, Discount and Finance, Limited, which has its offices in Toronto. Mr. Griffin has been a large operator in mortgages and real estate in Toronto for twenty years. Sir JOHN WILLISON is president of the company.

MERVYN SMITH has been appointed assistant secretary of the Ontario Equitable Life and Accident Insurance Company. Prior to joining the Ontario Equitable on December 1st, 1920, as chief clerk, Mr. Smith was for nine years connected with the actuarial department of the Mutual Life of Canada.

F. D. McCHARLES, formerly assistant actuary of the Great-West Life Assurance Company, has been appointed

actuary of the company. In this capacity he succeeds C. C. Ferguson, who was general manager and actuary, and whose entire time is now required for the direction of the affairs of the company outside of the actuarial department. Mr. McCharles graduated in 1909 from the Manitoba University with the degree of B.A. Immediately following he spent two years at Princeton University in post-graduate work in mathematics. Obtaining his M.A. degree he then joined the actuarial staff of the Great-West

Life in 1911, and later became a Fellow of the Actuarial Society of America. After nine years on the staff, he was appointed assistant actuary in January, 1920, and now becomes, on the unanimous vote of the directors, chief of the department which he has represented for such a long while.

J. FRASER MACDONALD, of Toronto, formerly connected with Sterling Trusts Corporation, has become associated with the Beemer and Clarkson, real estate, financial and insurance brokers. This firm is at present located in the Confederation Life Building, Toronto, but will shortly move to quarters in the Excelsior Life Building. Mr. Macdonald will direct his attention to the buying and selling of residences and residential land.

**OBITUARY**

CHARLES K. HAGEDORN, president of the Kitchener Suspenders and Button Company, died suddenly at his home in Kitchener, Ont., this week. He took a keen interest in municipal affairs, and was a member of the city council for some years and was the first chairman of the local light commission. He was president of the Board of Trade for two years, and an active member of the Kitchener and Waterloo Manufacturers' Association.

**BANK BRANCH NOTES**

The Royal Bank of Canada has opened a branch at Long Branch, Ont.

The Banque d'Hochelega's sub-agency at Daaquam, Que., has become a branch.

The Dominion Bank of Canada has purchased a business corner on Granville St., Vancouver, paying the L. R. Steel Co. \$205,000 for it.

G. D. Dallaire has been transferred from the Canadian Bank of Commerce in Montreal to the branch in Havana.

F. A. Stanley, formerly attached to the Windsor, N.S., branch of the Bank of Commerce, is now at the Edmonton branch.

The Bank of Montreal announces the following: T. Y. Love, manager at Raymond, appointed manager at High River, Alta.; H. C. Francis, manager at Medicine Hat, appointed manager at Lethbridge; J. S. Jones, manager at High River, appointed manager at Medicine Hat; C. P. Colville appointed manager at Prince Albert; M. E. Jensen appointed acting manager at Punnichy, Sask.; W. T. R. Henderson, appointed acting manager at Raymond, Alta.; F. Merrett appointed manager at Schreiber, Ont.; E. A. Moore, manager at Prince Albert, appointed manager at Thorold, Ont.

**DOMINION FIRE INSURANCE CO.**

Assets totalling \$961,062 are reported by the Dominion Fire Insurance Co. in its 1920 statement, shown in detail elsewhere in this issue. This is an increase of \$27,000 over 1919. The company's government bonds, however, have increased from \$603,266 to \$673,666, now constituting 70 per cent of the total assets. Holdings of municipals decreased from \$138,521 to \$133,932, and of stocks from \$50,245 to \$41,700. Cash decreased from \$27,968 to \$18,272, but on the other hand call loans of \$12,150 were paid off. The liabilities show some important changes as follows:—

	1919.	1920.
Net unadjusted losses .....	\$ 21,209	\$ 90,487
Reserve for accruing taxes ...	10,700	18,600
Current unpaid accounts .....	4,200	6,694
Deposit account reinsuring companies .....	95,259	198,595
Unearned premium reserve ...	295,509	333,759
Hail reserve .....	16,349	20,271
Payments due on war loan ....	175,000	.....
Surplus to policyholders .....	315,848	292,653
	\$934,076	\$961,062

**FAVOR TWENTY-PAY LIFE POLICY**

More than 150 delegates were present at the 41st biennial convention of the Grand Lodge of the Ancient Order of United Workmen, held on March 16 in Toronto. The report of the treasurer showed that the reserve fund at the close of 1920 amounted to \$1,504,827, an increase during the past two years of \$378,708. It was the unanimous decision of the convention to adopt the twenty-pay life certificate as soon as the Ontario government passed the necessary legislation, which it is expected to do this season.

The following officers were elected for the next two years:—P.G.M.G., E. F. Drake, Ottawa; Grand Master, R. F. Graham, Ottawa; Grand Foreman, F. P. Burton, Hamilton; Grand Overseer, J. W. Cook, London; Grand Recorder-Treasurer, F. G. Inwood, Toronto; Grand Solicitor, A. G. F. Lawrence, Toronto; Grand Guide, E. W. Kingsnorth, Toronto; Grand Inside Watchman, W. F. Fairbairn, Ottawa; Grand Outside Watchman, F. C. Paterson; Grand Medical Examiner, E. F. Bowie, M.D., Toronto; Executive Board—R. G. Graham, F. P. Burton, J. Lockie Wilson, E. F. Drake, C. E. Cameron.

### A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

### KNIGHTS OF COLUMBUS MAY WITHDRAW

The annual meeting of the Supreme Council of the Knights of Columbus was held in Ottawa, March 13, this being the first time it met in Canada. On March 14 the executive met G. D. Finlayson, superintendent of insurance for Canada, to discuss the new regulations for the control of fraternal societies operating in Canada, and also appeared before parliament to protest against the size of the deposits required under the new law.

### LIMITATION OF SHIP OWNERS' LIABILITY

The Imperial Shipping Committee, which was appointed in June of last year by the British government after consultation with the governments of Canada, Australia, New Zealand and South Africa, has submitted a report on the limitation of ship owners' liability under bills of lading. This report unanimously recommends uniform legislation throughout the empire on lines of existing acts, but based more precisely on the Canadian Water Carriage Goods Act, 1910, subject to provisions in regard to exceptional cases in which goods may be carried at owners' risk, precise definition of physical limits to shipowners' liability, and fixing of monetary limits of liability.

It is considered improbable that any legislation along the lines suggested in the report of the committee will be enacted by the government interested during the present year.

### MONTREAL LIFE UNDERWRITERS' ASSOCIATION

The February meeting of the Montreal Life Underwriters' Association was addressed by P. F. McCaffrey, local inspector of income taxation, who referred especially to the payment of commissions to a second party. He stated that the only deduction which would be recognized by the departments for commission paid by an agent to some other party would be payment of commissions to some other duly licensed agent.

The following were elected to the executive for 1921: Honorary president, T. P. Bourgeois, Metropolitan Life; president, J. D. Young, New York Life; vice-president Louis Bouvier, Great West Life; second vice-president, F. A. Buck, Metropolitan Life; secretary, E. Stuart Taylor, Sun Life; treasurer, W. C. Breedlove, Mutual Life. Board of management—L. Miller, Travellers' Life of Canada; D. T. Diplock, Sun Life; T. E. Bourke, North American Life; W. O. H. Percy, Canada Life; and James S. Johnson, Imperial Life.

### ALBERTA HAIL INSURANCE BOARD

The second annual report of the hail insurance board of Alberta, presented at the annual meeting of that organization in Calgary on March 16, shows that satisfactory progress was made last year. The total area insured within the hail insurance district was 2,049,004 acres. Outside the district 283,077 acres were insured, making a total of 2,332,081 acres on which insurance was carried at the beginning of the season. On account of dry, hot winds in a portion of the province during the latter part of June and early in July, the insurance on 40,669 acres was cancelled, leaving 2,291,412 acres on which the risk was carried throughout the season. Compared with 1919 these results show a decrease of 92 per cent. in the acreage of insurance cancelled, and an increase of 45 per cent. in the total acreage carried.

The percentage of loss in 1920 was about the same as in 1919, being very slightly more than 4 per cent. of the total insurance, and the total awards were \$881,280. The income amount shows a surplus on the year's operations of \$313,886, and the balance sheet shows a total surplus of assets over liabilities of \$508,986.

### 1920 LIFE INSURANCE LAWS

The 1920 volume of Life Insurance Laws, published by the Association of Life Insurance Presidents for its members, has now been distributed. The book contains 71 new statutes affecting life insurance companies in the United States and Canada. Of these statutes sixty were enacted in the United States and eleven in Canada. Their distribution among the states and provinces was as follows: New York, fifteen; Massachusetts, fourteen; Virginia, eight; Maryland, seven; Mississippi four; United States Congress, Louisiana, Manitoba, New Jersey, Ontario and Dominion Parliament, two each; British Columbia, Delaware, Georgia, Kansas, Kentucky, New Brunswick, North Carolina, Prince Edward Island, Quebec, Rhode Island and Saskatchewan, one each.

### REGINA FIRE UNDERWRITERS

A. J. Hosie, of Drope and Hosie, was elected president of the Regina committee of the Western Canada Fire Underwriters' Association on February 23. Mr. Hosie takes the place of Geo. Sneath, the retiring president. Other officers elected were: Vice-president, J. R. Peverett; and executive committee, H. Stevenson, J. McKenzie and F. Gray. The secretary-treasurer is C. S. Keating.

An announcement was made that the Western Canada Fire Underwriters' Association had decided to appoint two inspectors to look after the work in Saskatchewan in place of one, and the province for this purpose will be divided into a northern and southern division.

An address on general matters of interest to the association was given by A. W. Stead, of Winnipeg, secretary of the association, which was much appreciated.

### SECURITY LOAN AND SAVINGS COMPANY

Net earnings of the Security Loan and Savings Co., St. Catharines, Ont., were \$43,591 in 1920, as compared with \$47,357 in 1919, although there was an increase in the volume of business transacted. The usual dividends were paid and \$15,000 was transferred to reserve, leaving a balance of \$2,390 to be carried forward.

The balance sheet shows mortgage loans at \$1,006,221, as compared with \$979,406 in the previous year. The other assets are made up largely of office premises, \$21,100; and government and municipal bonds and cash, approximating \$200,000. Total assets are \$1,234,734, as compared with \$1,195,955 at the end of 1919. There is no other real estate on hand.

On the liabilities side, debentures outstanding have been reduced from \$101,264 to \$84,465, while deposits have increased to \$421,236 from \$345,714. The paid-up capital is stationary at \$532,300, with the reserve fund \$15,000 higher at \$175,000. Payments due on mortgages both for interest and principal were satisfactorily met during the year.

### TORONTO SAVINGS AND LOAN COMPANY

A profitable year was experienced by the Toronto Savings and Loan Company in 1920, when net earnings amounted to \$155,825, as compared with \$148,389 in 1919. In addition to the regular dividend of 10 per cent., a bonus of 2 per cent. was declared. The bonus paid in the previous year was 4 per cent.

The assets of the company are slightly lower at \$4,165,116, and are made up chiefly as follows: Mortgages, \$266,964; stocks owned, \$2,501,886; real estate owned, \$1,157,056. Cash on hand and in banks is \$157,726, as compared with \$127,432 in 1919.

The company's head office is at Peterborough, Ont. The capital of \$1,000,000 is fully subscribed and paid up, and there is a reserve fund of \$1,100,000.

COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt Station for the week ended March 11:—  
La Rose, 69,126 pounds. The total since January 1 is 1,634,926 pounds, or 817.46 tons.

AUTOMOBILE INSURANCE RATES RAISED

Further changes in rates, effective March 1, were put into effect by the Canadian Automobile Underwriters' Association. Collision rates were increased by percentages up to 40, varying according to districts and coverage. Theft rates were increased also, but there was no change in public liability, property damage, or fire rates.

TORONTO INSURANCE CONFERENCE

At the annual meeting of the Toronto Insurance Conference, an organization of brokers in that city, on March 3, the following officers were elected:—President, G. H. Muntz, of Muntz and Beatty; 1st vice-president, J. H. Ewart, of J. H. Ewart and Co.; 2nd vice-president, H. Begg, of Shaw and Begg. Joseph Murphy, of Murphy, Love, Bascom and Hamilton, was the retiring president.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended March 11, 1921, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Ala.	Sask.	B. C.	N. S.	N. B.	P. E. I.	Total.	1920.
Mar. 11	14	13	0	0	4	1	6	0	0	38	16
Mar. 4	5	12	0	2	1	2	9	0	0	31	16
Feb. 25	16	14	0	4	2	2	8	2	0	48	12
Feb. 18	6	28	2	2	0	4	0	0	0	44	16

GRADUAL IMPROVEMENT IN BUSINESS

City stores in the Toronto district report an improvement in business since March 1, according to Dun's *Bulletin* of March 12. Regarding the Montreal district, the following is said: "The protracted thaw has worked havoc with country roads, but favors the early opening of navigation, and the government ice-breakers are expected to start work next week on opening up the channel between Quebec and this city. General trade conditions are pretty much as last noted, with collections well maintained as a whole, and the volume of failures is below expectations. The iron market is dull, foundrymen being comparatively lightly employed for some time past, but quotations are fairly steady at \$41.80 for foundry iron, and furnace men claim present quotations do not much more than cover cost of production. In general hardware a fair turnover is reported, notwithstanding the hanging back of some buyers in the anticipation of lower prices. For paints, oils, etc., there is a gradual but steady growing demand. The distribution of general groceries is about normal, and variations in values are few. The refinery figure for standard granulated sugar remains at 10½ cents. Molasses values are unsettled, round lots of fancy Barbadoes being offered at 80 cents, about half the figure quoted last fall. Canned goods are moving freely and some authorities seem disposed to prophesy a shortage before new pack comes due."

SASKATCHEWAN FARMERS' MUTUAL FIRE

Another favorable year was experienced by the Saskatchewan Farmers' Mutual Fire Insurance Co. in 1920, new business written amounting to \$15,773,842, as compared with \$13,554,397 in 1919. Assessments and premiums totalled \$113,394, against \$104,414 previously, while loss claims were some \$4,000 lower at \$62,785.

Thirteen years in the field has enabled the company to build up one of the strongest and largest mutual fire businesses in the province of Saskatchewan. The insurance in force at the end of December 31, 1920, amounted to \$37,651,251, compared with \$31,357,755 at the end of the previous year. Total assets at \$505,449, as compared with \$390,523 in 1919, show a balance over liabilities of \$451,139. Further details of the company's operations last year will be found elsewhere in this issue.

EXCHANGE QUOTATIONS

Quotations of exchange on European countries and the United States as at March 17, 1921, with comparisons, are given below. The Canadian figures are supplied by the Imperial Bank of Canada, while New York quotations are given by the National City Co., Ltd., Toronto:—

	Can., Mar. 10.	Can., Mar. 17.	N.Y., Mar. 17.
London, cheque	442.50	447.00	390.00
France	8.08	8.00	6.94
Germany	1.78	1.84	1.59
Belgium	8.45	8.37	7.25
